Marking the observance of the twenty-third anniversary of the safety movement in the United States, the National Safety Council is holding its annual congress at Cleveland on October 1-5, 1934.

More than 390,000 persons in some 1,700 forest work camps in the United States were receiving employment on August 15 according to a recent announcement by the assistant director of Emergency Conservation Work.

1. In factories situated at Montreal and within a radius of ten miles around the Island of Montreal: 13 cents per hour.

2. In factories situated at Quebec, and within a radius of ten miles around the City of Quebec: 12½ cents per hour.

3. In factories situated in other municipalities having more than 3,000 persons, Montreal and Quebec excepted: 12½ cents per hour.

4. In factories situate in other municipalities of less than 3,000 persons, Montreal and Quebec excepted: 12½ cents per hour.

II.—In the case of piece workers, it shall be sufficient that at least 80 per cent of the employees in each class, viz.: A, B, C and D, hereinabove described, receive the minimum wage above set out.

III.—The territorial jurisdiction determined in the present agreement shall extend to all the Province of Quebec.

IV.—The present agreement shall be in force for a period of twelve months from the date of its approval by the Lieutenant-Governor in Council.

It shall continue in force after such period unless notice of discontinuance be given in writing by one or the other of the contracting parties or by both.

Such notice of discontinuance must be given on or before the first of May in any year and shall become effective the first of July following.

*Bricklayers, Masons and Plasterers, Three Rivers.*—The Quebec Official Gazette, August 18, contained notice of an application for the extension of an agreement between certain bricklaying, masonry and plastering contractors of Three Rivers and district and the National Catholic unions of bricklayers, masons and plasterers which agreement gives a wage rate of 70 cents per hour for journeymen in these three trades, with time and one half for overtime.

Announcement is made in the Alberta Gazette of August 15 of the appointment to the Provincial Cabinet of Hon. Mary Irene Parly as Minister without portfolio.

The report for the year 1933 of the administration of the Factory and Workshops Acts, under the Department of Industry and Commerce of the Irish Free State, indicated a total of 10,692 establishments registered under the legislation, an increase of 49. Accidents in these plants during 1933 totalled 875 as compared with 816 in 1932 and 738 in 1931. There were eight prosecutions for failure to comply with regulations.

Coal production in Canada amounted to 991,023 tons in July as compared with 675,264 tons a year ago. The July, 1929-1933 average output was 906,726 tons. Bituminous coal production in July, 1934, totalled 901,682 tons, sub-bituminous coal, 21,908 tons and lignite coal 67,433 tons.

## LABOUR AND INDUSTRY IN BRITISH COLUMBIA IN 1933

### Annual Report of the Provincial Department of Labour

A COMPREHENSIVE review of the industrial situation in British Columbia during the calendar year 1933 is presented in the annual report of the Department of Labour of that province. Established under the Department of Labour Act of 1917, the Department has authority to require trade unions, industrial societies and other organizations to supply information as to their rules and practices; to require employers to furnish reports as to their employees regarding hours of work, wages, etc., and to obtain from any available source information as to the cost of living, the relation of prices to labour, and industrial conditions in the province. Under Departmental administration are the employment offices and the Factories Act. In addition, the Deputy Minister of Labour is chairman of the recently appointed Board of Industrial Relations which now administers the Hours of Work Act, the Male Minimum Wage Act and the Female Minimum Wage Act (Labour Gazette, June 1934, page 510).

*Unemployment and Relief.*—A detailed report is presented of the activities of the Unemployment Relief Branch. Relief operations were dealt with under the heading of "Direct Relief" (municipal families, transient families, single homeless men, single homeless women); "Special Relief Commission," and "Works Projects". The number receiving relief at the close of the year (December 1933) totalled 109,543, of whom 22,006 were heads of families, 61,977 were dependents, and 25,560 were single individuals.

*Payrolls.*—The payroll of the 3,530 firms reporting amounted to \$68,028,424.61, a decrease of \$4,577,949.96 from 1932, or 6.3 per cent. However, it is pointed out, that this figure does not represent the total payroll. In addition there must be included: \$966,249 in returns received too late for classification; \$1,000,000 as an estimate for firms who failed to send in a return; \$10,031,979.67 in railway payrolls; \$5,000,000 for Dominion and provincial employees; \$2,500,000 for wholesale and retail firms; \$4,100,500.00 for miscellaneous including warehousing, coal yards and other transportation, etc., and \$7,500,000 for steamships and express services—making a total industrial payroll of \$99,126,653.28.

The class designated as wage earners received 74.30 per cent of the total payroll, the

percentage for the other two classes being: 13.62 received by clerks, stenographers and salesmen; and 12.08 by officers, superintendents and managers.

Six of the twenty-five industrial groups registered an increased payroll for 1933, headed by coast shipping with an increase of \$1,925,000; the lumber industry with \$1,118,000; metal-mining, \$885,000; cigar and tobacco manufacture, \$17,000; breweries, \$13,000; and oil-refining with \$10,000. The decreases varied from \$17,000 in jewellery-manufacturing to \$2,337,000 in the general contracting group, followed by the public utility group with a loss of \$1,100,000; printing and publishing, \$928,000; coal-mining, \$822,000; metal trades, \$562,000; food products, \$555,000; miscellaneous trades and industries, \$506,000 pulp and paper manufacture, \$287,000; explosives and chemicals, \$257,000; laundries, cleaning and dyeing, \$255,000; wood-manufacture (N.E.S.), \$230,000; builders' materials, \$221,000; garment-manufacture, \$211,000; ship-building, \$10,000; leather and fur goods, \$94,000; smelting, \$61,000; house-furnishing, \$33,000; and paint-manufacture, \$25,000.

Exclusive of public authorities and railways, employers in the province with a payroll of over \$100,000 numbered 98 as compared with 110 for 1932. The 98 firms are distributed industrially as follows: lumbering, 26; food products and metal mining, 10 each; coal mining and coast shipping, 7 each; public utilities and printing and publishing, 5 each; oil-refining and packing houses, 4 each; pulp and paper manufacture, 3; breweries, garages, general contracting, miscellaneous metal trades and industries, ship-building, and smelting, 2 each; explosives, laundries and paint manufacture, 1 each. Four of these firms had an annual payroll of over \$1,000,000, one of these exceeding \$3,000,000 and two in excess of \$2,000,000.

*Weekly Wage Rates.*—During 1933, the average industrial wage for a full week's work for the 61,891 adult males employed was \$22.30, a decrease of \$1.32 when compared with 1932, and a loss of \$9.21 when compared with the peak year of 1920. The statistics also indicate that in 1933, 22,972 adult male workers were in receipt of less than \$19 per week—an increase of 2.541 in this group as compared

with 1932. Information is printed in tabular form which shows the adult males employed and the percentage receiving less than \$19 per week in the various industrial groups. Of these, cigar and tobacco manufactures have 63 employees, or a percentage of 87.30 receiving less than \$19 per week; the lumber industry is next in the list with 16,727 employees, or a percentage of 64.14 in receipt of less than \$19 per week; followed by wood manufacture with 985 employees, or a percentage of 63.65.

As indicated in the accompanying table of twenty-five chief industrial groups, seven—jewellery manufacture, garment-making, coast shipping, smelting, cigar and tobacco manufacturing, metal mining and breweries—registered increases in the average weekly wage, these increases ranging from \$7.15 per week in the first named to 5 cents per week in the last. All the others showed decreases, that of \$5.56 per week in oil refining being the greatest.

50.00 and over...	656	.....	.....	.....	.....
Totals.....	61,891	2,612	7,903	567	621

*Apprenticeship.*—The apprentices reported numbered 621, a decrease of 101 from the 1932 total. During 1929 there were, 1,676 apprentices reported, the loss in the intervening years being 63 per cent.

Increases are noted in printing and publishing, 52; food products, 26; pulp and paper, 16; garment manufacture, 15; laundries, cleaning and dyeing, 6; wood manufacture, 6; coal-mining, 3; and in the manufacture of jewellery, 1.

Decreases in the number were led by contracting, 79; followed by public utilities, 40; smelting, 36; metal trades, 21; miscellaneous trades and industries, 13; ship-building, 12; leather and fur goods and explosives and chemicals, 6 each; house-furnishing and metal-mining, 2 each; and builders' materials, 1.

*Employment Service.*—The report of the provincial branch of the Employment Service revealed that with the exception of lumbering, "practically all branches of the basic industries were less active than during other years". Dealing with the volume of business transacted, as shown by tabular statistics, the report summarizes the situation as follows:

The number of placements was 41,318, all but three being within the province. Of the 41,318 placements, 18,927 were sent to "regular" positions, where the duration of employment ranged from one week to permanence. The balance, 22,391, were given "casual" work, where the duration was expected to be less than one week. Of the 4,841 women placed, the Vancouver office sent 3,706, the balance, 1,135, being the work of the Victoria office. The placements were about equally divided between "regular" and "casual" positions and the greater part being in the domestic service branch.

Reference is also made to the increasing difficulty of placing handicapped ex-service men in employment. It was emphasized that their war disabilities practically render them unemployable in an already over-burdened labour market. However, during the year 726 positions were found for handicapped men, all but 88 being for an expected duration of less than one week. There were also 196 jobs which went to industrial handicaps.

*Factory Inspection.*—The annual report of the Factory Inspection Branch details activities in connection with accident prevention, overtime permits, sanitation and lighting, and elevator operation and inspection. In spite of prolonged industrial inactivity it was found that safety measures were not curtailed. The apparent inconsistency of requests for overtime permits in a period of slack labour was explained as being the result of buyers withholding orders until the latest possible time and then specifying deliveries in a limited period, resulting in the manufacturer having to adjust conditions to meet the order in a hurry. However, every such case was investigated, and only 10 overtime permits were granted.

*Labour Disputes and Conciliation.*—A section of the department's report deals with labour disputes and conciliation. During the year there were fourteen disputes involving 2,397 employees and a time loss of 25,760 working days.

### British Columbia Male Minimum Wage Act

In a brief summary of the administration of the Male Minimum Wage Act, the report states that "owing to certain weaknesses in the legislation passed during the session of 1929 very little was accomplished under this particular Act, the only order promulgated covering stationary steam engineers." This order was repealed by the new Act of 1934. The new legislation was reviewed in the Labour

Gazette for June, 1934, page 511. This Act, together with two other 1934 enactments—the Hours of Work Act and the Female Minimum Wage Act—are now administered by a Board of Industrial Relations (LABOUR GAZETTE, June, 1934, pages 510-513).

Recent orders issued under the new Male Minimum Wage Act are given elsewhere in this issue and in the LABOUR GAZETTE for August, 1934, page 751 and in previous issues.

### British Columbia Hours of Work Act

Under a new administrative arrangement provided for during the last session of the British Columbia Legislature, the Board of Adjustment which administered the Hours of Work Act, 1923, was replaced by a Board of Industrial Relations which is now charged with the direction of the New Hours of Work Act, 1934 (LABOUR GAZETTE, June, 1934, page 510).

During 1933, the last year of the old Act, the average weekly hours worked by the 71,185 employees reported by the 3,530 firms who made returns in time to be classified was 47.35, a decrease of 0.34 compared with 1932: 77.95 per cent of all workers reported working forty-eight hours or less per week; 10.93 per cent between eight, but not more than nine,

hours per day; and 11.12 per cent were working in excess of nine hours per day, or fifty-four hours per week. In explanation of the fact that though the original legislation established an eight hour day this limit was exceeded in some cases, the report points out the Hours of Work Act, 1923, affected only certain industries and that these are all operating within the specified working period. Only those outside the scope of the legislation were working in excess of the limitations fixed by the enactment. It is further pointed out that under the Hours of Work Act, 1934, the Lieutenant Governor in Council may bring any industry, business, trade or occupation within the scope of the Statute by additions to the Schedule which is now part of the Act.

## Minimum Wages for Women in British Columbia in 1933

Included in the annual report of the Department of Labour is also the report of the Minimum Wage Board for the year 1933. The preface explains that while the report officially deals with the calendar year 1933, the material to be collected for statistical and other purposes cannot be assembled until the early part of the following year.

At the 1934 session of the Legislature the "Women's Minimum Wage Act" was repealed, and a new Statute, called the "Female Minimum Wage Act, 1934," received the assent of the Lieutenant-Governor on March 29 of that year. At the same time a new "Male Minimum Wage Act" became law, and the Board of Industrial Relations was established, under the latter Act, to administer several labour laws (LABOUR GAZETTE, June, 1934, pages 510-513). This new Board was entrusted with the work previously done by the Minimum Wage Board, which, since 1918 has carried out the provisions of the original "Minimum Wage Act" as they applied to women and girls of the province. This report, therefore, is the final record of the original Board and a forerunner of reports of the new Board of Industrial Relations.

One of the features of the Board's work in 1933 was the collection of moneys to which employees were entitled under the regulations, and which their employers had failed to pay. In this respect, the Board established a new record when it collected a total of \$6,835.81 in wage arrears, ranging in various amounts from less than a dollar to substantial sums. All classes of occupations under the Act were affected, and in many cases, which the report details, court action had to be taken to recover wage claims. Commenting on this phase of administration the report observes:

"The sum of \$6,835.81 tells a story of diligent activity on the part of the board and its officials, but also reveals that the stressful conditions, still prevailing, lead many employers to attempt to evade the law."

The report gives considerable space to the public hearings which were held as a result of requests from employers for reductions in wages prescribed by the Board's orders. After weighing all the evidence submitted, the Board decided that the conditions justified the amending of only one order. Consequently, an emergency order was issued authorizing a temporary reduction of 10 per cent for experienced workers in the fruit and vegetable industry (LABOUR GAZETTE, July, 1933, page 703).

A statistical summary of all occupations under Board orders indicated that payroll returns were received from 3,152 employers, whose staffs totalled 17,895 women and girl employees—a decrease of 32 in firms reporting and of 8 in the number of employees. This total of 17,895 employees does not represent all who were gainfully employed for the Act of 1923 exempted farm labourers, fruit pickers and domestic workers from its scope. These three classes, with bank and federal employees, are not included in the figures.

The average weekly payroll for experienced women and girls over 18 years amounted to \$244,596.50, and for the younger and less experienced class it was \$12,964, making a total of \$257,560.50.

The lowest legal wage for women over 18 years in the nine occupations is \$12.75 per week, the rate set for the mercantile classification. However, during the year the average wage for all women over 18 years was \$14.87 and for inexperienced younger girls it was \$8.93.

A study of the statistics shows that 4,185 or 23.38 per cent were listed as receiving the actual minimum wage set for experienced workers in the various groups. Commenting on this fact, the report states:

"It is encouraging to realize that 7,204, or over 40 per cent of all women and girls reported were paid more than the amount prescribed by the regulations. This is ample proof that the minimum has not become the maximum wage, neither has it become the standard."

By occupations, the telephone and telegraph group stands out with the greatest number receiving the higher salaries. Over 62 per cent employed in this line of work were drawing pay-cheques in advance of what the order requires. Office work was second on the list, showing employment of a nature that is well paid in comparison with the other lines of women's work. The figures reveal that the fruit and vegetable industry comes third, but it is pointed out that, while those engaged to look after perishable products and prepare them for market in jam-factories, canneries, and packing-houses may earn fairly high wages, their season is extremely short.

Referring to economic conditions as reflected in wages, the report continues:

"An analysis of returns received by the Board shows that employees are still experiencing wage decreases in one way or another, and staffs are still being reduced in numbers. From our forms it was learned that,

while one employer might put in a wage cut, another would place his staff on short time, and still another would dispense with the services of one or more employees. Some firms resorted to two of these methods to reduce overhead, and in quite a number of cases all three expedients were resorted to. But in comparing results with 1932 it is pleasing to note that there were about only half as many firms who laid off employees during 1933, and the total number of women and girls who were let out was 526, as against 1,478 the previous year.

"Wage cuts were reported by 305 employers, as against 541 in 1932, but to brighten the picture 11 cases were noted of firms showing either additions to their staffs or increases in wages paid to employees."

"As conditions improve, the Board hopes that employers will endeavour to provide full-time work for their staffs. Employees have appreciated being retained on the pay-rolls for intermittent work, but such employment can-

not ensure a living wage to these part-time workers. The inevitable result is that some one else has to supplement their earnings.

"The other side of the picture should not be overlooked. The wage-earners are the buyers, curtailed wages mean diminished purchasing-power, and sluggish trade is the natural consequence arising from depleted pay-envelopes. We would be pleased, therefore, to know that managers and other executives are turning their thoughts towards eliminating short-time employment wherever possible. We do not wish employers to feel that their efforts to retain as many on their pay-rolls as they can are not appreciated, for they are. Their co-operation in making the next step towards ultimate recovery of good times is not only urged, but the Board has faith that this can and will be done."

The table relating to marital status of employees showed that 19.72 per cent were married; 3.64 per cent were widowed; and 76.64 per cent were single.

## BRITISH COLUMBIA BOARD OF INDUSTRIAL RELATIONS

### Orders under Male Minimum Wage Act and Hours of Work Act

**T**HE Board of Industrial Relations, established under the provisions of the Male Minimum Wage Act, 1934, of British Columbia (LABOUR GAZETTE, June, 1934, page 510) has recently issued Order No. 11, establishing a minimum wage in the wood-workers industry. Other recent orders were given in the LABOUR GAZETTE for August, 1934, page 751 and previous issues. The following is the text of the new order:

**ORDER No. 11—Establishing a Minimum Wage in the Wood-working Industry.**—Pursuant to the provisions of the "Male Minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, the Board of Industrial Relations hereby orders:—

1. That where used in this Order the expression "wood-working industry" includes all establishments operated for the purpose of manufacturing sash and doors, cabinets, show-cases, office and store fixtures, wood furniture, and general mill-work products.

2. That, subject to the exemptions granted from time to time under section 6 of the said Act, the minimum wage for every employee in the wood-working industry (not included in any other Order of the Board) shall be the sum of thirty-five cents (35c) per hour.

3. That, subject to the exemptions granted from time to time under section 6 of the said Act, the minimum wage for every male person over the age of 18 and under the age of 21 years in the wood-working industry (not included in any other Order of the Board) shall be the sum of twenty-five cents (25c.) per hour.

Dated at Vancouver, B.C., this 1st day of August, 1934.

Board of Industrial Relations.

### Hours of Work Act, 1934

The Hours of Work Act, 1934, which also comes under the administration of the Board of Industrial Relations, was reviewed in the LABOUR GAZETTE for June, page 510, while its regulations as governing certain industries were given in the issue for July at pages 641-2. Additional regulations have recently been issued by the Board as follows:

**REGULATION No. 15—Mercantile Industry.**—The mercantile industry is hereby added to the Schedule of the said Act, the approval of the Lieutenant-Governor in Council to such addition to the said Schedule having been obtained by Order in Council dated the 7th day of August, 1934.

**REGULATION No. 15A—Mercantile Industry.**—Persons employed in the mercantile industry in the Province, with the exception of the City of Vancouver, the City of North Vancouver, Municipality of the District of West Vancouver, the Municipality of the District of Burnaby, the City of Victoria, the Municipality of the Township of Esquimalt, the Municipality of the District of Oak Bay, and the Municipality of the District of Saanich, may work two (2) hours per day in excess of the limit prescribed by section 3 of the said Act, on Saturday of each week and on the day preceding a statutory holiday, but the total hours worked in any one week shall not exceed forty-eight (48).

Made and given at Victoria, B.C., this 9th day of August, 1934.

## MINIMUM WAGES IN MANITOBA

### Order governing all Employees in Hotels, Restaurants, etc.

AS previously outlined in the LABOUR GAZETTE (June, 1934, page 519 and July, 1934, page 642) the Minimum Wage Act of Manitoba was revised at the recent session of the Legislature to include all male employees. When first enacted, the legislation only applied to women. Then, at the session of 1931, the Act was amended to cover boys under 18 years of age (LABOUR GAZETTE, May, 1931, page 503 and July, 1931, page 766). Subsequent to the Act being made applicable to boys, the following Regulations were re-issued: No. 4, governing beauty parlours and barber shops (LABOUR GAZETTE, July, 1931, page 770); No. 12, governing retail stores (LABOUR GAZETTE, December, 1931, page 1305); No. 16, governing manufacturing industries in Winnipeg and Brandon (LABOUR GAZETTE, May, 1932, page 540); No. 3, governing laundries, dyeing and cleaning establishments in Winnipeg and St. Boniface (LABOUR GAZETTE, December, 1932, page 1263).

When the Act was amended this year to include men, it was forthwith made applicable to all workers employed in mail order houses, offices, places of amusement, shops or factories (LABOUR GAZETTE, June, 1934, page 519). By the re-issuance of Regulation No. 5, it is now extended to cover all employees in hotels, restaurants, clubs and refreshment stands in the province. This regulation was first issued in 1926 (LABOUR GAZETTE, February, 1926, page 84) and at that time was applicable only to female employees.

The re-issued regulation prescribes the usual provisions with respect to general conditions of labour—cleanliness, toilet rooms, temperature and ventilation, health and injuries. It also provides for the keeping by the employers of an accurate time record (open to examination) and for the posting of the regulations. Provisions pertaining to hours and wages, etc., are as follows:

#### Hours

(1) *Hours of Labour*.—The hours of labour shall be not more than ten (10) in any day, nor more than forty-eight (48) in any week, with one full day off each week, or in lieu thereof, two half days off each week, consisting of not less than five consecutive hours each, of the regular working day. One half hour interval exclusive of regular working hours shall be allowed for each meal. The hours shall be arranged so that no work period for women shall end between 1 a.m. and 6 a.m.

(2) *Exception*.—The above clause shall not apply to cooks and male workers over the age of eighteen years employed in hotels. Time worked by these employees in excess of forty-

eight (48) hours shall be paid for at not less than the hourly rate specified. In no case shall the hours exceed 54 in any week.

#### Minors

No minor under sixteen years of age shall be employed.

#### Wages

(1) *Method of Payment*.—Wages shall be paid weekly in cash, and after each week's wages have been earned, they shall be paid within three (3) days.

(2) *Notice to be given*.—After four weeks' employment, three (3) days' notice shall be required on the part of the employer before dismissing an employee, and on the part of the employee before leaving employment, except in the case of flagrant insubordination on the part of the employee or flagrantly unjust treatment on the part of the employer.

(3) *The Minimum Wage*.—No employee shall be paid wages at a less rate than that set out as follows:

(a) If employed in any city, or in St. James, St. Vital, Fort Garry, Tuxedo, East Kildonan, West Kildonan, Old Kildonan, Brooklands, Transcona, or at a summer resort during June, July, August or September, in any portion of Manitoba, the following shall be the minimum rates:

I. Experienced Women—Not less than \$12.00 per week or 25 cents per hour.

II. Inexperienced Women—During the first three months of employment under this regulation, not less than \$9.60 per week or 20 cents per hour.

III. The number of inexperienced women in any establishment shall not exceed 25 per cent of the total experienced women.

IV. Men—(over 18 years of age)—Not less than \$12.00 per week or 25 cents per hour.

V. Boys—No boy under 18 years of age under this regulation shall be paid wages at a rate less than \$8.00 per week for the first six months of employment; or at a rate less than \$9.00 per week for the second six months of employment; or at a rate of less than \$10.00 per week after twelve months of employment. Bell boys, regardless of age, not less than \$8 per week.

(b) If employed in any other portion of the Province of Manitoba the following shall be the minimum rates:

Women—Not less than \$9.60 per week or 20 cents per hour.

Men (over 18 years of age)—Not less than \$10.00 per week or 21 cents per hour.

#### Board and Lodging

Where board and lodging is furnished by the employer, there may be deducted from the wage a sum which shall be not more than two dollars and fifty cents (\$2.50) per week for room, and not more than four dollars (\$4.00) per week for board, and for both lodging and board not more than six dollars and fifty cents (\$6.50) per week. Part board or lodging at the same rate.

If uniform is required, it shall be furnished and laundered by the employer without cost to the employee. Uniform means any special kind of dress, including cap, cuffs and aprons.

#### Permits of Exemption

The Board may issue a permit upon application therefor granting modification of, or ex-

emption from, these regulations. Such permits will be issued only in case of exceptional or emergent conditions arising.

#### Penalty

Any violation of these regulations is punishable by fine or imprisonment, or both.

### NEW PROGRAM OF RELIEF FOR ONTARIO

THE Ontario Unemployment Relief Department has recently issued a memorandum outlining the program to be followed in direct relief. According to the statement as issued by Mr. J. A. Ellis, secretary of the Unemployment Relief Department, the program is for the guidance of municipalities and sets forth the policy decided upon. The following is the text of the memorandum:—

"The municipalities are requested to have a complete new registration and investigation of all relief recipients: this to start immediately and to be completed by September 15 next in the Cities of Toronto, Hamilton, and Ottawa, and in all other municipalities by September 1 next. There is no doubt that there are some persons obtaining relief who ought not to get it.

"As soon as any municipality has completed its new registration and investigation and advised this Department of the number of families and individuals registered, an application may be made by the municipal council for payment of cash for food and shelter instead of the present voucher system.

"All unemployable persons in a municipality where cash relief is being paid shall be eligible for cash. This will include the sick, the maimed, the widow with children and all others who are unemployable. Unemployed men must work to receive their cash orders at the prevailing rates of wages for skilled and unskilled labour in the district. The municipality must use care in placing men on work for which they are adapted.

"The allowance for cash is confined strictly to food and shelter allowances and does not include milk, bread and clothing. Where payments are made in cash for food, other than milk and bread, and shelter, the amounts so paid should be included in the accounts rendered to the Department under the headings respectively of food and shelter.

"To illustrate, where a man's family is receiving a total relief allowance of \$40 a month

for food and shelter, if he is a labourer and the prevailing rate of pay for such work in the district is 50 cents an hour, he will be expected to work 80 hours in the month or thirteen and one-third six-hour days.

"In cases where the shelter allowance is being used in all or in part to pay taxes the municipality will make its own arrangements to deal with the matter.

"If a man by his own initiative earns a little extra money he is to be permitted to retain same up to an amount not exceeding one-third of his food allowance for himself and family for the current month. He must report such earnings to the relief office. If he earns more than one-third, deduction from his allowance will be made according to the usual practice.

"The municipality must arrange its own program of work, and if it fails to do so cash relief will not be given. The program of work must be submitted to and approved by the Department and will be subject to inspection by the Department Inspectors.

"If funds are not available to the municipality for important purchases of materials, the work will naturally be confined to municipal projects which call for a maximum of labour and a minimum of materials.

"Municipalities will not be permitted to replace regular employees with relief recipients under this plan.

"Individual recipients abusing the system will be dealt with harshly."

New registration forms have been distributed to the municipalities and it is understood that these require of applicants for relief, information pertaining to their "work record" for the previous thirty days; also if the applicant can do any other kind of work. In addition, the new forms require information as to whether the applicant, or any dependents, have liquor permits, motor car, or any other vehicle. Monthly incomes, expenses or other obligations are to be set forth in detail.

### Relief Administration in Saskatchewan

The abolition of the Saskatchewan Relief Commission and the taking over of its administrative duties jointly by the Department of Railways, Labour and Industries and the Department of Agriculture was announced recently by the Hon. J. G. Gardiner, provincial premier.

In a statement on the situation Premier Gardiner referred to the reduction of the Federal payments to the provinces. As applied to Saskatchewan, he estimated this at \$25,000 per month less than in 1933. In consequence he stated the first task was that of reducing administration costs to the minimum. Relief orders for August would be on the same basis as for July, but with the August issuance he called for a complete cut off on all relief previously handled by the Relief Commission until a new check up had been made on all recipients and their necessities. This part of

Premier Gardiner's statement is as follows:

"We are asking the municipalities to check the list in the light of the problem which now confronts both the province and the municipalities. The provincial government hopes that the result of this check up will indicate that the Federal Government have been correct in assuming that the relief problem for this year will be less costly than it was last year.

"We are hopeful that with greater responsibility thrown on the municipalities for decisions and the cutting out of the buffer in the form of a relief commission between the municipality and the government much of this delay will be removed. While it is our desire that every person who can get by without relief should do so, it is also our intention that where relief is absolutely essential, cases should be dealt with in such manner as to give assistance with the least possible delay."

## CONVENTIONS OF LABOUR BODIES

### Ontario Provincial Council of Carpenters

WITH a representative attendance of delegates, the twenty-third annual convention of the Ontario Provincial Council of Carpenters was held recently in the Labour Temple, St. Catharines. Also present were: Tom Moore, president of the Trades and Labour Congress of Canada; Arthur Martel, general executive board member of the International Brotherhood of Carpenters and Joiners, and J. Marsh, general representative of the international organization.

In the report of the executive board reference was made to the reported proposal of wage codes for wage earners and the delegates were advised that organized labour must be prepared to demand representation on every board if the government decides on a policy of fixing minimum wages. In touching on the question of unemployment insurance, the members were urged to press for the enactment by the federal government of this legislation. Referring to the federal building program, the executive suggested that as this work was being undertaken for the relief of unemployment, the Minister of Public Works be requested to insert in all contracts that the hours of labour should not be more than thirty per week.

President Tom Moore, of the Trades and Labour Congress of Canada, referring to the draft convention on unemployment insurance which had been almost unanimously approved by representatives of 48 different countries at

Geneva, suggested that each local union discuss it at their meetings.

Some of the delegates favoured a housing scheme, and after an explanation of the Winnipeg housing scheme it was suggested that efforts should be made to get provincial and municipal assistance for housing programs.

Among the resolutions adopted and the legislative action sought were: (1) urging the expedition of a building program throughout the province; (2) asking the Ontario Government to appoint a fair wage officer immediately; (3) amending the Workmen's Compensation Act so as to assure to the injured workman 66½ per cent of his wages until fit to resume work; (4) amending the Election Act to provide for better voting accommodation; (5) petitioning the Ontario Government to make it compulsory for municipalities receiving government financial aid, whether for "relief work" or "public works" to pay the fair wage rate pertaining to the various crafts employed; (6) calling for prompt information concerning firms who are not fair to members of the union; (7) urging the Provincial Government to continue the application of the Ontario Apprenticeship Act and to extend its operation as opportunity affords.

The election of officers resulted as follows: President, Robert Barnett, Ottawa; Vice Presidents, A. E. Edgington, Hamilton, Len Lear, Brantford, and Andy Cooper, Toronto; Secretary-Treasurer, T. Jackson, Toronto. Fred Wright, St. Catharines, was elected to represent the organization at the convention of the Trades and Labour Congress.

### Provincial Federation of Ontario Fire Fighters

At the fifteenth annual convention of the Provincial Federation of Ontario Fire Fighters, recently held at Hamilton, it was announced that every city in the province was now represented in the organization.

Featuring the convention were the addresses of Mr. J. E. Ritchie, fire prevention engineer of the Fire Marshal's office, who spoke on the subject of fire and explosion hazards in grain elevators and grain grinding mills; and Mr. E. P. Heaton, Ontario Fire Marshal, who declared that the fire losses in Ontario were \$4,000,000 less than in the preceding five years.

Among the resolutions adopted were: (1) Favouring the granting of the eight hour day to all permanent fire departments; (2) authorizing the taking of a referendum vote on the advisability of affiliation with the International Association of Fire Fighters; (3) recording opposition to any change in the administration of the Fire Marshal's Department; (4) seeking compulsory legislation to have a main shut-off valve for ammonia plants placed outside such buildings.

Chief officers elected were: President, H. Ray Hobbs, Oshawa, Ont.; Secretary-treasurer, D. Lamb, Toronto, Ont.

### International Association of Public Employment Services

The twenty-second convention of the International Association of Public Employment Services was held at the Chateau Frontenac in the city of Quebec on September 4, 5 and 6, under the presidency of Russel J. Eldridge, Director of the New Jersey State Employment Service. Addresses of welcome were delivered by the Honourable C. J. Arcand, Minister of Labour for the Province of Quebec, and Mr. Alfred Crowe, on behalf of the Quebec Division of the Employment Service of Canada. The program included the following subjects:—

Industrial and Commercial Job Survey, by H. N. Milburn, Jr., Manager, National Re-Employment Service, Baltimore, Md.

The Problem of the Stranded Workers, by W. A. Motley, Director, Pennsylvania State Employment Service, Harrisburg, Penn.

Report on Program for Developing Complete National Employment Service in the United States, by Walter Burr, Associate Director, United States Employment Service, Washington, D.C.

Training and Selection of Personnel in an Employment Office, by Oliver Short, Civil Service Commissioner, Maryland.

The Relation of the Church to the Employment Service, by Rev. Father G. Abel, Professor of English, Laval University, Quebec, Que.

Canada's Experience in Establishing and Operating Its Public Employment Service, by R. A. Rigg, Director, Employment Service of Canada, Ottawa, Ont.

The Quebec Women's Division of the Employment Service of Canada, by Mrs. G. Anderson, Asst. Superintendent, Employment Service of Canada, Montreal, Que.

Method of Affiliating the United States Employment Service with Municipal and Other Related Agencies, by Miss Mary LaDame, Associate Director, United States Employment Service, Washington, D.C.

Contribution made by the Employment Service of Canada in Connection with the Federal Unemployment Relief Plan, by H. C. Hudson and James Neish, General Superintendents of the Employment Service of Canada, respectively, for the Provinces of Ontario and Manitoba.

More than usual interest was attached to this Convention by virtue of the fact that the authorities in the United States are in the midst of an organizing effort to give effect to legislation passed at the last session of Congress which aims at the establishment in the United States of a National Co-ordinated Employment Service rather closely resembling the Employment Service of Canada.

Officers of the Association were all re-elected, namely,—President, Russel J. Eldridge, Newark, N.J.; First vice-president, A. W. Motley, Harrisburg, Penn.; Second vice-president, Gerard Tremblay, Deputy Minister, Provincial Department of Labour, Quebec, Que.; Third vice-president, Clare L. Lewis, New York City, N.Y.; Secretary-treasurer, B. C. Seiple, Cleveland, Ohio.

The following were elected to complete, along with the above named officers, the Executive Committee: M. J. McCartin, Boston, Mass.; R. A. Rigg, Ottawa, Ont.; Mrs. M. L. West, Richmond, Va.; M. Carpenter, Indianapolis, Ind.; Miss M. LaDame, Washington, D.C.; M. G. Murray, Minneapolis, Minn.; J. Neish, Winnipeg, Man.

## WORKMEN'S COMPENSATION IN SOUTH AFRICA

### New Law for Compulsory Insurance

A New Workmen's Compensation Act adopted by the Parliament of South Africa during its recent session makes it compulsory for all employers to insure their workmen against accident and death and provides penalties for failure to do so.

The Act covers all workmen employed under a contract of employment, whether their remuneration is calculated by time or by work done, including persons who convey for gain any persons or goods by vehicle, vessel or aircraft, the use of which they have obtained from the owner under any contract other than purchase or hire purchase agreement unless their remuneration is fixed solely by a share in the earnings. Persons in naval or military service under the Crown or the Government of the Union, persons whose remuneration exceeds £600 per annum, casual workers, and outworkers are excluded, as are also persons who contract or subcontract for the carrying out of the work and themselves employ other persons, independent of the employer, to perform such work. The Act does not apply to domestic service, except in connection with a licensed hotel or boarding house, nor to agriculture except in employment connected with an engine or machine worked by mechanical power.

Within three months after the commencement of the Act every employer other than the Government must obtain from a society or a company licensed under the Act a policy of insurance covering his liability to all his workmen and must maintain such policy in force. The Minister may except any employer or group of employers if satisfied that a fund has been established, provision made for maintaining it and security deposited with the Treasury to cover all payments. Provision is made to enable employers to form mutual insurance associations should they so desire.

Where the accident is attributable to the serious and wilful misconduct of the workman, compensation is not recoverable unless serious disablement or death results and the workman leaves dependants. Accidents are not compensable if caused by the workman's drunkenness or a diseased condition known to the workman but not to his employer. A magistrate may, however, award such compensation as he deems equitable if he considers the accident to have materially increased the disablement or accelerated the death. An accident resulting in serious disablement or death is to be deemed to arise

out of and in the course of the employment even if the workman was acting in contravention of a law applicable to his work or of instructions issued by his employer, provided such act was done by the workman in connection with his employer's trade or business. An accident occurring while a workman, with the consent of his employer, is engaged in first aid or rescue work or in any training or competition connected therewith is deemed to arise out of and in the course of employment.

Notice of an accident must be given as soon as possible and claim for compensation, except in extraordinary cases, must be made within six months of the accident or of death as the case may be. An employer may require the injured workman to be examined by a medical practitioner named by the employer. The workman and employer may make a written agreement as to the compensation to be paid which agreement may, on application to a magistrate by either party, be made an order under the Act, provided it is first referred to the Commissioner for his report. A person who through age or infirmity is especially liable to meet with an accident may agree to be paid not less than one-half of the compensation stipulated by the Act.

Provision is made for the appointment of a Commissioner to investigate claims referred to him and assist in the settlement of disputes; to examine settlements transmitted to him by an insurer and if not satisfied therewith to bring the claim before a magistrate; to hear complaints from workmen or employers relating to the Act; to administer compensation money awarded to a workman; to give effect to or devise schemes for the prevention of industrial accidents and to make an annual report on the operation of the Act. Questions in dispute may be determined by a magistrate.

Provision is made for the revision of compensation and the control of payments. Compensation may not be assigned or attached nor be subject to administration of estates or estate duty law. It takes priority over all debts other than mortgages, etc., and the costs and fees incurred under the laws governing insolvency and winding-up of companies.

An employer is forbidden to make any deduction from the earnings of his workmen to meet the cost of insurance or to receive contributions for medical aid. It is also illegal for an employer to make a contract with an

intending workman whereby the latter relinquishes any right to compensation.

Where a contract is made for the execution of work any workman engaged is deemed to be in the employ of the principal until the contractor has secured a policy of insurance. In the case of agricultural work, however, where the contractor uses a machine, he alone is liable for compensation. Where a claim is made against a principal he may give notice thereof to the contractor who is then entitled to intervene, in which case any order for compensation is to be made against the principal and contractor jointly. Where the accident happens in circumstances which create a legal liability against some person other than the employer, the workman may take proceedings both against that person and against any person liable for compensation.

Compensation for temporary total disability is a periodical payment at the rate of 60 per cent. of the monthly earnings of the workman up to £20 of such earnings, together with 35 per cent. of monthly earnings in excess of £20 and up to £33-6s-8d. This may be increased to an amount not exceeding the rate of the workman's earnings or £6-10s. a month, whichever is less. Payments are made for a period not exceeding six months, which may be extended to one year if the disability continues. After that time payments at the rate of 50 per cent of earnings up to £20 together with 25 per cent of earnings over £20 and up to £33-6s-8d. are allowed for a further six months.

Compensation for permanent partial disability is a lump sum varying with the degree

of disability. Where disability amounts to 100 per cent. the benefit is a monthly pension equal to one-half the monthly earnings of the workman up to £20 together with one-quarter of such earnings in excess of £20 and up to £33-6s-8d.

In case of death, the benefit payable to a widow, is an amount not exceeding two years earnings of the workman or £500, whichever is less. Where a widow and one or more children survive, an amount not exceeding 18 months' earnings is paid or the sum of £375 whichever is less, together with a pension in respect of the children, the whole not exceeding £500 or two years earnings whichever is less. A pension is payable for a child up to the age of 16 years or until death or marriage under that age. Where the monthly pension to a workman does not exceed £3 it may be commuted for a lump sum.

An employer must maintain a first aid service and provide means of conveyance to a hospital and in addition to payment of compensation must also defray for a period not exceeding one year, the reasonable expenses of medical treatment up to £100.

Compensation is payable for scheduled industrial diseases unless the workman at the time of entering employment falsely represented that he was not suffering from the disease. Compensation is not payable in respect of causation or aggravation of an industrial disease due to employment outside the Union, unless the workman was sent to such work by his employers.

Provision is made for compensation to natives at a lower rate.

### Employment of Women and Children in Italy

Italian legislation governing the employment of women and children was consolidated and amended by an Act of April 26, 1934, which will come into effect at a date to be announced later. The Act regulates employment in a large number of occupations including commercial establishments. The former law dealt only with industry. However, the new Act does not apply to agricultural and maritime workers, domestic servants, home workers or government and other public employees.

The minimum age for the employment of children is fixed at 14 years instead of 12 as formerly, but the Minister of Corporation may authorize the employment, in certain specified occupations, of children not less than 12 years of age who have passed a certain grade in school work. The occupation must not en-

danger the health or morals of the children who must be physically fit to perform it.

Boys under 15 and girls under 21 years of age will not be admitted to employment without a medical certificate. Such persons are also forbidden to work in certain occupations which are classed as dangerous or unhealthful.

The Act fixes an eight hour day, exclusive of a one hour rest period, but allows overtime up to two hours a day for children under 15 years of age and three hours for girls over that age. Except in bakeries, night work between 10 p.m. and 5 a.m. is prohibited for boys under 18 years of age and for women. Exemptions may be granted, however, to boys between 16 and 18 years of age employed in continuous processes in certain specified industries.

## INTERSTATE COMPACT FOR UNIFORM MINIMUM WAGES

### Conferences of Seven States Result in Agreement upon Legislation

**F**OLLOWING a recent conference at Concord, N.H., delegates from seven North-eastern States—Maine, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, and Pennsylvania—signed the first interstate compact for establishing uniform standards for conditions of employment, particularly in regard to a uniform minimum wage for women and minors.

As detailed in the United States Department of Labor Monthly Review for July, the first step in establishing a common standard for labour legislation was a conference of State Governors called at Albany, N.Y., in January, 1931. At this conference the States represented were: Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, and Ohio. It was agreed that there should be a comparative study of labour laws and that a meeting of the representatives of the labour departments in the east-central section of the United States should be called to consider the possibility of formulating a uniform basis of labour legislation.

Further progress resulted at a second meeting in June, 1931, at Harrisburg, Pa., at which recommendations were made for greater uniformity of legislation respecting workmen's compensation, public and private employment agencies, women and minors, industrial health, and statistics. Again in January, 1933, at a similar conference in Boston, the same recommendations were urged with greater emphasis.

Following the Boston conference, the Legislature of Massachusetts adopted a resolution authorizing the appointment of a commission on inter-state compacts affecting labour and industries. Contacts were made with other States which participated in, and definitely formulated plans for, united action, resulting, as already stated, in the ratification of a compact for establishing certain uniform labour standards. The compact, although signed by the representatives of the seven participating States, must be submitted to their respective Legislatures for final sanction, and receive the assent of Congress.

*Policy and Intent.*—In a statement of policy and intent, the compact declares that: "enforcement among the industrial States of the Union of reasonably uniform standards for labour in industry, determined in accordance with the general welfare, would not only benefit labour but would be of real advantage to employers, removing the pressure toward

low wages, long hours of work, exploitation of minors and women, and similar action commonly admitted to be injurious to all concerned."

It points out that the "advantages of such uniform standards have already been indicated by the operation of the National Industrial Recovery Act and the codes of fair competition adopted thereunder."

It further considered that "the establishment of reasonably uniform standards in States concerned with the same general fields of industry and competitors in the same markets will afford the advantages of stability in labour legislation to all concerned, with disadvantage to none."

Provision was made for the compact being given "full force and effect" in the States which ratify it. It was also provided that nothing in the compact "shall be construed as abrogating, repealing, modifying or interfering with the operation of laws already in effect in any State party hereto which establish standards equivalent to or above those herein specified, nor to prevent or discourage the enactment of additional laws establishing similar or higher standards; nor shall anything herein contained repeal or affect any laws concerning conditions of employment that are not in conflict therewith or that deal with subjects not included herein."

*Administrative Machinery.*—The machinery for the administration of the compact consists of an inter-state commission and also a commission in each State which is a party to the compact. Each State provides for its own unpaid commission, representing industry, labour and the public with a chairman appointed by the Governor. The chairman of each State commission is the representative of his State on the interstate commission to which the President of the United States is requested to appoint a representative of the Federal Government. The expense of the interstate commission is shared by all the States ratifying the compact. Each State commission and the interstate commission must make an annual report and provision is also made for an exchange of such reports.

Each ratifying State is charged with the enactment of suitable legislation to establish and maintain the minimum standards agreed upon. If any part of the compact or its application should be held to be contrary to the Constitution of any ratifying State or of

the United States, "all other separable parts of the said compact" and their application "shall continue to be in full force and effect."

Any State may at any time become a party to the compact by ratification. But each State which is in the compact cannot secede until it has reported the reasons for its withdrawal to the interstate commission, which shall within six months investigate and submit its recommendations. Then if the State still wishes to withdraw it shall defer such action for a period of two years from the date of the interstate commission findings.

Other details of the functioning of the compact are covered in the following sections:—

"Should any question arise on the part of one or more of the States ratifying this compact, concerning a matter involved in said compact or in any State law adopted in pursuance thereof, then such question shall be brought before the said interstate commission for consideration. Said interstate commission shall make any necessary investigations, shall publish its findings and any recommendations and shall furnish copies of such findings and recommendations to the State commissions in each State party to this compact.

"If any ratifying State should desire a modification of any provision or provisions of this compact, or a revision of the entire compact, or if for any reason it should become desirable to extend the scope of said compact, the aforesaid interstate commission shall, upon the application of one or more of the ratifying States, and after 30 days' notice to the governors and State commissions of the other States, proceed to consider such application and the reasons advanced for the proposed modification or revision and shall make such recommendations to the ratifying States concerning the same as may seem fitting and proper. Whenever said modification, revision or extension is ratified in the manner prescribed for the ratification of this original compact and the Congress of the United States has consented thereto, then such modification, revision or extension shall be in full force and effect in the States ratifying the same."

*Minimum Wage Legislation.*—The first piece of labour legislation to be drafted in accordance with the compact provisions of general uniformity was that of minimum wages for women. The sections relating thereto are as follows:—

Section 1. No employer shall pay a woman, or a minor under 21 years of age, an unfair or oppressive wage.

Section 2. The State agency administering the minimum wage law enacted in conformity with this compact shall have authority to investigate the wages of women and minors; to appoint wage boards, upon which employers, employees and the public shall have equal representation, for the purpose of recommending minimum fair wages rates for women and minors; and, after a public hearing, to enter directory orders based on the determinations of the wage boards, together which such administrative rulings as are appropriate to make the determinations effective; and may have further authority, without the agency of a wage board, to enter such

orders in the case of occupations with less than a specified number of employees.

Section 3. The State administrative agency and wage boards appointed by such agency shall have authority to administer oaths and to require by subpoena the attendance and testimony of witnesses and the production of records relative to the wages of women and minors.

Section 4. The State administrative agency shall have further authority to inspect to determine compliance with its orders; to publish the names of employers violating a directory order; and, after a directory order has been in effect for a specified period, to make such order mandatory after a public hearing thereon. Such mandatory order shall carry a penalty of fine, imprisonment, or both. Said agency shall have authority to reconvene wage boards or to form new wage boards for the purpose of modifying wage orders. It shall have authority at any time on its own motion to modify administrative regulations, after a public hearing thereon.

Section 5. The State administrative agency shall have authority to issue special licences to employees who, by reason of physical or mental condition are incapable of earning the minimum fair wage rate established for the occupation in which they are employed. Said agency shall have authority to take assignment of wage claims at the request of women or minor employees paid less than the minimum wage to which they are entitled under a mandatory order, and to bring legal action necessary to collect such claims. Such employees shall be authorized, under the statute, to recover by civil action the full amount to which they are entitled under a mandatory fair wage order.

Section 6. Employers subject to the minimum wage law enacted in conformity herewith shall be required to keep specified records including the names, addresses, occupations, hours and wages of the women and minors in their employ; to permit the inspection and transcript of such records by the State administrative agency and its authorized representatives; and upon request, to furnish said agency with a sworn statement of the same. Employers shall further be required to post and maintain the notices regarding wage orders issued by the State administrative agency.

Section 7. Each minimum wage law so enacted shall contain provisions for appeal to the courts on questions of law by persons aggrieved by the decisions of said agency. Said law shall also contain a provision to the effect that in no case shall wage orders or decrees entered under a previously existing law be nullified until the provisions of the law enacted in conformity herewith have become operative and until new wage orders covering the same occupations have been entered and made effective.

Section 8. Each minimum wage law enacted in conformity herewith shall contain a saving clause to the effect that if any provisions of such law or its application be held invalid, the remainder of the law and its application elsewhere shall not be affected thereby.

Section 9. Mandatory fair-wage legislation now in effect in any of the signatory States, and such legislation in course of passage in any of such States as is in conformity with the provisions of this compact, is hereby declared to meet the minimum standards required by this compact.

Section 10. This compact as applied to minimum wage shall, when ratified by two or more States, be in full force and effect in the States so ratifying the same."

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Standard Code of Industrial Hygiene

THE International Labour Office in its series of Studies and Reports has recently drafted and published a pamphlet entitled "A Standard Code of Industrial Hygiene". It is explained that this program of surveys into industrial conditions is in accordance with the policy (entrusted to the International Labour Office under Part XIII of the Treaty of Versailles) of protecting the workers' health and recommending suitable measures in that direction.

Hitherto the Office has been engaged on studies of specific problems such as the regulation of the use of white lead and industrial anthrax. Now it has decided to also "consider the lot of those millions of workers employed in factories and workshops, who, without incurring specific risks, are nevertheless exposed to all the dangers to health involved in unhygienic conditions of work." It has engaged in this particular study not only in the interests of the health of the workers, but "with a view to the improvement of production and the furtherance of social progress."

Pointing out that several countries\* have taken steps to modernize their industrial hygiene regulations, the Office considers that fact a justification of its own effort to present a standard code. It further claims that "there is ample evidence that it was right in committing itself to such a course." Without losing sight of numerous climatic, political and economic differences between countries, it has sought to outline "those principles on which any system of general regulation of industrial hygiene should be based".

The object, it is stated, has not been to produce a document which might serve as a basis for international Conventions or recommendations, nor a standard system of regulations which the Office might submit to the States Members of the International Labour Organization in the hope that it might be adopted in its entirety. "The purpose of the Office has rather been to focus opinion on rules which, in each State, might inspire either new measures or the amendment of existing provisions, and also serve as a guide for those concerned with the health of the workers."

#### PREMISES ABOVE GROUND

The Code, as drafted by the Office for working premises at and above ground level, is set forth in part as follows:

\* Recently the American Standard Association drafted under the auspices of the United States Public Health Service a health code for industrial establishments.

**Notification.**—In industrial and commercial establishments, all workrooms in which workers are engaged irrespective of their number should be made the subject of a notification. The notification should contain a description of the work engaged in, and whenever the type of work carried out changes a new notification should be required.

**Responsibility.**—Employers or their representatives should be responsible for health conditions in working premises.

**Posting of Notices.**—A notice should be posted in all working premises indicating the duties of employers and workers.

**Height.**—In new constructions, in which workers are more or less permanently employed, the height of the workrooms should be at least 3 metres (9 ft. 10 in.) Exceptions to this rule should not be admitted except on grounds of technical necessity.

**Cubic Space.**—The cubic space of workrooms should be such as to afford without deduction for benches, machines, furniture and material, at least 10 cubic metres per worker.

**Area.**—The area of working places should be such that any worker employed therein has sufficient space to move about freely.

**Roofing.**—Roofing on working premises should be constructed so as to afford effective protection for the workers against heat or the inclemency of the weather.

**Walls and Ceilings.**—Walls and ceilings in workrooms should have a surface which can be whitewashed or painted. Walls should be proof against dampness, whether it originates in the ground, in weather conditions or in the presence of contiguous reservoirs.

**Flooring.**—Flooring or paving in covered-in working premises should be solid, watertight, even and not slippery. The material of which it is made should be easily cleansed. In workrooms in which the processes carried on involve wet flooring, it should, in the absence of other protection for the worker, be such as to protect the workers' feet against damp and loss of heat.

**Apertures, Windows, Doors.**—In new constructions glass partitions, windows and other external openings intended for the admission of light should be of such dimensions that their area amounts to at least one-sixth of the floor of the workroom. In calculating this area, openings of sheds, roof lanterns, etc., but not glass panes or partitions in inside doors, should be taken into account.

Windows and other sources of admission of light should be so placed as to afford the most uniform distribution possible of daylight in all parts of the workroom. They should be easily cleaned. Some of them should be made to open readily.

Measures should be taken to prevent direct radiation of sun on to the workers, or overheating of the workrooms, and to prevent work being carried on in direct draughts.

Where windows are the only means of natural lighting the space between these and the ground should not exceed 1 metre (3 ft. 3 in.). They should be so placed as to allow daylight to fall on the opposite wall of the workroom.

Doors should be well fitting and should open outwards.

**Cleanliness and Maintenance.**—Walls and ceilings should always be maintained in a proper state of repair and of cleanliness. The workroom should be cleaned as often as required by the nature of the work carried on, and cleaning should preferably be done during intervals between work and in manner calculated to prevent the raising of dust. Special precautions should be taken wherever, for technical reasons, cleaning must inevitably be done during working hours.

**Residues, Waste Water.**—Residual matter, residues and sweepings and in general waste material capable of harmful effects should be removed daily from the workroom. Measures should be taken to ensure effective removal of waste water. This should be done in such a manner as to obviate production of effluvia. Consequently, sewers should be provided with hydraulic syphons or other effective devices constantly maintained in good working order and repair.

**Ventilation.**—Workrooms should be thoroughly ventilated at least once daily outside working hours.

**Lighting.**—It is advisable that all workrooms should receive adequate natural daylight. At the level of the working place the amount of light should suffice for the accomplishment of the work without injury to the workers' sight. Windows and roof lighting and also transparent parts of artificial light sources should be kept sufficiently clean in order that they may normally fulfil their function.

Artificial light sources should not cause overheating or vitiation of the atmosphere; heat liberated by these should not be permitted to constitute a source of discomfort for the workers. In all circumstances these light sources should afford lighting of practically constant intensity. Measures should be taken to prevent glare and the production of troublesome shadows.

**Temperature.**—A temperature suitable to the work engaged in should be maintained in the workrooms. In summer, workrooms should be protected as far as possible against an excessive rise in temperature. During the cold season workrooms should be heated and a minimum temperature maintained. A thermometer in good working order and readily accessible should be fixed at the level of the workers' heads in the part of the workroom furthest removed from the heating.

The workers should be protected against excessive radiation from heating apparatus. Heating apparatus should be so constructed as to prevent contamination of the air in the workrooms.

**Drinking Water.**—Good drinking water, or in default of this wholesome beverages, should be provided for the workers. Distribution should be affected under conditions conforming to hygienic principles. Water supply intended for drinking should be legibly marked "Drinking water."

**Cleanliness.**—Adequate cloakroom and sanitary installations should be provided and maintained in a good state of repair, enabling the workers:

(a) to keep their clothing, taken off during working hours under satisfactory conditions as regards safety (theft) and health;

(b) to wash their faces and hands.

**Seats.**—Seats should be provided for all workers obliged to work in a standing position, in order that they may profit by any opportunities for rest which may occur during the course of their work.

The specifications also called for adequate lavatory facilities.

#### BELOW GROUND LEVEL

For workrooms situated below ground level, the Code provides as follows:

Where the competent authority deems it necessary to permit work being carried on in semi-underground premises all the foregoing provisions relative to notification, responsibility, posting of notices and work applicable to workrooms situated at or above ground level should likewise apply to workrooms the flooring of which is below the level of the outside ground.

The walls and flooring, after being thoroughly dried, should be covered with a damp-resisting material.

In addition to the foregoing provisions, underground work should be subjected to special restrictions laid down by the competent authority.

The Code stipulates that in as far as practicable the preceding provisions relating to flooring, artificial light, drinking water, cleanliness, etc., should apply to work under shelters.

#### UNHEALTHY OR OFFENSIVE TRADES

The Code specifies in detail the special provisions which should govern working conditions in unhealthy or offensive trades. In this respect it deals with such conditions as dampness, steam, vapour, humidification, glowing furnaces, drying rooms, noise, vibration, poisons, etc.

**Fumes and Gases.**—Under this heading the Code stipulates:

Escape of irritant toxic or asphyxiating smoke, fumes or gas in workrooms or adjoining premises should be prohibited. Production and diffusion of smoke, fumes and gas of this nature should be prohibited as far as possible and their removal should be ensured by exhaust ventilation installed as near as possible to the point of production. Such smoke, fumes and gas should be rendered harmless prior to being passed into the outside air.

In workrooms in which, in spite of all precautions taken, asphyxiating toxic or irritant fumes and gas may escape, the air renewal should be such that the workers' health does not suffer.

No worker should be allowed to enter without protective apparatus places likely to contain toxic asphyxiating, or inflammable fumes or gas, until it has been ascertained that there is no risk.

During work in closed apparatus and enclosed or partially enclosed spaces, where there is reason to apprehend the presence of dangerous gas or fumes or an irrespirable atmosphere, approved masks or oxygen breathing apparatus should be provided and worn by the workers. Safety belts with ropes attached should also be provided and used, and wherever possible at least one person should supervise from the outside the worker or workers exposed to danger.

**Dust.**—Escape of dust in workrooms or adjacent premises should be avoided. During manipulation of dust-producing material, or manual or mechanical work causing dust liable to injure the health, requisite measures should be taken to prevent dispersion of such dust in the air of the workrooms.

Mechanical processes accompanied by liberation of dust should as far as possible be carried on in closed apparatus, provided with exhaust devices.

In default of such methods, localised exhaust hoods should be provided to capture the dust as close to its point of origin as possible. Dust collected should be rendered inoffensive or destroyed.

In dusty trades, cloakrooms, washing accommodation, and eventually douche-baths, separate from the workrooms, should be provided for the workers. Conditions in regard thereto should be laid down by the competent authority.

### United States Joins International Labour Organization

On August 20, 1934, the representative of the United States Government at Geneva, Mr. Prentiss B. Gilbert, handed to Mr. E. J. Phelan, Acting Director of the International Labour Office, in the absence of the Director, the official acceptance by the United States of the invitation extended by the International Labour Conference at its recent Session to become a Member of the International Labour Organization.

The acceptance of the United States was conveyed by the following letter addressed to

Mr. Harold Butler, Director of the International Labour Office:

SIR,—In your letter to me of 22 June, 1934, you advised that the International Labour Conference had unanimously adopted a resolution inviting the Government of the United States of America to accept membership in the International Labour Organization and there was transmitted with your letter a copy of the resolution, which in extending the invitation states "that such acceptance involves only those rights and obligations provided for in the Constitution of the Organization and shall not involve any obligations under the Covenant of the League of Nations."

I am now writing to say that, exercising the authority conferred on him by a joint resolution of the Congress of the United States approved 19 June 1934, the President of the United States accepts the invitation heretofore indicated, such acceptance to be effected on 20 August 1934, and, of course, subject to understandings expressed in the Conference resolution, and has directed me to inform you accordingly.

Yours respectfully,

(Signed) PRENTISS GILBERT.

The invitation to which this letter is a reply was adopted unanimously by the International Labour Conference on 22 June 1934, and was referred to in the July issue of the **LABOUR GAZETTE**.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF AUGUST, 1934

### Reports of the Superintendents of the Employment Service

**T**HE employment situation at the end of August was reported by superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces were busy harvesting their crops and some had started fall ploughing. Grain was light, but root crops were average and several small shipments of early apples had been made to European markets. Both inshore and offshore fishing was reported as fair, with prices considerably above those of a year ago. Logging was quiet, although pulpwood cutting continued in some districts, but without the fire hazard which had been prevalent recently. Salt mines in the New Glasgow area were finding a ready market for their entire production, and coal mines in that district operated from three to five days per week, while those in Cape Breton and vicinity worked from five and a quarter to six days per week. Manufacturers of food-

stuffs, wood products and oil companies reported business as good, but foundries and nail factories experienced some slackness, however for the most part, the steel industry was fairly well employed. Considerable repair work continued in building construction, with a number of skilled and unskilled workers employed. Development of the Hydro extension lines through the Miramichi Valley was advancing rapidly, and highway work was also being carried on. Transportation was heavy, both by rail and water and longshoremen were busy. There was no change in the Women's Domestic Section where the usual placements of household workers were made.

Farming showed little change in the Province of Quebec, likewise mining, but improvement was noted in logging. In Hull, nearly all factories were in operation, but in Montreal, only tobacco and cigars were active, all

other industries being quiet. Clothing establishments were busy during the first half of August, but the latter part of the month were affected by a strike. Conditions in Sherbrooke and Three Rivers were satisfactory, but in Quebec City some slackness prevailed. Building construction decreased somewhat during the month, and although orders for carpenters, painters and so forth were fewer, a large number of building labourers was placed. Montreal was also employing a number of workers on sewer construction, and at Rouyn and Three Rivers highway construction afforded employment. The situation at Quebec and Sherbrooke was quiet. Transportation, except at Quebec City, showed little activity and trade little change. Numerous good orders were received in the Women's Section for cooks and assistants and placements of household workers were quite satisfactory.

The harvesting of grain was well underway throughout Ontario, resulting in a fair demand for farm workers. A number of men and women were also employed in gathering fruit. Requests for bushmen in the Port Arthur area were considerably ahead of last year for the same period, chiefly owing to the early start made in pulpwood cutting, but in other sections logging had not yet started. Mining remained very active at Timmins, Fort William and in the Long Lac area, but quieter at Sudbury. Improvement already noted continued in manufacturing, many additional workers being taken on at the fruit and vegetable canneries, although they were not yet operating at full capacity. Textile factories, breweries, planing mills and many iron and steel plants were busy, while other establishments were somewhat slack, following a few months of exceptionally good business. Building construction showed little change. This industry, though far from the level of former years, had been showing increased activity during the past months, much of which was due to repair and alteration work, although several large contracts were also in progress which afforded employment to a number of workers. Highway work, as well as various other construction projects, continued as relief measures, and a number of extra gangs were employed in railway maintenance. Freight transportation, by rail and water, was fair and trade showed little change. There was a steady flow of domestic orders for women workers, but fewer for hotel and institutional employees due to the close of

the holiday season. This resulted in a decided scarcity of experienced help, especially cooks-general.

The demand for farm help in the Prairie Provinces was less than usual, weather conditions considerably retarding operations. It was reported in Manitoba that wheat was turning out better to the acre than was anticipated, but coarse grains were poor and elsewhere the yield was somewhat below the estimate. A few orders were received for bushmen which were easily filled. Mining was starting to pick up a little, but not much change was looked for until colder weather set in. Manufacturing was quiet. Building construction was light, with practically no work available in this line except that of a casual nature. Highway construction and relief camps continued. Nearly all railway employees in the vicinity of Lethbridge were working full time. Some improvement was noted in requests for city household workers in the Women's Departments, but a decrease in orders for help in farm homes, as well as for hotel and institutional workers. The call for harvest cooks this season was about the smallest on record, due to the fact that harvesting crews were much smaller in number.

Orders for farm help in British Columbia remained fairly steady, with sufficient applicants to meet all demands. While logging camps were in operation, there was no demand for additional men, and it was expected that some would be closed soon owing to fire hazard. Sawmills were still busy with export lumber, there being little, if any, improvement in the domestic market. No call existed for extra mine labour. Fruit crops, which were good, were being harvested, and canneries and packing houses had big staffs employed, but other lines of industry were slack. Building construction was quiet. Relief camps continued, but there was a marked reduction in the number of men seeking relief registration, which was undoubtedly due to a large number of men going East for the harvest and other seasonal work. Waterfront workers were busy at New Westminster and Prince Rupert, but slack at Victoria, owing to the closing for a short time of one of the large shipping mills. Trade was quiet. An increase in orders for domestic work was recorded, as families returned to the city from summer resorts, and as a result, a shortage of experienced household help existed.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN JULY, 1934

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on August 1 was 8,769, the employees on their payrolls numbering 931,429 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for July was 1,701 having an aggregate membership of 156,357 persons, 18 per cent of whom

were without employment on August 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 61 cities throughout Canada, showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the Beginning of August, 1934, as reported by Employers

Employment at the beginning of August showed a moderate contraction, according to statements tabulated by the Dominion Bureau of Statistics from 8,769 firms, whose payrolls aggregated 931,429 persons, as compared with 941,941 on July 1. This decrease of 10,512 workers is the second interruption in the series of advances characterising the industrial situation since the beginning of 1934, the first reduction having been indicated on April, 1, when it was of a seasonal nature. The level of employment continues considerably higher than at the opening of the year and also than in any month of either 1933 or 1932; the index, at 99.9 on August 1, was 12.8 per cent above that of 88.6 indicated on January 1, and showed substantial improvement in comparison with the August 1, 1933 and 1932 index numbers of 87.1 and 86.3, respectively. The experience of the last thirteen years indicates that employment usually, though not invariably, advances at the beginning of August, there being on the average a fractional increase in the index.

As already stated, the employment index, calculated on the 1926 average as 100, stood at 99.9 at the beginning of August, 1934; compared with 101.0 in the preceding month, while on August 1 in the thirteen preceding years, the index was as follows: 1933, 87.1; 1932, 86.3; 1931, 105.2; 1930, 118.8; 1929, 127.8; 1928, 119.3; 1927, 110.5; 1926, 105.5; 1925, 97.5; 1924, 95.8; 1923, 101.4; 1922, 94.2 and 1921, 90.0.

The decline at the beginning of August occurred largely in the highway construction group, from which 16,090 men were released by the co-operating employers. In addition, retail trade, logging and some branches of factory employment, (notably in textile and iron and steel plants), were seasonally slack. On the other hand, manufacturing as a whole, mining, communications, transportation, building and railway construction and services also reported heightened activity. Employment in all these industries, except communications, was in greater volume than at the beginning of August of last year. A more detailed analysis by industries is given in succeeding pages.

### Employment by Economic Areas

Activity increased in the Maritime Provinces, Quebec and British Columbia, but there were reductions in personnel in Ontario and the Prairie Provinces. Employment in all five economic areas was in greater volume than at the same date of last year or of 1932.

*Maritime Provinces.*—Statements were tabulated from 622 firms in the Maritime Provinces employing 71,597 persons, compared with 70,959 in the preceding month. This advance, which continued the upward movement that with only one exception has been in evidence throughout the year, brought the index to 101.3, or over eight points higher than on August 1, 1933, when more pronounced improvement had occurred. Highway, railway and building construction, coal-mining and

services reported heightened activity at the beginning of August, 1934; within the manufacturing group, iron and steel and electric current plants showed increases, but fish-preserving, textile and pulp and paper factories were slacker, the losses in fish canneries being mainly seasonal in character. Logging was also seasonally quiet.

*Quebec.*—Continued improvement was shown in Quebec, according to returns from 2,095 employers with 259,109 workers, as against 257,072 on July 1. The level of employment was considerably higher than on August 1, 1933, when a larger advance had been made;

reduction occurred in the highway construction group, but manufacturing as a whole, logging and retail trade also released help. Within the manufacturing division, iron and steel, textile, lumber, chemical, non-ferrous metal and pulp and paper mills were slacker, while leather, food, tobacco, and beverage and clay, glass and stone factories reported improvement. Mining, transportation, building and railway construction, wholesale trade and services also showed heightened activity. Employment on August 1, 1933, had increased over the preceding month, but was then in decidedly smaller volume, the index at 86.6,

#### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

the index at the latest date, standing at 94.9, was over ten points higher than in the same month of last summer. Manufacturing, logging, building and railway construction and hotels and restaurants reported increased employment on the date under review, while activity in transportation, highway construction and trade declined; within the manufacturing division, there were large gains in leather, musical instrument, vegetable food, pulp and paper and electric current plants, while lumber and textile factories were slacker.

*Ontario.*—Employment in this province showed a decline, the 3,855 firms co-operating on August 1 having 402,921 employees, or 14,553 fewer than at July 1. Most of the re-

duction occurred in the highway construction group, but manufacturing as a whole, logging and retail trade also released help. Within the manufacturing division, iron and steel, textile, lumber, chemical, non-ferrous metal and pulp and paper mills were slacker, while leather, food, tobacco, and beverage and clay, glass and stone factories reported improvement. Mining, transportation, building and railway construction, wholesale trade and services also showed heightened activity. Employment on August 1, 1933, had increased over the preceding month, but was then in decidedly smaller volume, the index at 86.6,

*Prairie Provinces.*—Employers in the Prairie Provinces reported a decrease; the 1,298 employers making returns had 116,670 workers, as compared with 118,283 at the beginning of July. The reduction took place mainly in highway and railway construction, but logging, metallic ore mining and trade also showed curtailment. On the other hand, coal-mining, communications, railway transportation and services reported improvement, while no general change occurred in manufacturing. The level of employment was slightly higher than on August 1, 1933.

*British Columbia.*—Further expansion was registered in British Columbia, mainly in manufacturing, mining and transportation, while trade also showed heightened activity; highway and railway construction, however, were slacker. Within the manufacturing division, the greatest gains occurred in lumber mills and food canneries. Returns were compiled from 899 firms employing 81,132 persons, or 2,979 more than in the preceding month. A larger increase had been indicated at the beginning of August of last year, but the index, at 97.6 on the latest date, was over ten points higher than on the same date in 1933. Table I gives index numbers by economic areas.

### Employment by Cities

Employment increased in five of the eight cities for which separate tabulations are made. Quebec City, Ottawa, Hamilton, Winnipeg and Vancouver showed improvement; in Windsor and the adjacent Border Cities, there was little general change, while in Montreal and Toronto curtailment was indicated.

*Montreal.*—There was a decrease in Montreal on the date under review, for which the 1,218 co-operating firms reported a combined payroll of 128,031 employees, or 615 fewer than on July 1. Building construction, leather, food and musical instrument factories registered improvement, but textile, clay, glass and stone and iron and steel plants showed reduced activity, and there were also declines in shipping and trade. On the whole, employment was in rather greater volume than on August 1, 1933, when an increase had been indicated.

*Quebec.*—Improvement was reported in Quebec City, where manufacturing, transportation, construction and services recorded greater activity. Statements were received from 160 employers whose staffs aggregated 12,902 workers, compared with 12,478 in the preceding month. Little general change had taken place on August 1 of a year ago, when the index was practically the same.

*Toronto.*—There was a falling-off in activity in Toronto, according to data from 1,292

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Aug. 1, 1921.....	90.0	102.4	83.7	90.5	96.8	85.4
Aug. 1, 1922.....	94.2	105.5	86.1	96.7	100.8	88.6
Aug. 1, 1923.....	101.4	109.8	97.1	103.4	103.6	95.2
Aug. 1, 1924.....	95.8	101.2	94.1	96.2	96.7	95.0
Aug. 1, 1925.....	97.5	103.5	96.4	96.7	95.5	99.6
Aug. 1, 1926.....	105.5	106.1	108.2	103.0	105.8	107.2
Aug. 1, 1927.....	110.5	113.2	109.8	109.2	114.0	110.0
Aug. 1, 1928.....	119.3	117.0	114.1	118.9	132.5	116.4
Aug. 1, 1929.....	127.8	127.5	121.3	128.0	144.8	122.7
Aug. 1, 1930.....	118.8	140.9	114.7	115.7	126.2	115.8
Aug. 1, 1931.....	105.2	106.8	102.4	100.7	129.1	98.0
Aug. 1, 1932.....	86.3	90.1	84.4	86.9	90.1	81.4
Jan. 1, 1933.....	78.5	80.1	77.8	78.8	84.4	69.7
Feb. 1.....	77.0	76.5	75.7	78.9	80.4	68.0
Mar. 1.....	76.9	76.8	74.1	79.8	80.0	67.7
April 1.....	76.0	78.3	73.1	78.3	78.3	68.8
May 1.....	77.6	80.3	75.4	79.5	79.2	72.2
June 1.....	80.7	82.8	79.3	81.6	82.7	76.2
July 1.....	84.5	89.9	83.0	85.0	85.0	81.8
Aug. 1.....	87.1	93.0	84.8	86.6	90.5	87.3
Sept. 1.....	88.5	91.5	87.0	88.1	90.7	89.2
Oct. 1.....	90.4	90.9	89.1	89.6	95.7	85.6
Nov. 1.....	91.3	90.2	92.2	91.4	94.6	84.0
Dec. 1.....	91.8	93.4	92.4	93.3	89.3	85.4
Jan. 1, 1934.....	88.6	97.0	86.3	91.2	86.4	80.4
Feb. 1.....	91.4	101.3	88.5	95.3	84.7	84.1
Mar. 1.....	92.7	103.2	89.1	97.8	83.8	85.6
April 1.....	91.3	95.1	85.1	98.7	83.3	86.6
May 1.....	92.0	98.3	85.5	98.5	85.4	88.4
June 1.....	96.6	98.4	90.9	104.4	89.5	89.1
July 1.....	101.0	100.4	94.1	109.9	94.1	94.1
Aug. 1.....	99.9	101.3	94.9	106.0	93.0	97.6
Relative Weight of Employment by Economic Areas as at Aug. 1, 1934.....	100.0	7.7	27.8	43.3	12.5	8.7

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated areas to the total number of all employees reported in Canada by the firms making returns for the date under review.

firms employing 112,081 persons, or 1,448 fewer than at the beginning of July. The decline was largely seasonal, employment having been reduced on August 1 in ten out of the thirteen years for which statistics are available; the loss this year was rather greater than on the same date in 1933, though smaller than in 1930, 1931 or 1932. The index was higher than at the beginning of August of last year. Manufacturing showed general curtailment as compared with July 1, there being a large reduction in textile and iron and steel factories. Retail trade was also affected by midsummer dullness; on the other hand, wholesale trade and construction showed improvement.

*Ottawa.*—Employment in Ottawa again advanced, 155 persons being added to the forces of the 164 co-operating employers, who had 13,224 workers on August 1. There were gains in construction, while trade and manufacturing showed a slowing-up. Employment at the beginning of August, 1933, had also increased, but the index then was lower.

*Hamilton.*—There were further additions to staffs in Hamilton, 259 establishments reporting 28,000 persons on their pay lists, as against 27,885 in their last return. Manufacturing showed a small increase on the whole, increases in the food and some other groups rather more than offsetting losses in textile and iron and steel; the fluctuations in other industries were slight. Employment was more active than on the same date of last year, when a small increase had also been noted.

*Windsor and the adjacent Border Cities.*—Little general change occurred in the Border Cities; statistics were received from 150 firms employing 13,468 workers, or 23 more than on July 1. Automobile and iron and steel works reduced their working forces, but food and other manufacturing establishments were busier. The situation had also remained unchanged on August 1, 1933, as compared with the preceding month. The index on the latest date was higher than at midsummer in any of the last three years.

*Winnipeg.*—A further increase was indicated in Winnipeg, according to 425 firms

Relative Weight of Employment by Cities as at Aug. 1, 1934.....	13.8	1.4	12.0	1.4	3.0	1.4	3.8	3.1

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

who had 35,676 employees, as compared with 35,154 at the beginning of July. There was little change in manufacturing as a whole; construction showed a considerable gain, and there were smaller increases in all other industries except transportation. A favourable trend had also been in evidence on the same date of last year, but employment was then at a slightly lower level.

*Vancouver.*—In Vancouver, manufacturing, transportation, construction, services and trade showed improvement, that in factory employment occurring mainly in food production. Returns were compiled from 381 employers with 28,821 persons on their staffs, as compared with 28,223 in the preceding month. A similar gain had been indicated on August 1, 1933, but the index of employment was then over six points lower.

Index numbers of employment by cities are given in Table II.

### Employment in Manufacturing Industries

Further improvement took place on August 1 in manufacturing establishments, 5,281 of which reported 470,682 operatives on their payrolls, as compared with 468,860 on July 1. Employment in this group has usually shown a small advance on August 1 in the experience of the last thirteen years, although the tendency was decidedly unfavourable at midsummer in 1930, 1931 and 1932; the increase this year was very slightly above the average. The index stood at 94.2, compared with 93.8 on July 1, 85.2 on August 1, 1933, 82.6 on August 1, 1932 and 94.7 on August 1, 1931.

The firms reporting for the latest date showed the seventh consecutive gain recorded in as many months; during this period, the co-operating manufacturers have enlarged their staffs by over 71,300 persons, while the index has risen by rather better than fourteen points since the opening of the year, a percentage of 17.8. It is also noteworthy

Relative Weight of Employment by Industries as at Aug. 1, 1934.....	100.0	50.5	2.5	5.4	2.3	10.6	16.2	2.8	9.7

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

that the index at the beginning of August was 10.6 p.c. higher than that of 85.2 recorded on August 1, 1933, while it was 26.6 per cent higher than the January 1, 1933, index of 74.4, the low point in manufacturing employment in this record of nearly fourteen years.

Improvement was indicated on the date under review in leather, musical instruments, vegetable food, tobacco and beverage, electric current and some other industries; the seasonal gains in fruit and vegetable canning were most extensive. On the other hand, declines occurred in fur, rubber, textile, chemical, iron and steel and non-ferrous metal factories. Among these also, the greatest losses were seasonal in character, occurring in textile and iron and steel.

Animal Products.—Fish-canning and meat product factories registered gains, while

dairies and fish-smoking and curing plants were seasonally slacker. There was no change on the whole in the animal food group as compared with July 1. Statistics were received from 274 firms employing 24,618 workers, as compared with 24,606 in the preceding month. The trend on August 1 in other years of the record has frequently been downward; the index on the date under review, at 132.6, was higher than at the beginning of August in any other year of the record, comparing favourably with that of 129.6 noted on August 1, 1933, and with the previous maximum of 123.6 on the same date in both 1929 and 1930.

*Leather and Products.*—Expansion was shown in employment in the leather group, 782 persons being added to the staffs of the 260 co-operating manufacturers, who employed 20,092 on August 1. Most of the improvement

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	Aug. 1 1934	July 1 1934	Aug. 1 1933	Aug. 1 1932	Aug. 1 1931	Aug. 1 1930	Aug. 1 1929

<sup>1</sup>The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

occurred in shoe factories in Quebec and Ontario. A rather larger gain had been reported by the firms making returns for the same date a year ago, when the index of employment was fractionally lower.

*Lumber and Products.*—Rough and dressed lumber mills were decidedly busier, while container, furniture and wooden vehicle factories reported curtailment. The lumber industry as a whole registered a minor advance; the payrolls of the 791 firms furnishing data aggregated 39,124 operatives, as against 39,057 in their last report. There were increases in British Columbia and the Maritime Provinces, while elsewhere the tendency was retrogressive. Activity in the lumber group as a whole was greater than on August 1, 1932, when considerable improvement had been recorded.

*Musical Instruments.*—Employment in musical instrument factories was better than in the preceding month, and was also brisker than in the corresponding month of last year. Statements were received from 35 manufacturers who had enlarged their payrolls by 238 persons to 1,183 on August 1, 1934.

*Plant Products, Edible.*—Important additions to staffs were registered in fruit and vegetable canneries, while sugar refineries and chocolate and confectionery factories were also busier; 434 employers in the vegetable food group reported 33,178 workers, or 2,610 more than at the beginning of July. The increase took place largely in Quebec, Ontario and British Columbia. Employment was in greater volume than on August 1, 1933, when smaller gains had been indicated.

*Pulp and Paper Products.*—Pulp and paper mills reported slightly heightened activity, while practically no change occurred in other branches of this group. Statistics were received from 565 manufacturers whose payrolls were increased by 60 persons to 57,778 on August 1. Advances in Quebec and British Columbia were largely offset by reductions in other provinces. A substantial gain had been noted in the corresponding month last summer, but the index was then several points lower, standing at 88.4, as compared with 95.8 on August 1, 1934.

*Rubber Products.*—There was a decrease in rubber works, 51 of which had 11,996 persons on their payrolls, compared with 12,113 on July 1. The loss (which took place chiefly in Quebec), compared unfavourably with the general gain reported at the beginning of August of a year ago; the level of employment was then decidedly lower.

*Textile Products.*—Cotton and woollen mills recorded increased working forces, but garment, hosiery and knitting factories were seasonally slacker; there was a decline of 1,288 persons in the staffs of the 915 co-operating manufacturers, who employed 89,850. The general trend in all economic areas except British Columbia was decidedly downward. Large increases had been noted at the beginning of August, 1933, when the index stood at 97.7, compared with 106.0 on the date under review.

*Other Plant Products.*—Data were received from 157 establishments in these industries, whose payrolls, aggregating 14,462 on August 1, showed an increase of 199 persons since July 1. There were gains in tobacco and beverage factories. The index on the same date last year was rather lower.

*Chemicals and Allied Products.*—A small contraction was noted in chemical works at the beginning of August, 224 persons having been released since the preceding month from the payrolls of the 172 co-operating manufacturers, who employed 8,996 workers. The index was higher than on August 1, 1933, when a smaller reduction had been indicated.

*Clay, Glass and Stone Products.*—Further slight additions to staffs were reported in building material plants, according to 192 employers with 8,397 workers, or 66 more than in their last report. There were increases in Ontario and British Columbia. Employment was in greater volume than on the same date last summer, although larger gains had then taken place.

*Electric Current.*—Considerable improvement was noted in electric current works, 98 of which reported 14,352 employees, compared with 13,825 on July 1. The index number on the date under review was rather higher than on August 1, 1933, when a large gain had also been recorded.

*Electrical Apparatus.*—Employment in 109 electrical apparatus works showed a minor increase at the beginning of August; they employed 11,326 operatives, or 51 more than in the preceding month. The situation was better than on August 1 of last year, when a larger advance had been indicated.

*Iron and Steel Products.*—Crude, rolled and forged, heating appliance and tool factories reported improvement, while agricultural implement, vehicle, foundry and machine shop and sheet metal works showed declines. A combined labour force of 96,873 persons was indicated by the 805 co-operating manufacturers, who had 97,681 on July 1. Firms in

all provinces except Ontario recorded rather heightened activity, but in that province there was a considerable falling-off. Improvement had been noted at the beginning of August in 1933; the index then, however, was over ten points lower than on the date under review.

*Non-ferrous Metal Products.*—Reductions in staffs were recorded in this group on August 1, according to the 147 firms furnishing data, who employed 17,367 workers, compared with 17,551 in the preceding month. The decrease occurred mainly in lead, tin, zinc and copper plants. Employment was in much greater volume than on August 1 of a year ago, when an increase had been indicated over the preceding month.

*Mineral Products.*—Statistics tabulated from 119 manufacturers of mineral products showed that they employed 13,891 workers, or practically the same number as in their last report. The index was higher than on the same date in 1933, although a gain had then occurred.

### Logging

Seasonal dullness reduced employment in logging camps in all provinces except Quebec and British Columbia, where small increases were indicated. Statements were tabulated from 264 firms throughout the Dominion, employing 23,284 men, or 573 fewer than in the preceding month. Smaller losses were reported on August 1 of last year, when the index stood at 48.9, as compared with 84.5 on the date under review. This was higher than at midsummer in any other year of the record.

### Mining

*Coal.*—There was an increase of 729 employees in the staffs of the 99 operators furnishing returns, bringing them to 22,034 on August 1, 1934. The improvement extended to both Eastern and Western coal fields. A smaller gain had been registered on the same date of last year, when the index was a few points lower.

*Metallic Ores.*—A large advance was recorded in metallic ore mines, in which employment was decidedly more active than at the beginning of August of last year. Returns were received from 105 firms, with 21,931 workers, as compared with 21,263 in their last report. Improvement was shown in all except the Prairie Provinces, that in Ontario being greatest.

*Non-Metallic Minerals (Other than Coal).*—Little general change was noted in this division, in which 78 employers enlarged their

payrolls by 23 persons to 6,405 at the beginning of August. Employment was at a higher level than in the same month last summer, when greater improvement over the preceding month had been recorded.

### Communications

There was an increase in the personnel of telephone and telegraph companies on August 1; the communication firms co-operating with the Dominion Bureau of Statistics had 21,339 employees, as against 21,056 in the preceding month. The number engaged in this group was less than on August 1 of a year ago. A decline had then been noted.

### Transportation

*Street Railway and Cartage.*—A gain was registered in this division, according to data received from 193 employers with 24,622 workers, as against 24,487 on July 1. A falling-off had been recorded on August 1, 1933, when the index of employment was practically the same.

*Steam Railway Operation.*—The trend of employment in steam railway operation was favourable in Ontario and the Western provinces; the 99 companies and divisional superintendents furnishing data throughout the Dominion reported 59,023 employees, compared with 58,107 in their last report. An increase had also occurred on the same date in 1933, but the index then was a few points lower.

*Shipping and Stevedoring.*—Statements were tabulated from 92 companies in this group, employing 15,020 workers, or 200 more than on July 1, 1934. There were losses in Quebec, but gains in British Columbia and Ontario. A general decline had been noted at the beginning of August a year ago; employment in shipping was then not quite so active.

### Construction and Maintenance

*Building.*—Considerable increases were again reported in building construction, 640 contractors adding 1,767 persons to their staffs, bringing them to 22,822 at the beginning of August. There were advances in all provinces, those in Quebec and Ontario being greatest. Employment was brisker than in the same month of 1933, when improvement had also been indicated.

*Highway.*—The number engaged on highway construction and maintenance showed important curtailment, mainly in Ontario and the Prairie Provinces. Data were received from 340 employers with 98,304 workers on their payrolls, as compared with 114,394 at

the beginning of July. An increase had taken place on August 1, 1933, but employment on road work was then not so active.

**Railway.**—A further increase was recorded in this group on August 1, 1934, when 35 companies and divisional superintendents reported that they had 29,911 men on their staffs, compared with 29,118 in the preceding month. There were gains in all except the Western provinces. The index number was slightly higher than at the beginning of August of a year ago, when improvement had also been noted.

### Services

Continued gains occurred in the service group mainly in hotels and restaurants; 415 firms employed 26,019 persons, compared with 25,319 at the beginning of July. Little general change had been recorded on August 1, 1933; the index was then lower.

## (2) Unemployment in Trade Unions at the Close of July, 1934

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle owing to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The situation for local trade union members during July remained much the same as in the preceding month according to the reports furnished the Department of Labour by 1,701 labour organizations with a membership covering 156,357 persons. Of these, 27,945, or 17.9 per cent were without employment on the last day of the month, contrasted with 18.0 per cent in June. Improvement was shown over July a year ago, when 21.2 per cent of the members reported were unemployed. Saskatchewan unions registered a gain in work afforded of nearly 3 per cent from June, attributable to intensified activity in the building and construction trades, and in steam railway operation. Conditions in Nova Scotia, New Brunswick, Manitoba, Alberta and British Columbia unions varied but slightly from the previous month, though the tendency was also upward. Recessions of a largely offsetting nature, however, were reflected by Quebec and Ontario unions. When

### Trade

There was a seasonal falling-off in employment in retail trade, but wholesale houses were more active, according to 1,045 trading establishments, which employed 90,033 workers, as compared with 91,918 on July 1. Ontario reported the largest declines, while there were gains in British Columbia. Smaller seasonal losses had occurred at the beginning of August last year, but the index then was a few points lower.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables, in which the columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on the date under review.

a comparison is made with the returns for July, 1933, Ontario and Saskatchewan unions showed the most substantial gains during the month reviewed, increases in activity, of lesser proportions, being reflected by Nova Scotia, New Brunswick, Quebec, Manitoba and British Columbia unions. Alberta unions alone indicated a falling off in activity from July a year ago, which was, however, slight.

Returns on unemployment affecting trade union members in the largest city in each province, with the exception of Prince Edward Island, are tabulated separately each month. Halifax, Saint John and Montreal unions reported a lowering of the employment volume, on a moderate scale, in comparison with June. In Edmonton and Vancouver also, activity was slightly curtailed, Toronto and Regina showing but nominal recessions. Winnipeg was the only city to reflect a better employment trend than in June, although the change was very slight. Contrasted with the returns for July of last year, Halifax members were much busier during the month reviewed, and increased activity, of noteworthy degree, was apparent among St. John, Toronto and Vancouver members. In Regina, Winnipeg and Montreal also, a somewhat better employment volume was afforded. Edmonton members, however, were decidedly less active than in July a year ago.

Appearing with this article is a chart which shows the trend of unemployment by months from January, 1928, to date. The level of the curve at the close of July remained almost

identical with that of June, showing a practically unchanged labour volume. The projection was, however, downward during July from the corresponding month of last year, an indication of better employment conditions during the period under review.

Further declines in activity, on a small scale, were shown in the manufacturing industries during July, the unemployment percentage standing at 18.1, in contrast with a percentage of 17.2 in June. The situation was, however, more favourable than in July last year when 22.3 per cent of the members reported were out of work. Employment for general labourers, glass and fur workers was

lesser proportions obtained for pulp and paper makers, printing tradesmen, brewery workers, general labourers and bakers and confectioners. Garment workers, however, were considerably slacker than in July a year ago, as were also metal polishers, this latter group of tradesmen embracing but a small membership. In the textile trades and among wood workers employment was also notably retarded from July last year, fur and hat and cap workers showing contractions on a smaller scale.

The trend of activity in the coal mining industry continued upward during July, though the change from June was slight as

### PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

on a much higher level than in June, while the tendency for pulp and paper makers, printing tradesmen and brewery workers was also better, but the gains were fractional only. On the contrary, a sharp drop in employment was evident among metal polishers, garment, textile and hat and cap workers. Declines, on a considerably smaller scale, were recorded by wood and leather workers, and cigar makers. Among iron and steel workers, and bakers and confectioners there was but a slight falling off in work afforded. Employment advancement over July a year ago affecting the greatest number of members was indicated by iron and steel workers. Among cigar makers, leather and glass workers also, substantial improvement was recorded. Gains of much

manifest by the reports tabulated from 53 unions with a membership aggregate of 16,108 persons. Of these, 3,252 or 20.2 per cent were without employment at the end of the month, in contrast with 21.9 per cent in June. Unemployment was in greater prevalence than in July of last year, when 14.3 per cent of the members reported were idle. Both the eastern and western coal fields participated in this better tendency shown from June, the Nova Scotia, Alberta and British Columbia mines all affording a slightly better volume of work. The recessions noted from July last year were most pronounced in the Province of British Columbia, though in Nova Scotia and Alberta also there was some lowering of the employment volume available. In addition to the

members who were reported as entirely unemployed many miners continued to work at reduced time.

There was little variation in the volume of employment afforded building and construction tradesmen during July over the previous month, the 191 unions making returns, with a total of 17,064 members, showing 57.0 per cent of idleness, as compared with 57.8 per

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919.....	3.1	2.0	3.4	2.7	2.1	3.2	2.0	7.9	3.4

Nov., 1933.....	17.1	10.7	22.8	22.1	20.4	16.1	15.0	21.3	20.4
Dec., 1933.....	11.2	11.5	23.2	24.9	20.3	17.2	17.6	19.8	21.0
Jan., 1934.....	10.7	9.4	23.6	24.2	21.2	17.9	16.4	25.0	21.2
Feb., 1934.....	10.8	9.8	21.9	22.9	21.6	18.3	17.1	21.2	20.0
Mar., 1934.....	9.1	10.7	22.3	19.3	21.8	18.5	20.3	19.9	19.5
April, 1934.....	10.9	9.6	22.3	18.6	19.5	15.6	22.4	19.2	19.1
May, 1934.....	11.8	8.1	23.6	15.5	17.8	14.2	24.3	18.4	18.5
June, 1934.....	11.4	7.5	22.9	15.9	17.0	12.1	24.8	17.2	18.0
July, 1934.....	9.9	6.2	24.1	16.3	16.1	9.3	24.1	16.2	17.9

cent in June. Carpenters and joiners, electrical workers, granite and stone cutters, tile layers, lathers and roofers, and painters, decorators and paperhangers all reported heightened activity from June, which was not of particular importance in any one group of tradesmen. Hod carriers and building labourers, on the other hand, reported a sharp drop in employment available, though affecting few workers, as their membership was small, and moderate contractions occurred among plumbers and steamfitters, bridge and structural iron workers and bricklayers, masons and plasterers. Steam shovelmen reported the same situation as in the preceding month. Compared with the returns for July of last year in the building and construction trades, when 61.9 per cent of unemployment was recorded, bricklayers, masons and plasterers, carpenters and joiners, tile layers, lathers and roofers, and hod carriers and building labourers were all much better engaged during the month reviewed, while gains, on a smaller scale, were recorded by electrical workers and steam shovelmen. Pronounced curtailment, however, was evident among bridge and structural iron workers from July last year, and recessions of much lesser magnitude occurred for painters, decorators and paperhangers, and plumbers and steamfitters. Among granite and stonecutters conditions were but nominally adverse.

Improvement, of slight degree, was reflected in the transportation industries during July from the previous month, unemployment standing at 8.2 per cent, as compared with 9.3 per cent in June. Increases in activity of greater importance were shown from July last year when 12.5 per cent of unemployment was recorded. The percentage for the month under review was based on the returns received from 747 organizations, embracing a membership of 52,858 persons, 4,316 of whom were idle at the end of the month. Steam railway employees, whose returns constituted about 78 per cent of the entire group membership reported, and navigation workers indicated employment expansion on a small scale, from June. No variation in conditions was apparent among street and electric railway employees, while teamsters and chauffeurs reported a fractional unemployment percentage, compared with a fully engaged situation in the previous month. Responsibility for the improvement over July of last year in the transportation industries rested almost entirely with the steam railway division which showed noteworthy gains in work afforded, though among street and electric railway employees activity tended very slight-

## II. PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

TABLE II.—PERCENTS OF UNEMPLOYMENT IN VARIOUS INDUSTRIES AND OCCUPATIONS																																	
Month	Fishing	Lumbering and logging	Mining	Manufacturing industries	Vegetable products	Pulp and paper products	Pulp and paper mill workers	Printing and lithographing	Electric current	Wood products	Fibres, textiles and textile products	Garment workers	Hat, cap and glove workers	Animal products	Iron and its products	Non-ferrous metals	Clay, glass and stone products	Miscellaneous manufactures	Building and construction	Shipping and reeving	Steam railway operation	Local transportation	Communication	Telegraph operation	Telephone operation	Trade (retail shop clerks)	Services	Governmental	Miscellaneous	All occupations

ly upward. Navigation workers, on the other hand, reported a considerable increase in slackness during the month reviewed, and among teamsters and chauffeurs there was a fractional employment drop.

Unemployment for retail clerks remained in almost the same volume during July as in the previous month, the 5 unions making returns with 1,849 members showing 6.3 per cent of idleness, as compared with 6.2 per cent in June. Contractions in activity, however, were noted from July of last year, when 2.9 per cent of the members reported were without work.

From unions of civic employees 76 reports were received during July, covering a membership of 7,658 persons, 272, or 3.6 per cent of whom were idle on the last day of the month, contrasted with percentages of 3.0 in June and 6.2 in July last year.

There was some slowing up of activity in the miscellaneous group of trades during July from the previous month as manifest by the returns received from 114 unions, with a total of 3,685 members. Of these, 648 or 17.6 per cent were idle at the end of the month, as contrasted with 14.9 per cent in June. Conditions, however, were more favourable than in July a year ago, when 20.6 per cent of the members reported were without employment. Noteworthy losses in work available from June were registered by hotel and restaurant, and theatre and stage employees. Among barbers and unclassified workers the tendency was towards greater activity, though the changes were fractional only. Unemployment

for stationary engineers and firemen, however, remained at the same level as in June. Compared with the returns for July last year hotel and restaurant employees were much better engaged during the month reviewed and among theatre and stage employees, stationary engineers and firemen, and unclassified workers employment expansion, on a much smaller scale, was noted. Barbers, however, indicated nominal curtailment of activity from July a year ago.

The situation for fishermen showed little change during July from either the previous month or July of last year, 1.9 per cent of the members being reported idle at the end of the month, in contrast with 2.2 per cent in June and 1.4 per cent in July, 1933.

Lumber workers and loggers during July maintained the high level of activity shown during June and with slightly greater intensity, while the improvement noted over July last year was quite pronounced. Returns were tabulated for July from 3 unions of these workers, involving 1,431 members, 35 or 2.4 per cent of whom were unemployed at the end of the month, contrasted with percentages of 3.0 in June and 22.5 in July a year ago.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1933, inclusive, and also the percentage of unemployment by provinces for July of each year from 1919 to 1931, inclusive, and for each month from January, 1932, to date. Table II summarises the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for July, 1934.

The volume of business transacted by the offices of the Employment Service of Canada during the month of July, 1934, as indicated by the average daily placements effected, showed a decrease of 22 per cent from the previous period, but an increase of nearly 25 per cent over the corresponding month last year. All industrial divisions, except mining and farming, where an appreciable gain was registered, showed declines in placements from June, the largest being in construction and maintenance. In comparison with July, 1933, construction and maintenance showed a marked increase, followed by gains of lesser magnitude in services and logging. Farming, trade and transportation registered fewer placements, the greatest decline being in farming. Minor changes only were recorded in mining and manufacturing.

The accompanying chart shows the trend of employment since January, 1932, as repre-

sented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. In viewing the trend of the curve of vacancies and of placements in relation to applications, a marked decline was shown throughout the month, but at the close of the period the levels attained were practically the same as those recorded at the end of July, 1933. The ratio of vacancies to each 100 applications was 63.7 during the first half and 56.2 during the second half of July, 1934, in contrast with ratios of 57.4 and 56.3 during the corresponding periods of 1933. The ratios of placements to each 100 applications during the periods under review were 60.9 and 53.7 as compared with 54.2 and 54.0, respectively, during the corresponding month of 1933.

The average number of vacancies reported daily by employers to the offices of the Ser-

vice throughout Canada during July, 1934, was 1,425, as compared with a daily average of 1,146 during the corresponding month a year ago, and with 1,822 recorded daily in June, 1934.

The average number of applications for employment received daily by the offices of the Service during the month under review was 2,390 in comparison with 2,016 in July, 1933. Applications for work during the preceding month of 1934 averaged 2,701 daily.

The average number of placements made

of which 46,976 were from men and 12,751 from women. Reports for June, 1934, showed 45,529 positions available, 67,506 applications made, and 43,621 placements effected, while in July, 1933, there were recorded 28,630 vacancies, 50,397 applications for work, and 27,266 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1924, to date:—

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o—o—o—o—o—o

daily by the offices of the Service during July, 1934, was 1,362, of which 776 were in regular employment and 586 in work of one week's duration or less, as compared with a total daily average of 1,745 during the preceding month. Placements in July a year ago averaged 1,091 daily, consisting of 608 in regular and 483 in casual employment.

During the month of July, 1934, the offices of the Service referred 35,506 persons to vacancies and effected a total of 34,046 placements. Of these, the placements in regular employment were 19,400, of which 15,189 were of men and 4,211 of women, while placements in casual work totalled 14,646. The number of vacancies reported by employers was 27,667 for men and 7,954 for women, a total of 35,621, while applications for work numbered 59,727,

1934 (7 months).....	129,798	114,720	244,518

#### NOVA SCOTIA

Employment opportunities as indicated by orders received at employment offices in Nova Scotia during July were 11 per cent less

favourable than in the preceding month and 33 per cent below the corresponding month of last year. There was a decline of nearly 14 per cent in placements when compared with June, and of nearly 35 per cent in comparison with July, 1933. The decrease in placements from July of last year was due to fewer workers being sent to relief camps on highway construction as nominal changes only were reported in all other groups. Industrial divisions in which most of the placements were effected during the month were logging 59; construction and maintenance 573; and services 240, of which 187 were of household workers. During the month 146 men and 94 women were placed in regular employment.

#### NEW BRUNSWICK

During July positions offered through employment offices in New Brunswick were nearly 7 per cent less than in the preceding month and 27 per cent below the corresponding month of last year. There was a decline of over 6 per cent in placements in comparison with June and of nearly 27 per cent when compared with July, 1933. Fewer placements were made in construction and maintenance, transportation and logging than during July of last year. These reductions, however, were offset in part by gains in all other groups, the largest of which was in services. Placements by industrial divisions included manufacturing 19; logging 108; farming 19; construction and maintenance 279; and services 422, of which 323 were of household workers. There were 411 men and 67 women placed in regular employment during the month.

#### QUEBEC

There was an increase of 19 per cent in the number of positions offered through employment offices in the Province of Quebec during the month of July when compared with the preceding month and of over 47 per cent in comparison with the corresponding month of last year. Placements were over 31 per cent higher than in June and nearly 51 per cent above July, 1933. All industrial divisions except manufacturing and mining participated in the increase in placements over July of last year, the largest gains being in services, construction and maintenance, and logging. Placements by industrial divisions included manufacturing 72; logging 337; farming 96; construction and maintenance 637; trade 150; and services 2,010, of which 1,650 were of household workers. Placements in regular employment numbered 1,341 of men and 1,415 of women.

#### ONTARIO

The demand for workers as indicated by orders received at employment offices in Ontario during July was nearly 36 per cent less than in the preceding month but nearly 52 per cent above the corresponding month of last year. There was a decline of nearly 37 per cent in placements when compared with June, but a gain of over 50 per cent in comparison with July, 1933. Increased placements over July of last year were recorded in all industrial groups except farming, trade and finance. Nearly 75 per cent of the net increase, however, was in construction and maintenance as a result of heavy placements being made on road construction and there being more activity in building construction. Services and logging also showed substantial gains. Placements by industrial divisions included manufacturing 547; logging 1,119; farming 1,186; mining 116; transportation 122; construction and maintenance 10,802; trade 215; and services 3,913, of which 1,716 were of household workers. During the month 7,324 men and 1,424 women were placed in regular employment.

#### MANITOBA

Orders received at employment offices in Manitoba during July called for 8 per cent more workers than in the preceding month but over 3 per cent less than during the corresponding month of last year. Placements were nearly 12 per cent above June and over 1 per cent in excess of July, 1933. The most important gains in placements over July of last year were in construction and maintenance and logging, while farming and services showed the only noteworthy declines. Industrial divisions in which most of the placements were effected during the month were logging 165; farming 737; construction and maintenance 1,126; and services 560, of which 457 were of household workers. There were 1,704 men and 296 women placed in regular employment during the month.

#### SASKATCHEWAN

During July orders received at employment offices in Saskatchewan called for over 18 per cent more workers than in the preceding month, but nearly 17 per cent less than during the corresponding month of last year. There was an increase of over 19 per cent in placements when compared with June, but a decline of over 13 per cent in comparison with July, 1933. The decrease in placements from July of last year was due to a reduction in the demand for farm workers, as a small gain in construc-

\* 3 Placements effected by offices since closed.

tion and maintenance was offset by declines in manufacturing and trade, and nominal changes only were reported in all other groups. Placements by industrial divisions included farming 669; construction and maintenance 422; trade 25; and services 802, of which 459 were of household workers. Placements in regular employment numbered 809 of men and 369 of women.

#### ALBERTA

Opportunities for employment as indicated by orders received at employment offices in Alberta during July were nearly 19 per cent less favourable than in the preceding month and nearly 27 per cent below the corresponding month of last year. There was a decline also in placements of 19 per cent when compared with June and of over 23 per cent in comparison with July, 1933. All industrial divisions showed reductions in placements from July of last year, the most noteworthy being in construction and maintenance, farming and logging. Placements by industrial divisions included manufacturing 43; farming 695; construction and maintenance 677; and services 463, of which 355 were of household workers. There were 1,001 men and 314 women placed in regular employment during the month.

#### BRITISH COLUMBIA

There was an increase of over 3 per cent in the number of positions offered through employment offices in British Columbia during July when compared with the preceding month and of nearly 41 per cent in comparison with the corresponding month of last year. Slightly higher percentages of gain were reported in placements under both comparisons. A substantial increase in the placements made in the highway division of construction and maintenance was responsible for the gain over July of last year, as small losses in farming, logging and transportation were offset by gains in services, manufacturing and trade. Placements by industrial divisions included manufacturing 37; farming 118; mining 31; construction and maintenance 3,528; and services 603, of which 386 were of household workers. During the month 2,453 men and 232 women were placed in regular employment.

#### Movement of Labour

During the month of July, 1934, the offices of the Employment Service of Canada made 19,400 placements in regular employment, of which 9,166 were of persons for whom the employment located was outside the immediate vicinity of the offices at which they were registered. Of the latter, 482 were

granted the Employment Service reduced transportation rate, 306 going to points within the same province as the despatching office and 176 to other provinces. The reduced transportation rate, which is 2.7 cents per mile with a minimum fare of \$4, is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

The labour movement from Ontario centres during July comprised the transfer of 207 persons, 204 of whom went to provincial situations and 3 outside the province. The latter were mine workers despatched by the Timmins office, 2 going to the Winnipeg zone and one to Amos. Provincially, from Port Arthur 89 bushmen, 51 mine workers, 12 highway construction employees, 5 survey men, 3 railway construction labourers, 2 restaurant workers and 1 domestic were conveyed to employment at various centres within the same zone, while for points within their respective zones also, the Fort William office transferred 3 mine workers, one construction carpenter and one tie peeler, and Sudbury 12 mine workers and 6 bush workers. Destined to the Fort William zone, in addition, were 11 miners sent from Timmins. The remaining 7 provincial transfers were for the Timmins zone, 6 of whom were bushmen travelling from North Bay and one, a carpenter, sent from Hamilton. In Manitoba during July, 208 certificates for reduced transportation were granted, 35 provincial and 173 interprovincial, all of these being issued at the Winnipeg office. Travelling on certificates for provincial points 25 farm hands, 6 mine workers and 4 carpenters went to employment at centres within the Winnipeg zone. The majority of the persons going outside the province were for the Port Arthur zone, these including 140 bush workers, 12 mine workers, 8 highway construction workers, 5 farm hands, 2 hotel cooks and 1 shoemaker. In addition, 2 farm hands were bound for Yorkton, 1 farm hand and 1 hotel waitress for Regina and 1 hotel cook for Saskatoon. Transfers at the reduced rate in Saskatchewan during July were 3 in number and effected by the Regina office, which despatched 2 teachers within its own zone, and one domestic to Yorkton. Offices in Alberta granted 57 certificates for reduced transportation during July, all provincial. Of these, 50 were secured at the Edmonton office by 12 bushmen, 7 farm hands, 2 farm household workers, 7 miners, 5 fish packers, 2 saw-mill workers, 2 fishermen, 2 building construction workers, 2 plasterers, 2 hotel waitresses, 1 construction labourer, 1 domestic, 1

garage hand, 1 carpenter and 1 cook, going to employment at points within the Edmonton zone, and by 2 farm hands journeying to Drumheller. The Calgary office was instrumental in the transfer of 2 highway construction labourers to Edmonton, 1 farm hand to Drumheller and 4 farm hands within the Calgary zone. Benefiting by the reduced rate in British Columbia during July, 7 persons were carried to provincial employment. The Vancouver office was responsible for the transfer of these, despatching one farm hand, 1

miner, and 1 fruit packer to Penticton, 1 saw-mill setter to Kamloops and 1 farm hand, 1 miner and 1 hotel cook within its own zone.

Of the 482 persons who proceeded to employment at the reduced transportation rate during July 216 travelled by the Canadian National Railways, 248 by the Canadian Pacific Railway, 14 by the Temiskaming and Northern Ontario Railway, 2 by the Pacific Great Eastern Railway and 2 by the Northern Alberta Railway.

#### (4) Building Permits Issued in Canada for July 1934

The value of the building permits issued by 61 cities during July stood at \$3,219,086; this was an increase of \$854,977 or 36.2 per cent. as compared with the total of \$2,364,109 reported in the preceding month. The gain is especially interesting since the experience of the last fourteen years shows that the building authorized is usually lower in July than in June. The comparison with the July, 1933, aggregate of \$2,180,403 was also favourable, the total for last month being \$1,038,683 or 47.6 per cent. higher than in the same month last year.

Some 50 cities furnished detailed statistics, showing that they had issued over 200 permits for dwellings valued at nearly \$1,000,000, and some 1,600 permits for other buildings estimated at more than \$1,900,000. In addition, engineering projects valued at \$286,515 were authorized by two cities. In June, authority was given for the erection of some 240 dwellings and 1,900 other buildings, valued at approximately \$960,000 and \$1,145,000, respectively.

Increases over June, 1934, were reported in New Brunswick, Quebec, Ontario, Manitoba and Saskatchewan, the largest gain of \$464,494 occurring in New Brunswick. Nova Scotia, Alberta and British Columbia showed declines, that of \$74,333 or 37.7 per cent. in British Columbia being greatest.

In comparison with the same month in 1933, Nova Scotia, New Brunswick, Ontario, Manitoba and Saskatchewan showed increases, that of \$562,848 or 64.1 per cent. in Ontario being most pronounced. In the remaining provinces, the value of the authorized building was lower than in July of last year, Alberta showing the greatest loss of \$30,821 or 28.3 per cent.

Of the four largest cities, Montreal reported an increase over June, 1934, but a small decrease as compared with July, 1933; in Toronto and Vancouver, on the other hand, there were reductions as compared with the

preceding month, but increases over July of last year, while Winnipeg reported improvement in both comparisons. Of the other centres Sydney, Fredericton, Moncton, Brantford, Fort William, Oshawa, Ottawa, Peterboro, St. Catharines, Sault Ste. Marie, York and East York Townships, Welland, Windsor, East Windsor, Walkerville, Woodstock, Moose Jaw, Regina, Saskatoon and Lethbridge showed gains as compared with both June, 1934, and July, 1933.

*Cumulative Record for First Seven Months, 1920-1934.*—The following table gives the value of the building authorized by 61 cities during July, and in the first seven months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first seven months of the years since 1920 are also given, (1926 average=100).

Year	Value of permits issued in July	Value of permits issued in first seven months	Indexes of value of permits issued in first seven months (1926=100)	Average indexes of wholesale prices of building materials in first seven months (1926 average=100)
	\$	\$		
1934.....	3,219,086	13,501,727	13.9	83.5
1933.....	2,180,403	12,496,302	12.7	76.5
1932.....	4,412,169	28,753,213	29.5	78.1
1931.....	11,042,609	69,993,717	71.8	83.3
1930.....	15,824,781	101,238,766	103.9	94.2
1929.....	22,702,584	147,311,851	151.2	99.2
1928.....	25,761,956	127,798,943	131.2	96.2
1927.....	16,369,195	97,211,914	99.8	96.1
1926.....	18,683,415	97,443,854	100.0	100.8
1925.....	12,812,603	78,712,320	80.8	103.1
1924.....	11,681,196	72,355,350	74.3	109.8
1923.....	13,078,547	86,126,043	88.4	111.7
1922.....	15,740,810	87,022,484	89.3	108.3
1921.....	10,965,891	66,737,755	68.5	130.2
1920.....	13,743,045	75,497,755	77.5	144.2

The aggregate for the first seven months of this year was greater by 8 per cent than in 1933, but the total was lower than in 1932 and earlier years of the record.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, August, 1934, summarized the employment situation as follows:—

In most of the principal industries there were only slight changes in the general level of employment during July, but the numbers recorded as unemployed at 23rd July were somewhat higher than a month earlier. This net increase was partly due to workers registering themselves as temporarily stopped during local holidays, and there were also increased registrations of juveniles in areas in which the school term ended before 23rd July.

The improvement shown in previous months continued during July in engineering, ship-building and ship-repairing, tinplate and electrical apparatus manufacture, and in the shipping and hotel and boarding-house services. There was also a substantial increase, between 25th June and 23rd July, in the numbers at work in the coal mining industry.

On the other hand, employment declined in building and public works contracting, and, as a result of local holidays, there was a sharp rise in the numbers registered as temporarily stopped in the jute industry. There were also further reductions in employment in the cotton, woollen and worsted, and certain other textile industries, in the clothing trades, including boot and shoe manufacture, and in the motor vehicle industry.

In the South of England employment showed little change on the whole, and continued fairly good in London and the South-Eastern Counties and fair in the South-West. In the Midlands there was some decline and employment was moderate. In the North of England it continued bad on the whole, a slight improvement in the North-Eastern Counties being more than counterbalanced by an increase in unemployment in the North-West. In Scotland employment was bad; there was an increase in the numbers unemployed, largely due to local holidays. In Wales it continued very bad, in spite of a small decrease in the numbers unemployed. In Northern Ireland employment showed some decline and continued bad.

Among the workpeople, numbering approximately 12,883,000, insured against unemployment in Great Britain and Northern Ireland and working in practically every industry except agriculture and private domestic service, the percentage unemployed at July 23, 1934 (including those temporarily stopped as

well as those wholly unemployed), was 16·8\* as compared with 16·5\* at June 25, 1934, and with 19·5 at July 24, 1933. The percentage wholly unemployed at July 23, 1934, was 12·9\* as compared with 13·0\* at June 25, 1934; while the percentage temporarily stopped was 3·9\* as compared with 3·5\*. For males alone, the percentage at July 23, 1934, was 19·2\* and for females, 10·4; at June 25, 1934, the corresponding percentages were 19·2\* and 9·5\*.

At July 23, 1934, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,553,747 wholly unemployed, 492,872 temporarily stopped, and 79,641 normally in casual employment, making a total of 2,126,260. This was 33,674 more than a month before, but 315,915 less than a year before. The total included 1,715,193 men, 50,920 boys, 319,499 women and 40,648 girls.

In Great Britain and Northern Ireland, the total number of persons on the Registers of Employment Exchanges at July 23, 1934, was 2,185,096.

### United States

*Manufacturing industries.*—Factory employment declined by 3 per cent and factory pay rolls fell by 6·8 per cent between June and July. These declines were due to inventory-taking, repairs, vacations, and the closing-down of plants over an extended July 4 holiday period. The decreases this year were further augmented by strikes in various localities and, in a number of instances, plants reported operations affected by the drought and extreme heat. During the preceding 15-year period, 1919-1933, inclusive, for which data are available in the Bureau of Labor Statistics, employment has declined in July in 12 instances and pay rolls have decreased in thirteen. The only years in which increases in employment in July were shown were 1919, 1929, and 1933.

The Bureau of Labor Statistics' general index of factory employment for July 1934 is 78·6 (preliminary) and the July 1934 pay-roll index is 60·4 (preliminary). The July 1934 index of factory employment is 9·9 per cent higher than the July 1933 index (71·5), and the pay-roll index is 18·9 per cent above the level of the pay-roll index of July of last year (50·8). The base used in computing these indexes is the average for the 3-year period, 1923-1925, taken as 100. (Prior to March 1934, the indexes of factory employ-

\* Provisional figures.

ment and pay rolls, published by the Bureau, were not adjusted to conform with the trends shown by biennial Census reports and were based on the 12-month average of 1926 taken as 100. Computed on the old basis, the July employment index stands at 73.7 and the payroll index at 54.9).

The indexes of factory employment and pay rolls are computed from reports made by representative establishments in 90 important manufacturing industries of the country. In July, reports were received from 23,257 establishments employing 3,604,143 wage earners, whose weekly earnings during the pay period ending nearest July 15 totalled \$67,099,752. More than 50 per cent of the wage earners in all manufacturing industries of the country are covered in these monthly employment surveys.

Gains in employment from June to July were shown in 20 of the 90 manufacturing industries surveyed and increased pay rolls were reported in 21 industries. The most pronounced gain in employment over the month interval (33 per cent) was a seasonal increase in the canning and preserving industry. The employment increases of 21.1 per cent in the typewriter industry, 14.6 per cent in rubber boots and shoes, and 10.7 per cent in the cash register, adding and calculating machine industry were due largely to resumption of plant operations in July following the settlement of labor difficulties in certain establishments. The beet sugar industry reported a seasonal increase of 14.5 per cent. Employment in the locomotive industry continued to expand, the increase of 9.5 per cent in July reflecting orders placed by railroads for equipment. Rayon establishments showed a gain of 8.4 per cent in employment and the increase of 8.1 per cent in the cottonseed oil, cake, and meal industry marks preliminary activity in preparation for later pronounced seasonal expansion. The beverage and ice cream industries reported seasonal gains in employment of 3.2 and 4.7 per cent, respectively. A number of establishments in the slaughtering and meat packing industry reported increased employment due to large receipts of cattle, purchased by the Government. The increase of 1.5 per cent in employment in the baking industry was due primarily to the adoption of the NRA code by the industry on July 9. Among the remaining 8 industries reporting increased employment, small seasonal gains were shown in the boot and shoe, woolen and worsted goods, and tin can industries.

The most pronounced decline in employment from June to July (29.1 per cent) was

shown in the hardware industry; inventories, vacations, and drought together with a falling-off in demand for automobile hardware accounting to some extent for this sharp decline. The millinery and women's clothing industries reported seasonal losses in employment of 22.5 per cent and 21.0 per cent, respectively. The silverware industry reported a decline of 11.5 per cent, aircraft, 10.9 per cent, and shirts and collars, 10.4 per cent. Employment in shipbuilding declined 9.6 per cent and the aluminum manufactures industry showed a falling-off of 9.3 per cent. Employment in the blast furnace-steel works-rolling mills industry decreased 8.4 per cent over the month interval, and pay rolls showed a decline of 30.5 per cent due to reduced plant operations during the July 15th pay period. Among the remaining 61 industries in which employment decreased in July, declines in industries of major importance were automobiles, 7.8 per cent; foundry and machine-shop products, 5.0 per cent; sawmills, 3.8 per cent; machine tools, 2.6 per cent; cotton goods, 2.1 per cent, and newspapers, 2.0 per cent.

*Non-Manufacturing industries.*—Increased employment was shown in 10 of the 18 non-manufacturing industries surveyed by the U.S. Bureau of Labor Statistics and gains in pay rolls were reported in 8 industries. The crude-petroleum producing industry reported the largest percentage gains in both items from June to July, 2.0 per cent in employment and 5.4 per cent in pay rolls. Employment in the building construction industry increased 1.6 per cent and pay rolls increased 2.3 per cent. These gains are due to changes in private building construction and do not include employees engaged on construction projects financed by Public Works Funds. The power and light and the telephone and telegraph industries reported gains in employment of 1.2 per cent and 0.8 per cent, respectively. The increase in employment in the laundry industry was 0.7 per cent and the gains in the remaining 5 industries in which increases in employment were reported (banks, bituminous coal mining, hotels, insurance, and real estate) were 0.4 per cent or less. While employment showed a slight gain in bituminous coal mining, pay rolls in this industry decreased 9.8 per cent, reflecting the sharply reduced production in the industry during the July 15 pay period.

In the 8 non-manufacturing industries in which decreased employment was reported from June to July, the largest percentage decline (6.8 per cent) was a seasonal decrease in anthracite mining. Pay rolls in this industry

showed a drop of 20.6 per cent due to decreased production and the effects of the July 4 holiday period.

Employment in retail trade, based on reports received from 36,722 establishments, showed a decrease of 5.6 per cent from June to July. This decrease, which is partially seasonal and reflects summer inactivity, was accentuated by

the effect of strikes and the drought in certain localities. The general merchandise group (department stores, variety stores, general merchandise stores, and mail order houses) showed a decrease of 8.4 per cent. The remaining retail groups showed a net decrease in employment of 3.2 per cent from June to July.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding the contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government with respect to contracts "for construction, remodelling, repair or demolition of any work" is set forth in an Act of Parliament adopted on May 30, 1930, entitled "The Fair Wages and Eight-Hour Day Act" (chapter 20-21, Geo. V). The full text of this measure appeared in the *LABOUR GAZETTE*, April, 1930, page 383. The Fair Wages and Eight-Hour Day Act provides as follows:—

3. (1) Every contract made hereafter with the Government of Canada for construction, remodelling, repairs or demolition of any work shall be subject to the following conditions respecting wages and hours:—

(a) All persons in the employ of the contractor, sub-contractor, or of any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall be paid such wages as are generally accepted as current from time to time for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged; provided that wages shall in all cases be such as are fair and reasonable;

(b) The working hours of persons while so employed shall not exceed eight hours per day except in such special cases as the Governor in Council may otherwise provide, or, except in cases of emergency, as may be approved by the Minister.

The Fair Wages Policy was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Order in Council of April 9, 1924. The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages sched-

ules, are thereupon included by the department concerned in the terms of the contract.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions for the protection of the workmen employed, which are sanctioned by the foregoing Orders in Council.

It is further provided in the foregoing Orders in Council that "all contracts for the manufacture and supply to the Government of Canada of fittings for public buildings; harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees; mail bags, letter boxes, and other postal stores; and any other articles and things hereinafter designated by the Governor in Council" must contain provisions for the observance of the current wages rates and working hours in the district, or, in the absence of any such current standards, fair and reasonable rates and working hours. These conditions, which are referred to in the Orders in Council as "B" conditions (the Conditions of the Fair Wages Orders in Council with reference to building and construction works being designated as "A" conditions), including the following Fair Wages Clause:—

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable

hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Both in the case of contracts for building and construction work, and in the "B" conditions sanctioned by Orders in Council applicable to contracts for the manufacture of certain classes of supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and address of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages, rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed, claim therefore may be filed with the Minister of the Department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Govern-

ment to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of certain classes of supplies listed in the Fair Wages Orders in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing fair wages conditions, have been recently executed by the Government of Canada:—

#### DEPARTMENT OF NATIONAL DEFENCE

##### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

The following is a statement of contracts awarded by the Department of National Defence during the month of August, 1934, for various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

Goods contracted for	Contractor
Cloth.....	Caldwell Woollen Mills, Ltd., Appleton, Ont.
Cement.....	Canada Cement Co., Mont- real, P.Q.
Summer caps.....	Ottawa Imperial Cap Co., Ottawa, Ont.
Drawers and Shirts.....	Joseph Simpson Sons, Ltd., Toronto, Ont.

Steam shovel engineer.....	0 90	8
Steam shovel fireman.....	0 55	8
Truck driver.....	0 40	8
Stationary fireman.....	0 40	8

POST OFFICE DEPARTMENT

Following is a statement of payments made in August, 1934, for supplies ordered by the Post Office Department under contracts which were subject to regulations for the suppression of the sweating system, the securing of payment to the workers of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Orders	Amount
<i>Making metal dating stamps and type, brass crown seals, cancellors, etc.</i>	
Pritchard-Andrews Co. of Ottawa, Ltd., Ottawa.....	\$245 62
<i>Making and repairing rubber stamps, daters, etc.</i>	
Pritchard-Andrews Co. of Ottawa, Ltd., Ottawa.....	74 57
<i>Making and supplying letter carriers' uniforms</i>	
Needlecraft Mills Ltd., St. Hyacinthe, P.Q.....	700 71
Maritime Cap Co., Moncton, N.B.....	976 32
Workman Uniform Co., Ltd., Montreal, P.Q.....	845 60
<i>Mail Bag fittings</i>	
F. W. Carling, Ottawa, Ont.....	848 00
Bell Thread Co., Ltd., Hamilton, Ont.....	778 41
<i>Letter Box Locks</i>	
Pritchard-Andrews Co., of Ottawa, Ltd., Ottawa, Ont.....	30 65
<i>Stamping Machines, etc.</i>	
Machine Works, Ltd., Montreal, P.Q.....	12,084 00

### Fair Wages Conditions in Harbour Commission Contracts

Under the Fair Wages Order in Council it is provided that certain conditions, referred to therein as "A" Conditions, shall, as far as practicable, be observed by the department or departments of the Government of Canada in connection with all agreements made by the Government involving the grant of Dominion public funds in the form of subsidy, advance, loan or guarantee for any of the purposes mentioned. Under this authority, fair wages conditions are prepared from time to time in the Department of Labour for insertion in contracts awarded by the Harbour Commissioners throughout Canada. The labour conditions in question are similar to those which are applicable to contracts awarded by the several departments of the Dominion Government and include either a fair wages schedule or the General Fair Wages Clause.

The Department of Labour has been notified that the following contract has been awarded under the above-mentioned conditions:—

#### *Saint John Harbour Commissioners*

Painting of sheds at West Saint John, N.B.  
Name of Contractor, Mr. A. J. Mallette, Saint John, N.B. Date of contract, August, 1934.  
Amount of contract, \$10,108. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Foreman painters.....	\$0 65	8
Painters.....	0 55	8
Riggers.....	0 50	8
Labourers.....	0 35	8

N.B.—In any case where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

### RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement, the rates of wages for the principal classes of labour are given, with other information of general interest.

#### **Manufacturing: Fur, Leather and Products**

PROVINCE OF QUEBEC.—THE QUEBEC SHOE MANUFACTURERS ASSOCIATION, THE SHOE MANUFACTURERS ASSOCIATION OF CANADA, QUEBEC PROVINCE DIVISION, AND THE NATIONAL CATHOLIC FEDERATION OF SHOE WORKERS.

Agreement to be in effect from August 22, 1934, for one year and thereafter until notice of discontinuance given by one or more of the parties on or before May 1 of any year, in which case agreement to expire July 1 next following such notice.

No employee to be required to become a union member and all employees to have equal consideration under the agreement whether union members or not. Employers to be sole judges as to competence of their employees and to have complete control of the administration of their factories.

In accordance with the provisions of the Collective Labour Agreements Extension Act, a joint committee to be formed consisting of two representatives of the employees and two representatives of employers in the factories in the City and on the Island of Montreal and within a radius of ten miles of the Island, two representatives of employees and two representatives of employers in factories in other municipalities having a population of 3,000 or more, and two representatives of employees and two representatives of employers in factories in municipalities of a population of less than 3,000. If the Quebec Minister of Labour add to the committee one or more delegates representing employers or employees who are not parties to this agreement, the number of representatives to be appointed by the union or the employers' associations to be reduced by such number.

Employees in each shoe factory may form a shop committee to assist in the application of this agreement. The shop committee and

the proprietor of the factory may classify any operations not covered by the wage schedule.

Other provisions of this agreement are those made obligatory under the Collective Agreements Extension Act and are printed on page 825 of this issue.

### Manufacturing: Textiles and Clothing

MONTREAL, QUEBEC.—THE ASSOCIATION OF MANUFACTURERS OF CLOAKS, SUITS AND LADIES GARMENTS AND THE INTERNATIONAL LADIES GARMENT WORKERS' UNION AND THE MONTREAL JOINT COUNCIL OF CLOAK, SUIT AND DRESS MAKERS' UNION

The agreement covers the manufacture of cloaks, reefers, suits and skirts, but does not include the manufacture of dresses.

Since 1932 when the above parties had an agreement (LABOUR GAZETTE, May, 1932, page 611), agreements have been made between the union and individual employers (LABOUR GAZETTE, March 1933, page 332) and one affecting cutters only (LABOUR GAZETTE, April 1934, page 372).

The new agreement between the above parties is to be in effect from August 8, 1934, to July 1, 1935, and thereafter from year to year until notice.

Employers to recognize the union and to employ union members only, if available. No unjust discrimination to be shown by members of either party against members of the other on account of union activity or past attitude or activity in strikes, etc. Shop chairman to be elected by employees in each shop.

No employer to work as operator, presser, cutter or finisher, in his shop during the slack or sample season, and at other times only under certain restrictions, as it is the ultimate aim of the parties to have employers discontinue such work.

Hours: 44 per week, but a joint committee to consider advisability of establishing a 40 hour week.

Overtime: no overtime in slack season, that is from March 15 to August 1, and from October 1, to January 15, except in production of samples and duplicates. In the busy season, overtime may be worked but not in excess of 6 hours per week nor 1½ hours in any one day. No overtime if there are unemployed in the industry except where no more space or machines available in any one shop.

Wages for piece work: the basis for the computation and determination of prices to be paid for piece work shall be the payment for a week's work by a workman of average ability and efficiency of: operators \$40 per

week, top pressers \$40, under pressers \$35; piece pressers \$22, lining makers and finishers \$20. Skirt makers to settle prices as per garment. When the piece committee cannot agree on prices with the employers they shall be referred to and settled by the Joint Conference Board.

Sample makers of average ability and efficiency to be paid at rate of \$35 per week, and upon piece work at \$36 per week.

Wages for week work: the desired standard of wages to be: cutters \$37.50 per week, trimmers \$25, sample makers \$35, examiners and general hands \$15, button sewers \$15. The desired standard for tailors of average ability and efficiency to be \$30 per week where piece work prevails and \$27.50 where week work prevails.

With a view to the establishment of an ultimate standard of payment to employees of average ability and efficiency of the wages mentioned above, the following increases to be paid by employers: an increase of 15 per cent to cutters now receiving less than \$20 per week, an increase of \$2 per week to cutters now receiving from \$20 and less than \$30 per week, an increase of \$1.50 per week to button sewers and general hands now receiving less than \$15 per week, an increase of \$1 per week to button sewers and general hands now receiving \$15 per week and over. Before January 1, 1935, a joint committee to be appointed to revise if necessary the wages of all week workers who are underpaid and bring such wages up as close as possible to the wages established in this agreement.

No work to be given to employees to be manufactured or worked upon at home. No contracting, sub-contracting or sub-manufacturing to be done in any shop.

When there is not sufficient work for all employees in any shop, the available work to be divided as equally as possible among the employees properly engaged in the work.

A Joint Conference Board to be formed to settle all disputes, and no strike or lock-out to occur during the existence of this agreement.

### Construction: Buildings and Structures

QUEBEC, QUEBEC.—CERTAIN GENERAL CONTRACTORS AND THE BUILDING TRADES COUNCIL OF NATIONAL CATHOLIC UNIONS

Agreement to be in effect from May 1, 1934, to May 1, 1935, and for another year if no notice of change given by either party.

Only union members to be employed, if available, and if necessary to employ others, they are to join the union. The business

agent of the union to have access to the jobs.

Contractors to be responsible for any of their sub-contractors keeping the terms of the agreement.

Any contractors violating the agreement are to pay certain specified fines to the union for such infractions.

All disputes to be referred to arbitration.

Other terms of the agreement were made obligatory on all employers and employees under the Collective Agreements Extension Act, and are given on page 823 of this issue.

**THREE RIVERS, QUEBEC.—CERTAIN ELECTRICAL CONTRACTORS AND THE NATIONAL CATHOLIC UNION OF ELECTRICIANS OF THREE RIVERS**

Agreement to be in effect from August 11, 1934, to August 11, 1935.

Only union members to be employed and the business agent of the union to have access to all jobs. Contractors to see that sub-contractors also observe the agreement. Either party violating the agreement to be fined a certain amount for each infraction, such money to be paid into the joint committee.

Any disputes to be referred to a joint arbitration committee.

Other provisions of this agreement were made obligatory on all employers and employees under the Collective Agreements Extension Act and were noted in the *LABOUR GAZETTE*, July, page 638, and this issue, page 824 the minimum wage rate for licensed electricians being 45 cents per hour.

**Transportation and Public Utilities:  
Street and Electric Railways**

**TORONTO, ONTARIO.—TORONTO TRANSPORTATION COMMISSION AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, LOCAL NO. 113 AND OTHER EMPLOYEES OF THE COMMISSION IN THE SAME CLASS OF WORK AS MEMBERS OF THIS UNION**

Agreement reached as a result of conciliation by the Ontario Railway and Municipal Board, following proceedings under the Industrial Disputes Investigation Act, as noted on page 809. Agreement to be in effect from March 31, 1934, to March 31, 1936, and thereafter from year to year until notice.

This agreement is the same as the one which came into effect March 31, 1929, and which was printed in the *LABOUR GAZETTE*, July, 1929, page 808, and which was later extended to March 31, 1934.

Wage rates are unchanged: trainmen 55 cents per hour for first three months' service, 57½ cents during next nine months' service and 60 cents after one year's service, with 5 cents per hour extra for one man car operators, 5 cents per hour extra for one man bus drivers, and 25 cents per day extra while in charge of trainers; motor and truck repairmen 55 cents per hour during first three months' service, 57½ cents during next nine months' service and 60 cents after one year's service; shedmen foremen 60 cents per hour, operating shedmen who operate cars and do general shed work 56 cents, ordinary shedmen doing general shed work but not operating cars 55 cents, car cleaners 54 cents; operating trackmen 56 cents.

Hours: regular trainmen, bus drivers and city coach route drivers to work 8 hours per day as far as possible; shop and car house employees 8 per day, with work on Saturday afternoon for those required only; way department employees usually to be 9 hours per day during summer and 8 per day during winter.

**Trade Union Unemployment Benefit Plans in United States**

The activities of self help organizations of the unemployed in the United States are summarized elsewhere in this issue. This movement is paralleled by the success attending trade union unemployment benefit plans. The July issue of the *Monthly Labour Review*, official publication of the United States Department of Labor, contains a survey of the operation of such plans by Anice L. Whitney, of the U.S. Bureau of Labour Statistics. It is pointed out that trade-union unemployment benefit plans have in most instances been maintained with great difficulty during the depression. However, a recent study shows 41 plans to be in existence as compared with 48 listed in a study made early in 1931 and it is stated that a "rather remarkable story of trade-union solidarity is unfolded by the history of these plans which show members voluntarily assessing themselves high percentages of their earnings for the maintenance of the funds." Benefits have in many cases been very greatly reduced but the relief afforded by the cash benefits and the plan followed in a number of instances for sharing the work among unemployed members have been regarded as of such value that in nearly all cases there was every disposition to continue the funds.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, AUGUST, 1934

### Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight, both the weekly family budget in terms of retail prices and the Dominion Bureau of Statistics index number of wholesale prices being however somewhat higher.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.51 at the beginning of August as compared with \$7.43 for July; \$7.43 for August, 1933; \$11.63 for August, 1929; \$11.10 for August, 1926; \$11.44 for August, 1921; \$16.92 for June, 1920 (the post war peak); and \$7.68 for August, 1914. Prices of pork, bacon, eggs, milk, flour and potatoes were higher, while slight decreases occurred in the prices of butter, beef and granulated sugar. Including the cost of fuel and rent with that of foods the total budget was \$15.92 at the beginning of August as compared with \$15.84 for July; \$15.96 for August, 1933; \$21.90 for August, 1929; \$21.32 for August, 1926; \$21.98 for August, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.41 for August, 1914. Fuel and rent were unchanged.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics based on prices in 1926 as 100 was 72.3 for August as compared with 72.0 for July; 69.5 for August, 1933; 98.4 for August, 1929; 99.1 for August, 1926; 106.0 for August, 1921; 164.3 for May, 1920 (the post war peak); and 66.1 for August, 1914. Eighty-nine prices quotations advanced, ninety-eight declined and three hundred and eighty were unchanged.

In the grouping according to chief component materials one of the eight main groups was higher, five were lower and two were unchanged. The groups which declined were: the Fibres, Textiles and Textile Products group, mainly due to lower quotations for raw jute, raw silk and raw wool, worsted cloth yarns and wool cloth; the Wood, Wood Products and Paper group, because of lower prices for lumber and timber; the Iron and its Products group, due chiefly to reductions in the prices of scrap iron; the Non-Ferrous Metals and their Products group, owing to lower quotations for copper, copper sheets and bars, tin and zinc which more than offset higher prices for antimony, lead and silver; and the Chemicals and Allied Products group, because of lower prices for dynamite and shellac. The Vegetables and Vegetable Products group advanced, because of higher prices for grains, flour and milled products which more than offset declines in the prices of sugar and

potatoes. The Animals and their Products group and the Non-Metallic Minerals group were unchanged, in the former higher prices for calves, hides, cured meats and eggs offset lower prices for steers, hogs, lambs and leather.

In the grouping according to purpose consumers' goods were unchanged from the previous month, foods, beverages and tobacco being lower, mainly because of lower prices for fresh meats and sugar, while other consumers' goods advanced, chiefly as a result of higher quotations for tires and silk hosiery. Producers' goods were higher because of advanced prices for materials used in the milling industries and for miscellaneous producers' materials.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of August of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rental are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively

large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on

#### CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1934\* (Average prices in 1913=100)

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 13½%; Clothing, 18½%; Sundries, 20%.

prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Beef prices were slightly lower in most localities, sirloin steak being down in the average from 22·7 cents per pound in July to 22·5 cents in August and shoulder roast from 12·2 cents per pound to 11·8 cents. Prices in the prairie provinces were considerably lower than in other provinces. Mutton increased from an average price of 20·5 cents per pound in July to 20·8 cents in August. Both fresh and salt pork advanced, the former being up from an average of 20·9 cents per pound to 21·7 cents and the latter from 18·7 cents per pound to 19·2 cents. Breakfast bacon rose from an average of 34·4 cents per pound in July to 36·4 cents in August. The price at the beginning of the year was 24·5 cents per pound.

Eggs were generally higher, fresh being up from an average of 24·9 cents per dozen to 27·2 cents and cooking from 21·1 cents per dozen to 23·7 cents. Prices in the prairie provinces were somewhat lower than in other parts of Canada. Milk was fractionally higher at an average price of 9·8 cents per quart. Butter prices were again lower, dairy being down from an average of 22·1 cents per pound in July to 20·8 cents in August and creamery from 25·2 cents per pound to 24·1 cents.

The price of bread has been unchanged in the average from 5·8 cents per pound during the last four months, while flour was fractionally higher at an average of 3·4 cents per pound in August as compared with 3·3

\*Prior to 1926 number of commodities was 236 and commencing in January, 1934, the number is 567.

(Continued from page 878)

in July and 3.1 in May. Onions declined from an average of 6.3 cents per pound to 5.6 cents. Potatoes showed a seasonal increase in price being up in the average from \$1.13 per ninety pounds in July to \$1.22 in August. Prices were considerably lower in Quebec and New Brunswick than in other provinces. Granulated sugar was fractionally lower at an average price of 6.7 cents per pound and yellow was unchanged at 6.6 cents per pound. Anthracite coal was up from an average price of \$14.82 per ton in July to \$14.88 in August. Increases were reported from Halifax, Orillia, Hamilton, Brantford, Stratford, Chatham, Sarnia and North Bay. No changes were reported in rent

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$15.50; Windsor, Nova Scotia, \$16.50; Moncton, \$16; Saint John, \$13; Quebec, \$14.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$15.50; Montreal, \$15.50; Ottawa, \$16.50; Kingston, \$16; Belleville, \$16; Peterborough, \$17; Oshawa, \$14.75; Toronto, \$15;

St. Catharines, \$15.50; Hamilton, \$15; Galt, \$16; Windsor, \$14; Sudbury, \$17; Cobalt, \$18; Timmins, \$19; Port Arthur, \$16.50; Fort William, \$16; Winnipeg, \$19.50.

## Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices in most cases were higher. No. 1 Manitoba northern cash wheat, Fort William and Port Arthur basis, advanced from an average price of 82 cents per bushel in July to 86 cents in August. The high price during the month was 94 cents per bushel reached on the 9th. In coarse grains western oats advanced from an average of 38.8 cents per bushel in July to 43.6 cents in August, flax from \$1.598 per bushel to \$1.627, rye from 57.9 cents per bushel to 68.7 cents and barley from 45.9 cents per bushel to 56.6 cents. In milled products flour was up from \$5.80 per barrel to \$6 and rolled oats from \$3.05 per ninety pound bag

to \$3.10. Granulated sugar at Montreal fell from \$5.18 per hundred pounds to \$5.09. Ceylon rubber at New York advanced from 14.4 cents per pound to 15.1 cents. The price in August, 1933, was 7.5 cents per pound. In live stock choice steers at Winnipeg declined from \$4.15 per hundred pounds to \$3.83; bacon hogs at Montreal from \$9.37 per hundred pounds to \$8.75 and at Winnipeg from \$8.27 per hundred pounds to \$7.74; lambs at Toronto from \$7.54 per hundred pounds to \$6.35 and at Winnipeg from \$5.55 per hundred pounds to \$4.96. Veal calves at Toronto advanced from \$4.82 per hundred pounds to \$5.65 and at Winnipeg from \$3.61 per hundred pounds to \$4.15. Butter prices showed little change during the month the August average being 20.9 cents per pound at Montreal. Cold storage hold-

ings at the beginning of August were reported to be 21 per cent higher than a year ago and 70 per cent higher than at the first of the previous month. Eggs at Montreal advanced from 25.3 cents per dozen in July to 26.1 cents in August and at Toronto from 22.9 cents per dozen to 23.9 cents. Storage holdings at the beginning of August were reported to be about 7 per cent greater than at the beginning of July. Raw cotton at New York was up from 12.7 cents per pound to 13.1 cents. The unfavourable government crop estimate was said to be a factor in this advance. Raw wool prices were 1½-2 cents per pound lower at 15-16 cents. Common fir lumber was \$1 per thousand board feet lower at \$18. Scrap iron declined from \$7-\$10 per ton to \$6.50-\$9.50.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to significant changes in prices in Great Britain and certain other countries. The authorities for the wholesale prices index numbers are named in all cases. The latest table showing cost of living and wholesale prices index numbers for various countries appeared in the LABOUR GAZETTE for July.

### Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1924=100, was 62.3 for July, a decline of 0.1 per cent for the month. The principal change in any one group was a rise of 4.1 per cent in the cereals group, partly offset by declines in meat and fish and other food. An advance of 2.5 per cent in cotton prices was offset by substantial declines in wool and other textiles. Other industrial materials groups showed only small changes.

The *Statist* index number, on the base 1867-1877=100, was 82.4 at the end of July, an increase of 2.1 per cent for the month, and of 0.9 per cent over the level of a year previous. The advance during July was due almost entirely to the sharp increase in vegetable foods, amounting to 17.1 per cent. All items in this group were higher than in the previous month, the greatest change occurring in the price of potatoes which rose 61 per cent during the month.

COST OF LIVING.—The index number of the Ministry of Labour, on the base July 1914=100, was 142 at the beginning of August, an increase of one point for the month, due to

an advance in food prices, as the other groups were unchanged from the July level.

### France

WHOLESALE PRICES.—The General Statistical Office index number, on the base 1914=100 (gold index) was 73 for July, a decrease of one point for the month. Food was lower due to a substantial decrease in vegetable foods, partly offset by advances in animal foods and the sugar, coffee and cocoa group. Industrial materials as a whole were unchanged, small increases in minerals and metals and textiles being offset by declines in miscellaneous commodities.

### Germany

WHOLESALE PRICES.—The Federal Statistical Office index number, on the base 1913=100, was 98.9 for July, an increase of 1.7 per cent for the month. The advance was general, including twelve of the sixteen groups. The most notable change was the increase in all the agricultural products groups.

COST OF LIVING.—The official index number, on the base 1913-1914=100, was 122.9 for July, an increase of 1.2 per cent for the month, due principally to an advance of 2 per cent in food prices, while other groups also were slightly higher, with the exception of rent which was unchanged.

### New Zealand

WHOLESALE PRICES.—The index number of the Census and Statistics Office, on the base 1909-1913=1000, was 1337 for June, a de-

crease of 0.2 per cent for the month. Small advances in foodstuffs of vegetable origin and animal products were more than offset by declines in the other main groups.

**COST OF LIVING.**—The official index number, on the base 1926-1930=1000, was 812 for May, an advance of one per cent over the February level, due to slight increases in all the main groups except rent.

### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926=100, was 74.8 for July, an increase of 0.3 per cent over the June level, and of 8.6 per cent over July, 1933. The principal groups showing increases were farm products, foods and fuel and lighting materials. Raw materials, including the basic farm products, raw silk, crude rubber and other similar commodities were 1.5 per cent higher than for June, semi-manufactured goods declined 0.3 per cent, while finished products on the whole were unchanged for the month.

*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated), which is the sum total of the prices per pound of 96 commodities of common consumption, was \$9.3216 at August 1, a rise of 0.9 per cent for the month, due chiefly to higher prices for foodstuffs, cotton and cotton goods, the increase in which was the result of drought in large areas of the country.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost *per capita* of a year's supply of commodities, was \$167.912 at August 1, an increase of 0.45 per cent for the month, and is the highest level reached since October, 1930. The increase in July was confined to the breadstuffs and dairy and garden produce groups.

**COST OF LIVING.**—The index number of the Department of Labour and Industries, Massachusetts, of the cost of living in Massachusetts, on the base 1913=100, was 132.9 for July, an advance of 0.8 per cent, due chiefly to an increase of about 3 per cent in food prices; fuel and light prices were also higher.

### Child Labour in the United States

The proposed Child Labour Amendment to the United States Constitution (LABOUR GAZETTE for June, 1934, page 497) has not been ratified by any State in 1934 and has been rejected by nine. In 1933 fourteen States ratified the Amendment and were added to the six who had previously done so. No time limit has been set for ratification and the National Child Labour Committee, incorporated by act of Congress in 1907 to promote the welfare of children has announced that it will conduct a campaign to obtain the sixteen ratifications now necessary to give the required three-fourths majority. The Amendment, which was passed by Congress in 1924, would enable Congress to legislate on the subject of child labour. Its supporters have expressed the belief that a Federal law would embody standards similar to those of the child labour provisions of the industrial codes expiring in 1935. Certain of these provisions were outlined in the February 1934 issue of the LABOUR GAZETTE at page 159.

A memorandum issued recently by the Children's Bureau of the United States Department of Labour states that up to August 6, 1934, about 500 codes had been approved, applying to the principal manufacturing and mining industries, retail and wholesale trades,

hotels, restaurants, banks and newspapers. Most of these codes contain a prohibition of the employment of children under 16 years of age and many also forbid the employment of young persons under 18 years of age in certain dangerous occupations, to be designated in most cases by the code authority. Many employers in industries not yet under codes are operating under the President's Re-employment Agreement or codifications thereof, and for all those within the scope of the National Industrial Recovery Act a standard code has been drawn up, which prohibits employment under 16 years of age (or 18 in hazardous occupations) and requires the industry to operate for the present under the wage and hour provisions of the most closely related approved code. In the canning industry, for which the code fixes a minimum age of 16 years or 18 for dangerous occupations, a number of children under 16 years of age were formerly employed. There are some types of child labour which are not regulated either by the codes or the Reemployment Agreement, including domestic service in private houses and commercialized agriculture.

A survey by the United States Children's Bureau noted in the LABOUR GAZETTE for January, 1934, page 21, indicated a decrease in the number of employment certificates issued for children.

## CENSUS OF MANUFACTURING INDUSTRIES IN CANADA, 1932

## Employees, Wages and Hours of Labour

THE Dominion Bureau of Statistics, under the Statistics Act of 1918, takes annually by mail an industrial census covering statistics of fisheries, mines, forestry, and general manufacturing in Canada. Figures for all manufacturing industries for the year 1932 are now available, and the accompanying tables give the figures in some detail.

Information as to the numbers of wage earners working eight hours or less per day, nine hours, ten hours and over ten hours, was secured each year from 1924 to 1930, the resulting figures for the principal manufacturing industries being given in the LABOUR GAZETTE for January, 1927, page 105; October, 1929, page 1189 and December, 1932, page 1296. For 1931 information was secured as to the numbers of wage earners whose regular hours of labour were forty hours or less, etc., and was given in the LABOUR GAZETTE for September, 1933, p. 955.

The accompanying table II shows the average number of wage earners during the year 1932 male and female, and total wages paid for each group of industries and for the im-

portant industries in each group; also the number of establishments and the numbers of wage earners by the length of working week periods. Figures are not included for most of the industries having less than one thousand wage earners, but the group totals and grand total include the figures for such industries.

Table III gives similar information by provinces and by groups of industries. In previous statements figures by provinces were not included.

Information as to hours per week in fish curing and packing and in butter and cheese making is not available, and detailed figures for these industries are accordingly omitted. The fish curing and packing industry employed an average for the twelve months of 2,657 wage earners, male, and 985 female, total wages being \$1,741,404, there being in addition 486 persons on salary. The butter and cheese industry employed an average for the twelve months of 7,600 wage earners, male, and 262 female, total wages being \$7,050,065, the number on salary being 3,358 males and 688 females with total salaries of \$4,169,301.

TABLE I.—MANUFACTURING INDUSTRIES, PRINCIPAL STATISTICS COMPARED FOR 1928, 1929, 1930, 1931 AND 1932

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Quebec Professional Syndicates Act May be Invoked by Workmen Who are not Members of a Syndicate in Respect of Contracts to Which They are not Parties

TWO recent decisions of the Quebec Court of King's Bench affirming judgments of the Superior Court at Montreal clarify the legal rights of workmen, who are not members of a syndicate or trade union, under the Professional Syndicates Act of Quebec in relation to contracts to which they are not parties but which stipulate the wages and hours for the job on which they are employed.

These decisions are based in part on section 14a of the Professional Syndicates Act which was added to the statute in 1931. In October, 1930, a claim for wages by a workman at the rate fixed in a contract for the job between his employer and the city of Quebec was disallowed by the Superior Court on the ground that the workman, not being a party to the contract and having made an agreement with the employer for a lower rate of wages, could not later claim wages at the rate stipulated in the employer's contract with the city.\* About forty similar cases were disposed of by this decision. The chief magistrate expressed his reluctance in coming to such a decision in view of the violation by the employer of the "fair wages" schedule in his contract with the city of Quebec, but he felt there was no other course open to him in the then state of the law.

At the next session of the Quebec Legislature, the Professional Syndicates Act was amended by adding section 14a:

14a. If it be stipulated in any contract that workmen, or the members of the syndicate, union or federation of syndicates shall receive a stated wage, such workmen or members, although not a party to the contract, are entitled to the rate of wages therein stated, notwithstanding any renunciation thereto afterwards agreed upon by them, whether express or implied.

Following this amendment to the law, several actions were instituted by workmen to recover wages alleged due under the terms of the contracts between their employers and the city of Montreal. In these cases, different judges of the Superior Court were in agreement in holding that workmen who were members of a trade union or syndicate had a right of action, under section 14a, with respect to a contract between the employer and the city. There was a difference of opinion, however, as to whether a workman who was not a member of the trade union whose members were employed on the job on which he was also

employed could bring an action against the employer for the rate of wages stipulated in the contract.

In 1932 in *Jensen v. Grimstead and Son* (LABOUR GAZETTE, April, 1932, page 472), involving a contract between the Protestant Board of School Commissioners of Montreal and the defendant, it was held that section 14a included all classes of workmen whether they were members of a syndicate or not and that the plaintiff was entitled to the rate of wages fixed in the contract in the same manner as if he had been a party to the contract. In 1933, two conflicting judgments were given in connection with claims for wages based on the employers' contracts with the city of Montreal. In *Bilodeau v. Loranger et Cité de Montreal* (LABOUR GAZETTE, May 1933, p. 570) the judge held that the Professional Syndicates Act was concerned with syndicates and their members only and that to concede a right of action to workmen independently of their membership in a syndicate was to modify the fundamental purpose of the Act. Such an interpretation could be made only where the intention to that effect had been expressed clearly by the Legislature. On the other hand, in a similar case a few weeks later (*Corbeil v. Cadieux*) (LABOUR GAZETTE, May, 1933, p. 571) the judge, after referring to the contradictory decisions in such cases, concluded that individual workmen, whether members of a trade union or not, had a right of action by virtue of section 14a. Further, he held that it could not be maintained that in such a case the right of action belongs to a syndicate because the syndicate can bring an action only on a collective agreement. "This article 14a is thus a new law and it is in no way concerned with syndicates. It is not the syndicate but the member of the syndicate or the workman who alone can avail himself of this provision. . . . Without article 14a, only the city could have sued the employer, to-day the right belongs to the workman; it belongs to him not by virtue of an agreement but as a legal right."

In June, 1933, two claims for wages were heard in the Superior Court at Montreal by Mr. Justice Martineau involving contracts let by the city of Montreal for construction work and containing the schedule of "fair wages" to be paid to different classes of workmen

\* *Juneau v. Plamondon et Cité de Québec*, Labour Gazette, September, 1931, p. 1052.

which had been adopted by the city of Montreal on May 31, 1929. In both cases, the plaintiffs' claims were allowed and these decisions were confirmed by the Court of King's Bench in June, 1934. The plaintiffs contended that they were employed on certain classes of work that, according to the contracts, were to be paid for at higher rates than they had received. In one case the plaintiff claimed that he worked as a rigger on structural iron work and should have been paid as a rigger. In the other case, the plaintiffs were engaged as labourers but they contended that later they were employed as carpenters but not paid the carpenter's rate. The decision as to the class of work was in favour of the plaintiffs in both cases.

As to the defence and first ground of appeal, that the plaintiffs, or respondents in the appeal cases, not being parties to the contracts between the defendants and the city, were not entitled to invoke the provisions of those contracts, the five members of the Court of King's Bench were agreed that the contention was not well founded. Mr. Justice Bond distinguished the cases before him from *Bilodeau v. Conseil de metiers de la construction des syndicats nationaux catholiques de Quebec, Inc.*, in which the decision of the Court of King's Bench had been to the effect that while Article 1029 of the Civil Code provides that a party "may stipulate for the benefit of a third party when such is a condition of the contract which he makes for himself," yet this Article is ineffective where the third party to be benefited remains undetermined. In the *Bilodeau* case, the contract between the parish authorities and a building contractor stipulated that as far as possible members of the Catholic Unions should be employed and

the action was instituted by certain workmen who were members of such a union. In the opinion of the Court hearing that case it was impossible to say that the plaintiffs had any particular right to demand work under the contract. In the cases presently before the Court, the plaintiffs had been engaged by the contractors and were therefore clearly determined under the circumstances as among those contemplated by the contracts. They have, therefore, right of action and on this ground alone it was held that the appeal should be rejected.

But the case did not rest only on Article 1029 of the Civil Code. The plaintiffs had invoked section 14a of the Professional Syndicates Act and in the opinion of the trial judge, the section applies equally to workmen who are not members of a syndicate and to those who are. Mr. Justice Bond of the King's Bench stated: "In my opinion it is impossible to overlook the plain terms of the Act now in question, which expressly stipulates that it shall be for the benefit of workmen, or the members of a syndicate. The apposition of terms is too striking to be overlooked, and, moreover, as I have already intimated, it does not constitute a striking departure from the principles of the civil law contained in Article 1029 C.C. As a consequence, I reach the conclusion that this ground of defence cannot be entertained." With this opinion, the other members of the Court agreed and the appeal in both cases was dismissed. (*Dufresne Construction Company, Ltd. (Defendant), Appellant, v. Dion (Plaintiff), Respondent; Duranceau and another (Defendants), Appellants, v. Dodge and others, (1934), 57 Cour du Banc du Roi, 132 and 147.*)

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

THERE was a decline in employment at the beginning of September, according to returns received by the Dominion Bureau of Statistics from 8,820 firms, each with a minimum of 15 employees, representing practically all industries except agriculture, fishing, hunting and highly specialized business operations. These firms employed 922,339 persons, or 9,444 fewer than in the preceding month. The experience of the last thirteen years shows, on the average, a slight recession in industrial activity between August 1 and September 1, but the reduction this year exceeded the average. That this was so, was due to unusually pronounced declines in highway construction, which generally releases men at this season, partly on account of harvest activities. The employment index number (with the average for the calendar year 1926 as the base equal to 100) stood at 98.8 on September 1, as compared with 99.9 on August 1, 1934, and with 88.5 on the same date in 1933. On September 1 of the twelve preceding years the index was as follows: 1932, 86.0; 1931, 107.1; 1930, 116.6; 1929, 126.8; 1928, 119.1; 1927, 111.0; 1926, 106.2; 1925, 97.8; 1924, 94.2; 1923, 101.2; 1922, 94.8, and 1931, 89.8.

At the beginning of September, 1934, the percentage of idleness reflected by local trade unions was 16.5 in contrast with 17.9 per cent at the beginning of August, and with 19.9 per cent at the beginning of September, 1933. The percentage for September was established from the reports received by the Department of Labour from 1,700 labour organizations with a membership aggregate of 158,970 persons.

Reports received by the Department of Labour from the offices of the Employment Service of Canada during the month of August, 1934, indicated a decline from July in the volume of business transacted as shown by the average daily placements effected, but an increase over the placements recorded daily during the corresponding month a year ago, the greatest loss in the first comparison being in construction and maintenance and the highest

gain under the second in logging. Vacancies during August this year numbered 34,304, applications for work 58,372 and placements in regular and casual employment 32,378.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting and rent at the beginning of September was slightly lower, \$15.87 as compared with \$15.92 the previous month, due to the somewhat lower cost of foods, chiefly potatoes. Comparative figures for certain previous dates are \$15.78 for September, 1933; \$21.90 for September, 1929; \$21.15 for September, 1926; \$20.90 for September, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.33 for September, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics was 72.0 for September as compared with 72.3 for August; 68.9 for September, 1933; 97.8 for September, 1929; 98.5 for September, 1926; 103.5 for September, 1921; 164.3 for May, 1920 (the post war peak); and 67.2 for September, 1914.

The most recent statistics available reflecting industrial conditions in Canada are given in the table on page 898. The index of the physical volume of business was substantially higher in August than in the previous month and was fractionally lower than in May, the high point of the year. Of the chief factors included in the index those indicating mineral production, manufacturing, construction, electric power output, trade employment, car-loadings and exports were higher than in July, while imports were lower. As compared with August, 1933, all these factors were higher. Information available for September shows employment at a lower level than in August, though higher than a year ago, while car-loadings and gross earnings of the Canadian National Railways were higher both as compared with the previous month and with September, 1933. Sugar manufactured for the four weeks' period ending September 8th was considerably lower than in the previous period but higher than for the corresponding period last year.

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(4) Figures for end of previous month.

(5) Figures for four weeks ending September 29, 1934, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending September 8, August 11, and July 14, 1934; September 9, August 12, and July 15, 1933.

(7) MacLean's Building Review.

The figures for strikes and lockouts in Canada during September show an appreciable decline from the previous month in the number of disputes recorded. Decreases appeared also in the number of workers involved and the time loss incurred, although strikes of women's clothing factory workers in Montreal involved large numbers of workers and caused a considerable time loss during the month. The number of disputes recorded was 19, involving 6,559 workers and resulting in a time loss of 65,277 man working days, as compared with 29 disputes in August, involving 11,741 workers and 84,682 days' time loss. Ten disputes were carried over from August and nine disputes commenced during September. Thirteen of the nineteen disputes were terminated during the month, four resulting in favour of the employers, four in favour of the workers, while five ended in compromises or were partially successful. The disputes unterminated at the end of September numbered six and involved 1,391 workers. In September, 1933, there were on record 23 disputes, involving 6,996 workers and resulting in a time loss of 38,274 man working days.

#### **Proposed conference on jurisdiction in social legislation**

Announcement was recently made by Sir George Perley, acting Prime Minister (in the absence of the Prime Minister, Rt. Hon. R. B. Bennett at the League of

Nations Assembly in Geneva) that the Government had in course of preparation a measure dealing with unemployment insurance which it would introduce at the next session of Parliament.

Concurrently with this announcement, the following letter, dated August 31, was addressed by the Prime Minister to the provincial premiers:—

"As I indicated at the meeting with the provincial premiers in July last, it is my purpose to call a conference of representatives of the governments of all the provinces to meet at Ottawa before the end of the year to discuss with the federal government the following questions and such other matters as may be placed on the agenda after I have been advised of the views of the premiers of the several provinces:

"1. What steps can be taken to reduce the evils of duplicate taxation and provide a more logical allocation of sources of revenue now available to Dominion and provinces.

"2. Are the provinces prepared to surrender their exclusive jurisdiction over legislation dealing with such social problems as old age pensions, unemployment and social insurance hours and conditions for work, minimum

wages, etc., to the Dominion Parliament? If so, on what terms and conditions?

"3. Is it desirable to endeavour more clearly to define the respective jurisdiction of the Parliament and Provincial legislatures with respect to health and agricultural and other matters in which there is a duplication of effort by Federal and provincial authorities?

"4. Consideration of the extent to which there may be more complete coordination of the effort of Federal and provincial authorities with respect to research work.

"5. Consideration of the extent to which there may be more complete co-ordination of the effect of the effort of federal and provincial authorities with respect to gathering and publication of statistical information and what steps, if any, should be taken to secure uniformity and complete accuracy of Canadian statistics.

"6. In the event of it being determined that the legislative jurisdiction of the Dominion Parliament and Provincial Legislature as at present defined by the British North America Act should be modified, a determination of the form in which the amendments to the British North America Act should be made.

"It has become necessary for me to attend the Assembly of the League of Nations and I am leaving to-morrow.

"May I hope that within the next few weeks you may be able to consider carefully the matters to which I have referred, and that on my return there will be awaiting me a reply from you indicating whether or not you think other questions should be considered at the conference, and if so, what questions, and indicating when would be the most convenient date for you to attend a conference; also such criticisms as you may think pertinent with respect to the questions which I propose to place upon the agenda."

#### **Hours of work under minimum wage orders in Ontario**

The Ontario Minimum Wage Board has amended its Orders to conform with the amendment to the Minimum Wage Act which was passed at the last session of the Legislature.

This amendment fixed the maximum number of hours per week for which the minimum wage established by the Board is to be paid. Such maximum hours are 48 per week in municipalities having a population of over 50,000, 50 per week in municipalities with a population of 10,000 to 50,000 inclusive and 54 per week in other municipalities. It is provided, however, that if, in any industry or employment to which the minimum wage applies, the prevailing weekly hours are less

than the fixed maximum, such prevailing weekly hours shall be considered to be the maximum number of hours for which the minimum wage is to be paid. Overtime must be paid for at not less than the established minimum rate. These provisions have been incorporated in all minimum wage orders except those governing hotels, restaurants, etc., seasonal canneries, and shoe shine parlours.

**New prices  
fixed for  
milk in  
Edmonton  
and Quebec**

Edmonton. Earlier orders fixing the prices to be charged for milk and cream in Edmonton and Calgary during the summer months were noted in the *LABOUR GAZETTE*, July, 1934, page 584.

Under the new order the minimum price to be paid to producers by distributors of milk and others purchasing milk in bulk for distribution as fluid milk in Edmonton is \$1.85 per 100 pounds (butter fat standard based on average test). The minimum prices to be charged to consumers by distributors are 7 cents per pint (16 tickets for \$1), and 10 cents per quart (10 tickets for \$1). For milk sold by distributors to stores the price is one cent per bottle less than retail prices, and the milk sold by stores must not be less than the retail prices as above. Wholesale prices to hotels, restaurants, cafes, bakeries, factories, hospitals or public or charitable institutions purchasing milk for use or consumption on the premises are, for standard milk: 33 cents per gallon, 9 cents per quart (bottles); 6 cents per pint (bottles). The price to hospitals and public institutions buying over 30 gallons of milk daily is 25 cents per gallon. Other sections of the order fix the prices for cream and buttermilk.

The preamble to the order states as follows: "Application has been made to the Board of Public Utility Commissioners by the Milk Producers' Association of the Edmonton District for the bringing into effect of a winter price for milk in the said City. The Board brought in a summer price applicable to the City on June 15th last, and the above mentioned application asked that the winter price be restored, such price to be effective on the 15th day of this present month. This the Board was unwilling to do. Investigation has, however, shown that, notwithstanding the abundant rainfall this year pastures in this area are definitely finished for the season

and that the great majority of the efficient producers are already feeding their herds both long feed and grains; in addition feed prices have already considerably advanced over those prevailing at the same time last year. The Board brought in the winter price last year on the 15th day of September, but having in mind the conditions already mentioned, it is deemed advisable to bring in the winter price this year on the 1st day of September, coming. This means that the producers' price in effect before the present summer prices were brought in, namely \$1.85 per one hundred pounds, will become effective on the 1st of next month. This leaves to the producer a net return, after allowing for the hauling charges, which the producer has to pay, of from \$1.65 to \$1.70 per one hundred pounds, for that portion only of the milk used for the fluid trade."

The Dairy Industry Commission of the Province of Quebec, on September 20, published an order applying to any person who directly or indirectly sells or delivers milk within the limits of the region of Quebec (including the City of Quebec). It provides that any pasteurized milk dealer must pay to the producer, for each 100 pounds of milk on a 3.25 per cent butterfat basis, \$1.60 net F.O.B. Quebec. Any raw milk dealer must pay the producer on the same basis \$1.80 net F.O.B. business place of dealer. No person shall offer, sell or deliver to the consumer, milk at prices less than 5 cents a pint, 10 cents a quart, or 40 cents a gallon. However, the price that may be charged to a grocery, hotel, restaurant, boarding house, dealer or business establishment, may be as low as 4 cents a pint or 8 cents a quart (boarding houses mean establishments where 30 meals or more a day are served).

**Canadian  
Co-operative  
Societies  
in 1933**

A table of statistics of co-operative societies in Canada for 1933 is published in the September issue of the *Canadian Co-operator*.

The societies listed include 34 retail societies (of which three furnished no reports); the co-operative wholesale societies of Manitoba and Saskatchewan (the Ontario Society did not report); two marketing societies, namely the Ontario Onion Growers' Co-operative, Limited, and the Manitoba Pool Elevators, Limited (the Saskatchewan Co-operative Wheat Producers, Limited, did not report); three co-operative dairy societies, of which only one reported, namely, the Calgary and District Milk Producers' Association Limited (the Saskatoon

Dairy Co-operative Marketing Association Limited, and the Community Co-operative Dairy, Limited, Toronto, did not report); and one transportation Society, namely the Rossland Co-operative Transportation Society.

The statistics for the Societies furnishing reports show that in 1933 the number of members was 10,735; share capital, \$481,660.79; loan capital, \$198,863.12; value of stock in trade, \$1,019,233.24; other assets, \$3,487,769.57; reserve fund, \$537,548.22; number of employees, 582; salaries and wages paid, \$690,171.71; sales for the year \$3,477,482.77; amount of purchase dividend declared, \$83,941.68; net surplus, \$413,626.40.

#### **Place of co-operation in recovery program in U.S.A.**

At the request of the Consumers' Advisory Board of the National Recovery Administration, the United States Bureau of Labour

Statistics has issued a bulletin (No. 598) for the use

of groups wishing to organize co-operative buying clubs or consumers' co-operative societies on the Rochdale plan. The bulletin contains rules, with model by-laws, for the organization and management of associations and clubs. "The most effective group with which to begin organizing a co-operative society," it is suggested, "is one in which the members have personal acquaintance with each other. It is best that members should be neighbours; or persons bound by some fraternal tie; or members of the same labour union, community centre, farmers' fraternal or marketing or other organization, which already gives a sense of kinship. Before launching a co-operative business the group should meet regularly for the purpose of studying and discussing the history, the methods, and the possibilities of co-operation. Literature on the subject should be distributed. Members of the group should individually secure as much information on the subject as possible. This preliminary education has been found by experience to be important."

The general principles underlying consumers' co-operation are stated as follows: "In an association organized on a truly co-operative basis there is genuine democracy. Membership is voluntary and open to all. Shares are of low denomination and may usually be paid for in instalments. At meetings each member has 1 vote and no more, regardless of the amount of stock held. In order to insure comparative equality in the financial status of members the number of shares that may be held by any one member is limited. Capital receives interest at no more than a legal rate,

it being the co-operator's idea that the owner of capital should receive a fair price for the use of his money, but no more than a fair price. The possessor of a great deal of money therefore has no more power in the affairs of the society and no higher status than his poorer fellow members. In the co-operative movement all are on the same footing. It has been said that the motive power of the movement is the man and not his money, and this principle is logically extended to every part of the movement, federations as well as retail societies. No financial group can obtain a controlling interest in a retail co-operative society; and such a society can increase its power over the policy and operations of a co-operative wholesale society only by increasing its membership. On the other hand, all the economy which results from the combination of a large number of industrial operations under one management can be obtained under the co-operative system through the method of federating societies for the purposes of wholesale trading and manufacture.

"If co-operative organizations are to be successful it is necessary that all of the above conditions obtain and that certain fundamental principles be followed in both organization and operation. This has been disclosed very clearly by studies made by the Bureau of Labour Statistics and by experience both in the United States and abroad."

#### **Practice of vocational guidance in Great Britain**

The National Advisory Councils for Juvenile Employment for England and Wales and for Scotland recently published a report on the national scheme of

vocational guidance which has been in operation for over 21 years. Young persons receive advice in regard to their future vocation both by the collective and by the individual method. Under the former are included literature on careers in various forms; lectures and addresses by representatives of the local committee, industrial experts, etc.; visual methods, comprising visits to factories and works; and the use of the cinema and lantern slides. The Councils recommend that the system of lectures should be extended, not only so as to afford a pupil in his last year at school some knowledge of the general structure of local industry and the opportunities of further education in relation to any particular trade which will be available to him, but also to give to older boys and girls who have passed the school-leaving age and are mainly unemployed details of the industrial opportunities

which are available to them in the area. They also recommend a considerable extension of the system of printed leaflets on careers, drafted from a national or a regional standpoint; together with, in suitable cases, handbooks descriptive of the varied trades of extensive industrial regions.

Individual advice on the selection of a career is given to boys and girls either by conferences at the schools, at which representatives of the local committee, the head teacher, the boy or girl and the parent are present; or by interviews between members of the committee, the boy or girl and the parent, held on Exchange or Juvenile Employment Bureau premises, generally during evening hours. In the report the Councils assess the relevant merits of those two systems, and declare a general preference for the former. The grounds of their choice are that the conference is held on ground with which the boy or girl is familiar; the presence of the head teacher, sometimes of the class teacher, can generally be assured; and parents, who often make a point of attending on important school occasions, are able to contribute to the discussion much of value regarding the child's preference and any circumstances of family life which may have a limiting effect upon the choice of work. The principal advantage of the conference system, the Councils consider, however, is its comprehensiveness, in that practically every child of the school-leaving age is enabled to be brought under the advisory system, and attendance is so general as to be almost universal.

#### **Employment service in charge of unemployment insurance in Belgium**

A recent decree amended the former system of voluntary unemployment insurance in Belgium. This system provided for the establishment by the local authorities of Unemployment Funds, whose functions and activities have hitherto been concerned with the supervisory control of approved unemployment societies and their unemployed members and the distribution of unemployment relief funds provided by the State. The intention of the present decree, as stated in the prefatory declaration, is to supersede the Unemployment Funds by machinery with wider functions, which will include responsibility for placing work. The decree, accordingly, abolishes the Unemployment Funds and replaces them by Placing and Unemployment Offices directly dependent on the Ministry of Labour and Social Welfare, the expenses of which will be defrayed entirely by the State.

The Minister of Labour and Social Welfare will establish at least one and not more than three of these Placing and Unemployment Offices, with specified areas of competence, in each province, and may also authorize these offices to establish not more than six sub-offices, in the communes in their area. The functions of the Placing and Unemployment Offices will include the placing of unemployed workers, either directly or through the employment exchanges established or approved by the government; for this purpose each exchange will be placed under the authority of the Placing and Unemployment Office covering the area in which it is established. The transfer of labour from one place to another will be carried out by the competent service of the Ministry of Labour and Social Welfare or by a central unemployment office which may be established by Royal Decree.

The Minister of Labour and Social Welfare will establish an Appeals Committee at each Placing and Unemployment Office, consisting of three employers, three workers, and one official representative, who will act as Chairman. Each Appeals Committee must meet regularly at least once a month and will settle disputes relating to eligibility for insurance or the right to benefit.

#### **Employment and unemployment statistics throughout the world**

A table showing the extent of employment and unemployment in various countries during the summer of 1934, with the corresponding figures for 1933, was published recently by the International Labour Office (Geneva). In general, unemployment has diminished, but to a less extent than appeared in a similar table published three months ago. At that time, comparison with the previous year showed an increase of unemployment in Bulgaria, France, the Irish Free State, Poland and Portugal. The figures now published give the same result for those countries and also for Belgium, Czechoslovakia, the Netherlands and Spain. In Switzerland the unemployment insurance statistics show an improvement, but those of the employment exchanges show an increase in unemployment. In most of the other countries the improvement as compared with last year is less marked than it was in the spring. Sweden is the only European country where the situation has continued to improve.

The employment statistics give on the whole a more favourable impression than the unemployment figures. Most of the indices available show an improvement as compared with last year, and in Estonia, Japan and

Sweden the improvement is more marked than three months ago. In Italy the summer figures show a slight increase as compared with a slight decrease in the spring figures. The reverse is the case in Czechoslovakia, while in France the reduction in employment is more marked than it was three months ago.

Other countries, including Great Britain, Canada, Australia and the United States, show considerable reductions in the volume of unemployment as compared with 1933.

It is pointed out that the figures in the table provide a basis for comparing tendencies, but not for any statistical comparison of the extent of employment or unemployment in the different countries. The figures are arrived at by methods which differ from one country to another, and those given for certain countries are so far from expressing the real situation that they cannot be regarded as anything more than symptomatic.

#### **Reorganization of industrial Codes in United States**

The National Recovery Administration in the United States recently undertook a new classification of the Codes governing different industries. The Codes were severally examined, the Code authorities and the persons concerned being consulted, and finally every Code was given a place in the new classification. Under the new system 22 groups of Codes are classified in four main divisions as follows:—

*Producing industries:* food, textiles; leather and fur; ferrous metals; non-ferrous metals; non-metallic products; fuel; lumber and timber; chemicals; paints and drugs; paper; rubber.

*Fabricating industries:* equipment; manufacturing; graphic arts; construction.

*Service industries:* public utilities; transportation; communication; finance; amusements.

*Distributing trades:* professions and services; wholesale and retail trades.

Among the expected effects of the reorganization is a reduction in the number of Codes, which it is hoped may be brought down to about 250 in place of the present 682, through the amalgamation of units of almost identical economic interest, whose separation at present is based on arbitrary and personal rather than economic reasons. It is also expected to provide a clearer perspective of the different classes of Codes, with clearer definition of problems to be solved by the Government and employers in the development of Code law and its application, and also to enable allied lines of business to receive identical treatment on common problems, to simplify statistics and to reduce the general costs of administration of the Codes.

Dr. H. M. Cassidy, of the Department of Social Science of the University of Toronto, has been appointed Director of Social Welfare for the Province of British Columbia.

A new contributory pension scheme for employees of the Canadian National Railways will become effective on January 1, 1935. The rules governing the scheme will be given in a future issue of the LABOUR GAZETTE. The pension rules and regulations which have been in force since August 1, 1929, appeared in the issue of January, 1930, page 26.

The Hon. L. P. D. Tilley, premier of New Brunswick, addressing the Union of N.B. Municipalities at their convention on October 4, said that his government would buy potatoes and distribute them this winter among families on colonization lots who have not raised crops of their own. He recommended that municipalities should follow the same procedure in providing relief for their unemployed.

A new arrangement has been made between the city of Winnipeg and the medical profession in regard to the treatment of unemployed cases (a reference to medical services for the unemployed appeared in the LABOUR GAZETTE, March, 1934, page 227). The new scale of fees to be paid by the city to doctors in unemployed areas are as follows: House calls, \$1.50; office calls, \$1, and hospital calls, 50 cents.

During the quarter ending September 30, a total of 12,360 accidents were reported to the Ontario Workmen's Compensation Board in the industries in Schedule 1 of the Act, 50 of which were fatal accidents; in Schedule 2 industries 580 accidents were reported, including 9 fatal cases; and 2,371 accidents to employees of the Crown, 11 of which were fatal, were reported during the last quarter, making in all 15,311, of which 70 were fatal.

A recent report on subsistence gardens in New York State for 1933, indicates that large quantities and a great variety of vegetables, valued at approximately \$1,100,864 were produced from plots by families receiving public relief or those regarded as in the marginal class. During 1932, some type of garden project was undertaken by either public or private agencies in twenty-eight city and seven county welfare districts. These projects provided additional food for 14,292 families. Their success was so marked that in 1933 fifty-eight city and twenty-three county districts added subsistence gardens to their regular program from which 41,149 families benefited.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

**D**URING September two applications for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department of Labour and were under consideration at the close of the month, namely:—

(1) From employees of the Brantford Municipal Railway Commission, being members of Local Division No. 685, Amalgamated Association of Street and Electric Railway Employees of America,

(2) From employees of the Western Stevedore Company at Fort William, Ontario, being truckers, stowers, loaders, sealers, checkers, assistant foremen and clerks, members of the International Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

A settlement was reached early in October in the case of the dispute between the Shipping Federation of British Columbia, Limited, and the Vancouver and District Waterfront

Workers' Association. The findings of the Board of Conciliation and Investigation which dealt with this dispute appeared in the July issue of the *LABOUR GAZETTE*, page 596. As stated in the August *LABOUR GAZETTE*, page 729, while the Shipping Federation indicated its willingness to abide by the terms of the majority report of the Board, the longshoremen rejected the findings, and direct negotiations were subsequently resumed. The joint negotiating committee composed of members of the Shipping Federation and the Waterfront Workers' Association reported progress in their work from time to time. Finally on October 3 with only the question of wages and a few other details to be agreed upon, and after proposals and counter-proposals on these questions had been submitted by both sides, a ballot was taken amongst the employees which showed 544 in favour of accepting a revised draft agreement submitted by the Shipping Federation and 133 against.

## STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1934

**T**HE following table shows the number of disputes, workers involved and time loss for September, 1934, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*Sept., 1934..	19	6 559	65,277
*Aug. 1934..	29	11,741	84,682
Sept., 1933..	23	6,996	38,274

\* Preliminary figures.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time is frequently not received until some time after its commencement.

A substantial decrease in the number of disputes is recorded for September, as compared with August, the number of workers involved and the time loss incurred showing a similar decline. Although 10,000 man-working days were lost in a strike of 500 pulpwood cutters near Cochrane, Ont., approximately one-half of the time loss for the month was caused by three disputes in Montreal, namely, a dispute involving 600 furniture factory workers resulting in a time loss of 7,500 working days and two disputes of women's clothing factory workers together involving 3 450 workers for a combined time loss of 29,000 working days. During August approximately one-half the time loss also was due to strikes in Montreal, that of 3,000 women's clothing factory workers causing a time loss of 25,000 days, and a strike of 4,000 men's clothing factory workers involving a time loss of 24,000 working days. In September, 1933, a strike of men's clothing factory workers in Montreal also caused a substantial time loss, 4,000 workers being involved for a loss of 20,000 working days, while a strike of 600 furniture factory workers at Stratford caused a time loss of 9,000 working days.

Ten disputes, involving 4,569 workers, were carried over from August, including a strike of furniture factory workers in Montreal, P.Q.,

commencing on August 30, but not reported in time for inclusion in the September issue of the *LABOUR GAZETTE*. Nine disputes commenced during September. Of these nineteen disputes, thirteen were terminated during the month, four being in favour of the employers involved, four in favour of the employees concerned, while the results of five were recorded as compromises or partially successful. At the end of September, therefore, there were six disputes in progress recorded as strikes or lockouts, namely: women's clothing factory workers, Toronto, Ont., cap factory workers, Montreal, P.Q., compositors, London, Ont., pulpwood cutters, Cochrane and Ansonville district, Ont., shoe factory workers, Preston, Ont., and furniture factory workers, Montreal, P.Q.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which in-

formation has been received indicating that employment conditions are no longer affected, but which the unions concerned have not declared terminated. Information is available as to five such disputes, namely: photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; moulders, Peterborough, Ont., February 27, 1934, one employer; paper mill workers, Dolbeau, P.Q., May 23, 1934, one employer; and shoe factory workers, Toronto, Ont., July 25, 1934, one employer. The dispute involving lithographers employed by one firm in Toronto, Ont., commencing April 15, 1932, and the dispute of shoe factory workers in one establishment in Montreal, P.Q., commencing July 5, 1934, which have been carried in the above list, are considered to have

### STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1934\*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
<b>(a) Strikes and Lockouts in Progress prior to September, 1934</b>			
<b>MINING, ETC.—</b>			
Coal miners, Saunders Creek, Alta.	41	697	Commenced July 6, 1934; against reduced wages; terminated Sept. 19, 1934; in favour of workers.
<b>MANUFACTURING—</b>			
<i>Boots and Shoes (Leather)—</i>			
Shoe factory workers, Bramp- ton, Ont.	95	570	Commenced July 4, 1934; for increased wages and recognition of union; terminated Sept. 8, 1934; compromise.
<i>Textiles, Clothing, etc.—</i>			
Women's clothing factory workers (dressmakers), Toronto, Ont.	38	900	Commenced July 12, 1934; for increased wages un-terminated.
Men's clothing factory work- ers, Victoriaville, P.Q.	500	5,000	Commenced Aug. 20, 1934; for increased wages; terminated Sept. 14, 1934; in favour of employer.
Women's clothing factory workers (dressmakers), Montreal, P.Q.	3,000	20,000	Commenced Aug. 22, 1934; for increased wages, reduced hours and improved conditions; terminated Sept. 25, 1934; partially successful.
Women's clothing factory workers (cutters), Montreal, P.Q.	450	9,000	Commenced Aug. 24, 1934; sympathy with clothing workers on strike Aug. 22; terminated Sept. 25, 1934; partially successful.
Cap factory workers, Montreal, P.Q.	150	3,600	Commenced Aug. 31, 1934; for increased wages, reduced hours and improved conditions; un-terminated.
<i>Printing and Publishing—</i>			
Compositors, London, Ont. . .	75	1,800	Commenced Mar. 1, 1934; for renewal of union agreement; un-terminated.
<i>Other Wood Products—</i>			
Chesterfield factory workers, Toronto, Ont.	70	140	Commenced Aug. 22, 1934; for renewal of agree-ment with increased wages, reduced hours, etc.; terminated Sept. 4, 1934; in favour of workers.
Furniture factory workers, Montreal, P.Q.	150	450	Commenced Aug. 30, 1934; for increased wages and shorter hours; terminated Sept. 5, 1934; compromise.

\*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which working time was lost to an appreciable extent.

## STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1934\*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
<b>(b) Strikes and Lockouts Commencing During September, 1934</b>			
LOGGING—			
Pulpwood cutters, etc., Cochrane & Ansonville districts, Ont.	500	10,000	Commenced Sept. 5, 1934; for increased wages, reduced hours, improved conditions and recognition of union; untermiated.
Pulpwood cutters, etc., Thunder Bay district, Ont.	400	3,000	Commenced Sept. 18, 1934; for increased wages and improved conditions; terminated Sept. 26, 1934; in favour of employer.
MINING, ETC.—			
Coal miners, Wayne, Alta. ....	100	1,000	Commenced Sept. 10, 1934; for district wage scale instead of co-operative agreement; terminated Sept. 21, 1934; in favour of workers.
MANUFACTURING—			
<i>Vegetable Foods—</i>			
Cannery workers, Kamloops, B.C.	55	385	Commenced Sept. 4, 1934; for increased wages; terminated Sept. 11; in favour of employer.
Cannery workers, Burlington, Ont.	7	35	Commenced Sept. 22, 1934; for increased wages; terminated Sept. 27, 1934; compromise.
<i>Boots and Shoes (Leather)—</i>			
Shoe factory workers, Preston, Ont.	28	420	Commenced Sept. 13, 1934; against discharge of workers; untermiated.
<i>Other Wood Products—</i>			
Furniture factory workers, Montreal, P.Q.	600	7,500	Commenced Sept. 13, 1934; for increased wages, reduced hours, and union recognition, untermiated.
TRANSPORTATION—			
<i>Water—</i>			
Pulpwood loaders, McNab Cove, N.S.	60	60	Commenced Sept. 15, 1934; for increased wages; terminated September 15, 1934; in favour of employer.
SERVICE—			
<i>Business, etc.—</i>			
Window cleaners, Montreal, P.Q.	240	720	Commenced Sept. 24, 1934; for reduced hours, elimination of overtime, recognition of union and increased wages; terminated Sept. 26, 1934; in favour of workers.

lapsed by September 30, 1934, and have consequently been removed from the list.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

A cessation of work by about one hundred highway construction workers at Apsley, Ont., for one-half day on August 15 was reported, but particulars were received too late for inclusion in the September issue of the LABOUR GAZETTE. The cause of the dispute was a complaint as to food and the officials in charge agreed to improve the meals.

A minor strike involving four carpenters employed on one building in Toronto, Ont. for one day and a half occurred on August 16, to secure hourly wages instead of piece rates. This demand being conceded, work was resumed. Detailed information was not received in time for inclusion in the September issue.

A strike of 130 workers in a men's clothing factory at St. John's, P.Q., for a few days toward the end of August has been reported in the press but particulars have not been received. It was stated that increases in wages were secured.

A cessation of work for three hours by about sixty women employed in a fruit cannery at Grimsby, Ont., occurred on September 14. It was reported that work on peeling fruit had been in progress only two days and the piece rates had not been determined. Provisional rates being announced subject to adjustment in accordance with minimum wage regulations, work was resumed.

A cessation of work by furniture factory employees at Chesley, Ont., on September 13, to secure a four per cent wage increase was reported in the press. Information secured by the Department is that the dispute was the result of a misunderstanding which was adjusted the same day.

A dispute involving employees in a furniture factory at Stratford, Ont., occurred early in September following a reorganization as a result of which some employees were not re-engaged. A number refused to accept employment unless the work were divided among all and picketed the establishment. Through the mediation of the provincial Deputy Minister of Labour, at the request of the City Council, it was arranged that a larger percentage of the employees would be re-engaged and the balance later if required.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

**COAL MINERS, SAUNDERS CREEK, ALTA.**—The strike of employees of one company, commencing July 6, was terminated on September 20, the agreement which expired on March 31, 1934, being renewed with the previous wage scale. The company had reduced rates of wages from \$4.45 per day for the lowest paid class to \$4.20, and for higher paid classes from \$5.40 per day to \$5, contract rates being reduced about 12½ per cent.

**SHOE FACTORY WORKERS, BRAMPTON, ONT.**—This dispute, commencing July 4, to secure increases in wages and recognition of the Shoe and Leather Workers' Industrial Union, was terminated on September 7, the strikers accepting the offer of the employer made on August 3 as a result of the mediation of the mayor and a committee appointed by the town council. This offer, which was refused at the time, provided for certain increases in wages and reductions in hours from 54 per week to 50, but not for recognition of the union. Following the attempt of the employer to operate with new employees a disturbance occurred on August 13, apparently without any serious results, but the new employees were reported to have left the town later.

**MEN'S CLOTHING FACTORY WORKERS, VICTORIAVILLE, P.Q.**—A large number of the employees in two of the establishments affected by a strike, commencing August 20, to secure increases in wages, resumed work on September 12 without securing their demands and the remainder were reported to have done so by September 14. In a disturbance in connection with picketing four were arrested on charges of assault.

**WOMEN'S CLOTHING FACTORY WORKERS (DRESSMAKERS), MONTREAL, P.Q.**—The strike of employees in dressmaking establishments in Montreal, called by the Industrial Union of Needle Trades Workers on August 22, was not terminated until September 25, when it was called off, the union stating that many firms

had granted the demands and that many others had made concessions. The proposal of the Minister of Labour for Quebec at the end of August that the dispute be referred to arbitration under the Quebec Trades Disputes Act was agreed to by the employers but refused by the union. Settlements between the union and several of the employers, however, were reported about the end of August, and continued from time to time. A number of persons were arrested in connection with disturbances arising out of picketing from time to time and released on bail. Three strikers charged with attempting to shut off power in a factory pleaded guilty, costs being levied against one, while the other two were released on suspended sentence. The sympathetic strike of dress cutters terminated also.

**CAP FACTORY WORKERS, MONTREAL, P.Q.**—Employees in about fifteen establishments ceased work on August 31, demanding increases in wages, the abolition of piece-work, the forty-hour week, minimum wage rates in all departments and improvements in sanitary conditions. Negotiations between the International Hat, Cap and Millinery Workers' Union and the employers were held, but at the end of the month no settlement had been reported.

**CHESTERFIELD FACTORY WORKERS, TORONTO, ONT.**—As stated in the September issue of the LABOUR GAZETTE, agreements between the Furniture and Woodworkers' Industrial Union and a number of the employers involved in this dispute were reached before the end of August. On September 5 the union reported the strike terminated. The agreements are summarized elsewhere in this issue.

**FURNITURE FACTORY WORKERS, MONTREAL, P.Q.**—Employees in one establishment, members of the Furniture and Woodworkers' Industrial Union, ceased work on August 30, demanding increases in wages and a reduction in hours from 44-49 per week to 44. Work was resumed on September 6, the employer having made some concessions in regard to wages, stated by the union to be increases of 10 and 15 per cent, the 44-hour week not to be exceeded by more than four hours. This dispute was not reported in time for inclusion in the September issue.

**PULPWOOD CUTTERS, COCHRANE AND DISTRICT, ONT.**—Employees of several logging contractors ceased work on September 5 and the days following, demanding increases in wages, reduced hours, right to organize and hold meetings in camp, recognition of camp committee, and no discrimination for union activity in camps. The rates for piece-workers demanded

were \$2.30 per cord instead of \$1.85-\$2, and the rates demanded for monthly-paid men were \$45 instead of \$30-\$35. The strikers were reported to be members of the Lumber Workers' Industrial Union and over one thousand employees in the camps were reported as still at work. Two hitherto unaffected camps were reported as striking on September 20. A number of the strikers were arrested on charges of obstructing police and placing obstructions on railway tracks and remanded for trial. A number of armed strikers were reported to have driven fifty men out of a camp and the employer laid information with the provincial Attorney-General. The provincial Minister of Lands and Forests, the Honourable Peter Heenan, formerly Federal Minister of Labour, visited the locality at the end of September, but stated he was unable to secure a settlement on the wage dispute. He had proposed that it be referred to arbitration by his department, but this was refused by the strikers.

**PULPWOOD CUTTERS, THUNDER BAY DISTRICT, ONT.**—A number of employees in logging camps in the Port Arthur district ceased work on September 18 demanding a nine-hour day and increases in wages, namely \$2.50 per single cord for piece workers, \$45 per month as a minimum for those on monthly pay, \$50 for loaders and \$55 for teamsters. The employers refused to negotiate with the Lumber Workers' Industrial Union and some camps continued to operate. On September 26 the strike was called off.

**COAL MINERS, WAYNE, ALTA.**—Employees of one operator ceased work on September 10 demanding the wage scale prevalent in the district. For some time the mine had been operated on a co-operative basis and the miners' earnings under this system were 'unsatisfactory. Their demand being conceded, work was resumed on September 22.

**CANNERY WORKERS, KAMLOOPS, B.C.**—A number of employees in one cannery ceased work on September 4 demanding an increase in the rate for men from 22½ cents per hour to 27½ cents. The work of the strikers was performed by other employees and after seven days the strike was reported to have lapsed.

**CANNERY WORKERS, BURLINGTON, ONT.**—A number of employees in one establishment on September 22 demanded an increase in wages from 20 cents per hour, the rate for less experienced employees, to 25 cents per hour. The manager being absent, this demand was refused at the time and they ceased work, being replaced. Some days later the strikers were given other positions at 25 cents per hour.

**SHOE FACTORY WORKERS, PRESTON, ONT.**—A number of employees in one establishment ceased work on September 13 in protest against the discharge of one employee for breaking a shop rule against smoking, claiming that the real reason for the dismissal was activity in the Shoe and Leather Workers' Industrial Union. A committee of the union had demanded a 10 per cent increase in wages and obtained some increases. The strikers were partly replaced but in connection with picketing several were arrested on charges of assault and causing a disturbance, being released on bail. At the end of the month no settlement was reported.

**PULPWOOD LOADERS, McNAB COVE, N.S.**—Labourers engaged to load pulpwood on ships ceased work on September 15, demanding an increase in wages, but were replaced after one day. As a result of the intervention of the provincial Minister of Mines and Labour, a tentative settlement was reached, pending further investigation.

**FURNITURE FACTORY WORKERS, MONTREAL, P.Q.**—Employees in eighteen establishments ceased work on September 13, demanding increases in wages, reduction in hours to forty-four per week, recognition of the Furniture and Woodworkers' Industrial Union, and time and one-quarter rates of wages for overtime. The provincial Department of Labour proposed that the dispute be referred to a Board under the Quebec Trades Disputes Act and the union agreed to abide by the decision of such a Board but the employers refused. By the end of the month it was reported that one of the employers had made concessions to employees resulting in a return to work and that several others had settled with the union, but that some three hundred workers were still on strike.

**WINDOW CLEANERS, MONTREAL, P.Q.**—Employees of some twenty window cleaning firms ceased work on September 24 demanding increases in wages, a forty-four hour week, elimination of overtime and union recognition. The employers conceding these demands, work was resumed on September 27. A number of pickets were reported to have been charged with assault in connection with picketing.

The Division of Industrial Hygiene, of the Ontario Department of Health, has recently issued pamphlets dealing with lead poisoning and its treatment and also one on benzol poisoning.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing down to date that given in the issue of February, 1934, in the review of Strikes and Lockouts in Canada and Other Countries, 1933. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in August was 34, and 12 from the previous month were still in effect, making a total of 46 disputes in progress during the month, involving 15,600 workers with a time loss of 65,000 working days. Of the 34 disputes beginning in August, 6 were over demands for advances in wages, 5 over other wage questions, 3 over questions respecting working hours, 12 over questions respecting the employment of particular classes or persons, and 8 over other questions. Settlements were reached during the month in 37 disputes, of which 4 were settled in favour of workers, 18 in favour of employers, and 15 ended in compromises. In the case of one other dispute, work was resumed pending negotiations.

A strike involving directly and indirectly about 3,400 artificial silk workers at Flint was in effect from August 22 to August 25, when strikers were successful in obtaining advanced wages, abolition of Sunday shifts and other concessions as to working conditions.

### Irish Free State

A ten weeks' strike of employees of Dublin newspaper publishers terminated September 28, when a compromise settlement was reached granting a partial increase in wages, employment of union members only, holiday with pay and other concessions to workers.

### United States

The number of disputes beginning in June was 85 and 145 were in effect at the end of the month. The number of workers involved in disputes in effect at the end of the month was 97,830 and the time loss for June 2,490,269 working days.

A strike of 3,200 iron miners at Birmingham, Alabama, was in effect from May 1 to June 27, and was settled through federal conciliation officers, an agreement being reached granting an advance of from three to five cents per hour in wage rates.

The general strike in the textile industry in eastern and southern states, which began September 4 and was reported in the last issue of the *LABOUR GAZETTE*, continued until September 22. An estimate of the number of strikers gives 421,000, but the number varied from day to day, as some mills were reopened, especially in the southern states, while others were closed down at various times. Outbreaks of violence occurred in several centres, resulting in sixteen deaths in all and numbers of other persons injured. The National Guard was called out in some districts to preserve order. The mediation board appointed by the President of the United States presented a report which was endorsed by the President, and the strike was then immediately terminated September 22. Under the recommendations of the mediation board report, a permanent Textile Labour Relations Board was established which is an impartial board and is to handle all labour relations formerly dealt with by the Code Authority. This Board is to regulate the "stretch-out" system, one of the causes of the strike, and while it is being investigated, no employer is to increase the work load of any employee until February 1, 1935. Although collective bargaining is still to be done on a plant-to-plant basis, it is provided that the clauses of the National Recovery Act guaranteeing the right of organizing and collective bargaining be enforced. Wages and hours in the industry are to be investigated by the Labour Department with a view to making changes in the rates and hours now in effect.

An Act promulgated in Spain recently provides for an increase in the subsidies granted to unemployment insurance funds, the systematic execution of public works so as to provide the maximum of employment, and the encouragement of private initiative in the building industry.

## Canadian Combines Legislation

A history of Canadian legislation against combines was made available in book form in September, when a one hundred-page volume on this subject was announced by a United States publisher. The book\* represents the first extensive study in this field made and separately published through other than governmental sources, and is considered to offer a more detailed published record on the subject than has been generally accessible up to this time in a single volume. The author, John A. Ball, Jr., is an instructor in economics at the Catholic University of America, Washington, D.C., and a native of Thorold, Ontario.

Commencing with the investigation of 1888 which led to enactment in the following year of the first Dominion legislation against combinations in restraint of trade, an effort is made to present the background, significance and results of the legislative measures of the Dominion Parliament for the prevention of such types of business combinations as operate to the detriment of the public by unduly lessening competition, enhancing prices unreasonably or otherwise restraining or injuring trade. The Acts examined include the trade combina-

tion provisions of the Criminal Code, the Combine Investigation Act of 1910, war time measures, the two Acts of 1919, and the present Combines Investigation Act. An examination of the purposes of these Acts as indicated in Parliament and as interpreted by the courts is presented in considerable detail, with useful quotations from original sources.

More lengthy consideration is given to the present Combines Investigation Act. Published results of investigations under this Act since its enactment in 1923 and the prosecutions which have occurred in this period are capably portrayed in concise form. The concluding chapter includes comment of a generally approving nature on existing Canadian combine laws, makes some few suggestions of changes considered desirable by the author, and brings the study up to date with briefer comment on action taken in 1934 in the passing of the Natural Products Marketing Act, the investigation by the Parliamentary Committee and Royal Commission on Price Spreads and Mass Buying, and provincial legislation.

---

\*"Canadian Anti-Trust Legislation," by John A. Ball, Jr., Williams & Wilkins Co., Baltimore, Md.

## Unemployed Self Help Organizations in United States

The co-operating activities of "self-help" groups of unemployed in the United States were outlined in the LABOUR GAZETTE for April, 1933, page 366, and in the May issue on page 563. Reference has also been made to the outstanding example in Canada of such an organization at Burnaby, British Columbia (LABOUR GAZETTE, April, 1933, page 366). A recent survey made by the United States Department of Labour Statistics indicates the rapid spread of "Self-help" organizations in that country from the inception of the movement in 1931. A wide range of activities and services is now being conducted by these organizations of unemployed with varying degrees of success. The value of the work done by them in keeping up the morale of their members and in filling the needs of those members was recognized by Congress by the insertion in the Relief Act of 1933 of a clause authorizing the Federal Emergency Relief Administration to make grants in aid of co-operative and self-help organizations for the barter of goods and services. Under this authorization nearly

\$1,000,000 was granted to such organizations from August, 1933, to June 1, 1934.

The nature of the assistance granted by this official action, according to an outline of policy in July issue of the *Monthly Labor Review* (United States Department of Labour) was for production purposes only, and to well organized and responsible groups. While at the beginning the majority of requests were for gasoline, transportation equipment, and supplies, in recent months the requests have been more and more for light industrial equipment and productive machinery. In making grants for production the Administration emphasizes that "production of goods should be primarily for use by the members and for exchange with other co-operatives; secondarily, for sale to or exchange with relief administrations and the Federal Surplus Relief Corporation; also for sale in non-competitive markets or for general sale as indicated and justified by special advantages of location, resources, or marketing possibilities of the co-operative."

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

**R**ECENT proceedings under the Quebec Labour Agreements Extension Act include the extension to all employees and employers in the industry and district, by Orders in Council, of an agreement affecting printing trades in Quebec city and district, and an agreement affecting the bricklaying, plastering and masonry trades in Three Rivers and district; and applications for the extension of agreements affecting building trades at Joliette, the ornamental iron and bronze trade in Montreal, the terrazzo and tile trade in Quebec city, and the plumbing trade in Three Rivers.

Under the Collective Labour Agreements Extension Act, Quebec, the text of which was printed in the *LABOUR GAZETTE*, May, 1934, page 417, applications may be made to the Minister of Labour, Quebec, by any association of employees or employers who are parties to a collective agreement to have those terms of such agreement which concern rates of wages and hours of labour made obligatory on all employees and employers in the same trade or industry within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" for the establishment of these conditions, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade or industry in the territory included in the agreement, from the date of the publication of the Order in Council in the *Quebec Official Gazette* for the duration of the agreement. The provisions of an agreement thus made obligatory are to govern all individual labour contracts in the specified trade and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement. Applications for the extension of certain agreements and Orders in Council subsequently passed under this Act have been noted in the *LABOUR GAZETTE* each month, beginning in June, 1934.

#### *Printing Trade, Quebec City and District.*—

Mention of the application to have an agreement in this trade made obligatory was made in the *LABOUR GAZETTE*, August, page 751. This agreement was made between the Association of Master Printers and Publishers of

the City and District of Quebec and the Typographical Union of Quebec, Local 302, the Union of Pressmen and Assistants of Quebec, Local 152, and the Catholic Union of Printers and Bookbinders of Quebec. An Order in Council approved October 4, 1934, makes the terms of the agreement obligatory on all employees and employers in the district, according to the following conditions:—

1. In the present Agreement, the word "journeyman" signifies a typographer, pressman, bookbinder, or stereotyper who has obtained from the Board of Examiners, appointed by the Joint Committee, in accordance with paragraph 2 of Act 7, chapter 56, 24 Geo. V, a certificate of competency entitling him to the regular salary stipulated hereinafter.

2. The word "Apprentice" signifies a junior typographer, pressman, stereotyper or bookbinder or any person to whom the Joint Committee has given a certificate stating that he is learning one or the other of the hereinabove mentioned trades and entitling him to be paid according to the schedule of wages prescribed for the period of apprenticeship.

3. Eight hours constitute the basis of one day's work. Any work done outside the regular hours by a regular or part-time employee will be considered as overtime.

4. Seven and one half hours constitute the basis of one night's work. Any work done outside regular hours, by a regular or part time employee, will be considered as overtime.

5. During the day, the hours of labour will be divided between 7 o'clock in the morning and 6 o'clock in the evening and 48 hours so divided during 6 days shall constitute a regular week's work.

6. During the night, the hours of labour will be divided between 6 o'clock in the evening and 4 o'clock in the morning and 45 hours so divided during 5 or 6 days shall constitute one regular week's work.

7. After having left the workshop, any workman who may be called to do overtime shall receive an amount equivalent to 2 hours' work.

8. The minimum wages for journeymen typographers, pressmen, stereotypers or bookbinders, shall be \$25 per week for day work and \$27 per week for night work. No employer shall have the right to reduce the wages of workmen receiving more than the said minimum at the time of the signing of this agreement.

9. Overtime work will be paid time and a half according to regular wages.

10. Double time will be paid for any work done on Sunday, Christmas Day, New Year's Day, Labour Day. This clause only applies to men regularly employed on night-shifts.

11. Foremen's wages will be at least \$3 more per week than those of journeymen.

12. Apprentices will be paid as follows:—

#### DAY WORK

First year.. . . .	\$ 5 00
Second year.. . . .	7 00
Third year.. . . .	10 00
Fourth year.. . . .	12 00
Fifth year (1st six months).. .	14 00
Fifth year (2nd six months).. .	16 00

## NIGHT WORK

First year.. . . .	\$ 6 00
Second year.. . . .	8 00
Third year.. . . .	11 00
Fourth year.. . . .	14 00
Fifth year (1st six months).. . .	16 00
Fifth year (2nd six months).. . .	18 00

with the exception of apprentice pressmen, working exclusively on non-automatic platen presses, who shall be paid as follows:—

## DAY WORK

First year.. . . .	\$ 5 00
Second year.. . . .	7 00
Third year.. . . .	9 00
Fourth year.. . . .	10 00
Fifth year.. . . .	12 00

## NIGHT WORK

First year.. . . .	\$ 6 00
Second year.. . . .	8 00
Third year.. . . .	10 00
Fourth year.. . . .	11 00
Fifth year.. . . .	13 00

13. In conformity with the 2nd subparagraph of paragraph 11 of article 7, the Joint Committee charged with the application of the said agreement shall be given the right, by its authorized inspectors:—

(a) to verify the rate of wages and the hours of labour in the employers' establishments to which the present collective Agreement applies;

(b) to exercise, for the benefit of each and any employee, any action resulting in their favour from the collective labour agreement rendered obligatory, without having to prove an assignment of claim by the interested party.

14. This agreement shall be posted up in each department or shop so that interested parties may take cognizance thereof.

15. The present agreement shall remain in force for one year, from the 11th of July, 1934.

16. The territorial jurisdiction, for the purposes of the present agreement, shall include the judicial districts of Quebec, Beauce and Montmagny. In the judicial districts of Beauce and Montmagny, the schedule of wages fixed by articles 8 and 12, may, however, be reduced by 15 per cent.

*Bricklayers, Plasterers and Masons, Three Rivers and District.*—The application for the extension of the agreement in this trade in Three Rivers was noted in the *LABOUR GAZETTE*, September, page 826. This agreement was made between eleven bricklaying, plastering and masonry contractors and the National Catholic Union of Bricklayers, Plasterers and Masons. The Order in Council, which was approved September 12, 1934, makes the conditions in the application obligatory for all employees and employers in the trade in the district named according to the following conditions:—

1. The word "journeymen" signifies and comprises any bricklayer, plasterer or mason who has obtained from the Board of Examiners formed by the joint Committee in virtue of

paragraph 2 of article 7 of the Collective Labour Agreement Act, a certificate of competency, entitling him to the regular wage, determined in article 2 of this request.

2. The rate of wages to be the following:—

Trades	Wages per hour
Bricklayers, journeymen.. . .	\$0 70
Plasterers, journeymen.. . .	70
Masons, journeymen.. . . .	70

3. The hours of labour shall conform with the provisions of the Order in Council No. 1496, of July 12, 1933, for the putting into force of the Act respecting the limit of working hours (23 Geo. V, Chap. 40). No work shall be carried on on Sundays, holidays of obligation, the feast of Saint Jean Baptiste, Good Friday and Labour Day.

4. Time and a half will be paid for overtime; the costs for travelling and the time of travel will be at the expense of the contractors, in the case of work carried on outside the towns. However, in any such case, time and a half will not be paid during the trip.

5. The territorial jurisdiction to which the present agreement shall apply comprises the counties of: Berthier, Maskinongé, Saint Maurice, Lavolette, Champlain and Trois-Rivières.

6. The present agreement shall be in force from the 15th of September, 1934, to the 15th of September, 1935; it shall renew itself automatically each year, unless one of the contracting parties notifies the other party of his intention of having the same amended or revoked, 30 days before the expiration of the said delay.

*Building Trades, Joliette.*—Notice of an application for the extension of an agreement between the Montreal Builders' Exchange and the Workers' Association of Joliette was published in the *Quebec Official Gazette*, September 8. The wage rates in the application for the three counties of Joliette, Berthier and Montcalm, but outside the city of Joliette, are the same as those established in the Montreal district for municipalities of a population of less than 5,000 where the cost of the contract concerned is less than \$5,000 (published in the *LABOUR GAZETTE*, July, page 638), except for the addition of stone breakers in quarries at a rate of 30 cents per hour. For the city of Joliette, the rates in this application are the same as for outside the city except bricklayers, plasterers and stone masons with a rate of 60 cents per hour, carpenters and joiners, plumbers and steamfitters 50 cents, stationary engineers 45 cents, hod carriers 35 cents, common labourers 30 cents, stone breakers in quarries 35 cents, carpenters' apprentices 35 cents.

*Ornamental Iron and Bronze Workers, Montreal.*—Notice of application for the extension of the agreement between certain contractors and the Canadian Union of Ornamental Iron and Bronze Workers of Montreal was published in the *Quebec Official Gazette*, September 8. The wage rates in this application

are 55 cents per hour for mechanics, 45 cents for fitters and 35 cents for helpers, with a 45-hour week.

*Terrazzo and Tile Workers, Quebec City and District.*—Notice of application for the extension of the agreement between certain terrazzo, tile and mosaic contractors and the Catholic Union of Labourers was published in the *Quebec Official Gazette*, September 15. The wage rates in this agreement are 50 cents per hour for marble setters, tilesetters, terrazzo layers and joint finishers, 40 cents for raw cement layers, men working on machines, and 35 cents for common labour. All these rates apply in the cities of Quebec and Levis and within a radius of ten miles of their limits, and also in the towns of Rivière du Loup and Thetford Mines. In the judicial districts of Quebec, Beauce, Kamouraska, Rimouski, Gaspé, Saguenay, Arthabasca, except for the

districts mentioned above, the wage rates in the application are 5 cents per hour less than the above rates.

*Plumbers, Three Rivers and District.*—Notice of application for the extension of the agreement between certain contractors in plumbing, for the installation of heating systems, for the installation of refrigeration plants and automatic sprinklers, in the tinsmith trade and for roofing and the National Catholic Union of Plumbers, Incorporated of Three Rivers, was published in the *Quebec Official Gazette*, October 6. The wage rates contained in the application for journeymen plumbers, installers of heating systems, installers of refrigerating plants and automatic sprinklers and tinsmith-roofers are 40 cents per hour from November 1, 1934, to April 30, 1935, and 45 cents from May 1, 1935, to October 31, 1935.

## BRITISH COLUMBIA BOARD OF INDUSTRIAL RELATIONS

### New Orders establishing Male Minimum Wages in the Construction, Logging, and Sawmill Industries.

THE Board of Industrial Relations, established under the provisions of the Male Minimum Wage Act, 1934, of British Columbia (LABOUR GAZETTE, June, 1934, page 510) recently issued the following new orders establishing a minimum wage in the construction, logging and sawmill industries, and cancelling Order No. 9, which was given in the LABOUR GAZETTE, August, 1934 (page 752). Order No. 9, now cancelled, provided for the exemption of the district east of Cascade Mountains from the provisions of Orders No. 1 and No. 2, establishing a minimum wage respectively in the logging and sawmill industries (LABOUR GAZETTE, May, 1934, page 419). The Board is composed of the following members: Mr. Adam Bell, Deputy Minister of Labour (chairman); Professor W. A. Carrothers, chairman of the Economic Council; Mr. C. J. McDowell; Mrs. Fraudena Eaton; and Mr. James Thompson.

#### MALE MINIMUM WAGE ACT

##### ORDER No. 12.—Order establishing a Minimum Wage in the Construction Industry.

Pursuant to the provisions of the "Male Minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, the Board of Industrial Relations hereby orders:—

1. That where used in this Order the expression "construction industry" includes con-

struction, re-construction, repair, alteration, or demolition of any building, railway, tramway, harbour, dock, pier, canal, inland waterway, road, tunnel, bridge, viaduct, sewer, drain, well, telegraphic or telephonic installation, electrical undertaking, gaswork, waterways, or other work of construction, as well as the preparation for or laying the foundation of any such work or structure.

2. That, subject to the exemptions granted from time to time under section 6 of the said Act, the minimum wage for every employee in the construction industry (not included in any other Order of the Board) in the City of Vancouver, the City of Victoria, the City of New Westminster, the City of Nanaimo, the City of Prince Rupert, the Municipality of the Township of Esquimalt, the Municipality of the District of Oak Bay, the Municipality of the District of Saanich, Municipality of the District of West Vancouver, the Municipality of the District of Burnaby, and the Municipality and District of North Vancouver shall be the sum of forty-five cents (45c.) per hour.

3. That, subject to the exemptions granted from time to time under section 6 of the said Act and to the provisions of paragraph 2 of this Order, the minimum wage for every employee in the construction industry (not included in any other Order of the Board) shall be the sum of forty cents (40c.) per hour.

4. That, subject to the exemptions granted from time to time under section 6 of the said Act, the minimum wage for every male person over the age of 18 and under the age of 21 years in the construction industry (not included in any other Order of the Board) in the City of Vancouver, the City of Victoria, the City of New Westminster, the City of Nanaimo,

the City of Prince Rupert, the Municipality of the Township of Esquimalt, the Municipality of the District of Oak Bay, the Municipality of the District of Saanich, Municipality of the District of West Vancouver, the Municipality of the District of Burnaby, and the Municipality and District of North Vancouver shall be the sum of thirty-five cents (35c.) per hour.

5. That, subject to the exemptions granted from time to time under section 6 of the said Act and to the provisions of paragraph 4 of this Order, the minimum wage for every male person over the age of 18 and under the age of 21 years in the construction (not included in any other Order of the Board) shall be the sum of thirty cents (30c.) per hour.

Dated at Victoria, B.C., this 28th day of September, 1934.

**ORDER NO. 13.—Order establishing a Minimum Wage in Logging Industry East of the Cascade Mountains.**

Pursuant to the provisions of the "Male Minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, the Board of Industrial Relations hereby orders:—

1. That where used in this Order the expression "logging industry" includes all operations in or incidental to the carrying on of logging; pole, tie, shingle-bolt, mining-prop, and pile cutting, and all operations in or incidental to driving, rafting, and booming of logs, poles, ties, shingle-bolts, mining-props, and piles.

2. That, subject to the exemptions granted from time to time under section 6 of the said Act and to the provisions of paragraph 3 of this Order, the minimum wage for every employee in the logging industry east of the Cascade Mountains (not included in any other Order of the Board) shall be the sum of thirty-five cents (35c.) per hour.

3. The minimum wage for every employee engaged in cook and bunk-house occupations within the logging industry east of the Cascade Mountains shall be the sum of two dollars and seventy-five cents (\$2.75) per day.

Dated at Victoria, B.C., this 28th day of September, 1934.

## Order Under Hours of Work Act—Drug Stores

The Board of Industrial Relations of British Columbia (LABOUR GAZETTE, June, 1934, page 510) has recently issued under the Hours of Work Act, 1934, Order No. 16, governing drug stores. Previous orders and regulations under this statute appeared in the LABOUR GAZETTE for September, page 831; for August, page 752; and for July, page 641.

The fatal accident rates per 100,000 persons, for the principal groups of industries in Great Britain, are shown in the annual report of the Chief Inspector of Factories and Workshops for 1933. For the year 1932 these rates were as follows: Metal, extracting and refining, metal conversion, including rolling mills and tube making, 40 fatal accidents; shipbuilding, 40; chemicals, paints, colours and varnish, ani-

**ORDER NO. 14.—Order establishing a Minimum Wage in the Sawmill Industry east of the Cascade Mountains.**

Pursuant to the provisions of the "Male Minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, the Board of Industrial Relations hereby orders:—

1. That where used in this Order the expression "sawmill industry" includes all operations in or incidental to the carrying-on of sawmills and planing-mills.

2. The minimum wage for every employee in the sawmill industry east of the Cascade Mountains shall be the sum of thirty-five cents (35c.) per hour, with the exceptions provided by paragraph 3 hereof.

3. Until further ordered, it shall be permissible for an employer in the sawmill industry east of the Cascade Mountains to employ a percentage of employees in his plant at a rate less than that fixed in paragraph 2 of this Order, but in no case shall the rate so paid be less than twenty-five cents (25c.) per hour, nor shall the percentage of employees paid at such rate (inclusive of employees in respect of whom a permit has been obtained under section 6 of the Act) be in excess of 25 per centum of the total number of employees in the plant.

4. Pursuant to the provisions of the said Act, every employer in the sawmill industry east of the Cascade Mountains shall furnish the Board, not later than the fifteenth day of each month, with a complete and certified statement of the names, ages, nationalities of, and wages paid per hour to every male person in his employ during the last preceding month.

Dated at Victoria, B.C., this 28th day of September, 1934.

**ORDER NO. 15**

Pursuant to the provisions of the "Male Minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, the Board of Industrial Relations hereby orders:—

That Order No. 9 of the Board, dated the 12th day of July, 1934, is hereby cancelled.

Dated at Victoria, B.C., this 28th day of September, 1934.

**REGULATION No. 16**

**Mercantile Industry—Drug-stores**

Persons employed in drug-stores as registered apprentices, certified clerks, and licentiates of pharmacy may work four (4) hours per week in excess of the weekly limit prescribed by section 3 of the Act.

This regulation shall remain in effect until September 30, 1935.

Made and given at Victoria, B.C., this 13th day of September, 1934.

**BOARD OF INDUSTRIAL RELATIONS.**

mal charcoal and glue making, 30; clay, stone, cement, 23; textile printing, bleaching, dyeing, 9; railway and tramway carriages, motor and other vehicles, 8; light metal trades, 8; flax, hemp, jute, 8; electrical engineering, 7; wool, worsted, shoddy, 6; bakeries, 6; cotton, 4; furniture, cabinet-making, 4; laundries, 4; other textile, 2; letterpress, litho printing, photography, 2.

## WOMEN'S MINIMUM WAGES IN THE PROVINCE OF QUEBEC

### Revised Orders governing Employees in various Clothing Occupations

THE Women's Minimum Wage Board of the Province of Quebec recently issued in amended form Orders No. 10 and No. 11, replacing respectively Orders 10 and 10a, and Orders 11, 11a and 11b, which had been in force since July 1, 1930. The text of the original orders was given in the *LABOUR GAZETTE*, May, 1930, page 523. Formerly the minimum wages were graduated definitely according to length of service, commencing with the wages of beginners and advancing to those of experienced workers. By the orders which follow, 70 per cent of working staffs are to receive the full minimum wage, lower percentages being permitted for the remaining employees.

**ORDER No. 10.—Governing female employees and males when replacing females in any class of employment, in the following industries: Women's and Children's dresses, silk underwear, kimonas and lingerie.**

(1) Minimum: No wage shall be less per week than is set forth in the following table:

City and Island of Montreal and a radius of ten miles around and beyond the Island.

10% of the employees at not less than..\$ 7 00

20% of the employees at not less than.. 10 00

70% of the employees at not less than.. 12 50

Province of Quebec,—excepting the City and Island of Montreal and a radius of ten miles around and beyond the Island of Montreal.

10% of the employees at not less than..\$ 6 00

20% of the employees at not less than.. 8 00

70% of the employees at not less than.. 10 00

The worker's salary shall be paid to her in cash; a part or the whole of the salary cannot be retained for any cause or purpose whatsoever. This salary shall be given to her in a sealed envelope on which shall be written: her name, her register number, the date of the week or of the fortnight she has worked, the number of hours she has performed, the rate per hour, the amount of money indicated in the envelope; same must be initialed by the person who paid the employee.

(2) Hours of Work: The work-period for which these minimum wages shall be paid, shall be 48 hours per week for the City and Island of Montreal and a radius of ten miles around and beyond the Island of Montreal, and 50 hours per week for the rest of the Province.

(a) Work in excess of the above work-period shall be counted as overtime and shall be paid for at not less than the minimum wages fixed by this Order.

(b) Work for less than the above work-period may be counted as short time and be paid for *pro rata* of the minimum wages fixed by this Order.

(c) The total of working hours cannot in any case exceed 55 hours per week unless a special permit has been obtained from the Industrial and Commercial Establishments Department. (Chap. 182, R.S.P.Q., 1925.)

(3) All employees, either timeworkers, pieceworkers or paid by any other mode, are subject to the above specified minimum wages.

(4) Waiting Time: Any employee required to wait in the establishment shall be paid for the time thus spent.

(5) Exemption: The Board may grant permits of variation or suspension of any of these regulations to meet exceptional conditions.

(6) Discharge of Employees: No employer shall discharge or threaten to discharge or in any way discriminate against any employee, because such employee has lodged a complaint with the Board or has testified or is about to testify in any investigation or proceedings permitted or prescribed by or taken under the provisions of this Act.

(7) Penalties: Any violation of this Order is punishable by fine or imprisonment (See Section 12 of the Act).

(8) Posting: Each establishment shall keep a copy of this Order posted in a conspicuous place where the employees have access.

(9) This Order shall come into force and be effective on December 1, 1934, and is replacing Orders No. 10 and 10A which were in force and effective since July 1st, 1930.

GUS. FRANCO, Chairman.

OMER BRUNET,

C. J. GRIFFIN,

EUG. RICHARD.

Montreal, August 29, 1934.

**ORDER No. 11.—Governing female employees and males when replacing females in any class of employment in manufactures of: overalls, mackinaws, shirts, collars, neckties, fabric, rayon and cotton underwear, embroidery, corsets and brassieres and all needle or sewing machine work not already covered by another Order.**

(1) Minimum: No wage shall be less per week than is set forth in the following table:

City and Island of Montreal and a radius of ten miles around and beyond the Island.

15% of the employees at not less than..\$ 7 00

15% of the employees at not less than.. 9 00

70% of the employees at not less than.. 11 00

Province of Quebec,—in Cities and Towns of 15,000 population and over outside of the City and Island of Montreal.

15% of the employees at not less than..\$ 6 00

15% of the employees at not less than.. 8 00

70% of the employees at not less than.. 10 00

In Municipalities having less than 15,000 population.

15% of the employees at not less than..\$ 6 00

15% of the employees at not less than.. 7 00

70% of the employees at not less than.. 9 00

The worker's salary shall be paid to her in cash; a part or the whole of the salary cannot be retained for any cause or purpose whatsoever. This salary shall be given to her in a sealed envelope on which shall be written: her name, her register number, the date of the week or of the fortnight she has worked, the number of hours she has performed, the rate per hour, the amount of money included in the envelope; same must be initialed by person who paid the employee.

(Sections (2) to (9) are identical with the corresponding sections in Order No. 10.)

## MINIMUM WAGES IN ONTARIO IN 1933

**P**RESENTING a cross-section of industrial conditions as related to the wages of women workers, the thirteenth annual report of the Ontario Minimum Wage Board reviews the administration of the Women's Minimum Wage Act during the year 1933.

In prefacing its report, the Board quotes the Biblical injunction that "the labourer is worthy of his hire" as the principle underlying all minimum wage laws. "It implies," the report states, "that all workers, men and women, are entitled to live decently upon the remuneration they receive from the work that they do."

The report then traces the application of this principle to the Minimum Wage Act as embodying the whole purpose of minimum wage legislation, and observes that while employers without exception are ready to subscribe to this principle yet "it must be frankly confessed that there are some employers who, apparently, are not ready to practise what they preach, and, consequently, a Minimum Wage Law is necessary."

Referring to the accumulated effect of the depressed industrial conditions of the past few years, the report states: "In many cases, it has marked the final disappearance of surpluses accumulated by industrial concerns over the period of prosperous years. The resultant necessity of lowering wage levels as a partial means of reducing overhead and overdrafts, and the cutting of wages by some firms to rates beneath our modest levels, in a last desperate effort to keep out of bankruptcy, were two of the major causes that made the task of the Board a difficult one, taxing to the limit the time, judgment and ability of its members. With the advent of better times, following a definite turn towards industrial recovery in this country, the Board anticipates that these problems will become less acute in the coming year, and that organized industry throughout the Province will recognize the importance of protecting their employees, and especially women employees, by making the payment of adequate wages the first step in the process of rehabilitation."

Emphasizing that its chief duty was to protect the wage rates of women and girls, the Board indicates its difficulties in this respect during the past year by reference to the fact that it "made more adjustments, instituted more prosecutions and collected more arrears

during 1933 than in any previous year since the Act was passed." Its activity in this respect in 1933 resulted in 2,500 adjustments, covering 1,000 firms, while the wage arrears collected amounted to \$9,497.77.

The Board also makes the statement that "during the thirteen years of its existence there has never been the slightest attempt on the part of governments to interfere with the operation of the administration of the law by the Minimum Wage Board." The report also states that the great majority of employers in Ontario welcome the wage limit rulings of the Board. Reference is made to the decision not to reduce minimum wage rates. It was pointed out that reductions in rates were advocated in some quarters on the basis of falling living costs. The Board's attitude was that it "would have to be convinced that commodity prices in general were down permanently before it could agree to any lowering of rates set." The Board claims it was justified in this stand by the fact that during the latter part of 1933 commodity prices began a decided trend upward.

The experience of the Board during 1933 has made it apparent, states the report, that some amendments to the Act are desirable, and it is the intention of the Board to ask the Government to bring such amendments before the 1934 Session of the Legislature. These amendments, primarily, will have to do with the number of hours for which the rates fixed under the orders of the Board are to be paid, and the length of time for which arrears may be collected. The Board also "desires to suggest to the Government that the women workers of the Province should be still further protected in their jobs by the inclusion of men and boys in any of the orders issued by the Board."

It is explained that wage levels are determined by the cost of living, and that the cost of living budget is established upon the least sum upon which a working woman can be expected to support herself. This budget is worked out on the basis of the cost of living in Toronto, and was revised several times during 1933. The budget of workers in other localities are then adjusted in proportion to a recognized variation in the cost of living as between large and small cities, towns, villages and country districts. The budget for Toronto allows \$364 per year, or \$7 per week for board

and lodgings; \$115.05 for clothing; \$171 for sundries (including laundry, doctor, dentist, carfare, amusements, church, etc.), making a total of \$650.05 for the year. The weekly budget for Toronto is therefore as follows: board and lodging, \$7; clothing, \$2.21; sundries, \$3.29, making a total of \$12.50 per week.

The figure thus arrived at is taken as the minimum wage required to provide a female worker at Toronto with the necessities of living.

In the accompanying table are summarized the chief statistics with respect to the various industries covered by the Act:

AVERAGE WEEKLY WAGES AND HOURS OF FEMALE EMPLOYEES IN VARIOUS INDUSTRIES IN ONTARIO, 1933

Industry	Number of Firms	Female Employees		Average hours per week	Minimum wage (experienced adults)
		Over 18	Under 18		
Laundries, dyeworks, etc. (Toronto).....	83	1,345	51	47.8	\$ 12.50

## LABOUR AND INDUSTRY IN ALBERTA DURING 1933-34

**T**HE report of the Bureau of Labour of Alberta for the fiscal year ending March 31, 1934, gives statistics of trade and industry in the province during this period, with details of the administration of the various acts in charge of the Bureau, including the Factories Act, the Minimum Wage Act, the Theatres Act, the Steam Boilers Act, the Labour Disputes Act, and the Employment Offices Act.

*Trade and Industries.*—According to the returns received by the Bureau there was a further decline in business, which, however, was not so great as that of previous years. Returns from 2,344 firms covered 34,499 male employees over eighteen, 293 males under eighteen, 6,343 females over eighteen, 87 females under eighteen and 368 apprentices. Total payments for wages and salaries were \$51,127,159.97, of which sum \$43,929,397.76 were paid to wage earners. The returns when considered as to employment by months indicate similar fluctuations to that which were shown during normal years with April the month of least employment, when 34,140 were employed, and October the month of greatest when 37,352 were employed. As in previous years, the returns, when considered by individual industries show fluctuations, again demonstrating that for unskilled work in the various industries men interchange from one to the other. The returns of monthly employment of women show a small steady increase in the number employed throughout the year.

The report contains tables showing classified weekly wage rates, and the weekly hours of labour. The table showing "classified weekly wage rates" indicates that of the 34,499 male employees over eighteen, the largest group (4,164) were employed in the wage classification between \$30 and \$34.99 per week. Of the 6,343 female employees over eighteen the largest group (1,493) were paid wages ranging from \$12 to \$12.99.

*Labour Disputes Act.*—The report of the administration of Labour Disputes Act outlines the appointments of boards of conciliation and investigation under the Act. The details with respect to the boards established during the year were reviewed in the LABOUR GAZETTE, March, 1933, page 272, and February, 1934, page 101.

*Factories Act.*—Returns of inspectors covering inspections under the Factories Act show a slight decrease in the number of persons employed in the places visited. A total of

4,245 inspections was made of 4,062 factories, shops, hotels, offices and office buildings in which were employed 16,969 males and 6,814 females. Recommendations relative to safety, sanitation, hours and wages and the employment of children, to the number of 1,120 were made, full particulars being given in tables in the report.

*Theatre Inspection.*—The report of the chief Inspector of theatres states: "It is not possible to report any improvement in the general physical condition of motion picture prints. The total number of adverse reports is greatly in excess of previous periods. Out of 12,995 reports, the film exchanges were advised that 494 required immediate attention, and of this number 51 were condemned as being unfit for further use. One hundred and seven were re-edited by inserting new sections in place of the worn strips and 336 were cleaned and revised."

Financial conditions made it necessary to curtail the inspection of the usual number of projectors (about 45 per cent less than last year). These projectors, it was stated, have been in continuous use for several years and can be expected "to cause fire hazards through damage to films unless repairs are enforced by the Department and proper mechanical adjustments insisted upon." For violation of Theatre Regulations there were three prosecutions.

*Boiler Inspection.*—The annual report of the chief inspector of boilers and machinery indicated a total revenue for the year of \$20,513.12, derived from inspection fees, engineers' examinations, etc. During the year there were 4,765 inspections of boilers and pressure vessels and 2,310 certificates were issued.

*Employment Offices.*—Another difficult year was reported by the provincial employment offices. In particular the officials stressed the predicament "of young men who have left school during the last three years and for whom there has been very little opportunity to become established in employment. Many of these young men," the report continues, "will soon be reaching an age when industrial managers will be reluctant to consider them as trainees. We also have a considerable body of men who, three years ago, were having difficulty in securing and retaining employment due to advancing years. It is extremely doubtful if many of this class will ever again be able to earn a livelihood, and they are

many years short of the age at which they may secure the old age pension."

Of the 31,352 vacancies filled, 26,692 were for males and 4,439 for females.

Placements in the male section were recorded as follows: 8,463 sent to farms, 245 to building construction, 95 to clerical work, 262 to personal occupations, 7,730 to general labouring, 1,103 to lumbering, 99 to manufacturing industries, 23 to railways, 377 to mining, 361 to mis-

cellaneous occupations, and 8,168 to casual employment.

In the female section, 1,130 persons were sent to farms, 11 to clerical occupations, 2,105 as domestics, 17 to miscellaneous occupations, and 1,177 to casual employment.

Of the 27,100 vacancies listed in the male section 99.3 per cent were filled, in the female section 4,591 vacancies were listed, of which 96.7 per cent were filled.

### Women's Minimum Wages in Alberta

The eleventh annual report of the Minimum Wage Board of Alberta, which is included in the annual report of the Bureau of Labour records decreases in female employees under all orders. Some of this decrease was explained by the fact that "due to lack of finances only city establishments were visited, consequently there is no record of employment in places outside cities formerly included."

A total of 2,746 inspections was made or 2,563 businesses in which were employed 6,799 experienced females, and 509 learners; 347 orders

for adjustment of wages, 23 for adjustment of hours and 23 for adjustment of staff (so that not more than 25 per cent would be in receipt of apprentices' wages) were made.

Three court cases were taken against employers for failing to pay minimum wages. One conviction was obtained and two were dismissed.

A number of permits was issued for overtime to be worked to take care of emergencies that had arisen. In all cases employers advised the Department of the number of hours worked and the amount paid for same.

### MOTHERS' ALLOWANCES IN BRITISH COLUMBIA IN 1933-34

THE administration of Mothers' Allowances in British Columbia under the provincial Mothers' Pensions Act for the year ending March 31, 1934, is dealt with in a recent report by the Superintendent of Welfare.

The number of families assisted as at March 31st, 1934, was 1,436, the number of children 3,147, while the amount expended in payment of Mothers' Allowances was \$621,502.14 for the year. Of this total the amount chargeable to municipalities was \$243,966.22 and to the Province \$377,535.92.

These figures represent a decrease in every instance as compared with the year 1932-33 as revealed by the statistical summary for that year as follows: Number of families, 1,514; children benefited, 3,274; amount charged to municipalities, \$310,128.73; amount charged to province, \$469,510.99; total expenditure, \$779,639.72.

It is pointed out that these substantial reductions were made necessary owing to financial conditions, and that "in the main, the mothers have realized the reasons for reduced allowances and have done their utmost by care and good management to carry on uncomplainingly. They have recognized the advantage of the Mothers' Allowances as compared with various forms of relief paid to families on a much smaller scale."

It is evident from the Visitors' reports and representation from the mothers themselves, states the superintendent that the present scale of allowances is inadequate and that "as soon as financial conditions will permit should be increased."

The superintendent considered that one of the most difficult problems was that respecting one-child cases and in this respect states: "For several years past the policy has been to restrict the indiscriminate granting of these. At the present time, grants are only being made where the mother or the child is in ill health, or in the case of an incapacitated husband living in the home, or of an older child living in the home over the age of sixteen, in ill health, or where the mother is in advanced years. It is considered that a young mother with only one child should, in normal times, be able to assume responsibility for the care of herself and child. It is true, that during these depressed times it is difficult to obtain employment, but where work cannot be secured, women as well as men, are entitled to unemployment relief and many are being assisted in that way. There is of course a difference of opinion on this point. The British Columbia Mothers' Pensions Act permits one child cases, and therefore it is argued that such applications should not be refused.

Some of the Provinces of Canada are not allowing one child cases at all, while others do so, with restrictions similar to those imposed in British Columbia at the present time."

Another problem dealt with was that concerning the incapacitated husband living at home for which the Act makes no provision. In former years, under an arrangement with the municipalities, \$10 per month was paid in such cases. However, since 50 per cent of the cost of mothers' pensions was made chargeable to municipalities, very few are now receiving it, and only in special instances of very urgent necessity.

In commending the work of the Mothers' Pension Visitor the report emphasizes the difficulties of such position "inasmuch as she must protect the taxpayer and safeguard the public treasury from fraudulent claims and

from claims which after investigation would appear to be the responsibility of some other person, or of a fund other than that provided for Mothers' Pensions."

Of the 1,436 families assisted, 844 were families of widows; in 284 cases the husband was incapacitated; in 47 cases the husband was insane; in 12 cases the husband was in penitentiary. There were also 39 cases of divorced wives; 153 cases of deserted wives; 52 cases of unmarried mothers; and 5 cases of foster mothers.

In 502 cases there was just one child; in 499 cases there were two children; in 230 cases there were three children; in 121 cases there were four children; in 48 cases there were five children; in 23 cases there were six children; in 9 cases there were seven children; and in 4 cases there were eight children.

## WORKMEN'S COMPENSATION IN ALBERTA

### Amendments to Regulation No. 13

**A**MENDMENTS to the regulations under the Workmen's Compensation Act (Accident Fund) of Alberta were published in the *Alberta Gazette*, September 15. The regulations of the Workmen's Compensation Board, as revised last year, were outlined in the *LABOUR GAZETTE*, March, 1933, page 277. In Regulation 13, as re-issued, the words printed in italics are new. Regulation No. 4, sub-paragraph 6 (now repealed), provided that for purposes of assessment employees of limited liability companies should be held to be "workmen" under the Act, payrolls to be stated to the Board by such companies.

#### REGULATION No. 13

Where in any calendar year the amount chargeable to the account of any employer is in excess of a sum equal to the amount of the ordinary assessment against such employer for the

current calendar year increased by five per centum, the Board shall assess and levy upon such employer for that year, in addition to the ordinary assessment, a super-assessment equal to the difference between the amount of the ordinary assessment for that year and the amount chargeable to his account for that year up to, but not more than, thirty-three and one-third per centum of the ordinary assessment, and such super-assessment not to exceed an amount equal to ten per centum of the total deficit of disbursements over receipts of such employer, and provided also that the additional charge herein provided for shall not be imposed in respect of any industry unless and until a period of three years has elapsed since the establishment thereof as an industry within the scope of the Act.

Regulation No. 4, sub-paragraph 6, is hereby repealed.

THE WORKMEN'S COMPENSATION BOARD,

F. D. NOBLE, Secretary.

## WORKMEN'S COMPENSATION IN QUEBEC IN 1933

**T**HE sixth annual report of the Workmen's Compensation Commission of Quebec reviews the administrative duties during the calendar year 1933. While the report is the sixth to be issued, it is the third dealing with operations under the Act of 1931 (*LABOUR GAZETTE*, May, 1931, page 525).

During 1933, there were 30,462 accidents reported to the Board as compared with 34,414 in 1932. Final figures for 1932 indicated a total of 30,643 claims allowed for accidents of which number 165 were for fatalities, 14,767

for compensation, and 15,711 for medical aid only.

The number of employers reporting to the Commission as at December 31, 1933, was 8,239, as compared with 7,979 at the end of the year 1932. It was explained that this increase in the number of employers reporting to the Commission resulted from special investigations which were made during the year 1933 in co-operation with the Quebec Association for the Prevention of Industrial Accidents. Every possible source of information was utilized

and the Commission is of the opinion that very few employers subject to the Act are carrying on operations without reporting to the Commission.

The total benefits awarded by the Commission in 1933 amounted to \$2,473,213.77; of which \$430,555.29 was for medical aid only. Administration expenses for the year totalled \$247,584.35, representing 9.98 per cent of all benefits awarded. In 1932 the amount awarded for benefits was \$2,852,292.90, which, compared with the amount for 1933 (referred to above) indicates a reduction during the past year of approximately \$379,079.

*Method of Rating.*—Explaining its method of rating the various industries for compensation purposes the report states:

"Separate accounts are kept of all assessments received and all compensation and medical aid awarded for each of these classes. Each of the 24 classes of industry is thus in effect a mutual insurance association of the employers in that class.

"The rates for each class are fixed and the assessments made in much the same way as a municipality levies its taxes. They are governed by the requirements. The rates fixed for the year are intended to cover the burden for that year. At the beginning of the year each employer is required to furnish the Commission with an estimate of his probable payroll for the year and he is assessed provisionally upon that estimate. At the end of the year the actual amount of pay roll is ascertained and the assessment is adjusted accordingly, the rate provisionally fixed being also altered where the accident experience shows this to be necessary.

"The rates are fixed in accordance with the accident experience. The amount of compensation and medical aid and the amount of assessments in the class for the preceding year are ascertained, an estimate being made of the amount still remaining to be paid for accidents which, by reason of continuing disability or for lack of reports, have not been disposed of before the end of the year, and allowance being also made for the difference between the estimates of pay roll given by employers at the beginning of the year and the actual figures as ascertained and shown in their pay roll statements at the end of the year. In this way the total expenditure and the total income of the class for the year are arrived at as nearly as possible, and the sufficiency or insufficiency of the rate charged determined.

"If it is seen that the rate charged has produced just sufficient money, or if the surplus or deficit is small the rate will be main-

tained. If there is any considerable difference, it will be increased or decreased accordingly. Any surplus to the credit of a class remains in the class funds, and this is also taken into consideration in fixing the rates."

The Commission permits certain classes of employers, known as Schedule 2 employers, to make their own payments to injured workmen or their dependents and such employers report to the Commission the amounts paid in every case. Where there is permanent incapacity or death and a benefit is payable, the Commission issues an award against the employer concerned showing the amount he will be called upon to pay under the Act; a copy of this award is forwarded to the injured workman or his dependants, so that he may be aware of the payments to which he is entitled. In 1933 Schedule 2 employers, paid in compensation the amount of \$405,830.58 as compared with \$547,175.36 in 1932.

The falling off in benefits awarded in Schedule 2 in 1933 resulted, it is stated, in great measure from reduced employment on railroads. A considerable number of such employees are working part time only and are less exposed to accidents as a result. Dealing with amendments to the Act the report stated that at the end of the year 1932, the Commission was faced with a provisional deficit of \$829,179.08 in the accident fund which necessitated a temporary reduction of benefits if the accident fund were to remain solvent. Accordingly the Act was amended to meet this contingency (LABOUR GAZETTE, March, 1934, page 239). The report also added that "a very considerable proportion of the deficit in the year 1932 arose from the unrestricted choice given to the workman as regards his attending physician in case of injury coming under the Act. The Act was amended in this respect by placing the choice of the doctor under the control of the Commission" (LABOUR GAZETTE, March, 1934, page 239).

*Safety and First Aid.*—During the year 1933, the Commission allowed \$7,900 to the Quebec Pulp & Paper Safety Association, together with \$44,500 to the Quebec Association for the Prevention of Industrial Accidents. The Commission, it is stated, is furnishing complete information to these Associations, showing the accident experience for each employer which permits a rapid follow-up of dangerous establishments, with the result that many safety measures have been adopted, guards installed on machinery, etc., which should have an appreciable effect on the loss ratio shown in future.

As regards first aid, the report pointed out that "the experience in the forest industry, has been very unfavourable up to the present." It was decided therefore to require employers in these classes to equip field hospitals and to keep a doctor available for treating injuries. The Commission has co-operated as far as possible in establishing these first aid stations by paying the salary of the doctor, where the number of men engaged has been sufficient to warrant this expense. It was believed that very considerable savings have been effected in this way, as infected wounds, which were not previously treated for three or four days, now receive prompt attention, thus greatly

reducing the period of disability suffered. The Commission also requires the employer to provide board and lodging during the first seven days of treatment at these first aid depots.

The financial statement indicated that the total expenses for 1933, actual and estimated, amount to \$2,337,600.74, while the total revenue, actual and estimated, amounts to \$2,336,419.18, leaving an apparent deficit on the year's operations of \$1,181.56.

The report concludes with tabular statistics for the year 1932, furnishing completed information for that year with respect to accidents, etc.

## TRADES AND LABOUR CONGRESS OF CANADA

### Summary of Proceedings of the 50th Annual Convention

THE Trades and Labour Congress of Canada held its fiftieth anniversary convention in the Royal York Hotel, Toronto, September 10-15, 1934. Presiding over the opening, Mr. William Dunn, president of Toronto District Trades and Labour Council, welcomed the delegates on behalf of organized labour of Toronto and District. In extending the civic welcome to the delegates, His Worship, Mayor Stewart of Toronto thanked the trade unionists for their contribution to the Centennial Celebration, and reviewed the principles and progress of the Congress.

Hon. Arthur Roebuck, Attorney General of Ontario, extended a welcome to the delegates on behalf of the provincial government and Province of Ontario. After dealing with two matters in the sphere of Labour—organization and the securing of agreements with employers—he stated that it was the intention of the provincial government to enact legislation giving legal status to agreements entered into between employers and employees. The Attorney-General further informed the delegates that where the majority of the employers and employees enter into an agreement such agreement will be legal and enforced by the minimum wage board. Reference was made to the minimum wage law for women which the speaker stated was construed, at times, as the prevailing, rather than the minimum wage. Mr. Roebuck further intimated that there would soon be a minimum wage for both men and women and this combined with codes would abolish many existing abuses and establish uniformity of conditions throughout the Province. In his opinion the enforcing of agreements would aid organized labour in dealing with the question

of wages and hours and competition would regulate prices. He also thought that if the Congress could procure wage increases it would help recovery.

Hon. W. A. Gordon, Minister of Labour, who was next introduced by the chairman, declared that the members of the Congress had a right to congratulate themselves on the splendid showing at this convention. He informed the delegates that in the early years of the existence of the organization it was looked upon with anxiety and fear lest its policies result in chaos and confusion. After fifty years, in the Minister's opinion, these policies were not materially changed. The Hon. Mr. Gordon told the delegates that as a result of the thoughtful representations of organized labour many reforms have been brought about and consummated. He informed the delegates further that he was not unacquainted with the difficulties of the working people. Continuing, the speaker made it quite clear that he did not believe in dismissing employees on account of their political opinions. Reference was then made to the meetings of the International Labour Organization at Geneva and the stand taken by the Federal representative at these meetings. The delegates were informed that the representative of the Dominion Government refrained from voting on such questions as affected provincial autonomy and not as being opposed to the measure under review. He suggested that the Congress ask the various Provinces to send representatives to the meeting of the International Labour Organization. Hon. Mr. Gordon drew attention to the great value of conferences and conciliation in settling disputes and urged that advantage be taken of the good offices of the

conciliation officers of the Department when difficulties arise. The delegates were advised that when boards were asked for and found in order that these in all cases were set up as promptly as possible in order to avoid serious ruptures in the relations between employers and employees. During the past four years over thirty boards had been established and their findings were fairly satisfactory. Continuing, the Minister stated that every proper effort should be made to prevent unsound reductions in wages as it was extremely difficult to restore them to what they were before the cut. It was the expressed opinion of the Minister that public bodies that do not give their support to labour are not playing their part. The Dominion Government, in so far as it can under the law and with the aid of the Provinces will stand four square behind the well balanced views of organized labour, stated Mr. Gordon. In conclusion he informed the delegates that the government would do what it could to render more secure the jobs of the workers and prevent them from being exploited.

His Honour, Lieutenant Governor of Ontario, was the next speaker to be introduced. In opening his address the Lieutenant Governor declared: "We all toil but with different tools." He congratulated the Congress for upholding the rights of men. It was his hope that the difficulties confronting the members would never daunt them, and that they would use every constitutional means at their command to better their conditions.

The preliminary findings of the Committee on Housing Conditions in Toronto, of which the speaker was chairman, was then presented.

Following these addresses, the chair was taken by President Moore, who thanked the previous speakers for their presence and their words of welcome. Continuing, he referred to the adoption of codes in industry in the United States and felt that many had benefited thereby. Speaking of the reference made by Attorney General Roebuck to codes, the president warned the delegates to beware of industrial codes lest they become cords which would bind and restrict them in their trade union activities. He was of the opinion that the Congress must give a lead of militancy steadied by sober thought and that the watchwords should be justice, equality and freedom.

After the various committees were appointed, the credential committee presented their preliminary report. The final report of this committee, which was presented on the last day of the convention, showed the following number of delegates present: Fraternal delegates, 2, one representing the British

Trades Union Congress and the other the American Federation of Labour; provincial federations, 1; trades and labour councils, 43; divisions of railroad telegraphers, 11; local unions, 274; international representatives, 42, making a total of 373. When the number was announced the chairman stated it was the largest attendance since 1921.

### Report of Executive Council

In opening the report, the officers reviewed the early history of the organization and the difficulties and hostility which it had to meet. Reference was made to the legislative program prepared and submitted to the Dominion Government (LABOUR GAZETTE, March, 1934, page 242). The report drew attention to employment and unemployment relief and briefly outlined the measures adopted by the government at its last session coming under these headings. Mention was made of an amendment to the Criminal Code with regard to picketing which complied with requests submitted by the Congress for a number of years. Reference was also made to the new Shipping Act and also to the enactment of legislation with regard to technical education which permits of extending the time for spending the unappropriated balances available to the Provinces of Nova Scotia, Manitoba and Saskatchewan. Among other subjects dealt with in the Executive report were: Radio broadcasting; banking credits and currency; taxation and financial matters; Natural Products Marketing Act; control of industry; railways and shipping; immigration; Election Act; cadet training; League of Nations; prison reform; legalizing of sweepstakes; relation with national and international bodies; International Federation of Trade Unions; International Labor Organization; National Research Council; Dominion Council of Health; National Construction Council of Canada; League of Nations Society in Canada; Canadian Council on Child and Family Welfare; *Canadian Congress Journal*; amendments to the British North America Act; labour and peace; road transport; and the Tolpuddle martyrs. Two other subjects in the report received considerable attention, namely: unemployment and relief for the unemployed, and industrial control and minimum wages. Under the first heading, the measures adopted by the Dominion were reviewed. It was felt that these measures would be of some benefit but considered that anything short of what was contained in the legislative program presented to the government in February, 1934, would be inadequate. Under the second heading, reference was made to the Royal Com-

mission investigating price spreads and certain industrial and commercial practices and to a brief prepared and submitted to this body by the president on behalf of the executive committee, setting out proposed remedies for conditions in certain industries. It was the opinion of the officers that closely allied with the question of minimum wage laws for men was the fixing of such wages through code authorities.

Labour's future policy in respect to minimum wage laws for men and the establishment of codes for the regulation and control of industry was left to the convention to define.

A review of provincial legislation as affecting labour was also given in the executive report, as well as the reports of the fraternal delegates to the British Trades Union Congress and the American Federation of Labour, and also the report of the delegate to the sixth International Trade Union Congress.

The executive report was sent to the various committees for their consideration and recommendations.

### **Report of Secretary-Treasurer**

According to the secretary-treasurer's report, total receipts, including balance brought forward, amounted to \$25,228.54, expenditures totalled \$22,167.50, leaving a balance on hand of \$3,061.04. The report also showed a membership of 103,424 on which per capita tax had been received.

The report of the Trustees on Congress headquarters showed total receipts of \$3,531.70, expenditures of \$2,410.19, leaving a balance of \$1,121.51.

### **Committee on Officers' Report**

The committee's report on that portion of the executive report with which they had to deal was taken up *Seriatim* and given approval with the exception of the section on industrial control and minimum wages. This caused a general discussion with quite a number of the delegates voicing their opposition to the establishment of minimum wages for men. It was finally referred back to the committee with instructions that they with the assistance of the executive council formulate the policy of the Congress on industrial control and minimum wages for men.

### **Report on Committee on Legislative Activities**

This committee commended the executive of the Congress for its vigilance and industry in observing and disseminating through the medium of the *Canadian Congress Journal* all

of the various activities of Parliament on matters of direct concern to the workers of Canada. Satisfaction was expressed for the amendment to the Criminal Code in relation to picketing. In this connection the incoming executive were instructed to bring pressure to bear upon the proper authorities with the view to securing wider recognition and application of this change. The tendency of Parliament toward legislative measures for the benefit of producers was also approved. In regard to the program presented to the Dominion Government by the Congress, regret was expressed that only a minimum of consideration was given, particularly in regard to the Canada Shipping Act which differs from the representations submitted by the representatives of Congress. The committee noted evidences of increased consideration of the human element in industry and agriculture and attributed this development to the following: the precedent established by the present administration of the United States; disclosures of the Stevens' investigations; and the urging by the Congress of its legislative programs. The committee warned the membership in all provinces not to place too great a dependence upon legislation as it can never be a substitute for the trade union, stating it is "the only means through which codes can be properly policed and chiselling prevented."

### **Fraternal Delegates Addresses**

Introduced by the Congress Secretary-Treasurer, Mr. J. P. McCurdy, secretary of Maryland State Federation and fraternal delegate from the American Federation of Labor, gave a review of the working of the National Recovery Act as it affected the workers in the United States. He informed the delegates that there were approximately 10,300,000 unemployed in the United States in June, 1934, as compared with 10,100,000 in October, 1933. The speaker was of the opinion that there are now in Canada about 200 branch factories of firms with headquarters across the line.

Mr. J. Marchbank, secretary of the National Union of Railwaymen and fraternal delegate from the British Trades Union Congress, reviewed the successes of labour in the political field and advised that they were trying to educate the membership in political action as well as industrial action. At the present time, the speaker stated, there were 210 organizations affiliated with the British Trades Union Congress with a membership of 3,294,581. He informed the delegates that there was a movement in his own organization to unify the various organizations in road, rail, water and air transportation. The speaker made it quite

clear that labour in Great Britain believed in conciliation but refused compulsory arbitration.

During Congress week a banquet was held to honour the memory of the Tolpuddle martyrs. Seven direct descendants of the martyrs attended, among whom was John Brine, now 88 years old, of St Mary's, son of James Brine, one of the six men in whose memory the banquet was held.

Hon. Arthur Roebuck, Attorney General of Ontario, was among the speakers and was the recipient of a bound volume containing the history of the Tolpuddle martyrs, the gift of the British Trades Union Congress, presented by President Moore of the Trades and Labour Congress of Canada. Following the speeches, the life of George Loveless was dramatized.

Continuing its report the Committee on Officers' Reports considered that central councils should be encouraged to affiliate with the League of Nations Society in Canada and where possible form study groups for the consideration of international affairs. They also warned local unions against having any dealings with the so-called "No More War Groups" alleged to be organized as offshoots of the Communist Party.

The subject of Industrial Control and Minimum Wages, which was debated previously and referred back to the committee for further consideration, was re-introduced. After drawing attention to the present trend towards regulation of industry to prevent exploitation and to the alleged evasions and disadvantages of existing legislation, the committee submitted the following recommendations, which were subsequently unanimously adopted:

(1) "Ample provision should be made by amendment to present laws and in future laws for the appointment of sufficient inspectors to ensure enforcement of the same.

(2) "All industrial regulatory laws should provide for a minimum and maximum number of hours to which they should apply.

(3) "There must be uniformity throughout the Dominion to prevent inter-provincial competition and evasion of the standard set by the removal of industries from one province to another. This can most effectively be achieved by amendments to the British North America Act by giving to the Federal Government full power to enforce such regulations, failing this our provincial executive should endeavour to have their respective governments mutually agree on uniform standards and methods of enforcement whether federal or provincial.

(4) "Such legislation can only be effective where adequate penalties for violation are provided and in this respect we look favourably upon the provisions contained in the new Alberta legislation providing for the licensing system and the cancellation of such licences where deliberate violations occur and also the

provisions of several provincial female minimum wage laws for prison sentences for second or subsequent offences.

(5) "It is our studied opinion that any such laws must provide the co-operation with bona fide unions, as it is only by full recognition of union agreements being accepted as the schedules to be enforced that the breaking down of established conditions can be avoided. Any legislation which ignores this fundamental principle of collective agreements should be vigorously opposed as should also schedules fixed arbitrarily by legislative bodies without consultation and agreement with the trade union organizations of the classes of workers covered by the same.

(6) "Exemptions are dangerous and should be prohibited as all wage earners are entitled to the full protection that such legislation may be able to give.

(7) "The right to organize in unions, free from any control whatsoever by employers or their agents should be clearly stated in the legislation.

(8) "Any provision for the incorporation of trade unions should be opposed as they successfully were in the Collective Labour Agreements Extension Act in the Province of Quebec and previous to that in the federal legislation giving trade unions the right to protect union labels by process of law.

(9) "Trade unions only should be given the right to represent wage earners interests in the negotiation of collective agreements and in the formation of any joint bodies created for the purpose of framing, administering or enforcing industrial control legislation as individuals are unable to carry out such functions."

### Committee on Constitution and Laws

This committee, to which two resolutions were referred dealing with the chartering of federal labour unions, recommended that there should be two classes of charters issued, viz: Class A.—federal units covering employees engaged in industrial activities, and such charters will only be issued when the application for same has been approved by the local trades and labour council, if one in existence; Class B.—Civic employee units. All federal units are required to affiliate and continue in affiliation with trades and labour councils in their respective localities where such councils are established.

### Resolutions

In dealing with eight resolutions submitted under the heading "Hours of Labour", the committee on resolutions grouped five and submitted a substitute for the whole as follows: "That this convention go on record in favour of a shorter work day and work week in conformity with the producing power of the nation, and that the Trades and Labour Congress of Canada through its executive council and provincial executives continue to press in an endeavour to have an inter-provincial conference called to assure the adoption of the necessary legislation to establish

such shorter work day and work week in all industries throughout all provinces of the Dominion."

Under the heading "Employment and Relief for the Unemployed", nine resolutions were grouped and the subject caused a prolonged discussion. The recommendation of the committee finally adopted, was to repeat the measures submitted to the Government in February, 1934, as follows:—

(1) Carrying out of federal, provincial and municipal building programs, employment on same to be made equally available to all unemployed persons, irrespective of whether they are registered as in receipt of relief or not.

(2) Provisions of fair wage regulations to apply to all relief works, including that done in relief camps established for single men.

(3) Enactment of legislation for a maximum *eight hour day and five day week in all industries* and the adoption of a maximum six hour day on relief works and government undertakings.

(4) Raising of purchasing power by payment of higher wages and salaries, and by a reduction of interest rates on bonds, mortgages, etc.

(5) Enactment of contributory unemployment insurance legislation as a national measure.

(6) National planning and establishing of an economic council to study and make recommendations to cope with economic changes taking place in industry and agriculture, especially in respect to the questions of distribution, purchasing power, displacement of labour by machinery and similar matters.

(7) Acceptance by the Federal Government as a national responsibility of the payment of adequate direct relief and its uniform application to all needy workers throughout the Dominion.

Unanimous consent of the delegates was given to the introduction of a resolution vigorously protesting against a recent memorandum of the Hydro Electric Commission issued to its employees which was reported to contain the following instructions: "That no employee of the commission take an active part in political activities, Dominion, provincial or municipal, either as a candidate for public office or in support of any holder, or candidate or party or as a member of any political party without prior written consent in each individual case of the commission."

Subsequently the attorney-general stated he would be willing to discuss this question with representatives of the Congress. Secretary-treasurer P. M. Draper and vice-presidents J. Simpson and R. Tallon waited on the Minister and Mr. S. Lyons, chairman of the Hydro Commission, and presented organized labour's views on the memorandum. Later the following message was received from the Attorney General: "In view of the representations made by the representatives of the Trades and Labour Congress and the further information laid before the Commis-

sion and after a fuller consideration of the problems involved, a majority of the Board is prepared to vote at the next meeting of the Board to rescind the Board's order respecting the participation of employees of the Board in politics, Dominion, provincial and municipal, and to in future follow the general principles now governing such relations between the Board of the Canadian National Railway and its employees which are to the effect that employees are permitted to take part in campaigns, accept nominations and if elected will be required to take leave of absence only during the time these various bodies are in session."

A subsequent announcement declared that the Board was prepared to rescind the former order and make effective the new regulations as approved by the majority of the board.

Resolutions were adopted making the following recommendations:

To provide all school students with books necessary for their education free of charge; also to abolish the examination fees and terminating all examinations with the month of June.

Inclusion of all branches of the construction industry under the Ontario Apprenticeship Act.

Opposing any further unification, consolidation or amalgamation of railway services.

Regulation of motor vehicle transportation.

Enactment of a National Retirement Act for railroad employees.

Restoration of the definition of "sailing ship" in Bill 91 (Canada Shipping Act) to its original form, as in Bill E passed by the Senate.

Compulsory observance of Armistice Day as a public holiday.

That ballot papers for provincial and federal candidates show the political party each represents instead of the occupation.

Proper accommodation for voting.

Appointment of a competent inspector of gears, tackles and working ways used in loading ships at Halifax and other ports where similar conditions exist.

Restriction of the use by street and electric railways of one-man cars, with their ultimate abolition.

Police protection in the enforcement of the Operating Engineers Act on complaint of any violation.

That all printing establishments be forced to conform with factory regulations.

Enactment of legislation making it compulsory to have cars of passenger elevators equipped with safety doors, distinct from and in addition to doors leading from landings.

Opposing the use of steel sash for windows unless one in every three on each floor be of a type which will open from inside outward as a means of rapid escape in case of fire.

Enactment of legislation for the examination and licensing of all persons engaged in steam-fitting and allied pipe trades.

Opposing the practice of workers carrying certificates for both plumbing and electrical trades.

Compulsory periodical inspection of automobiles, particularly brakes and headlights.

That Ontario truck owners be compelled to place two drivers on commercial trucks on transport work and that a special tax be placed on trailers carrying freight attached to commercial trucks.

Automobile insurance (by legislation in Quebec) against accident to others, and that chauffeurs' examinations be made as severe as possible.

Enactment by the Federal government of legislation instituting a system of contributory unemployment insurance controlled and administered by the Federal Government.

The printing of bonds and securities in Canada from steel plates.

Prohibiting provincial government employees carrying on other business in spare time.

Foreclosure moratorium for the Province of Nova Scotia.

One day's rest of twenty-four consecutive hours each week in places of amusement in the Province of Quebec.

Opposing Sunday work in paper mills.

Eight-hour day for all permanent fire departments throughout Canada.

Opposing night delivery of milk.

Enactment and enforcement of legislation making it unlawful to work in the building industry more than forty hours a week or eight hours a day during the first five days of the week, the hours to be from 8 a.m. to 12 noon and from 1 to 5 p.m.

That municipalities receiving government financial aid be obliged to pay the fair wage rate pertaining to the various crafts employed.

Fixing of minimum and maximum prices charged by barbers for their services.

Amendments to the British North America Act.

Political freedom for all Canadian citizens.

Establishment of an economic co-operative system in Canada by the Federal Government.

The prohibiting of the wearing of uniforms in public by members of political organizations, and that the Congress use every legitimate means to defeat facism.

Legislation to protect the workers in all industries in the exercise of their right to

organize, bargain collectively, secure signed agreements and be represented by representatives of their own choice, with government assistance when necessary to secure satisfactory adjustment of all disputes.

Legislation to prohibit any employees organization formed or controlled by the employer, employers' group, or their agents from having any legal status or official recognition in respect to collective bargaining and agreement.

The taking of a national referendum before any declaration of war.

Abolition of Section 98 of the Criminal Code.

Establishment of a system of national control of the banking system of the Dominion.

Greater support of the Provincial Bank of Ontario and that it be not restricted in the interest of privately owned banks.

Legislation to permit the payments of dividends only on actual capital employed and prevent inflation and over-capitalization of stock.

The operation of a building program financed by the Federal Government, the provincial governments to enact legislation exempting from municipal taxation all new buildings and improvements to old buildings for a period of ten years.

Amendments to the Compensation Acts in the provinces of Ontario and Quebec.

Enactment of sickness and invalidity insurance legislation.

Provision for Mothers' Allowances in Quebec.

Dominion-wide legislation for old age pensions to be administered by the Federal Government.

Full restoration of promotions, increases and compensation in the public service.

That Ontario breweries and distilleries be allowed to advertise in the papers of the province.

Support of those advocating public ownership of electricity.

### Election of Officers

The election of officers resulted in the re-election of the executive as follows:

President, Tom Moore, Ottawa, (Sixteenth consecutive term).

Vice-presidents: R. J. Tallon, Calgary, (Eighth consecutive term); James Simpson, Toronto, (Eighteenth consecutive term), and P. R. Bengough, Vancouver, (Fifth consecutive term).

Secretary-treasurer, P. M. Draper, Ottawa, Ont. (Thirty-fifth consecutive term unopposed).

Provincial Executive Committees: Nova Scotia; (Executive to be elected later). Que-

bee: L. A. Beaudry (chairman), Montreal; Omer Fleury, Quebec; G. R. Brunet, Montreal; Pierre Lefebvre, Montreal. Ontario: W. Russell (chairman), Toronto; Ald. Rod Plant, Ottawa; E. Walker, London; F. Lamb, Toronto. Manitoba: H. Kempster (chairman), Winnipeg; Robert Hewitt, Winnipeg; George Schollie, Winnipeg; Ald. William Lowe, Winnipeg. Saskatchewan: H. Perry, (chairman), Regina; H. D. Davis, Prince Albert; A. Taite, Moose Jaw; Ald. A. M. Eddy, Saskatoon. British Columbia: Bert Showler (chairman), Vancouver; A. Ross, Vancouver. The Trades and Labour Councils of Victoria and Prince

Rupert to select one member each to complete the executive:

Fraternal delegate to the American Federation of Labour, William Dunn, president, Toronto and District Trades and Labour Council.

Fraternal delegate to the British Trades Union Congress, 1935, Ernest Inglis, London, Ont., Canadian vice-president of the International Brotherhood of Electrical Workers.

By unanimous consent Halifax, N.S., was selected as the convention city for 1935.

The commemorative service at London for the Tolpuddle Martyrs was outlined in the last issue of the LABOUR GAZETTE.

## RECENT LABOUR UNION CONVENTIONS

### Postal Employees of Canada

The fourth convention of the United Postal Employees of Canada was held in Toronto, on September 4-6, 35 delegates attending. President E. L. Goodwin occupied the chair. Speakers who addressed the delegates at the opening session were: His Worship, Mayor Stewart; Controller Simpson; V. C. Phelan, President, Civil Service Federation of Canada; John Reaves, Secretary of the Federated Association of Letter Carriers, and Mr. S. Nelson of the Civil Service Commission.

The new constitution, adopted by the convention, provided for the taking out of a charter with the Dominion Government for the financial protection of locals; the holding of biennial conventions; and the levying of a special assessment not to exceed fifty cents per member.

The adopted resolutions contained the following recommendations:

The closing of post offices on public holidays.

That all uniforms be contracted for and made locally.

The cancellation of departmental regulations requiring a work week of 48 hours at certain periods of the year.

Promotions to be made chiefly on the basis of seniority and adaptability.

Improving the working conditions of the various staff offices.

The re-establishment of the ratio of 7 hours night duty as equivalent to 8 hours day duty and 6 hours of Sunday work as equivalent to an 8 hour week day.

That any employee called for questioning on any serious charge be privileged to have some one present with him at the interview.

The establishing of a 40 hour week for day workers and a 35 hour week for night workers, night work to commence at 5 p.m.

Prohibiting the use of sealing wax on back of letters.

That promotions be given full consideration in post office staffing.

Maintenance of the merit system in the civil service.

The re-opening of the Superannuation Act.

Prohibiting red envelopes and red labels on newspapers.

That preference be given to seniors in choice of duties and hours.

The destruction of error slips after one year.

That all naval and military war service be recognized as continuous service for superannuation only.

Restoration of the interest rate on retirement funds to five per cent.

That paid up civil service insurance policies be paid back in a cash annuity, if so desired, after the age of sixty.

That Civic Holiday be considered as a statutory holiday.

The immediate filling of promotional vacancies and that the higher salary be paid.

Proportional representation on the Federation National Council.

That the name of the organization be changed to "Canadian Postal Employees," and that each local be advised that letter carriers cannot belong to the "Canadian Postal Employees". (These employees have their own organization.)

The restoration of the ten per cent deducted from salaries, together with the statutory increases and promotions.

That the age limit for promotions for positions of railway mail clerks be raised from 35 to 40 years.

The deduction of organization dues from the pay cheques.

The election of officers resulted as follows: President, W. H. Smith, Calgary; first vice-president, W. J. White, Moncton; second vice-president, N. J. Moran, Toronto; third vice-president, J. Carr, Hamilton; fourth vice-president, C. W. Powers, Sherbrooke; secretary-treasurer, W. N. Duncan, Toronto.

### Brotherhood of Maintenance of Way Employees

The twenty-fifth regular convention of the Brotherhood of Maintenance of Way Employees, which was held in Detroit, on September 10, was attended by over three hundred delegates from Canada and the United States.

Among those to extend a welcome to the delegates were H. B. Kuder, representing Mayor Couzens, and Frank Martell, president of the Detroit Federation of Labour. During one of the earlier sessions of the convention R. J. Tallon, representing the Trades and Labour Congress of Canada conveyed fraternal greetings to the delegates from the Canadian body. The secretary-treasurer read a telegram from Hon. W. A. Gordon, Minister of Labour of the Dominion of Canada, in which the minister expressed his appreciation of the invitation to the convention, and regret that pressure of official duties would prevent him from being present.

The president in his address gave a complete review of the activities of the organization during the past three-year period.

The secretary-treasurer in addition to presenting statistical information in his report also suggested certain constitutional changes that would relieve the strain on the Brotherhood's finances.

A careful review of the constitution, was made and on recommendation of the Committee on Constitution, several changes were adopted by the convention.

The report of the Committee on Jurisdiction made reference to the various jurisdictional agreements which had been entered into with other organizations and indicated the impracticability of such agreements. The following recommendations of the committee in this connection were adopted by the convention:—

(1) The Brotherhood of Maintenance of Way Employees should be a Maintenance of Way and Structures Department organization, accepting to membership and representing all Maintenance of Way Employees covered by Maintenance of Way payrolls and supervised by

Maintenance of Way officials, except clerical forces and signal men.

That the executive head of our organization extend to the Brotherhood of Railway Signalmen an invitation to amalgamate their organization with our Brotherhood and advise the Signalmen's organization of our willingness and desire to meet with them for the purpose of working out an amalgamation agreement mutually satisfactory to our respective organizations.

(2) The Brotherhood of Maintenance of Way Employees should not seek to represent railway employees in any other department of the railroads, and where we now represent those in other departments, steps should be taken to transfer such employees to other standard railway labour organizations prepared and qualified to represent them under the standard railway labour movement.

(3) The jurisdictional agreements heretofore entered into and in conflict with the purpose and intent of the two foregoing recommendations are not in the best interests of our organization, but are detrimental to the present and future welfare of our Brotherhood. They should be abrogated or modified.

(4) That the incoming executive officer of our Brotherhood be and is hereby instructed to proceed in such a manner and at such a time as he deems proper to make known to the other railway labour organizations with which we hold jurisdictional agreements the provisions of the foregoing recommendations.

(5) If and when, in the opinion of the Executive Officer of our organization, the fulfilment of the foregoing recommendations would be found to be contrary to the best interests of our organization, he may, with the consent and approval of the Grand Lodge Executive Board, meet the situation in such a way as to protect the interests of our organization, keeping in mind the wholesale dissatisfaction on the part of the membership with the existing agreements.

The resolutions adopted contained the following recommendations:—

Protesting the low wages paid to certain members of the Brotherhood.

Establishment of the union-management co-operative movement as in effect on the Canadian National Railways.

Government ownership and operation of railroads in Canada and the United States.

A non-partisan political policy.

Establishment of a shorter work week without reduction in compensation.

The insertion in each agreement of a provision for arbitration of disputes concerning changes in wages or rules that cannot otherwise be settled.

Adoption of a system of old age pensions.

Opposition to alleged discriminatory practice against regular maintenance of way employees.

The chief officers elected were: President, F. H. Fljozdal, 61 Putnam Ave., Detroit,

Mich.; secretary-treasurer, E. E. Milliman, 61 Putnam Ave., Detroit, Mich. W. V. Turnbull, Montreal, Que., was re-elected Canadian vice-president, while E. J. Hopcroft, Toronto, Ont., was re-elected member of executive board.

Detroit, Mich., was selected as the next convention city.

### **Hotel and Restaurant Employees and Beverage Dispensers' International Alliance**

The twenty-seventh general convention of the Hotel and Restaurant Employees and Beverage Dispensers' International Alliance was held at Minneapolis, Minn., August 13, with 146 delegates in attendance, representing 79 local unions, and a membership of 30,399 out of a total of 50,420 as at June 30, 1934.

In his address, President E. Flore stated that from April 30, 1932, to April 30, 1934, there was a gain of 19,467 members, and that 212 new charters had been issued since September 1, 1932. He presented an audited statement of the finances which showed a total cash balance of \$96,672.80, of which amount \$1,539.96 was on deposit in the Royal Bank of Canada in Montreal. Referring to the difference in opinion as to the best method of organizing, he stated "There are those who believe that the interest of labour would best be served by what they call vertical organization, that is, organization into industrial unions. There are others who favour horizontal organization; that is, organization according to trade. While our organization is organized along industrial lines, much if not all of our organization in the larger cities has been along trade union lines." The president further informed the delegates that recently a change had been inaugurated in New York City and Los Angeles where a semi-industrial form of organization was set up.

Dealing with Canadian activities, President Flore gave a brief review of the twenty-second annual report on Labour Organization in Canada, published by the Department of Labour. In speaking of the affiliation held by the International Union with the Trades and Labour Congress of Canada, the speaker stated "Our affiliation with the Trades and Labour Congress has been helpful to our membership in the Dominion and the officers of the Congress have been ever ready to assist in the development of their field of activity."

According to the report of the secretary-treasurer there were organized during the period May, 1932, to May, 1934, 175 local branch unions, and during the same period 27,631 members were taken into the organiza-

tion. The membership as at April 30, 1934, was 46,948 comprised in 332 locals. A great amount of statistical data, including benefits, membership, weekly wages, etc., was also contained in the report.

The committee on constitution and laws concurred in a resolution recommending that the name of the organization be changed to Hotel and Restaurant Employees' International Alliance and Bartenders' International League of America, and the change in name was adopted by the convention. By unanimous consent the name of the official journal was changed to "*The Catering Industry Employee*."

The Committee on the National Recovery Act and codes expressed the opinion that the success of members of the organization in securing employment was attributable to the repeal of the 18th amendment and not entirely to the promulgation of the hotel and restaurant codes. Commendation was expressed for the efforts put forth to have a minimum wage established for skilled workers in the trade. The committee was further of the opinion that only by the 40-hour week or less could unemployment in the industry be eliminated and agreed with the president and secretary-treasurer in their pronouncement that the N.R.A. cannot supplant the trade union movement in securing justice for the catering industry employees.

The resolutions adopted contained the following recommendations:

Opposition to certain proposed amendments to the hotel and restaurant codes.

The adoption of a private license system for the sale and distribution of liquors.

That the privilege of voting be given to residents of the District of Columbia.

Support of the Costigan-Wagner anti-lynch bill.

The enactment of old age pensions and out of work insurance legislation.

The abolition of private employment agencies.

Financial support to the striking truck drivers of Minneapolis, Minn.

The formation of a Labour Party in the United States.

Appointment of women organizers.

Opposing any co-operation with dual organizations.

The licensing of cooks through an examination as to their ability and the standardization and sanitation of eating establishments.

Opposing further loans and credits to the Nazi Government of Germany.

Opposition to company unions.

The enlarging of the executive of the American Federation of Labor.

Opposition to fascism in the United States and a boycott of goods made in countries where fascism rules.

Opposing the employment of persons under the age of 21 in establishments dispensing hard liquors and strong wines and malt beverages.

Adoption of the 30-hour week, with a 6-hour day and 2 days rest in seven.

In the election of officers, President Edward Flore, of Buffalo, and Secretary-treasurer, Robert B. Hesketh, of Cincinnati, were unanimously re-elected.

Rochester, N.Y., was selected as the next convention city.

### International Photo Engravers Union

The thirty-fifth annual convention of the International Photo Engravers' Union was held at Indianapolis, from August 20-25, with approximately fifty delegates in attendance.

In presenting his report, President Edward J. Volz recalled the experiences and accomplishments of the past year, and reviewed at considerable length the operation of certain codes and the advantages accruing from their developments under the National Recovery Act. The report showed a total membership of 8,649, a decrease of 273 for the year. In speaking of Canada, the president stated that

the situation concerning the local unions of the organization was satisfactory and that the financial resources of these unions were considerably increased.

According to the financial report, presented by President Volz, the balance in all funds at the end of the fiscal year was \$300,467.80, being \$66,031.44 in excess of that reported on June 1, 1933. A very complete statement on the various benefits and group insurance was also contained in this report.

In the report of the secretary-treasurer a detailed account of receipts and expenditures in each department of the organization was presented. Each of the vice-presidents submitted reports covering their respective jurisdictions.

The following recommendations were embodied in resolutions adopted:

Direct labour representation on the code authority of the industry.

Closer co-operative relations with associated employers.

Continuation of economy measures by the international union.

Convening of a conference of representatives from all Canadian locals early this fall.

Chief officers elected were: President, Edward J. Volz, New York; Secretary-treasurer, Henry F. Schmal, St. Louis. William C. Golby, of Toronto, was re-elected third vice-president.

Cleveland, Ohio, was selected as the convention city for 1935.

## TRADE UNION CONGRESS OF GREAT BRITAIN

THE sixty-sixth annual Trades Union Congress was held at Weymouth on September 3-7, Mr. A. Conley, chairman of the General Council, presiding. The number of delegates in attendance was 575, representing 165 affiliated organizations and approximately 3,295,000 members. The figures of total trade union membership represented at the Congress showed a decline of 73,000 (rather over 2 per cent) on those of the previous Congress, nearly one half of this decrease occurring in the textile group.

President Conley, in his opening address, after referring to the suppression of working class organizations in Germany and Austria, spoke of the dangers which democracy faced to-day, not only in avowed political dictatorship, but in the reactionary temper abroad in countries where democratic forms were still nominally respected. He criticized the National Government's policy in regard to state subsidies and trade restrictions; advocated

closer economic relations with the Soviet Government as a more direct means of improving employment; and recommended the raising of the school-leaving age both on educational grounds and as a means of easing the employment situation. He urged the necessity for demanding a shorter working week, suggesting that continued opposition to this and other reforms might force the trade unions to consider more drastic means of action. He further suggested for consideration the simultaneous presentation to employers in all industries of a united and co-ordinated program for wage increases and standardized working hours. He claimed that this would be "the logical next step in the development of the powers of this Congress."

The General Council was instructed to consider methods of raising funds to finance national disputes, and to report on a proposal that during the progress of any dispute sponsored by the General Council a weekly

levy should be made on members of all affiliated organizations.

Unanimous approval was given to a resolution instructing the General Council to co-operate with the Labour Party in efforts to raise the school-leaving age to 16 years, with adequate maintenance allowances, and to raise correspondingly the minimum age in all employment.

Mr. Citrine, secretary of the Congress, moved a resolution, which was adopted, condemning fascism, urging the united opposition of the trade unions, the Labour Party, and the co-operative movement, and calling upon the General Council to use all possible means to combat fascism and to continue unyielding opposition to any form of dictatorship.

An emergency resolution was moved and carried calling upon the Government to publish in full the reports of the Commissioners who had recently visited the distressed areas. Resolutions were also adopted demanding amendments in the National Health Insurance Act in favour of unemployed contributors, and in the Widows', Orphans' and Old Age Contributory Pensions Act in order to secure pensions at 55 years of age for wives of men already in receipt of a pension.

The third day of the Congress proceedings was mainly occupied with addresses by Mr. H. B. Butler, the Director of the International Labour Office, and by fraternal delegates representing the American Federation of Labour, the Trades and Labour Congress of Canada, the National Trades Union Federation of India, the International Federation of Trade Unions, and the Co-operative Union. Preceding these addresses, the General Council's report on the International Labour Conference held at Geneva last June was considered, and a composite resolution on the subject of a shorter working week was moved and carried unanimously. This declared that a shorter working week was essential as a means of eliminating unemployment, protested against the British Government's opposition to an international Convention limiting hours of employment, and urged that every effort should be made in this country and others to secure a 40-hour week without reduction in wages or earnings.

Mr. Butler, in his address, described the economic position as being considerably better in many countries to-day than it was in 1932, when he last spoke to the Congress, particularly in Great Britain and in the United States. He gave his opinion that the large sums expended on unemployment insurance and on public works in this and in certain other countries had been an important factor in stabi-

lizing trade and arresting the depression. The world was still far from solving the problem of rational distribution of its products, Mr. Butler said, and economic warfare would not help to remove the difficulty, which was of international dimensions. Sooner or later, he thought, there must be a return to normality in trade relations and currency matters. Mr. Butler said that his Office was again taking up the question of a shorter working week, and, he hoped, would open the way towards substantial progress at next year's Conference.

The American delegates gave an account of the administration of the National Recovery Act, and of some of the results so far achieved. Following their addresses it was announced that a message of sympathy and encouragement was being sent from the Congress through the American Federation of Labor to the textile and other workers engaged in industrial struggle.

Approval was given to a report, prepared by the National Joint Council of the Congress and the Labour Party, on war and peace. The report stated that the responsibility for preventing war should not be placed on the trade union movement alone, but rested on every peace-loving citizen. Distinction had to be made between a war of aggression and one undertaken in defence of the collective peace system. The General Council considered that, while there was no question of abandoning the possibility of a general strike as a means of preventing war, the provision in the standing orders of the Congress which required the calling of a special congress to decide as to industrial action in the event of a threat of war was sufficient to guarantee expedient action by the Congress.

A resolution was approved which urged that the income limit under the Unemployment and Health Insurance Acts should be raised to at least £500 a year, on the ground that the present limits did not meet the needs of large numbers of non-manual workers.

A Fair Wages resolution was passed which urged the General Council to approach the Government and all municipalities with a view to ensuring that contracts by such bodies should be let to contractors who not only pay fair wages on Government and municipal contracts, but as a general practice throughout their establishments.

A plan for the socialization of the iron and steel industry, which had been prepared by the General Council, was unanimously approved. Mr. Arthur Pugh, in submitting the report, said that it had been drawn up on the basis that, for the present at any rate, the industry would require to be organized as a

distinct economic unit, with the maximum of self-government. The Council's plan provided for Act of Parliament which would set up a central corporation, to which would be transferred the ownership and control of existing undertakings, subject to compensation to the previous owners. While sectional boards would look after the management of each important branch of the industry, the corporation would be responsible for the general direction of the industry, and would fix prices in conjunction with a body representing the consumers. The precise policy to be followed with regard to prices, as between home and foreign markets, the report left for future consideration. The trade unions would exercise their functions in the appointment of works councils, and in negotiating conditions of employment with the directing personnel, provision being made for adequate conciliation machinery. Works councils would nominate members for the sectional boards, and the trade unions would be consulted in regard to appointments to these boards and to the central corporation.

The reorganization of the economic structure of the cotton industry was discussed, and a resolution passed urging that a Cotton Control Board, having statutory powers, should be set up. It was stated on behalf of the General

Council that, while supporting this plan, they would also proceed with the preparation of a scheme for the socialization of the industry.

The coal mining industry was also reviewed, and a resolution passed asking the National Joint Council to prepare plans to ensure the efficient production and sale of coal, a large development of the treatment and utilization of coal, and their integration with coal production into a single industry, having a common wage, and under public ownership and control.

Mr. Ernest Bevin moved a resolution on the subject of rationalization, and the poverty and distress caused to districts by the closing down of large industries. He proposed that the Government should appoint a survey board to report to Parliament on the liabilities incurred by local authorities through this cause, and that the latter should be given legal powers to trade, in order to assist in finding employment for the workpeople displaced. The resolution was carried unanimously.

A resolution was also passed demanding a more intensive housing campaign, with provision of adequate accommodation for each family; and another, which asked for the legal protection of house purchasers against "shoddy" building work.

### International Federation of Trade Unions

The annual meeting of the General Council of the International Federation of Trade Unions was held at Weymouth, England, from 27 to 29 August, 1934. Mr. W. M. Citrine (Great Britain) presided. There were in attendance representatives from 15 national trade union centres and 23 international trade secretariats. Fraternal delegates were also present from Norway, the Irish Free State and the United States.

Mr. Citrine, in his presidential address, referred to the proposals to merge the various international federations of separate industries into the International Federation of Trade Unions. He expressed the hope that the dominant idea would not be how to preserve separate identities, but rather how to build up the International Federation more solidly in order to achieve the greatest amount of effort on behalf of the people they represented. He rejoiced to think that the American Federation of Labour would, through the United States Government, take part henceforth in the councils of the International Labour Organization at Geneva and hoped that this relationship would be extended by participation of the American Federation of Labour in the work of the International Federation.

The proposals for reorganization as outlined in the presidential address were the subject of

a debate, during which representatives of various international trade secretariats expressed a wish to retain the complete independence of their respective organizations. A proposal of the Executive Committee was eventually accepted, by which three of its representatives were appointed to confer with representatives of the international trade secretariats with regard to closer collaboration.

After meeting in private session, the General Council issued the following statement on the subject of united action with Communist elements: "The meeting of the General Council of the International Federation of Trade Unions held at Weymouth considered after an introductory report by Jouhaux the question of the united front and declared that the overtures of the Communists and of the Red International of Labour Unions at Moscow for the United front and for unity of action are manoeuvres devoid of any sincere intention. The International Federation of Trade Unions once again points out that the Red International of Labour Unions of Moscow must bear the blame for the division and weakening of the trade union movement, in view of its appeals to the workers extending over many years to fight against the 'free' trade union movement."

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF SEPTEMBER, 1934

### Reports of Superintendents of the Employment Service of Canada

**T**HE employment situation at the end of September was reported by the superintendents of the Employment Service to be as follows:—

Harvesting was partly completed in the Maritime Provinces with good crops reported and fall ploughing well under way. Fishing was very fair and prices were somewhat higher than last season's. Continued activity was reported in logging, a number of pulpwood cutters finding employment. Coal mines in the New Glasgow area operated from four to six days per week, while those in Cape Breton and vicinity worked five, five and a half, and six days per week. Manufacturers of confectionery and foodstuffs were busy, there being work for many on Christmas trade preparations. Gas and oil companies also reported business steady. Wood products and pulp and paper companies at Saint John were working full time, but foundries were quiet and sawmills expected to complete their season's work early in October. Good progress was being made on buildings and roads already in the course of construction, and several new building permits had been issued, and many for repairs. Transportation by rail and water, both freight and passenger, was fairly heavy, the first, due to the arrival or departure of large shipments, the second, to the holding of several conventions. Auto traffic also was good, owing to fine weather. Trade was fair, with wholesale houses busy shipping fall goods. A steady demand existed for domestics in the Women's Division and many satisfactory placements were made.

Farming in the Province of Quebec showed lessened activity, but in logging a large number of placements were effected, with wages somewhat above last year's. Manufacturing recorded little change. Industries at Hull showed improvement and in Quebec City were operating regularly, but at Montreal, boot, shoe and textile establishments, only, were busy. There was little building construction in progress, although the demand for unskilled labour in Montreal had increased. Transportation was fairly active, but trade had declined slightly from that of the previous month. In the Women's Domestic Section remunerative orders had been received for cooks and hotel employees, as well as other requests for workers for general household service, nevertheless

the supply of registered applicants still exceeded the demand.

There was a fairly heavy call for farm help for fall work in the Province of Ontario with no difficulty experienced in meeting all requirements. A good beginning was made by several lumber companies in opening their camps and all classes of bush workers, such as handymen, blacksmiths, cooks, log makers, teamsters, hookmen and ordinary hands, were supplied. Logging in the Timmins area, however, was handicapped by a strike. Activity also increased in the mining districts, with very promising results. Conditions remained practically unchanged in manufacturing. Foodstuffs, breweries, fruit and vegetable canneries, and textile plants were busy, but some slackness prevailed in the iron and steel industries. Little new building construction was taking place, other than repairs and the erection of small dwellings. Large projects already underway were progressing satisfactorily, some of which were nearing completion. Relief work continued on highways and in National Defence camps. Many orders were listed for women domestic help and some for factory employees, but in the former division experienced maids were not always easy to obtain and in the latter case the majority of work obtainable was for a short time only.

Precipitation in the form of rain, snow and sleet, which was general throughout the Prairie Provinces, caused nearly all farm work to come to a standstill, although it went a long way toward replenishing the parched sub-soil in many of the dried-out communities. However, with improved weather conditions harvesting and fall ploughing will again continue. Wages offered, for the most part, were \$10 and \$15 per month and fifty cents to \$1 per day. Though there was a fairly good demand for experienced piece workers in logging, it was somewhat difficult to recruit suitable applicants, efforts to obtain workers being further handicapped by the fact that many orders stated that the men would be required to look after their own meals. Mining showed improvement, with a good demand for miners holding certificates, and machine men, track layers, and coal loaders. The manufacturing industry was fairly active, but mills at Medicine Hat were very quiet. Little building construction was in evidence and men were still being sent to relief camps. Trade showed

scarcely any change, being rather quiet on account of the unfavourable weather. The situation in the Women's Domestic Section also remained about the same, with a number of applicants registered for employment.

Farming was quiet in British Columbia, although a great deal of orchard work was being done. Fruit picking, also, was well up to date and packing houses had full crews employed. Logging remained active, but with no great movement of labour. Saw and shingle mills operated steadily to a limited extent, and mostly with reduced crews. Improvement was noted in coal mining, but there was no call

for men. Some miners, who had been engaged in placer mining and prospecting, had drifted back to the towns, the result of their efforts not having proved very successful. Manufacturing was only fair. Little building construction was taking place and relief work in the National Defence camps and on provincial highways was about the only employment available for unskilled labour. Longshoremen were busy, also drydock and shipyard workers at Prince Rupert and Victoria. Trade was fair, with collections slow. A number of positions were listed for women domestic workers, all of which were easily filled, although wages, on the whole, for this type of work, were low.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN AUGUST, 1934

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on September 1 was 8,820, the employees on their payrolls numbering 922,339 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for August was 1,700, having an aggregate membership of 158,970 persons, 16.5 per cent

of whom were without employment on September 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 65 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 61 cities throughout Canada, showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the beginning of September, 1934, as Reported by Employers

The firms furnishing monthly employment data to the Dominion Bureau of Statistics reported a further contraction in their payrolls at the beginning of September; the experience of the last thirteen years shows on the average, a slight recession between August 1 and September 1, but the decline at the latest date was rather greater than the average for the years since 1920. That this was so, was due to very pronounced declines in highway construction, which usually releases men at this season, partly on account of harvest activities; the losses this year, however (involving over 15,300 workers), were greater than on September 1 in any other year since 1920. Statements were received from

8,820 employers with an aggregate payroll of 922,339 persons, or 9,444 fewer than at the beginning of August. The index (average 1926 = 100) stood at 98.8, compared with 99.9 on August 1, 1934, and with 88.5 on September 1, 1933; the situation thus continued considerably better than a year ago, and also compared favourably with that indicated in the late summer of 1932, when the September 1 index was 86.0. The following shows the September 1 indexes in the fourteen years of the record: 1934, 98.8; 1933, 88.5; 1932, 86.0; 1931, 107.1; 1930, 116.6; 1929, 126.8; 1928, 119.1; 1927, 111.0; 1926, 106.2; 1925, 97.8; 1924, 94.2; 1923, 101.2; 1922, 94.8, and 1921, 89.8.

An analysis of the returns by industries shows a minor gain in manufacturing, the eighth consecutive monthly increase since January 1, 1934; this advance, though slight, is in favourable comparison with the small decline that in the thirteen preceding years has been the usual seasonal movement between August 1 and September 1. The greatest gains on the date under review occurred in textile and fruit and vegetable canning factories, while there were important losses in fish-canneries and iron and steel plants. Among the non-manufacturing industries, logging, mining, communications, rail-

advance is especially interesting because it is contrary to the usual seasonal trend, the experience of the years since 1920 showing, on the average, a decline between August 1 and September 1. Most of the gain on the date under review took place in construction, mainly of highways and roads, although general building and railway construction and maintenance were also more active. Slight improvement was also indicated in mining, communications and transportation. On the other hand, manufacturing as a whole was slacker, chiefly in fish-preserving, pulp and paper and iron and steel factories. Statistics

#### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

**NOTE.**—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

way construction, services and trade showed heightened activity. On the other hand, there were the unusually large reductions in highway construction, already mentioned, and shipping also released men.

#### Employment by Economic Areas

Firms in the Maritime Provinces and Quebec showed moderate gains; there was no general change in the Prairie Provinces, while in Ontario and British Columbia the movement was unfavourable.

*Maritime Provinces.*—Employment at the beginning of September showed its fifth successive increase in as many months. The

were received from 619 firms in the Maritime Provinces, whose staffs aggregated 72,121 workers on September 1, 1934, compared with 71,797 in the preceding month. A reduction had been recorded at the beginning of September of last year; the index then was over ten points lower than at the latest date, when it stood at 101.8.

*Quebec.*—Increased employment was noted in Quebec, mainly in manufacturing, logging, building and railway construction and services; within the first-named, the textile, iron and steel, musical instrument, rubber and leather groups showed improvement, while lumber, food and pulp and paper factories

released employees. The working force of the 2,100 employers co-operating in Quebec stood at 260,708 persons, as against 259,109 on August 1. A larger advance had been registered at the beginning of September, 1933, but employment then was generally in smaller volume. The gains on September 1 this year and last are contrary to the usual seasonal movement indicated, on the average, on that date in the years since 1920.

*Ontario.*—In this province 3,897 firms reported further curtailment in personnel, reducing their staffs from 403,075 at the first of August, to 392,960 on September 1; improvement had been noted on the same date last year, when the index, at 88.1, was considerably lower than at the latest date, viz., 103.3. Manufacturing recorded no general change. There were large increases in the vegetable food division, and smaller gains in textile, chemical, tobacco, non-ferrous metal, electric current, electrical apparatus and some other groups, but these were nearly offset by a substantial seasonal decline in iron and steel,

and smaller losses in pulp and paper, lumber and rubber factories. Among the non-manufacturing industries, logging, mining, railway construction and services reported heightened activity, but transportation was rather slackier, and highway construction work released a large number of men.

*Prairie Provinces.*—Very little general change was indicated on the whole in industrial employment in the Prairie Provinces at the beginning of September, as compared with August 1; the index was over two points higher than on September 1, 1933, when a small increase had been recorded by the firms making returns. Data were tabulated for the date under review from 1,301 employers of 116,751 workers, or practically the same number as in the preceding month. Mining, communications, transportation and trade afforded heightened employment; manufacturing reported a minor increase, declines in meat-packing plants and dairies being more than offset by general but comparatively small gains in other classes of factory employment.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Sept. 1, 1921.....	89.8	104.9	83.3	89.1	97.8	84.8

May 1.....	92.0	98.3	85.5	98.5	85.4	88.4
June 1.....	96.6	98.4	90.9	104.4	89.5	89.1
July 1.....	101.0	100.4	94.1	109.9	94.1	94.1
Aug. 1.....	99.9	101.3	94.9	106.0	93.0	97.6
Sept. 1.....	98.8	101.8	95.4	103.3	92.9	96.2
Relative Weight of Employment by Economic Areas as at Sept. 1, 1934.....	100.0	7.8	28.3	42.6	12.7	8.6

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated areas to the total number of all employees reported in Canada by the firms making returns for the date under review.

On the other hand, construction, particularly on highways, showed considerable curtailment. The seasonal employment afforded in harvesting operations at this time of year is, of course, not reflected in these statistics.

*British Columbia.*—Employment in British Columbia showed a reduction on September 1, the first recorded since the opening of the year. An increase had been indicated on the same date of last year, when the index, at 89.2, was seven points lower than at the latest date. Manufacturing was slacker, largely owing to losses of a seasonal nature in fish-canning. On the other hand, fruit and vegetable canneries were decidedly more active. Mining, transportation, railway construction and trade also showed improvement, but highway construction and maintenance released a large number of workers. The personnel of the 903 firms furnishing data declined from 81,026 persons on August 1, to 79,805 at the beginning of September.

Table I gives index numbers by economic areas.

### Employment by Cities

Employment advanced in Montreal, Quebec City, Toronto, Winnipeg and Vancouver, while curtailment was noted in Ottawa, Hamilton and Windsor and the adjacent Border Cities. The situation in these centres was generally more favourable than at the beginning of September of last year.

*Montreal.*—Employment in Montreal showed an increase on September 1, 546 persons having been added since August 1 to the paylists of the 1,221 co-operating firms, who employed 128,505. Considerable improvement was noted in manufacturing, particularly in textiles, while leather, musical instrument and iron and steel factories were also somewhat busier. Communications, local transportation and services also showed heightened activity. On the other hand, construction and trade released workers. A more pronounced advance had occurred on September 1, 1933, but the index then was rather lower.

*Quebec.*—A slight increase was indicated in Quebec, according to 160 employers of 13,082

TABLE II.—INDEX NUMBERS OF EMPLOYMENT BY PRINCIPAL CITIES

(AVERAGE CALENDAR YEAR 1926=100)

Aug. 1.....	86.4	94.9	92.9	103.4	87.8	100.7	84.0	91.5
Sept. 1.....	86.6	99.9	94.3	100.9	84.9	91.0	85.2	91.8
Relative Weight of Employment by Cities as at Sept. 1, 1934.....	13.9	1.4	12.3	1.4	2.9	1.3	3.9	3.1

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

persons, as compared with 12,994 in the preceding month. Hotels and restaurants and trade were rather more active, while construction was slacker. Employment as reported by employers was in practically the same volume as at the beginning of September a year ago, when a similar small advance had been noted.

*Toronto.*—Manufacturing showed substantial improvement, chiefly in leather, vegetable food, textile, chemical, electrical apparatus and iron and steel; hotels and restaurants also afforded increased employment. Construction and trade, on the other hand, were slacker, while other groups showed little change on the whole. Statements were received from 1,304 firms with 113,732 workers, or 1,539 more than on August 1. A rather larger gain had been indicated on the same date a year ago, but employment then was below its present level.

*Ottawa.*—There was a decrease in Ottawa, chiefly in manufacturing and construction,

while trade showed slight improvement. The 164 firms furnishing returns reported 12,917 employees, compared with 13,207 in the preceding month. On September 1, 1933, a minor gain had been noted; the index was then several points lower.

*Hamilton.*—Manufacturing was decidedly slacker, especially in the food, textile and iron and steel divisions, and construction also reported a recession in Hamilton; 257 employers recorded 27,010 persons on their payrolls, as compared with 28,017 on August 1. Employment had shown little general change at the beginning of September of a year ago, when industrial activity was at a lower level.

*Windsor and the adjacent Border Cities.*—A considerable reduction was registered in the Border Cities, where the 154 co-operating firms reported 12,221 workers, as against 13,539 in the preceding month. Vegetable food and iron and steel plants (chiefly automobile works), showed diminished activity, while in other industries there was also a

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES  
(AVERAGE CALENDAR YEAR 1926=100)

	All industries	Manufacturing	Logging	Mining	Communications	Transportation	Construction	Services	Trade

Relative Weight of Employment by Industries as at Sept. 1, 1934.....	100.0	51.1	2.6	5.6	2.3	10.7	15.0	2.9	9.8

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

slightly downward tendency. A smaller loss had been noted on the same date of last year, when the index was many points lower.

**Winnipeg.**—Employment in Winnipeg continued to improve; manufacturing as a group showed little change, but communications, transportation and trade were brisker. An aggregate working force of 36,267 persons was reported by the 424 establishments making returns for September 1, which had employed 35,728 workers in the preceding month. A smaller increase had been recorded on the same date in 1933, and the index then was a few points lower.

**Vancouver.**—There was an advance in employment in Vancouver, according to statements received from 381 firms employing 28,829 workers, as against 28,756 on August 1. Manufacturing plants reported rather smaller payrolls, the largest losses being in the lumber industry, while trade indicated improvement,

and other groups showed minor gains. Employment was in slightly greater volume than on the same date of a year ago, when a larger increase had been noted.

Index numbers by cities are given in Table II.

### Manufacturing Industries

Continuing the favourable movement in evidence since the beginning of the year, employment in manufacture showed a further small advance on September 1, the 5,296 co-operating employers enlarging their payrolls from 470,823 on August 1 to 471,243 on the date under review. This increase, though slight, is especially interesting because factory operations have very often been curtailed in the early autumn of the years since 1920, the average index showing a fractional reduction between August 1 and September 1. The crude index (standing at 94.3 on September 1,

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	<sup>1</sup> Relative Weight	Sept. 1 1934	Aug. 1 1934	Sept. 1 1933	Sept. 1 1932	Sept. 1 1931	Sept. 1 1930	Sept. 1 1929

Non-metallic mineral products.....	1.5	138.7	137.6	127.5	122.2	132.2	140.2	148.8
Miscellaneous.....	.5	114.2	114.8	99.3	96.4	106.5	110.4	118.4

<sup>1</sup>The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

1934, as compared with 94.2 in the preceding month and 86.8 on the same date in 1933), showed an increase of half a point after correction for seasonal variation. The edible animal, lumber, pulp and paper and iron and steel groups reported contractions which were generally seasonal in character. On the other hand, leather, musical instrument, vegetable food, textile, tobacco and beverage, chemical, electrical apparatus, electric current and non-ferrous metal factories indicated considerable improvement. The largest gains in manufacturing were in Quebec.

Since January 1, there has, on the whole, been uninterrupted recovery in manufactures, resulting in the reinstatement of nearly 71,800 persons in the plants of the approximately 5,180 manufacturers furnishing monthly employment data to the Dominion Bureau of Statistics; this is an average increase of about 14 persons in the staff of each of these employers, and signifies an appreciable increase in consumers' purchasing power. Improvement was also indicated during the same period of 1933, the numbers then added to the reported payrolls aggregating over 61,400, an increase, on the average, of some 12 operatives in each of the establishments whose statistics were tabulated.

*Animal Products, Edible.*—Declines occurred in meat and fish-preserving establishments, while dairies showed little general change. The payrolls of the 270 co-operating factories aggregated 23,371 employees, as compared with 24,651 in the preceding month. Employment on September 1, 1933, had experienced a smaller decrease, and the index number then was slightly higher than on the date under review.

*Leather and Products.*—A further gain was shown in leather factories, chiefly in tanneries and miscellaneous leather plants; this increase was rather smaller than that noted at the beginning of September of last year, when the employment indicated by the firms making returns was at practically the same level. Statements were received from 262 manufacturers having 20,190 persons in their employ, as against 20,000 on August 1, 1934. Quebec firms reported the largest increase.

*Lumber and Products.*—Seasonal reductions were made in sawmills, and container and other lumber-using factories were also slacker. Furniture plants, however, showed improvement. The result was a decrease of 485 persons in the staffs of the 797 lumber establishments furnishing data, whose payrolls aggregated 38,803. This loss was the first to take place since the beginning of the year; it was

of practically the same size as that noted on September 1, 1933, when the index was several points lower.

*Musical Instruments.*—Additions to personnel were recorded in musical instrument works, 35 of which increased their labour forces by 191 persons to 1,371 on September 1. Increases occurred in Quebec and Ontario. A smaller gain had been indicated at the beginning of September, 1933, when employment was at a lower level.

*Plant Products, Edible.*—Confectionery and chocolate and fruit and vegetable preserving factories reported heightened activity, the additions to staffs in canneries being particularly pronounced. The general improvement was on a smaller scale than on the same date last year, when the index stood at 115.2, compared with 125.3 at the beginning of September, 1934. Data were compiled from 435 firms in the vegetable food division, whose payrolls rose from 33,108 on August 1 to 35,943 at the date under review. Ontario and British Columbia reported the largest advances.

*Pulp and Paper Products.*—Employment in this group showed a considerable decline, mainly in pulp and paper mills. Increases had been noted on September 1 of last year, when the index, at 89.5, was nearly five points lower than on the date under review. The forces of the 576 co-operating establishments included 57,087 persons, as compared with 57,912 in the preceding month. The Maritime Provinces, Quebec and Ontario reported the reduction.

*Rubber Products.*—Practically no change on the whole was indicated in rubber factories, 51 of which employed 12,016 workers compared with 11,996 on August 1. The situation on September 1, 1933, had improved over the preceding month, but employment was then at a lower level, the index standing at 84.2, as against 94.3 on the date under review.

*Textile Products.*—Seasonal increases occurred in textile factories, 917 of which had 91,672 employees, as against 39,973 on August 1. Most of the advance took place in Quebec and Ontario, but the tendency was generally favourable, except in British Columbia. Garment and personnel furnishing and headwear factories registered the bulk of the gain, while knitting, yarn and cloth and miscellaneous textile plants were slacker. The index of employment on the same date last year was between six and seven points lower; the increase then reported had involved a larger number of workers.

*Tobacco, Distilled and Malt Liquors.*—Further improvement was noted in this industry on September 1 as compared with August 1, since when 314 persons were added to the payrolls of the 159 co-operating factories, which employed 14,788 operatives. The level of employment was higher than at the beginning of September, 1933, when a minor decline had been indicated in the group as a whole.

*Chemical Products.*—Employment in this division showed a gain, according to statistics from 171 employers of 9,281 persons, compared with 8,998 on August 1. Activity was greater than on the same date a year ago.

*Clay, Glass and Stone Products.*—Factories producing these classes of building materials showed curtailment; statements were received from 190 plants, having 8,193 workers, as against 8,347 in the preceding month. An increase had been noted at the beginning of September last year, but the index then was decidedly lower.

*Electric Current.*—Considerable expansion was shown in electric current plants, 97 of which employed 14,689 persons, or 358 more than at August 1. Employment was brisker than on September 1, 1933, when little general change had been indicated.

*Electrical Apparatus.*—Employment in this group increased at the beginning of September; 152 workers having been added since August 1 to the forces of the 109 co-operating establishments, which had 11,489 employees. The gain occurred mainly in Ontario. A larger advance had been noted on the corresponding date in 1933, when the index was over thirteen points lower.

*Iron and Steel Products.*—The rolling mill, vehicle, agricultural implement and foundry and machine shop divisions of the iron and steel group recorded contractions in employment, while heating appliance, sheet metal and some other factories were busier. On the whole, there was a reduction of 3,216 in the forces of the 806 co-operating iron and steel manufacturers, who employed 93,578 persons at the beginning of September. Activity was curtailed in all except Quebec and the Prairie Provinces, but the greatest losses were in Ontario. The trend on September 1, 1933, had also been downward, although the decline then was smaller, and the index number was over eight points lower than on the date under review, when it stood at 71.2.

*Non-Ferrous Metal Products.*—The precious and the base metal and the smelting and refin-

ing divisions reported slightly heightened employment; 145 manufacturers in the group as a whole employed 17,628 operatives, as against 17,361 on August 1. Improvement had also been indicated on the same date last year, but general activity was then decidedly less.

*Mineral Products.*—Employment in this group showed a moderate advance, according to statements from 121 establishments with 13,982 persons on their payrolls, as against 13,895 at the beginning of August. The index was higher than on September 1, 1933, when a rather larger gain had taken place.

### Logging

Employment in logging camps showed an increase at the beginning of September, according to the 263 co-operating firms, whose payrolls aggregated 23,618 workers, compared with 23,255 in the preceding month. The number employed in the bush on September 1 was larger than on the same date in any other year of the record; an active season in bush operations has been forecast for the winter of 1934-35.

### Mining

*Coal.*—Data were received from 100 operators having 22,485 men on their payrolls, as compared with 22,043 at the beginning of August. The Prairie coalfields reported the expansion, which, on the whole, involved a smaller number of workers than that registered on the same date a year ago; the index number then was slightly lower than on the date under review.

*Metallic Ores.*—Employment in metallic ore mines showed a further improvement, according to returns from 113 firms whose forces rose from 21,945 persons on August 1, to 22,444 at the beginning of September. An advance had also been shown on September 1, 1933, but employment was then in smaller volume.

*Non-Metallic Minerals (other than coal).*—Continued gains on a small scale were reported in this group, in which 78 firms enlarged their staffs by 76 workers to 6,468 on September 1. A similar slight increase had been noted on the corresponding date of last year; the level of employment was then considerably lower.

### Communications

Further expansion was indicated in the communications division, in which the companies reporting employed 21,854 workers, as compared with 21,471 in the preceding month.

Activity was slightly less than in the early autumn of 1933; the gain then indicated was decidedly smaller.

### Transportation

#### *Street and Electric Railways and Cartage.*—

Improvement was shown in local transportation on the date under review, when the 192 employers furnishing data reported 25,086 workers, or 408 more than in the preceding month. The advances were chiefly in Quebec and the Prairie Provinces. A rather smaller increase had been recorded at the beginning of September, 1933; the index then was practically the same.

*Steam Railways.*—There was a further gain in the number employed in steam railway operation on September 1, according to the 101 companies and branches from which returns were received, and which had 59,125 employees, compared with 59,060 on August 1. Employment was at a slightly higher level than on the same date last year, although the advance then noted had been on a much larger scale. The improvement reported at the beginning of September, 1934, took place mainly in the Maritime and Prairie Provinces, while there were losses in Quebec and Ontario.

*Shipping and Stevedoring.*—Reductions in staffs were noted in the water transportation group, in which activity was not quite so great as on the same date in 1933. Statements were received from 93 employers of 14,459 workers, as against 15,024 in the preceding month.

### Construction and Maintenance

*Building.*—Very little general change was shown in building construction, in which employment was brisker than in the late summer of 1933. Data were received from 639 contractors, whose payrolls stood at 22,716 on August 1, 1934. The trend was favourable in all except the Western Provinces.

*Highway.*—There was a pronounced decrease in this group, 15,302 men being released from

the forces of the 338 co-operating employers, who had 82,891 workers. There were losses in all except the Maritime Provinces, the largest occurring in Ontario. Activity was generally greater than on September 1, 1933, when a smaller contraction had been reported.

*Railway.*—Further increases in employment were indicated by the 35 firms furnishing data in this division, who employed 32,674 persons, as against 29,934 in the preceding month. Improvement occurred in all but the Prairie Provinces. Reduced activity had been noted on the corresponding date of 1933, and the index number then was over twelve points lower.

### Services

There was an expansion in the service group, in which business this year has been brisker than in 1933. The 424 establishments furnishing returns for September 1, 1934, reported 26,555 assistants, as against 26,039 on August 1. Most of the gain occurred in hotels and restaurants, and in Quebec and Ontario.

### Trade

Moderate improvement was noted in both retail and wholesale establishments; employment in this group continued at a higher level than in the late summer of last year, when a rather larger increase had been indicated in the group as a whole. Returns were received from 1,063 trading establishments employing 90,731 persons, compared with 90,210 at the beginning of August, 1934.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables, in which the columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on the date under review.

## (2) Unemployment in Trade Unions at the Close of August, 1934

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades, or who are idle due to illness, are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making re-

turns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

There was an increase in the volume of activity afforded local trade union members

during August from the previous month, this being the seventh successive month that the employment tendency has been favourable. Reports for August were furnished by 1,700 labour organizations, combining a membership of 158,970 persons, 26,191 or 16.5 per cent of whom were without work on the last day of the month contrasted with 17.9 per cent in July. A higher level of employment was also evident from August a year ago when 19.9 per cent of inactivity was reported. Quebec and Alberta unions registered gains of over 5 per cent from July, attributable mainly in the former province to improvement in the manufacturing industries, particularly the

available from August a year ago all provinces reflected employment advancement during the month reviewed, and which was of noteworthy proportions in Nova Scotia, New Brunswick, Ontario and Saskatchewan. In Quebec and Alberta moderate improvement was recorded, Manitoba unions showing slight gains.

Each month a separate compilation is made of unemployment in the largest city in each province with the exception of Prince Edward Island. Edmonton and Montreal unions indicated important recovery during August from the slackness of the previous month though conditions in these cities still remained rather quiet. In Halifax, Saint John, Toronto

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

garment trades, while in the latter, the greater activity accorded coal miners was an important factor in the better situation which obtained, though a general upward tendency was noted in the majority of trades. Nova Scotia unions reported a small advance in work afforded, principally in the coal mines and in New Brunswick conditions were nominally better. Activity in British Columbia was curtailed by slightly over 4 per cent from July, navigation workers showing more depressed conditions and fishermen a considerable slowing up of activity. In Ontario, Manitoba and Saskatchewan also, the trend of employment was downward though the changes were very slight. With the exception of British Columbia which showed a fractional drop in work

and Winnipeg gains of somewhat lesser degree occurred. On the other hand, activity was very slightly retarded among Regina and Vancouver unions. In making a comparison with the returns for August a year ago, Halifax and Saint John members were much busier during the month reviewed, and marked expansion was recorded from Toronto. In Vancouver, also, gains on a noteworthy scale were apparent, Montreal, Winnipeg and Regina, in addition, showing some rise in the employment volume available. Edmonton unions were the only ones to report contractions of activity which were of moderate volume.

The chart which accompanies this article illustrates the unemployment trend by months

from January, 1928, to date. The curve which has pursued a downward course uninteruptedly from the close of January this year showed a continuation in this favourable direction during August. At the end of August the curve rested also at a lower level than at the close of the same month last year, showing that a greater volume of employment was afforded union members than in August, 1933.

The manufacturing industries during August showed a noteworthy increase in available work over July, the 463 unions making returns with a total of 49,193 members, showing that 6,669 or a percentage of 13.6 were unemployed at the end of the month contrasted with 18.1 per cent in July. A much better situation also was reflected from August a year ago when 20.1 per cent of the members reported were idle. The garment trades absorbed a considerably greater number of members than in July, and among metal polishers and hat and cap workers, whose combined membership was small, pronounced advances in employment were recorded. Iron and steel workers were slightly busier than in July, as were also textile and fur workers, bakers and confectioners, and printing tradesmen. Pulp and paper makers reported a drop in available work from July, involving the greatest number of members, and curtailment of activity was evident among wood, glass and leather workers, meat cutters and butchers, and cigar-makers. Responsibility for the better conditions prevailing in the manufacturing industries from August a year ago rested, in substantial measure, with the iron and steel trades, though among garment, hat, cap and leather workers, metal polishers, and printing tradesmen improvement on a noteworthy scale occurred. Among wood workers there was also a slightly upward employment tendency. On the other hand, textile, glass and fur workers, cigarmakers, bakers and confectioners, paper-makers, and meat cutters and butchers all reported some lessening of the employment volume afforded from August, 1933, which, however, did not affect a great number of members in any one group.

The situation for coal miners during August was much improved from the previous month according to the returns tabulated from 50 unions, embracing a membership of 15,765 persons. Of these, 2,166 were idle on the last day of the month, a percentage of 13.7 compared with an unemployment percentage of 20.2 in July. There was little change, however, shown from August, 1933, though the tendency was adverse, the percentage of inactivity for that month standing at 13.1. The

best situation was reported from Alberta mining areas, which absorbed a much greater number of members than in July though employment in Nova Scotia and British Columbia was also in greater prevalence. Contrasted with the returns for August last year in the coal mining industry Nova Scotia and Alberta miners were somewhat better engaged during the month reviewed, this improvement

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919.....	3.1	2.0	3.4	2.7	2.1	3.2	2.0	7.9	3.4

being slightly more than offset by the curtailment evident in the British Columbia mines.

The 202 associations of building and construction tradesmen making returns for August and which included a membership of 16,769 persons showed that 9,610 were without work at the end of the month, a percentage of 57.3 contrasted with 57.0 per cent in July. A large increase in slackness from July was reported by electrical workers. Among bridge and structural iron workers the percentage of employment recession was substantial, though involving few members. Painters, decorators and paperhangers, and tile layers, lathers and roofers showed employment curtailment on a more moderate scale, while among carpenters and joiners activity was but nominally retarded. Conditions for bricklayers, masons and plasterers were materially better than in July, plumbers and steamfitters, and steam shovelmen showing improvement of somewhat lesser degree. Fractional gains only were recorded by granite and stonecutters. From hod carriers and building labourers the same percentage of idleness was reported in both months under comparison. The situation in the building and construction trades, as a whole, was more favourable than in August of last year when 63.6 per cent of the members reported were without work, painters, decorators and paperhangers particularly showing heightened activity, on a large scale, during the month reviewed. Pronounced employment expansion was also manifest by bricklayers, masons and plasterers, and notable increases in work afforded were reflected by carpenters and joiners, hod carriers and building labourers, steam shovelmen, and tile layers, lathers and roofers. On the other hand, electrical workers, granite and stonecutters, and bridge and structural iron workers suffered important losses in activity from August, 1933, and among plumbers and steamfitters some curtailment was evident.

The trend of employment in the transportation industries during August was less favourable than in the previous month though the change was slight, according to the returns compiled from 739 associations with 53,520 members. Of these, 4,949 or 9.2 per cent were idle at the end of the month in contrast with 8.2 per cent in July. Improvement on a rather small scale was registered from August, 1933, when 11.4 per cent of the members reported were unemployed. There was a slight slowing up of activity from July among steam railway employees, whose returns comprised nearly 77 per cent of the entire group membership reported, and employment for navigation workers eased off to some extent. Among street

and electric railway employees, and teamsters and chauffeurs the situation remained unchanged from July. Steam railway employees reported the bulk of the expansion noted from August last year, activity for street and electric railway employees tending favourably, though the change was almost negligible. Greater depression was evident in navigation from August a year ago, and among teamsters and chauffeurs employment was nominally restricted.

Activity among retail shop clerks subsided slightly during August from the previous month, and recessions on a more pronounced scale were reflected from August, 1933. For the month reviewed reports were furnished by 6 associations of these workers, with an aggregate of 1,848 members, 151 of whom were idle at the end of the month, a percentage of 8.2 as compared with percentages of 6.3 at the end of July and 1.1 at the close of August, 1933.

Civic employees reported a slightly better volume of work during August both over the preceding month and August last year, unemployment standing at 3.4 per cent as compared with 3.6 per cent in July and with 4.8 per cent in August a year ago. The percentage for August was based on the returns tabulated from 79 associations representing 7,968 members.

From unions in the miscellaneous group of trades 114 reports were received for August, covering a membership of 3,812 persons, 641 or 16.8 per cent of whom were reported unemployed at the end of the month in comparison with 17.6 per cent in July, and with 19.7 per cent in August last year. Hotel and restaurant employees reported the most pronounced expansion from July, theatre and stage employees showing slight gains in activity. Stationary engineers and firemen, barbers and unclassified workers, however, indicated some falling-off in work available. As in the previous comparison, hotel and restaurant employees were much better engaged than in August a year ago and moderate improvement was noted by unclassified workers, and theatre and stage employees. Stationary engineers and firemen, however, showed but fractional employment increases. Barbers alone indicated retarded activity, which was quite slight.

Conditions for fishermen were distinctly unfavourable during August, unemployment standing at 66.7 as against 1.9 per cent in July. Curtailment of substantial proportions was also evident from August a year ago when 21.3 per cent of inactivity was registered.

There was a marked drop in employment for lumber workers and loggers during August from the previous month and greater depression was also noted from August last year, the 3 unions making returns with 1,451 members showing 37.0 per cent of idleness compared with 2.4 per cent in July and with 20.5 per cent in August, 1933.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1933 inclusive, and also the percentage of unemployment by provinces for August of each year from 1919 to 1931 inclusive, and for each month from January, 1932, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for August, 1934

During August, 1934, reports from offices of the Employment Service of Canada showed a decline of nearly 12 per cent in the average daily placements from those of the preceding period, but a gain of over 5 per cent when a comparison was made with the average daily placements effected during the corresponding month a year ago. When

farming, where a fairly heavy decrease was registered.

The accompanying chart shows the trend of employment since January, 1932, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o-o-o-o-o-o

compared with the work transacted during July, all industrial divisions, except farming, mining and trade, showed declines, the highest losses registered being in construction and maintenance and services, and the largest gain in farming, the increase in this section being largely due to harvesting operations in the Prairie Provinces. Gains over August last year, the most noteworthy of which was in logging, were reported in all groups except

made semi-monthly. It will be seen from the graph that the curve both of vacancies and of placements in relation to applications declined slightly during the first half of the month, but followed a marked upward trend during the latter half of the period under review, and at the close of August reached a considerably higher level than that recorded at the end of August a year ago. The ratio of vacancies to each 100 applications was 55.6

during the first half and 61.6 during the second half of August, 1934, in contrast with ratios of 61.1 and 53.7 during the corresponding periods of 1933. The ratios of placements to each 100 applications during the periods under review were 52.5 and 58.2, as compared with 58.4 and 50.6 during the corresponding month of 1933.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during August, 1934, was 1,271, as compared with 1,425 during the preceding month and with 1,198 in August a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,162, in comparison with 2,390 in July, 1934, and with 2,096 during August last year.

The average number of placements made daily by the Offices of the Service during August, 1934, was 1,200, of which 734 were in regular employment and 466 in work of one week's duration or less, as compared with a total daily average of 1,362 during the preceding month. Placements in August a year ago averaged 1,136 daily, consisting of 683 placements in regular and 453 in casual employment.

During the month of August, 1934, the Offices of the Service referred 33,966 persons to vacancies and effected a total of 32,378 placements. Of these, the placements in regular employment were 19,815, of which 15,434 were of men and 4,381 of women, while placements in casual work totalled 12,563. The number of vacancies reported by employers was 25,468 for men and 8,836 for women, a total of 34,304, while applications for work numbered 58,372, of which 44,362 were from men and 14,010 from women. Reports for July, 1934, showed 35,621 positions available, 59,727 applications made, and 34,046 placements effected, while in August, 1933, there were recorded 32,323 vacancies, 56,588 applications for work and 30,667 placements in regular and casual employment.

The following table gives the placements effected by the Offices of the Employment Service of Canada each year from January, 1924, to date:

Year	Placements		
	Regular	Casual	Totals
1924.....	247,425	118,707	366,132
1925.....	306,804	106,021	412,825
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328

1931.....	153,771	198,443	352,214
1933.....	170,576	181,521	352,097
1934 (8 months).....	149,613	127,253	276,866

## NOVA SCOTIA

During the month of August, 1934, positions offered through employment offices in Nova Scotia were nearly 11 per cent more than in the preceding month but nearly 23 per cent less than during the corresponding month of last year. There was an increase of over 15 per cent in placements when compared with July, but a decline of nearly 23 per cent in comparison with August, 1933. The decrease in placements from August a year ago was entirely due to fewer men being sent to relief work on road construction, as all other groups, except manufacturing where a nominal decline only was reported, showed gains. The largest increase was in logging. Industrial divisions in which most of the placements were effected during the month were: logging, 88; construction and maintenance, 644; and services, 254. Of the latter 199 were of household workers. Placements in regular employment numbered 198 of men and 67 of women.

## NEW BRUNSWICK

There was an increase of nearly 6 per cent in the number of positions offered through employment offices in New Brunswick during August when compared with the preceding month, but a decline of over 21 per cent in comparison with the corresponding month of last year. Placements were over 1 per cent higher than in July but nearly 25 per cent less than in August, 1933. As in Nova Scotia, all groups, except construction and maintenance, showed improvement over August of last year. The gains, however, were insufficient to offset the decline in construction and maintenance. Placements by industrial divisions included: manufacturing, 38; logging, 77; construction and maintenance, 264; and services, 470, of which 362 were of household workers. There were 390 men and 73 women placed in regular employment during the month.

## QUEBEC

The demand for workers, as indicated by orders received at employment offices in the Province of Quebec during August, 1934, was nearly 19 per cent higher than in the preceding month and nearly 55 per cent above the corresponding month of last year. There was an increase in placements of 20 per cent when compared with July and of over 66 per cent in comparison with August, 1933. All industrial divisions, except manufacturing and farming in which small losses only were reported, showed gains in placements over August of last year, the most noteworthy increases being in construction and maintenance, services, and logging. Industrial divi-

sions in which most of the placements were effected during the month were: manufacturing, 99; logging, 474; construction and maintenance, 1,110; trade, 147; and services, 2,080, of which 1,850 were of household workers. During the month, 1,925 men and 1,554 women were placed in regular employment.

#### ONTARIO

Orders received at employment offices in Ontario during August called for 26 per cent less workers than in the preceding month, but over 14 per cent more than during the corresponding month of last year. There was a decline of nearly 27 per cent in placements when compared with July, but an increase of nearly 14 per cent in comparison with August, 1933. Placement gains over August of last year were reported in all industrial groups except trade, the most noteworthy increases being in logging, construction and maintenance, farming, and services. Placements by industrial divisions included: manufacturing, 418; logging, 914; farming, 890; mining, 144; transportation, 90; construction and maintenance, 7,386; trade, 220; and services, 3,110, of which 1,750 were of household workers. There were 4,778 men and 1,230 women placed in regular employment during the month.

#### MANITOBA

During August, orders listed at employment offices in Manitoba called for over 32 per cent more workers than in the preceding month but over 22 per cent less than during the corresponding month of last year. There was an increase in placements of over 25 per cent in comparison with July, but a decline of over 22 per cent when compared with August, 1933. The decrease in placements from August of last year was due to fewer workers being sent to farm work and to employment on road construction, with minor losses in manufacturing and services. These reductions were partly offset by gains in logging, mining and trade. Placements by industrial divisions included: logging, 51; farming, 1,646; construction and maintenance, 887; trade, 37; and services, 663, of which 561 were of household workers. Placements in regular employment numbered 2,363 of men and 341 of women.

#### SASKATCHEWAN

Opportunities for employment, as indicated by orders received at employment offices in Saskatchewan during August, were over 65 per cent better than in the preceding month, but 20 per cent less favourable than during the corresponding month of last year. There was

a gain of nearly 67 per cent in placements when compared with July, but a loss of 18 per cent in comparison with August, 1933. A large reduction in the number of farm placements was mainly responsible for the decline from August of last year, although small losses were also reported in trade, construction and maintenance, and manufacturing. In all other groups small gains were recorded. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 47; farming, 1,997; mining, 31; construction and maintenance, 377; and services, 763, of which 535 were of household workers. There were 2,050 men and 488 women placed in regular employment during the month.

#### ALBERTA

There was an increase of over 48 per cent in the number of positions offered through employment offices in Alberta during August when compared with the preceding month, and of over 6 per cent in comparison with the corresponding month of last year. Placements also were nearly 44 per cent higher than in July and nearly 4 per cent above August, 1933. All industrial divisions, except construction and maintenance, showed gains in placements in comparison with August of last year, the largest increase being in farming. Placements by industrial divisions included: manufacturing, 53; farming, 1,338; construction and maintenance, 732; trade, 39; and services, 584, of which 444 were of household workers. There were 1,751 men and 400 women placed in regular employment during the month.

#### BRITISH COLUMBIA

Employment opportunities, as indicated by orders received at employment offices in British Columbia during August, were nearly 10 per cent less favourable than in the preceding month but over 21 per cent better than during the corresponding month of last year. There was a decline of nearly 11 per cent in placements when compared with July, but a gain of nearly 22 per cent in comparison with August, 1933. The increase in placements over August of last year was almost entirely due to work provided on road construction, although all other groups, except logging, showed minor gains. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 29; logging, 32; farming, 152; mining, 33; construction and maintenance, 3,011; and services, 605, of which 405 were of household workers. During the month 1,979 men and 228 women were placed in regular employment.

### Movement of Labour

During the month of August, 1934, the offices of the Employment Service of Canada effected 19,815 placements in regular employment, 10,374 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter, 585 were granted the Employment Service reduced transportation rate, 531 travelling to centres within the same province as the dispatching office and 54 to other provinces. The reduced transportation rate which is 2·7 cents per mile with a minimum fare of \$4 is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Persons benefiting by the Employment Service reduced transportation rate in Ontario during August were 263 in number and bound for provincial situations. The Port Arthur office was instrumental in the transfer of 234 of these, dispatching 128 bushmen, 54 mine workers, 23 highway construction cookees, 14 construction workers, 5 carpenters, 4 survey workers, 2 sawmill labourers, 2 blacksmiths and 2 restaurant workers to various points within the Port Arthur zone. For centres within their respective zones Sudbury transferred 17 bush workers and 1 miner, and Fort William 5 mine workers and 1 carpenter. Travelling to positions in the Fort William zone also, were 3 mine workers shipped from Timmins. The balance of this provincial movement was from North Bay, from which centre 1 bushman and 1 plumber went to Timmins. Transfers at the reduced rate in Manitoba during August were effected by the Winnipeg office and numbered 62. Of these, 11 were for provincial points, and 51 for centres in other provinces. The Winnipeg zone was the destination of all workers travelling within the province, included among whom were 6 farm hands, 4 mine workers,

and 1 hotel porter. Of the persons transported outside the province, the Port Arthur zone received 23 bushmen, 10 construction labourers, 4 hotel workers, 3 sawmill labourers, 2 mine workers, 1 farm hand, 1 blacksmith, and 1 telegrapher. The remaining inter-provincial transfers were of farm labour for Saskatchewan rural districts. In Saskatchewan 7 reduced rate certificates were issued during August, the Regina office granting these to teachers going to employment within the territory covered by that office. The Alberta labour movement during August comprised the transfer of 223 workers, 220 of whom went to employment within the province and 3 outside. The latter were farm hands for the Saskatoon zone who travelled on certificates secured at Edmonton. Provincially the Edmonton office assisted in the dispatch of 193 highway construction workers, 14 miners, 2 farm hands, 2 farm household workers, 2 carpenters, 2 cooks, 1 hotel waitress, 1 blacksmith, 1 bushman, and 1 mill sawyer to employment within its own zone. Proceeding from Calgary one harvester was bound for a point within the district covered by that office. Business transacted by British Columbia offices during August involved the issue of 30 reduced rate certificates, all provincial. Of these, 27 were granted at the Vancouver office to 4 cannery workers, 1 bushman, and 2 sawmill workers going to Kamloops, 1 mine worker to Penticton, and to 15 mine workers, 2 farm hands, 1 cook-general, and 1 hotel waitress journeying to employment within the Vancouver zone. The Penticton zone, in addition, received 3 apple sorters from New Westminster.

Of the 585 workers who were conveyed at the Employment Service reduced transportation rate during August, 389 travelled over the Canadian National Railways, 174 over the Canadian Pacific Railway, 18 over the Pacific Great Eastern Railway, and 4 over the Temiskaming and Northern Ontario Railway.

### (4) Building Permits issued in Canada in August, 1934

There was a slight increase in the value of the building permits issued during August, 1934, as compared with the preceding month, while in the more significant comparison with August of last year, there was a very considerable increase; during the month under review, the 61 co-operating centres authorized building estimated to cost \$3,273,889, as compared with \$3,219,086 in July, 1934, and \$1,910,809 in August, 1933. There was, therefore, an increase of 1·7 per cent in the first com-

parison and of 71·3 per cent in the second. The aggregate value of the building authorized in the first eight months of this year, viz., \$16,775,616, was higher than in 1933, though lower than in any other year of the record; in considering these data, it should be noted that the wholesale prices of building materials were lower in 1934 than in other years since 1920, with the exception of 1933, 1932 and 1931.

Some 50 cities furnished detailed statistics showing that they had issued about 250 permits for dwellings estimated to cost over \$900,000, and more than 1,600 permits for other buildings valued at approximately \$1,980,000. During July, authority was granted for the erection of some 200 dwellings and 1,600 other buildings, estimated at about \$1,000,000 and \$1,900,000, respectively.

Quebec, Ontario, Manitoba, Alberta and British Columbia reported gains as compared with July, 1934, that of \$396,182 or 69.7 per cent in Quebec being most pronounced. Of the reductions elsewhere indicated, that of \$489,249 or 94.9 per cent in New Brunswick was the greatest.

All provinces except Prince Edward Island and Alberta reported higher aggregates of building permits issued than in August of last year, the largest increases of \$706,656 and \$576,045 taking place in Ontario and Quebec, respectively.

Of the four largest cities, Montreal, Winnipeg and Vancouver showed improvement as compared with July, 1934, and also with August, 1933, while in Toronto there was a decline in the first, but an increase in the second comparison. Of the other centres, Halifax, Sherbrooke, Three Rivers, Westmount, Belleville, Fort William, Galt, Kingston, London, Niagara Falls, Peterborough, Sarnia, Sault Ste. Marie, Sandwich, St. Boniface, Regina, Edmonton, Nanaimo, New Westminster and North Vancouver recorded gains in both comparisons.

*Cumulative Record for First Eight Months, 1920-1934.*—The following table gives the value of the building authorized by 61 cities during August and in the first eight months of each year since 1920, as well as index numbers of wholesale prices of building materials in the first eight months of the years since 1920, (average 1926=100).

Year	Value of permits issued in August	Value of permits issued in first eight months	Indexes of value of permits issued in first eight months (1926=100)	Average indexes of wholesale prices of building materials in first eight months (Average 1926=100)
	\$	\$		
1934.....	3,273,889	16,775,616	15.4	83.4
1933.....	1,910,809	14,407,111	13.2	77.2
1932.....	3,823,251	32,576,464	29.8	77.7
1931.....	8,201,879	78,194,996	71.6	83.0
1930.....	14,029,564	115,268,330	105.5	93.4
1929.....	21,582,221	168,894,072	154.6	99.2
1928.....	17,448,542	145,247,485	133.0	96.4
1927.....	29,478,378	126,690,292	116.0	96.2
1926.....	11,672,599	109,211,942	100.0	100.7
1925.....	9,511,008	88,223,328	80.8	103.1
1924.....	9,406,733	81,762,083	74.9	109.0
1923.....	11,425,031	97,551,074	89.3	111.8
1922.....	18,158,932	105,181,416	96.3	108.4
1921.....	10,928,039	77,665,614	71.1	128.6
1920.....	10,805,846	86,303,601	79.0	143.8

The aggregate for the first eight months of this year was higher by 11.6 per cent than in 1933, but was lower than in earlier years of the record; as already stated, the average index number of wholesale prices of building materials was also lower in 1934 than in other years of this record except from 1931 to 1933.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, September, 1934, summarized the employment situation in August, as follows:—

There was some improvement, during August, in employment among insured work-people; but the total numbers unemployed, insured and uninsured, showed a slight increase at August 4, 1934, as compared with a month earlier owing to the registration for employment of juveniles who had left school at the end of July.

The industries in which the improvement was most marked included coal mining, building, shipbuilding and ship-repairing, tube manufacture, and cocoa, chocolate, etc., manufacture. There was also a substantial reduction in the numbers registered as temporarily

stopped in the jute industry, following the termination of local holidays. On the other hand, there was a further decline in employment in the boot and shoe industry, and most of the clothing trades, in the motor vehicle industry, and in the manufacturing section of the cotton industry; a slight setback also occurred in iron and steel manufacture, the hosiery industry and the distributive trades.

The improvement in employment was most marked in Wales, but there was also a substantial reduction, following the termination of local holidays, in the numbers registered as unemployed in Scotland. There was little change in other areas, apart from a slight decline in the North-Western Division. In London and the South-Eastern Counties employment continued fairly good, and in the South-

West it was fair. In the Midlands it was moderate. In the North of England and in Scotland it continued bad, while in Wales it was still very bad. In Northern Ireland it remained bad.

Among the workpeople, numbering approximately 12,883,000, insured against unemployment in Great Britain and Northern Ireland and working in practically every industry except agriculture and private domestic service, the percentage unemployed at August 20, 1934 (including those temporarily stopped as well as those wholly unemployed), was 16·6\* as compared with 16·8\* at July 23, 1934, and with 19·1 at August 21, 1933. The percentage wholly unemployed at August 20, 1934, was 13·0\*, as compared with 12·9\* at July 23, 1934; while the percentage temporarily stopped was 3·6\*, as compared with 3·9\*. For males alone, the percentage at August 20, 1934, was 18·9\* and for females, 10·4\*; at July 23, the corresponding percentages were 19·2\* and 10·4\*.

At August 20, 1934, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,598,338 wholly unemployed, 456,841 temporarily stopped, and 81,399 normally in casual employment, making a total of 2,136,578. This was 10,318 more than a month before, but 274,559 less than a year before. The total included 1,692,319 men, 68,715 boys, 321,603 women and 53,941 girls.

In Great Britain and Northern Ireland, the total number of persons on the Registers of Employment Exchanges at August 20, 1934, was 2,195,212.

#### United States

*Manufacturing Industries.*—Increases of 1·0 per cent in factory employment and 3·0 per cent in factory pay rolls were shown in August as compared with July. Employment and pay rolls in manufacturing industries normally increase in August reflecting seasonal activity in certain industries and a recovery from July shutdowns. During the preceding 15-year period, 1919-1933, inclusive, for which data are available in the Bureau of Labour Statistics, increases in employment from July to August have been shown in each year except 1930 and pay rolls have increased in every instance with the exception of August 1930 and 1931.

The Bureau of Labour Statistics' general index of factory employment for August, 1934, is 79·4 (preliminary) and the pay-roll index is 62·2 (preliminary). The August, 1934, index of factory employment is 3·9 per cent higher than the August, 1933, index (76·4), and the pay-roll index is 9·5 per cent

above the level of that for the same month last year (56·8).

The base now used in computing these indexes is the average for the 3-year period, 1923-1925, taken as 100. (Prior to March, 1934, the indexes of factory employment and pay-rolls published by the Bureau were computed by weighting each of the separate 89 industries surveyed instead of using group weights and this series did not include the canning and preserving industry. The former series had not been adjusted to conform with the trends shown by biennial Census reports and was based on the 12-month average of 1926 as 100. Computed on the old basis, the August employment index is 73·6 and the pay-roll index is 55·8).

The indexes of factory employment and payrolls are computed from reports supplied by representative establishments in 90 important manufacturing industries of the country. In August, reports were received from establishments employing 3,749,639 wage earners, whose weekly earnings during the pay period ending nearest August 15 totalled \$70,842,025. More than 50 per cent of the wage earners in all manufacturing industries of the country are covered in these monthly employment surveys.

Fifty-two of the 90 manufacturing industries surveyed reported gains in employment and 51 industries reported increases in pay-rolls.

Comparing the level of employment and pay-rolls in the 90 separate industries in August, 1934, with August, 1933, 52 industries show increased employment over the year interval and 60 industries show increased pay-rolls.

*Non-Manufacturing Industries.*—Gains in employment from July to August were shown in 10 of the 18 non-manufacturing industries surveyed monthly by the U.S. Bureau of Labour Statistics and increases in weekly pay-rolls were reported in 7 industries. The most pronounced gains in employment and pay-rolls over the month interval were in the metalliferous mining industry in which increases of 7·0 per cent in employment and 7·5 per cent in pay-rolls were reported. These gains were due somewhat to resumption of operations in a number of plants which were shut down in July, although increased employment was general throughout the industry. Employment in the building construction industry increased 1·7 per cent and pay-rolls increased 1·5 per cent. These increases represent changes in employment and pay-rolls in private building construction only and do not include employees engaged on construction projects financed by Public Works funds. The crude petroleum producing industry reported a gain of 1·4 per cent in em-

\*Provisional figures.

ployment over the month interval coupled with an increase of 2.0 per cent in pay-rolls. The gains in employment in the remaining 7 industries reporting increases were as follows: electric light and power and manufactured gas, 0.7 per cent; wholesale trade, 0.3 per cent; real estate, 0.3 per cent; banks, 0.2

per cent; bituminous coal mining, 0.2 per cent; insurance, 0.1 per cent; telephone and telegraph, less than  $\frac{1}{10}$  of 1 per cent. The most pronounced decrease in employment from July to August was shown in the anthracite mining industry (7.6 per cent) and was due largely to labour troubles.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding the contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government with respect to contracts "for construction, remodelling, repair or demolition of any work" is set forth in an Act of Parliament adopted on May 30, 1930, entitled "The Fair Wages and Eight-Hour Day Act" (chapter 20-21, Geo. V). The full text of this measure appeared in the LABOUR GAZETTE, April, 1930, page 383. The Fair Wages and Eight-Hour Day Act provides as follows:—

3. (1) Every contract made hereafter with the Government of Canada for construction, remodelling, repairs or demolition of any work shall be subject to the following conditions respecting wages and hours:—

(a) All persons in the employ of the contractor, sub-contractor, or of any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall be paid such wages as are generally accepted as current from time to time for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged; provided that wages shall in all cases be such as are fair and reasonable;

(b) The working hours of persons while so employed shall not exceed eight hours per day except in such special cases as the Governor in Council may otherwise provide, or, except in cases of emergency, as may be approved by the Minister.

The Fair Wages Policy was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Order in Council of April 9, 1924. The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages sched-

ules, are thereupon included by the Department concerned in the terms of contract.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions for the protection of the workmen employed, which are sanctioned by the foregoing Orders in Council.

It is further provided in the foregoing Orders in Council that "all contracts for the manufacture and supply to the Government of Canada of fittings for public buildings; harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees; mail bags, letter boxes, and other postal stores; and any other articles and things hereinafter designated by the Governor in Council" must contain provisions for the observance of the current wages rates and working hours in the district, or, in the absence of any such current standards, fair and reasonable rates and working hours. These conditions, which are referred to in the Orders in Council as "B" conditions (the Conditions of the Fair Wages Orders in Council with reference to building and construction works being designated as "A" conditions), including the following Fair Wages Clause:—

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respect hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, on on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable

hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rate of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Both in the case of contracts for building and construction work, and in the "B" conditions sanctioned by Orders in Council applicable to contracts for the manufacture of certain classes of supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and address of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages, rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed claim therefore may be filed with the Minister of the Department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction work, clerks of works or other

inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of certain classes of supplies listed in the Fair Wages Orders in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts containing fair wages conditions, have been recently executed by the Government of Canada:—

#### DEPARTMENT OF MARINE

##### *Contracts in Group "A" (Construction, etc.)*

Making and installing new boilers in the C.G.S. *Estevan*, at Victoria, B.C. Name of contractors, the Victoria Machinery Depot Co., Ltd., Victoria, B.C. Date of contract, June 30, 1934. Amount of contract, approximately \$50,000. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rate of wages not less than	Hours of labour not more than	
		per day	per week
Boilermakers, ironworkers, electric welders, acetylene welders and burners.....	\$ 0 75	8	44
Drillers and holders.....	0 44	8	44
Rivet heaters.....	0 53	8	44
Boilermakers' helpers.....	0 56	8	44
Machinists.....	0 68	8	44
Machinists' helpers.....	0 48	8	44
Blacksmiths.....	0 72½	8	44
Blacksmiths' helpers.....	0 55	8	44
Coppersmiths.....	0 73	8	44
Labourers.....	0 47	8	44

Overtime—first 4 hours, time and a half; balance, double time. Sundays and Holidays, double time.

Construction of a wooden lighthouse tower at Baccaro, Shelburne Co., N.S. Name of contractors, Shelburne Woodworkers Ltd., Shelburne, N.S. Date of contract, August 7, 1934. Amount of contract, \$1,850. A fair

wage schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Carpenters and joiners.....	\$ 0 50	8
Shinglers.....	0 50	8
Painters.....	0 50	8
Labourers.....	0 30	8
Driver, team and wagon.....	0 55	8
Driver.....	0 30	8
Motor truck driver.....	0 35	8

Protection work at Maugers Beach, Halifax County, N.S. Name of contractors, McDonald Construction Co., Ltd., Halifax, N.S., Date of contract, August 14, 1934. Amount of contract, \$7,272. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Pile driver engineer.....	\$ 0 75	8
Pile driver fireman.....	0 40	8
Carpenters.....	0 55	8
Labourers.....	0 35	8

N.B.—In any cases where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Erection of a double dwelling at Pachena Light Station, Vancouver Island, B.C. Name of contractor, A. W. MacMillan, Port Alberni, B.C. Date of contract, September 6, 1934. Amount of contract, \$7,724. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Bricklayers.....	\$ 0 85	8
Carpenters.....	0 65	8
Cement finishers.....	0 60	8
Compressor operators.....	0 50	8
Concrete mixer operators.....	0 50	8
Electricians.....	0 70	8
Labourers.....	0 40	8
Lathers—metal or wood.....	0 65	8
Motor truck drivers.....	0 45	8
Painters and glaziers.....	0 60	8
Plasterers.....	0 85	8
Plumbers and steamfitters.....	0 70	8
Roofers—felt and gravel.....	0 55	8
Sheet metal workers.....	0 70	8
Stonecutters.....	0 75	8
Stone masons.....	0 85	8
Teamsters, team and wagon.....	0 70	8
Teamsters.....	0 40	8
Tile layers.....	0 85	8

Construction of shed, railroad tracks, dock lighting, wharf repairs, etc., at Three Rivers, P.Q., undertaken for the Harbour Commissioners of Three Rivers. Name of contractors, J. P. Porter & Son Limited, St. Catharines, Ont. Date of contract, August 10, 1934. Amount of contract, \$369,078.22. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Blacksmiths.....	\$0 45	8
Bricklayers.....	0 70	8
Carpenters and joiners.....	0 50	8
Cement finishers.....	0 50	8
Compressor operators.....	0 40	8
Drill runners (machine).....	0 40	8
Electricians.....	0 55	8
Firemen—stationary.....	0 35	8
Hoist operators (gasoline).....	0 45	8
Hoist operators (steam).....	0 55	8
Labourers.....	0 30	8
Lathers, metal or wood.....	0 50	8
Machinists.....	0 55	8
Motor truck drivers.....	0 35	8
Painters and glaziers.....	0 50	8
Plasterers.....	0 70	8
Pile driver runners.....	0 55	8
Plumbers and steamfitters.....	0 55	8
Roofers, felt and gravel.....	0 45	8
Sheet metal workers.....	0 55	8
Structural steel workers.....	0 65	8
Driver, horse and cart.....	0 45	8
Driver, team and wagon.....	0 55	8
Concrete mixer operator.....	0 40	8

N.B.—In any cases where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Demolition and other contingent and accessory work in Saint John Harbour, N.B. Name of contractors, the Saint John Dry Dock & Shipbuilding Co., Saint John, N.B. Date of contract, August 28, 1934. Amount of contract, cost plus. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Acetylene burner.....	\$0 55	8
Blacksmith.....	0 55	8
Blacksmith's helper.....	0 40	8
Carpenter.....	0 60	8
Crane operator.....	0 65	8
Crane signman.....	0 40	8
Compressor operator.....	0 45	8
Diver.....	1 25	8
Diver tender.....	0 50	8
Driver, horse and cart.....	0 55	8
Electrician.....	0 60	8
Electric welder and burner.....	0 60	8
Fireman, stationary.....	0 40	8
Fireman, crane.....	0 45	8
Hoist runner (steam).....	0 65	8
Labourer.....	0 35	8
Machinist.....	0 60	8
Motor truck driver.....	0 40	8

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hou.	per day
Pipefitter.....	0 50	8
Rigger.....	0 50	8
Saw filer.....	0 55	8
Timberman or cribman (using such tools as x-cut saw, adze, axe, hammer, auger, etc.).....	0 45	8
Teamster.....	0 35	8
Teamster with team and wagon.....	0 70	8
Floating derrick runner.....	0 65	8

*Dipper Dredge—Marine*

	per month and board	Customary hours

## DEPARTMENT OF NATIONAL DEFENCE

*Contract in Group "B" (Manufacture of Supplies, etc.)*

The following is a statement of contracts awarded by the Department of National Defence during the month of September, 1934, for various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

Goods contracted for	Contractor
Structural steel.....	Sarnia Bridge Co., Montreal, P.Q.
Structural steel.....	Disher Construction Co., Ltd., Toronto, Ont.
Drill trousers.....	Yamaska Garments Ltd., St. Hyacinthe, P.Q.
Breeches.....	Grant-Holden-Graham, Ltd., Ottawa, Ont.
Cement.....	Canada Cement Co., Ltd., Montreal, P.Q.
Breeches.....	Walter Blue & Co., Sherbrooke, P.Q.
Drill shirts.....	Houde, Laroche & Cie., St. Croix, P.Q.
Blue serge.....	Dominion Woollens and Worsted, Ltd., Toronto, Ont.
Drill trousers.....	Gault Bros., Ltd., Vancouver, B.C.
Cloth.....	Oxford Woollen Mills Ltd., Oxford, N.S.
Lumbermen's rubber boots.....	Northern Rubber Co., Guelph, Ont.
Lumbermen's rubber boots.....	Woodstock Rubber Co., Woodstock, Ont.

Goods contracted for	Contractor
Metal doors.....	Canadian Metal Window Steel Products, Toronto, Ont.
Copper shingles.....	Western Steel Products Ltd., Winnipeg, Man.
Blue serge.....	Paton Mfg. Co., Montreal, P.Q.
Winter caps.....	Ottawa Imperial Cap Co., Ottawa, Ont.
Drill trousers.....	Grant-Holden-Graham Ltd., Ottawa, Ont.
Socks.....	Royal Knitting Co., Ltd., Guelph, Ont.
Crockery.....	Sovereign Potters Ltd., Hamilton, Ont.
Cement.....	Canada Cement Co., Montreal, P.Q.
Truck chassis.....	General Motors Products of Canada, Ltd., Ottawa, Ont.
Drill shirts.....	Sterling Shirt & Overall Co., Cap de la Madeleine, P.Q.
Cloth trousers.....	Grant-Holden-Graham Ltd., Ottawa, Ont.
Waterproof coats.....	Grant-Holden-Graham, Ltd., Ottawa, Ont.
Iron pipe.....	Garthshore Thomson Pipe & Foundry Co., Ltd., Hamilton, Ont.
Wire fence.....	Steel Co. of Canada, Ltd., Montreal, P.Q.
Aeroplane spruce.....	Chas. C. Labrie Ltd., Vancouver, B.C.

## DEPARTMENT OF PUBLIC WORKS

*Contracts in Group "A" (Construction, etc.)*

Construction of an extension to the breakwater at North West Cove (Tancook), Lunenburg Co., N.S. Name of contractor, Robert A. Douglas, New Glasgow, N.S. Date of contract, September 17, 1934. Amount of contract, approximately \$8,770. A fair wages schedule was inserted in the contract, as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Timberman or cribman (using such tools as: broad-axe, saw, hammer, auger, adze).....	\$0 37½	8
Blacksmith.....	0 45	8
Labourers.....	0 30	8
Gasoline hoist operator.....	0 45	8
Driver, team and wagon.....	0 55	8
Teamster.....	0 30	8
Labourers.....	0 30	8
Boatmen.....	0 30	8
Motor boat operators.....	0 35	8

Reconstruction of the wharf at Deer Park, District of West Kootenay, B.C. Name of contractors, A. H. Green Co., Ltd., Nelson, B.C. Date of contract, September 20, 1934. Amount of contract, approximately \$8,876. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Pile driver engineer.....	\$0 70	8
Fireman.....	0 55	8
Carpenters.....	0 65	8
Labourers.....	0 40	8
Bridgemen.....	0 65	8
Boorman.....	0 65	8

Construction of an extension to the revetment wall and dredging, Owen Sound, Ont. Name of contractors, Hill & Sibbald, Ltd., St. Catharines, Ont. Date of contract, September 18, 1934. Amount of contract, approximately \$27,251. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Hoist engineer—gas.....	\$0 50	8
Hoist engineer—steam.....	0 65	8
Fireman—stationary.....	0 40	8
Concrete mixer operator.....	0 45	8
Diver.....	1 10	8
Timberman or cribman (using such tools as: broad-axe, x-cut saw, hammer, adze, auger).....	0 42	8
Labourers.....	0 55	8
Concrete finishers.....	0 55	8
Driver, team and wagon.....	0 65	8
Teamster.....	0 35	8
Motor truck drivers.....	0 40	8
Carpenters and joiners.....	0 60	8
Blacksmiths.....	0 55	8

N.B.—In any cases where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Construction of a wharf and approach, Malbaie, Gaspé County, P.Q. Name of contractors, Dumont & Damours, Engr., Rivière du Loup, P.Q. Date of contract, September 15, 1934. Amount of contract, approximately \$25,335.60. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Machinist.....	\$0 55	8
Blacksmith.....	0 45	8
Timbermen and cribmen (using such tools as broad-axe, x-cut saw, hammer, adze, auger).....	0 37½	8
Driver, team and wagon.....	0 55	8
Driver, horse and cart.....	0 45	8
Drill runner—machine.....	0 40	8
Boatmen.....	0 30	8
Firemen—stationary.....	0 35	8
Hoist operator (gasoline).....	0 45	8
Motor truck drivers.....	0 35	8
Teamsters.....	0 30	8
Labourers.....	0 30	8
Compressor operator.....	0 40	8
Diver.....	1 00	8

Construction of Customs and Immigration Building and Customs warehouse at Cantic, P.Q. Name of contractor, Euclide Hubert, Beloeil, P.Q. Date of contract, September 22, 1934. Amount of contract, \$15,000 and unit prices for additional work. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator.....	\$0 40	8
Cement finishers.....	0 50	8
Stonemasons.....	0 70	8
Stone cutters.....	0 60	8
Brick & hollow tile layers.....	0 70	8
Structural steel workers.....	0 65	8
Ornamental iron workers.....	0 45	8
Carpenters and Joiners.....	0 50	8
Sheet metal workers.....	0 55	8
Roofers, felt and gravel (man in charge).....	0 45	8
Terrazzo layers.....	0 55	8
Marble and tile setters.....	0 70	8
Lathers, metal.....	0 50	8
Plasterers.....	0 70	8
Plasterers' helpers.....	0 35	8
Painters' glaziers.....	0 50	8
Plumbers and steamfitters.....	0 55	8
Electricians.....	0 55	8
Labourers.....	0 30	8
Driver, one horse and cart.....	0 45	8
Driver, team and wagon.....	0 55	8
Driver.....	0 30	8
Motor truck driver.....	0 35	8

Construction of repairs to wharf at Manicouagan, Saguenay Co., P.Q. Name of contractor, Joseph Belley, Rivière Mailloux, P.Q. Date of contract, September 8, 1934. Amount of contract, approximately \$2,729. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Blacksmiths.....	\$0 45	8
Compressor operators.....	0 40	8
Drill runners—machine.....	0 40	8
Driver, horse and cart.....	0 45	8
Driver, team and wagon.....	0 55	8
Drivers.....	0 30	8
Hoist engineer—gas.....	0 45	8
Hoist engineer—steam.....	0 55	8
Labourers.....	0 30	8
Motor truck driver.....	0 35	8
Powdermen.....	0 40	8
Quarrymen.....	0 35	8
Timbermen or cribmen (using such tools as: broad-axe, x-cut saw, hammer, auger, adze).....	0 37½	8

Reconstruction of wharf at Rivière Ouelle (Pointe aux Orignaux), Kamouraska Co., P.Q. Name of contractor, Louis Levesque, Rivière Ouelle Station, P.Q. Date of contract, Sep-

tember 18, 1934. Amount of contract, approximately \$29,957. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Blacksmiths.....	\$0 45	8
Carpenters and joiners.....	0 50	8
Compressor operator.....	0 40	8
Concrete mixer operator.....	0 40	8
Drill runners.....	0 40	8
Hoist operator—gasoline.....	0 45	8
Hoist operator—steam.....	0 55	8
Labourers.....	0 30	8
Machinists.....	0 55	8
Pile driver runner.....	0 55	8
Powderman.....	0 40	8
Quarrymen.....	0 35	8
Structural steel workers.....	0 65	8
Motor truck driver.....	0 35	8
Driver, horse and cart.....	0 45	8
Driver, team and wagon.....	0 55	8
Drivers.....	0 30	8

Reconstruction of Bayfield Street Wharf, Barrie, Ont. Name of contractors, Wm. Birmingham & Son, Kingston, Ont. Date of contract, August 31, 1934. Amount of contract, approximately \$11,407.40. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Blacksmiths.....	\$0 55	8
Boatmen.....	0 35	8
Carpenters and joiners.....	0 60	8
Cement mixer operator.....	0 45	8
Hoist engineer (steam).....	0 65	8
Hoist operator (gas).....	0 50	8
Pile driver operator.....	0 65	8
Fireman.....	0 40	8
Labourers.....	0 35	8
Driver, team and wagon.....	0 65	8
Teamster.....	0 35	8
Cement finisher.....	0 55	8
Motor truck driver.....	0 40	8
Timbermen or cribmen (using such tools as broad-axe, hammer, x-cut saw, auger, adze).....	0 42	8

Construction of a boiler house at, and the installation of a steam heating system in the frost-proof warehouse on the railway wharf at Charlottetown, P.E.I. Name of contractors, Bruce Stewart & Co., Ltd., Charlottetown, P.E.I. Date of contract, September 5, 1934. Amount of contract, \$3,500. A fair wages

schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Carpenters.....	\$0 50	8
Labourers.....	0 35	8
Plumbers and steamfitters.....	0 55	8
Painters and glaziers.....	0 50	8
Man in charge felt and gravel roofers.....	0 45	8
Electricians.....	0 55	8
Motor truck driver.....	0 40	8
Driver, horse and cart.....	0 50	8
Driver, team and wagon.....	0 65	8
Drivers.....	0 35	8

N.B.—In any cases where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Construction of a breakwater, Pointe aux Anglais, Saguenay Co., P.Q. Name of contractor, Henri Lemieux, Quebec, P.Q. Date of contract, September 10, 1934. Amount of contract, approximately \$5,846.80. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Blacksmith.....	\$ 0 45	8
Carpenters and joiners.....	0 50	8
Compressor operators.....	0 40	8
Drill runners (machine).....	0 40	8
Driver, horse and cart.....	0 45	8
Hoist operators—gas.....	0 45	8
Hoist operators—steam.....	0 55	8
Labourers.....	0 30	8
Motor truck drivers.....	0 35	8
Powdermen.....	0 40	8
Quarrymen.....	0 35	8
Teamster, team and wagon.....	0 55	8
Teamster.....	0 30	8
Timberman or cribman (using such tools as: broad-axe, x-cut saw, auger, adze, hammer).....	0 37½	8

Completion of construction of a siding to wharf at Hantsport, N.S. Name of contractors, Messrs. Ralph and Arthur Parsons, Walton, N.S. Date of contract, September 6, 1934. Amount of contract, approximately \$14,627. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Carpenters and joiners.....	\$0 50	8
Timbermen or cribmen (using such tools as broad-axe, x-cut saw, hammer, adze, auger).....	0 37½	8
Boatmen.....	0 30	8
Compressor operator.....	0 40	8
Hoist operators (gasoline).....	0 45	8
Hoist operators (steam).....	0 55	8
Fireman (stationary).....	0 35	8
Labourers.....	0 30	8
Motor truck drivers.....	0 35	8
Pile driver runners.....	0 55	8
Driver, horse and cart.....	0 45	8
Driver, team and wagon.....	0 55	8
Driver.....	0 30	8
Blacksmith.....	0 45	8

Completion of an extension to Lancaster Hospital, Saint John, N.B. Name of Contractors, R. A. Corbett & Co., Ltd., Saint John, N.B. Date of contract, September 6, 1934. Amount of contract, \$14,897. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator.....	\$0 40	8
Cement finishers.....	0 70	8
Brick and hollow tile layers.....	0 90	8
Carpenters and joiners.....	0 60	8
Sheet metal workers.....	0 60	8
Terrazzo layers.....	0 70	8
Marble setters.....	0 90	8
Tile setters.....	0 90	8
Lathers—metal.....	0 60	8
Plasterers.....	0 90	8
Painters and glaziers.....	0 55	8
Plumbers and steamfitters.....	0 65	8
Electricians.....	0 60	8

Removal of shoal in River St. Francois, between Lake St. Pierre and Pierreville, Yamaska Co., P.Q. Name of contractors, Cummins Construction Co., Ltd., Montobello, P.Q. Date of contract, September 20, 1934. Amount of contract, approximately \$13,345.60. The General Fair Wages Clause was inserted in the contract.

Dredging at Ruisseau LeBlanc, P.Q. Name of contractors, Cummins Construction Co., Ltd., Montobello, P.Q. Date of contract, September 20, 1934. Amount of contract, approximately \$24,087.50. The General Fair Wages Clause was inserted in the contract.

Dredging harbour at Meaford, Ont. Name of contractors, The Randolph MacDonald Co., Ltd., Toronto, Ont. Date of contract, September 17, 1934. Amount of contract, approximately \$12,237.50. The General Fair Wages Clause was inserted in the contract.

Deepening channel in the East River, between New Glasgow and Trenton, N.S. Name of contractors, Beacon Dredging Co., Ltd., Halifax, N.S. Date of contract, September 7, 1934. Amount of contract, approximately \$17,003.58. The General Fair Wages Clause was inserted in the contract.

Deepening channel in Rivière du Loup at Louiseville, Maskinonge Co., P.Q. Name of contractors, St. Francis River Dredging Co., St. Francois du Lac, Yamaska Co., P.Q. Date of contract, September 17, 1934. Amount of contract, approximately \$19,380.87. The General Fair Wages Clause was inserted in the contract.

Dredging at Lorneville, St. John Co., N.B. Name of contractors, Saint John Dredging Co., Ltd., Saint John, N.B. Date of contract, August 29, 1934. Amount of contract, approximately \$6,500. The General Fair Wages Clause was inserted in the contract.

Dredging the north arm of the Fraser River, New Westminster District, B.C. Name of contractors, the B.C. Bridge and Dredging Co., Ltd., Vancouver, B.C. Date of contract, August 21, 1934. Amount of contract, approximately \$58,657.50.

#### ROYAL CANADIAN MOUNTED POLICE

##### *Contracts in Group "A" (Construction, etc.)*

In connection with the construction of a central heating plant at the R.C.M. Police Barracks at Regina, Sask., the following contracts were awarded:—

1. Erection of a power house. Name of contractors, Pool Construction Co., Ltd., Regina, Sask. Date of contract, September 12, 1934. Amount of contract, \$25,085.

2. Erection of conduiting, manholes, etc. Name of contractors, Smith Bros. & Wilson, Ltd., Regina, Sask. Date of contract, September 7, 1934. Amount of contract, \$5,764.

3. Installation of piping, trenches, etc. Name of contractors, Vagg, Wilson & Co., Ltd., Regina, Sask. Date of contract, September 7, 1934. Amount of contract, \$14,707.

A fair wages schedule was inserted in the three above-mentioned contracts as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Carpenters and joiners.....	\$0 75	8
Labourers.....	0 40	8
Bricklayers* and masons.....	1 00	8
Plasterers.....	1 00	8

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both the employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Pulp, Paper and Paper Products

**THOROLD, ONTARIO.**—ONTARIO PAPER COMPANY LIMITED and THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS and OTHER UNIONS.

Agreement to be in effect from June 24, 1934, to May 1, 1935.

Union members to be employed, if available, and any other men employed to join the proper union.

Hours: 8 per day, 48 per week, but the Company to have the right at its discretion to spread employment by reducing hours of any employee or department to 40 hours per week, but in this case, overtime rates only to be paid for work over 48 hours per week.

Overtime for day workers: time and one-half to be paid for overtime and for work on Sundays and three holidays. Overtime for tour workers: if overtime is for other than tour work, time and one-half, but if continuing after regular shift due to absence of man on next shift, straight time to be paid.

Wage rates are increased from June 24, 1934 by  $7\frac{1}{2}$  per cent over the rates which came into effect April 1, and which in turn were an increase of from 5 to 8 per cent in rates in effect before April 1, 1934.

Wages per hour—in Electrical Department: Electrician (1st) 79 cents, electrician (2nd) 72 cents, helpers 55 cents, maintenance men 70 cents, operators 70 cents. In Ground Wood Mill: repair men 69 cents, repair helper 55 cents, stone sharpeners 61 cents, assistant stone sharpeners 56 cents, carriers 45 cents, oilers 50 cents, grinder men 52 cents, screen men 50 cents, waste 43 cents, wood pullers 45 cents,

cleamers 43 cents, pressmen 46 cents. In Sulphite Mill: cooks 74 cents, helpers 53 cents, acid makers 70 cents, screenmen (head) 62 cents, blow pit men 49 cents, screenmen 50 cents, stone-men 48 cents, millwright 70 cents, millwright helper 58 cents, labourers and cleaners 43 cents, wet machine operator 50 cents. In Mixing Room: head beaterman 90 cents, mixers 48 cents, beatermen 51 cents. In Machine Room: machine tender \$1.25 and \$1.38, back tenders \$1.08 and \$1.21, spare hand (clothing man) 94 cents, third hands 82 and 91 cents, fourth hands 62 cents, fifth hands 58 cents, oilers 53 cents, cleaners 46 cents. Wrapping Machine: machine tender 71 cents, helper 59 cents, second helper 46 cents. Finishing Room: weighers 57 cents, finishers 50 cents, helpers 48 cents, electric truckers 56 cents, loaders 47 cents, coremen 47 cents, inspector of finished rolls 51 cents, cutter operator 52 cents, crane operators (paper storage) 56 cents, labourers (loaders) 47 cents, labourers (storage) 45 cents. Small Rewinders: windermen 67 cents, helpers 51 cents. Steam Plant: head fireman 70 cents, second fireman 60 cents, labourers 49 cents, masons 89 cents. Turbines: head operator 80 cents, second operator 71 cents. Brown hoist: engineers 80 cents, derrick runners (while on cranes only) 74 cents, shovel operator 70 cents. Machine Shop: machinists 82 cents, roll grinder 83 cents, machinists helper 61 cents, first blacksmith 80 cents, helper 58 cents, engine inspector 74 cents, welder 73 cents, helper 55 cents. Millwrights: pattern maker 84 cents, millwright (1st) 82 cents, millwright (2nd) 70 cents, helpers 58 cents, paper machine millwright 86 cents. Basement: head oiler 71 cents, assistant head oiler 58 cents, oilers 50 cents, sweepers 46 cents, general cleaners 43 cents. Steam Fitters: 1st steam fitter 77 cents, 2nd steamfitter 69 cents, helpers 60 cents, pump operator 66 cents. Paint shop: painters 70 cents, helpers 56 cents. Bull gang: labourers 56 cents, rigger 69 cents. Salvage Department: salvage man 67 cents, helper 49 cents. Wood Room and Barkers: oiler 49 cents, chipperman 52 cents, cleaners 46 cents, labourers 43 cents, millwright 82 cents, filer 82 cents.

Grievances or disputes which cannot be settled between Company officials and union officers are to be referred to arbitration, the result of which will be binding on both parties.

### Manufacturing: Wood Products

**TORONTO, ONTARIO.**—CERTAIN FURNITURE MANUFACTURERS and THE FURNITURE and WOODWORKERS INDUSTRIAL UNION.

Agreement reached following strike reported on page 908 of this issue. Agreement to be in effect from August 22, 1934, to August 22, 1935, and thereafter from year to year until notice.

This agreement is similar to the one previously in effect which was summarized in the LABOUR GAZETTE, April, 1934, page 373, and September, 1933, page 953, with these exceptions:

Hours are reduced from 44 to 40 per week, with time and one-half for overtime. All work on legal holidays and on May 1, must be sanctioned by the union and paid for at time and one-half rate.

Employers to contribute 2 per cent of the payroll to the union toward an unemployment fund.

Cutting, operating, cushion-making, frames, etc. to be on an hourly basis.

Hourly wage rates are unchanged, except that the minimum rate for any labourer to be 35 cents per hour or \$15 per week.

### Manufacturing: Printing and Publishing

QUEBEC, QUEBEC.—CERTAIN NEWSPAPER AND BOOK AND JOB OFFICES AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 302.

Agreement to be in effect from February 14, 1934, to February 14, 1936.

The terms of this agreement which relate to wages, rates, hours, etc., were made obligatory by Order in Council under the Quebec Labour Agreements Extension Act, and are printed on page 911 of this issue.

Another clause in the original agreement between the parties which is not included in the scope of the Order in Council, provides for the payment of wages to all workers who work less than 24 hours in a week at the rate for night work.

WINDSOR, ONTARIO.—A CERTAIN NEWSPAPER AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 553.

Agreement to be in effect from April 1, 1934, to March 31, 1937, and thereafter from year to year until notice, but the wage scale may be re-opened by either party on giving notice sixty days prior to April 1, 1935 or 1936.

The agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, October, 1933, page 1034, November, 1932, page 1222, September, 1931, page 1036, and July, 1929, page 803.

Wage rates for journeymen are unchanged at 80 cents per hour for day work and 85 cents for night work.

A new clause provides that the union is not to attempt to enforce the operation of the five day week, except with the permission of the employer.

REGINA, SASK.—CERTAIN NEWSPAPER PUBLISHERS AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS UNION, LOCAL No. 75.

Agreement to be in effect from June 1, 1934, to May 31, 1936.

This agreement is similar to the one previously in effect which was summarized in the LABOUR GAZETTE, October, 1933, page 1034, July, 1932, page 818, and July, 1930, page 841, with certain changes in working arrangements and the following change in wages:

The wage rate for journeymen pressmen to be 78 cents per hour (an increase of 2 cents per hour over the previous rate). Wage rates

for apprentices are increased proportionately. In the absence of the foreman due to sickness or holidays, the man in charge to receive 75 cents per day extra.

### Construction: Buildings and Structures

CALGARY, ALBERTA.—MASTER TINNERS AND THE SHEET METAL WORKERS INTERNATIONAL ASSOCIATION, LOCAL No. 254.

Agreement to be in effect from August 15, 1934, to March 31, 1935, and thereafter subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, September, 1933, page 954, with the following exceptions:

Wage rate for journeymen sheet metal workers to be 80 cents per hour (a reduction of 10 cents per hour from the previous rate).

The clause providing for a committee for each party is not in this agreement.

### Health and Public Welfare in Manitoba

The Department of Health and Public Welfare of Manitoba in its annual report summarizes its main activities as follows: (1) Prevention of disease and preservation of health; (2) the care of those unfortunate individuals in the community who through financial inability; mental or physical illness; old age or infirmity; or from other causes are unable to look after themselves.

The Division of Child Welfare, which is administered by the department, reported a very heavy year, largely due to present economic conditions. A great number of widows with dependent children were in need of assistance and it was only by the closest supervision of applications for mothers' allowances that the division found it possible to keep within the appropriation allotted for its activities, particularly in view of the fact that there were no deduction in the schedule of allowances.

There was a slight reduction in the number of children for whom temporary or permanent wardship had to be taken. It was hoped, although it could not be definitely ascertained, that this is due to the better type of family adjustment being carried on throughout the Province.

One definite trend, on which the report comments with satisfaction, is that municipalities are making greater efforts to care for their own "neglected" children. By this is meant that an effort is being made by the municipalities to re-establish as a family unit, children who may become "neglected."

## PRICES, RETAIL AND WHOLESALE, IN CANADA, SEPTEMBER, 1934

### Cost of Living, Prices of Staple Articles and Index Numbers

**T**HE movement in prices during the month was slightly downward both the weekly family budget in terms of retail prices and the Dominion Bureau of Statistics index number of wholesale prices being somewhat lower, the former because of lower costs for foods and the latter mainly because of declines in the prices of certain raw materials.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.46 at the beginning of September as compared with \$7.51 for August; \$7.24 for September, 1933; \$11.64 for September, 1929; \$10.94 for September, 1926; \$10.28 for September, 1922; \$16.92 for June, 1920 (the post war peak); and \$7.83 for September, 1914. The decline was due mainly to lower prices for potatoes although the prices of beef, veal, mutton and granulated sugar were also lower. The prices of bacon, lard, eggs, bread and rolled oats were higher. Including the cost of fuel and rent with that of foods the total budget was \$15.87 at the beginning of September as compared with \$15.92 for August; \$15.78 for September, 1933; \$21.90 for September, 1929; \$21.15 for September, 1926; \$20.90 for September, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.33 for September, 1914. Fuel was slightly higher due to increased prices for coal. Rent was practically unchanged.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics based on prices in 1926 as 100 was 72.0 for September as compared with 72.3 for August; 68.9 for September, 1933; 97.8 for September, 1929; 98.5 for September, 1926; 103.5 for September, 1921; 164.3 for May, 1920 (the post war peak); and 67.2 for September, 1914. One hundred and eighteen prices quotations were lower, seventy-eight were higher and three hundred and seventy-one were unchanged.

In the grouping according to chief component materials five of the eight main groups were lower and three were higher. The groups which declined were the Vegetable and Vegetable Products group because of lower prices for wheat, flax, rye and certain milled products which more than offset higher prices for barley, corn and oats; the Fibres, Textiles and Textile Products group, because of lower quotations for raw cotton, raw wool, raw silk and worsted cloth yarns; the Wood, Wood Products and Paper group, owing

chiefly to price reductions for spruce lumber and ground wood pulp; the Iron and its Products group, mainly on account of lower prices for tin plate and scrap steel; and the Non-Ferrous Metals and their Products group, due to lower prices for copper, lead, tin and zinc. The Animals and their Products group was considerably higher, advanced quotations for calves, hides, butter, lard, eggs and cured meats more than offsetting declines in the prices of steers, hogs, lambs, leather, furs and fresh meats. The Non-Metallic Minerals and their Products group and the Chemicals and Allied Products group also advanced.

In the grouping according to purpose consumers' goods were higher while producers' goods were lower. The advance in the former was due mainly to higher prices for certain commodities in the foods, beverages and tobacco group, while the decline in the latter occurred mainly in materials for the meat packing industries, the milling industries and the textile and clothing industries.

In the grouping according to origin raw and partly manufactured goods were slightly lower while fully and chiefly manufactured goods advanced somewhat. Canadian farm products declined slightly, decreased prices for field products being more than sufficient to offset advances in animal products.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of September of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located

(Continued on page 974)

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL, AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost for an average family

\*Prior to 1926 number of commodities was 236, and commencing in January, 1934, the number is 567.

(Continued from page 966)

but still fairly central, without modern conveniences.

The figures as to rental are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle,

anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

## Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and

electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

#### CHANGES IN THE COST OF LIVING IN CANADA

FROM 1913 TO 1934\*

(Average prices in 1913=100)

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 13½%; Sundries, 20%.

#### Retail Prices

Beef prices were slightly lower in most localities, the Dominion average for sirloin steak being down from 22.5 cents per pound in August to 22 cents in September, round steak from 18.2 cents per pound to 17.8 cents

and shoulder roast from 11.8 cents per pound to 11.5 cents. Veal and mutton also were lower, the former averaging 11.8 cents per pound in September as compared with 12 cents in August and the latter averaging 19 cents per pound in September as compared with 20.8 cents in August. Bacon prices were generally higher being up in the average from 33.2 cents per pound in August to 35.1 cents in September. The price of lard also advanced averaging 13.2 cents per pound in September as compared with 12.7 cents in August.

Egg prices showed a slight seasonal advance the Dominion average being 27.5 cents per dozen in September, 27.2 cents in August and 24.9 cents in July. The price of milk was unchanged at an average of 9.8 cents per quart. Increases, however, were reported from St. Hyacinthe, Belleville, Peterborough, Edmonton and Calgary.

Bread was fractionally higher at an average of 5.9 cents per pound. Onions were generally lower the Dominion average being down from 5.6 cents per pound in August to 4.3 cents in September. Potatoes declined substantially in nearly all localities the Dominion average being down from \$1.22 per ninety pounds in August to 98 cents in September. The price of granulated sugar was fractionally lower at 6.6 cents per pound. The price in September, 1933, was 8 cents per pound. The price of tea has advanced gradually during the nine months of the present year the Dominion average being 52.6 cents per pound in September as compared with 45.7 cents in January. Anthracite coal advanced from \$14.88 per ton in August to \$14.96 in September. Increases were reported from Sherbrooke, St. Hyacinthe, Peterborough, Oshawa, Orillia, Toronto, St. Catharines, Kitchener and London.

Following are the prices reported for Welsh coal, domestic sizes:—Halifax, \$15.50; Windsor, Nova Scotia, \$16.50; Moncton, \$16; Quebec, \$14.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$15.50; Montreal, \$15.50; Ottawa, \$16.50; Kingston, \$16; Belleville, \$16.50; Peterborough, \$17; Oshawa, \$15; Toronto, \$15; St. Catharines, \$15.50; Hamilton, \$15; Galt, \$16; Windsor, \$14; Sudbury, \$17; Cobalt, \$17.75; Timmins, \$19; Port Arthur, \$16.25; Fort William, \$16; Winnipeg, \$19.50.

#### Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

The price of No. 1 Manitoba northern cash wheat, Fort William and Port Arthur basis, averaged 82.3 cents per bushel in September as compared with 86 cents in August and 67.2

cents in September, 1933. Prices advanced considerably during the first ten days of the month following which there was a gradual decline. In coarse grains flax was down from an average of \$1.627 per bushel to \$1.516 and rye from 68.7 cents per bushel to 66 cents, while oats and barley advanced, the former from 43.6 cents per bushel to 45.7 cents and the latter from 56.6 cents per bushel to 58.5 cents. In milled products flour was 50 cents per barrel lower at \$5.50, while rolled oats advanced from \$3.10 per ninety pound bag to \$3.30. Granulated sugar at Montreal was unchanged at an average price of \$5.09 per hundred pounds. Raw rubber at New York declined from 15.1-16.6 cents per pound to 15-15.9 cents. In live stock choice steers at Toronto were slightly lower at \$5.30 per hundred pounds, while at Winnipeg the price declined from \$3.83 per hundred pounds to \$3.49. Lambs at Toronto declined from \$6.35 per hundred pounds to \$5.77, while calves advanced from \$5.65 per hundred pounds to \$6.45. The price at Winnipeg was somewhat lower at \$3.79 per hundred pounds. Bacon

hogs at Montreal rose from \$8.75 per hundred pounds to \$8.85 but at Toronto the price declined from \$8.63 per hundred pounds to \$8.49. Creamery butter at Montreal advanced from 20.9 cents per pound to 21.4 cents and at Toronto from 21.7 cents per pound to 22.2 cents. Cold storage holdings at the beginning of September were about 20 per cent higher than at the corresponding date last year and 22 per cent higher than holdings at the beginning of August this year. Fresh eggs showed a substantial seasonal advance the price at Montreal rising from 26.1 cents per dozen to 32.1 cents and at Winnipeg from 21.3 cents per dozen to 27.6 cents. The price of raw cotton at New York was down from 13.1 cents per pound to 12.7 cents. The textile strike together with the fact that visible supplies of American cotton were considerably increased in September were said to be factors in the price movement. The price of scrap steel was \$1 per ton lower at \$6.50-\$8.50, while the price of copper at Montreal declined from \$7.64 per hundred pounds to \$7.30.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE accompanying tables, which appear quarterly, give the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries. The following notes afford information as to significant changes according to groups of commodities in some of these countries. The index numbers of the cost of living are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases.

### Great Britain

**WHOLESALE PRICES.**—The Board of Trade index number, on the base 1924=100, was 63.6 for August, an advance of 2.1 per cent over the July level. This increase was almost entirely due to the increase in food prices, amounting to 6.5 per cent. The greatest change was in cereals which group was 11.8 per cent higher than in July, and the meat and fish group showed an advance of 5.9 per cent. Non-foods, on the whole, were 0.3 per cent lower, the changes in the different groups being small except for a decrease of 2.5 per cent in wool prices.

The *Statist* index number, on the base 1867-1877=100, was 83.4 at the end of August, an increase of 1.2 per cent for the month. All

groups were included in the rise for the month except the sugar, coffee and tea group. The largest increase was one of 3.1 per cent in vegetable foods.

**COST OF LIVING.**—The index number of the Ministry of Labour, on the base July, 1914=100, was 143 at September 1, an increase of 0.7 per cent for the month. Foods were higher, the principal changes being increases in prices of eggs, bread and flour, bacon and butter, with a reduction in potato prices. The fuel and light group also showed a slight advance.

### France

**WHOLESALE PRICES.**—The General Statistical Office index number, on the base 1914=100 (gold index) was 74 for August, an increase of 1.4 per cent for the month, due chiefly to increases in all of the food groups, while industrial materials were lower than the July level.

### Germany

**WHOLESALE PRICES.**—The Federal Statistical Office index number, on the base 1913=100, was 100.1 for August, an advance of 1.2 per cent for the month. The upward movement was general, extending to the four main groups and to most of the sub-groups, the principal advances occurring in cattle and in textiles.

(a) Average for year. (b) First of month. (c) 15th of month. (d) End of month. (e) New series. (f) Sum totals of the prices per pound of 96 articles of common consumption. (g) Until end of 1927, "Dr. Lorenz". (h) Prior to 1926, number of commodities was 236. (i) Paper currency basis; index number on pre-war currency suspended from April, 1933.

**COST OF LIVING.**—The official index number, on the base 1913-1914=100, was 123·3 for August, an increase of 0·3 per cent for the month. There were no marked changes in any of the groups.

### South Africa

**WHOLESALE PRICES.**—The index number of the Census and Statistics Office, on the base 1910=1000, was 1102 for July, a decrease of 6 per cent from the April level, due to declines in the jute, leather, hides and skins group, the grains, meals, etc. group, groceries, meat and chemicals.

### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926=100, was 76·4 for August, an advance of 2 per cent for the month. This is the highest point reached since February 1931. The increase in August was chiefly due to substantial advances in farm products, foods and fuel and lighting materials.

*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated) which is the sum total of the prices per pound of 96 commodities of common consumption, was \$9·4778 at September 1, an advance of 1·7 per cent for the month. This is a rise of almost 50 per cent in this index number since March 1, 1933, and is the highest point reached in three and one-half years.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost *per capita* of a year's supply of commodities, was \$169·188 at September 1, a gain of 0·76 per cent for the month, and is the highest point reached in four years.

**COST OF LIVING.**—The National Industrial Conference Board index number, on the base 1923=100, was 79·6 for August, a rise of 0·6 per cent for the month. All groups except sundries were higher than the July level.

## The Primary Iron and Steel Industry in Canada, 1933

The Dominion Bureau of Statistics has published a report on the primary iron and steel industry in 1933, covering the operations of plants engaged chiefly in the manufacture of (a) pig iron, (b) ferro-alloys, (c) steel ingots and direct steel castings, (d) rolled and drawn iron and steel products such as bars, plates, sheets, strips, rails, wire rods, structural shapes, etc. Thirty-six firms were included in this industry in 1933 and reports were received for 50 different plants or departments including 4 blast furnace departments, 2 ferro-alloy plants, 26 steel furnace divisions and 18 rolling or drawing mills.

Factory sales of pig iron, steel and rolled products were valued at \$18,492,549 in 1933 compared with \$16,197,526 in 1932, and \$36,911,245 in 1931. The 22 works in Ontario accounted for 63 per cent of the total sales for Canada, 6 plants in Nova Scotia provided 20 per cent of the total and 14 works in Quebec accounted for 14 per cent. There were also 4 operating plants in Manitoba, 1 in Alberta and 3 in British Columbia.

Capital employed in 1933 was reported at \$96,444,846 of which \$74,536,432 or 77·4 per cent represented the value of land, buildings and plant equipment. The total for Ontario was \$64,821,820; for Nova Scotia, \$18,380,730; for Quebec, \$11,773,013; for Manitoba, \$1,342,983; and for Alberta and British Columbia, \$126,300.

The average number of employees in the primary iron and steel plants was 5,200 in

1933 compared with 4,847 in 1932, and 8,026 in 1931. About 315 workers were employed in blast furnace departments, 209 in ferro-alloy plants, 1,467 on steel furnaces and 3,207 in rolling mills. Salaries and wages in 1933 totalled \$6,049,189 compared with \$6,131,057 in 1932 and \$11,072,054 in 1931.

A concise booklet entitled "How to Avoid Accidents in the Engineering Industry" has been published by the Industrial Accident Prevention Associations of Ontario. The safety recommendations it contains represent the accumulated experience of employers, management and operators in this industry, and are based on facts, not theory. The booklet contains general engineering shop rules; rules for lathe operators; for drilling machine operators; for shaping machine operators; for screw machine, auto, semi-auto, hand screw and hollow spindle lathe operators; for boring, milling and gear cutting machine operators; for planing machine operators; for the safe operation of grinding machines, surface—internal—external; for safe power press operation; for the prevention of electrical accidents; and for hand tools; also hints to crane drivers and slingers; and sections on ladders; piling and storage of materials; first aid; skin infection; spitting; fooling and horseplay; and health hazards in chromium plating.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Contract by Employee not to Carry on Similar Business is Enforced

The Manitoba Court of Appeal, by a majority decision, recently reversed the judgment of Mr. Justice Adamson in the action brought by a drug company in Manitoba against a former employee (LABOUR GAZETTE, October, 1933, page 1056). The defendant, a pharmaceutical chemist, entered the employment of the plaintiff company in January, 1928, and in March was put in charge of the company's retail drug store opened in that month at Flin Flon, the hiring being on a monthly basis at \$200 a month. He continued in that position until September, 1932, when he was dismissed on a month's notice. In the following month he was employed by the Copper Drug Company Limited as druggist and clerk in a retail drug store. On December 6, 1928, when he had been in the plaintiff's employment for eleven months, he signed at the plaintiff's request an agreement in the form of a bond for \$5,000, agreeing that he would not carry on a similar business in the territory of the plaintiff for a period of five years. Mr. Justice Adamson, in dismissing the action in the lower court, pointed out that the defendant did not sign the bond as a consideration for being taken into the service of the company, and the signing of the bond was something new imported into the agreement, and was not a condition of his employment. The agreement was therefore in the nature of a voluntary covenant, and was moreover a covenant "in restraint of trade."

The Court of Appeal, on the other hand, held that the mere continuance of a person in service, though terminable at the notice or will of the employer, is a sufficient consideration for a reasonable restraint against exercising the same trade on his own account after dismissal.

Chief Justice Prendergast, in the course of his judgment, said: "The business of druggists, with more diffused knowledge in matters of health and the prevalence of patent medicine, has undergone a great change, and I do not think, on the evidence as we have it, that much, if anything, can be made of the defendant's having become possessed of trade secrets or formulae of compounds. The defendant, however, being not a mere clerk but in effect manager, acquired as such an intimate knowledge of the terms and conditions of the company's dealings with manufacturers and wholesalers, and became identified with it in such a way that its customers would inevitably be diverted to the new store which started business next door. The plaintiffs have shown a considerable falling off in their business since the new store started. But this period has coincided with a depression which

has also affected the northern district and it seems that the amount of \$5,000 set forth in the bond is much in excess of actual damages. . . . In the conditions of our very sparsely settled northern mining country where Flin Flon is situate, the plaintiff's undertaking at that place was a hazardous one which they did not feel like entering into without securing such assurance as that given by the bond, without signing which, the defendant admits frankly, he knew that his employment could not continue. I would allow the appeal with costs, enter judgment for the plaintiffs for \$2,000 and grant an injunction as prayed for, also with costs."

Mr. Justice Dennistoun (agreeing with Chief Justice Prendergast and Mr. Justice Richards), said: "I agree that the appeal should be allowed, for upon the facts the bond sued on with its restrictive covenants was taken for the protection of the goodwill of the plaintiff's business, and not with the object of depriving the defendant of the means of livelihood. The defendant was made manager of the plaintiff's business at the mining town of Flin Flon upon his solemn contract under seal that he would not enter into competition with the plaintiff's drug business for a limited time in a limited area. As such manager he acquired special knowledge in respect to the stock in trade, its costs, and the profits at which it could be sold. This was highly confidential information in a newly opened mining camp. Moreover he obtained information as to the requirements of the plaintiff's customers, with some knowledge of their diseases and of those prescriptions, preparations, cosmetics, contraceptives, hair-dyes, salves, and other specifics for ailments or vanities which are not readily disclosed to strangers. Having acquired this intimate and personal knowledge, he placed it at the disposal of a rival business in violation of his covenant not to do so. He was in a different position from that of a mere clerk or counter salesman whose duties are automatic and can be performed in complete ignorance of his master's trade secrets. To put a man of that type out of business may well be held a contract in restraint of trade which is contrary to public policy. But to hold a person to a contract such as we have here is, in my judgment, well within the cases referred to by my learned brethren." (These cases were *Morris Limited versus Saxelby*, H. of L. 1916; *London and Yorkshire Bank versus Pratt*, 1887; *Reimer versus Rosen*, Manitoba, 1919).

Mr. Justice Trueman and Mr. Justice Robson dissented. *Northland Drug Co. versus Maguire* (Manitoba) 1934 *Dominion Law Reports*, vol. 31, page 687.

### **Municipality not liable for Act of Contractor in Relief Work**

The Court of Appeal of Ontario allowed the appeal by the Town of Orillia, defendant, from the judgment of Judge McEvoy, awarding the plaintiff the sum of \$2,000 damages and costs against the appellant under the circumstances stated by Mr. Justice Davis in his judgment as follows:—

"The town of Orillia, on October 4, 1932, constituted seven persons (two of whom were members of the council) to be the 'Orillia Public Welfare Board' to supervise public welfare and relief work in the Town, to assist the council in the administration and distribution of relief funds derived from all sources, to consider all cases requiring or applying for relief and to make recommendations to the council as to the same, to organize and co-ordinate all community relief work and to exercise all the powers and duties given the Municipal Public Welfare Board by the Minister of Public Welfare for Ontario or by other Provincial or Dominion authority. The creation of this Board by the municipal council was sought to be warranted by the provisions of The Unemployment Relief Act, 1932, 22 Geo. V, ch. 4 (Ont.), Special reference was made to the expression 'direct relief' in secs. 3 and 4 of the Order in Council, schedule B to the Act. This Welfare Board acquired the right to cut and remove standing timber from a bush lot outside the limits of the municipality for distribution as fuel among the needy in the municipality, and the Board engaged the defendant James to haul some of this wood into the Town and distribute it amongst the needy as directed, at the price or sum of \$1.25 per cord. James owned a motor truck and used the same for carrying out this work. The plaintiff, his brother-in-law, accompanied him on the truck on the day in question as a helper, and suffered serious injuries when the truck, in attempting to pass another car travelling in the same direction, went into the ditch, obviously due to the recklessness of James in the operation of the truck. The plaintiff seeks in this action to recover his damages from the municipality.

"It is unnecessary to determine the nice questions raised as to whether or not the municipality had any authority to carry on such wood operations or to delegate such authority, if any, to this Board of citizens, because it is plain on the evidence that James was in any event an independent contractor and that the relation of master and servant did not exist between him and the Board or between him and the municipality. The power of control retained by the employer is the point on

which mainly turns the question whether a person is a servant or an independent contractor, and there is no evidence in this case of any such direction and control by the municipality or by the Board of the manner of doing the work undertaken by James as to constitute the relationship of master and servant.

"The judgment against the appellant municipality for the plaintiff's damages must be set aside. The appeal is allowed and the action dismissed with costs."

The judgment of the Court, allowing the appeal, was unanimous.

*McNeil versus the Town of Orillia (Ontario) 1934, Ontario Weekly Notes, page 538.*

The problem of accident compensation for persons injured while engaged on work relief projects in the United States has arisen in many States. There has been no uniformity in the rulings of the workmen's compensation commissions or in the court decisions upon this point. However, the majority of rulings and decisions have excluded such persons from the benefits of the compensation laws.

### **Compensation Board cannot reconsider Facts already dealt with**

The New Brunswick Supreme Court, in an appeal by an employer from the decision of the provincial Workmen's Compensation Board in re-opening a case and reversing its former decision, held that where the Board has disallowed a workman's claim on the ground that the injury he sustained did not arise "out of and during the course of his employment, the Board cannot re-open the case and reverse its decision under section 43 of the Workmen's Compensation Act, as that section only deals with circumstances which follow the award, and not with those which precede it. Section 43 of the Act of 1932 provides as follows:—

"The Board may reopen, rehear, redetermine, review or readjust any claim, decision, or adjustment, either because an injury has proven more serious than it was deemed to be, or because a change has occurred in the condition of a workman or in the number, circumstances or condition of dependents, or otherwise."

The workman in this case had been employed on the Canadian National Railways for about 15 years in the capacity of carman's helper. While on his way to work on the morning of September 13, 1932, he was struck by a train while he was proceeding to his work by way of the company's tracks. The claim was disallowed by the Board on October 14, 1932, but on the claimant's application the

Board re-opened the case, and reversed their first decision, having heard the claimant's evidence that the path taken by him on the day of the accident was the usual way taken by the shopmen to reach their place of work, the track being used for this purpose with the knowledge of the management.

Mr. Justice Baxter, in his judgment, reviewed the provisions of the Act, concluding as follows: "The appeal is therefore open on the ground that all the established facts do not entitle the workman to compensation as a matter of law. The claimant's own testimony shows that he took a short cut instead of one of at least three roads which led to an entrance to the portion of the Government property where his work was. There is not

a syllable of evidence to show that he used the short cut 'with the full knowledge of the management' and besides the use of the tracks was forbidden by statute (Railway Act, R.S.C. 1927, c. 170, s. 408). The facts are undisputed and there is a total absence of evidence to support the finding of the majority of the Board. . . . Of course the appeal must be allowed, without costs, on the ground that the Board had no power to reopen the claim; but it is as well to show, I think, that what may be considered a technical decision has not deprived the workman of anything to which he might otherwise have been entitled."

*The King versus Workmen's Compensation Board* (New Brunswick), 1934 *Dominion Law Reports*, vol. 3, page 753.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

**I**NDUSTRIAL employment showed a considerable increase in Canada on October 1, according to statements received by the Dominion Bureau of Statistics from 8,864 employers, each with a minimum of fifteen employees, whose staffs aggregated 933,486 persons, as compared with 923,078 in the preceding month. Activity has often shown a falling-off between September and October in the thirteen years of the record, the change on the average being a fractional reduction; the substantial increase this year is therefore especially interesting. The index (based upon the average for the calendar year 1926 as 100) stood at 100.0 on October 1, 1934, compared with 98.8 on September 1, 1934, and 90.4 on October 1, 1933. On the same date in the twelve preceding years, the index was as follows: 1932, 86.7; 1931, 103.9; 1930, 116.2; 1929, 125.6; 1928, 118.8; 1927, 110.3; 1926, 106.5; 1925, 99.5; 1924, 95.0; 1923, 100.7; 1922, 95.8, and 1921, 91.3. These returns are representative of all industries except agriculture, fishing, hunting and highly specialized business.

At the beginning of October, 1934, reports were received by the Department of Labour from 1,700 local trade unions embracing a membership of 159,675 persons. Of these, 26,204 were reported idle, a percentage of 16.4, compared with percentages of 16.5 at the beginning of September, 1934, and 19.8 at the beginning of October, 1933.

Reports for September, 1934, received by the Department of Labour from the offices of the Employment Service of Canada showed increases over August, 1934, and September, 1933, in the average daily placements effected, logging being largely responsible for the gains in each instance. During the month under review, September, 1934, the total opportunities for work numbered 32,350, applications made, 57,916, and placements in regular and casual employment, 30,441.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent at the beginning of October was

\$15.96 as compared with \$15.87 for September; 15.78 for October, 1933; \$21.96 for October, 1929; \$21.14 for October, 1926; \$22.01 for October, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.48 for October, 1914. The increase in October of this year as compared with the previous month was due to the somewhat higher cost of foods. In wholesale prices the index number calculated by the Dominion Bureau of Statistics was 71.4 for October as compared with 72.0 for September; 67.9 for October, 1933; 96.8 for October, 1929; 98.1 for October, 1926; 99.6 for October, 1921; 164.3 for May, 1920 (the post war peak); and 66.8 for October, 1914.

The most recent statistics available reflecting industrial conditions in Canada are given in the table on page 984. The index of the physical volume of business was somewhat lower in September than in August and May, the two high points of the year, but was substantially higher than in September last year. Of the principal factors included in the index those used as indicators of mineral production, manufacturing, electric power output and carloadings were lower in September than in August, while those of construction, trade employment, imports and exports were higher. As compared with a year ago all these factors were higher except exports. Information available for October shows employment slightly higher than in the preceding month and about 11 per cent higher than in October, 1933. Total carloadings and gross revenue of the Canadian National Railways also were higher, both as compared with the preceding month and with October last year. Contracts awarded for October and sugar production for the four weeks ended October 6 were lower than in the preceding period and in the corresponding periods of 1933.

The figures for strikes and lockouts during October show some decrease from the previous month in numbers of disputes, employees involved and also in time loss, but were greater than those for October last year. The number of disputes recorded was 16, involving 4,970 workers with a time loss in man working days of 52,011, as compared with

(3) Figures for end of previous month.

(4) Figures for four weeks ending October 27, 1934, and corresponding previous periods.

(5) Sugar production given in periods of four weeks ending October 6, September 8 and August 11, 1934; October 7, September 9 and August 12, 1933.

(6) MacLean's Building Review.

19 disputes, 6,509 workers and 65,277 days' time loss in September, and 13 disputes, 1,101 workers and 18,141 days' time loss for October, 1933. A great part of the time loss was due to two strikes of loggers in northern Ontario and a strike of coal miners in Nova Scotia, whereas in September about half of the time loss resulted from two strikes of clothing workers in Montreal. In October last year a strike of furniture factory employees at Stratford, Ont., caused most of the time loss for the month. Six disputes were carried over from September and ten disputes commenced during October. Eleven of the sixteen disputes were terminated during the month, five resulting in favour of the employers, five resulting in compromises or being partially successful, while the result of one was recorded as indefinite. The disputes un-terminated at the end of the month numbered five and involved 1,350 workers. These figures do not include those strikes and lock-outs in which employment conditions were no longer affected, but which had not been called off or definitely declared terminated by the unions involved.

#### **Industrial Disputes Investigation Act**

A Board of Conciliation and Investigation was established during the past month to deal with two disputes at Fort William, Ontario, which involved certain classes of railway employees, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, etc. An application from employees of the Winnipeg Electric Railways was received, and was being investigated by an officer of the Department with a view to securing a settlement without Board procedure. A dispute involving street railway employees at Brantford, Ontario, in connection with which an application had been received, was settled through the efforts of the Chief Conciliation Officer of the Department. Further particulars of the proceedings under the Act during the month appear on page 991.

#### **Conciliation of labour disputes in United States**

The third monthly report of the National Labour Relations Board was submitted to President Roosevelt at the end of October through Secretary of Labour Frances Perkins (The establishment of this Board was noted in the LABOUR GAZETTE, September, 1933, page 874). "Despite the limited authority of the Board," it is stated, "we are happy to report that much has been and is being accomplished. In our last monthly report we pointed out that from August 6, 1933, to

July 1, 1934, 4,447 cases were handled by Regional Labour Boards, involving over a million and a half workers; that 2,633 of these cases were settled by the Boards through agreements; and that, in addition, 1,258 were settled as a result of decisions or recommendations, or by other appropriate methods. During the months of August and September, 1934, 1,477 cases were handled by the Regional Boards, involving over 600,000 workers; 409 of these cases were settled by the Boards through agreements, and 146 as a result of decisions or recommendations, while many of the remainder will be amicably disposed of later on. These bare statistics eloquently testify to the value of the work performed by the Boards.

"Quite apart from the successful settlement of controversies, the Boards have rendered another public service by bringing together in the principal industrial centres leading employers and labour representatives, who through their work as members of the Boards have acquired a mutual understanding of each other's problems and of the need of establishing sound and harmonious labour relations. The Boards would have been worth creating if they had accomplished no more than this."

In addition to dealing with the controversies brought before it the Board is engaged in "informal studies" with a view to assisting in the consideration of future legislative proposals. These studies include (1) analysis of decisions relating to collective bargaining, employee organization and similar matters, handed down by boards comparable to our own, such as the War Labour Board, the Railroad Labour Board, the National (Railroad) Mediation Board, the National Labour Board, the Regional Labour Boards, and the various boards created during the past year under codes and by the President; (2) analysis of the set-up, operation and accomplishments of these boards; (3) study of strike and other statistics compiled by the Department of Labour, with particular reference to the bearing of these statistics upon the problems with which our Board has to deal; (4) digest of significant material in current trade, labour and other journals and publications; (5) appraisal of the accomplishments of the conciliation and arbitration machinery set up prior to the Recovery Act in certain industries; (6) the history and results of State and Federal legislation dealing with industrial disputes; (7) the history, organization and accomplishments of certain foreign labour courts and of the Canadian, British, German and other systems of governmental regulation in the field of labour regulations.

### **Bureau of Labour and Public Welfare in Saskatchewan.**

A Bureau of Labour and Public Welfare, under the Minister of Municipal Affairs, was provided for by an Order in Council passed by the Government of Saskatchewan on October 16. Certain duties are transferred to the new Bureau from the existing Department of Railways, Labour and Industries. The chief officer of the Bureau will be called the Commissioner of Labour and Public Welfare. The Bureau is to administer such matters relating to the relief of distress as may be specified by the Minister; it will also administer the following Acts: the Factories Act; the Building Trades Protection Act; the Employment Agencies Act; the One Day's Rest in Seven Act; the Weekly Half Holiday Act; the Coal Mines Safety and Welfare Act; the Minimum Wage Act; the Workmen's Wage Act, and such other acts as may from time to time be assigned by the Lieutenant Governor in Council to the administration of the Bureau.

The Bureau is authorized also to establish and maintain one or more department offices at such places within Saskatchewan as may be designated by the Lieutenant Governor in Council; put employers who want workpeople, and workpeople who want work within Saskatchewan, into communication with one another free of charge; and co-operate with the Federal Labour Exchange.

The Bureau is further to collect, assort, systematize and publish information and statistics relating to: employment, wages and hours of labour throughout the province; strikes or other labour difficulties; trades unions and labour organizations; the relations between capital and labour and other subjects in connection with industrial problems; sanitary conditions of employment; and such other matters as may from time to time be designated by the Minister.

Finally, the Bureau is to provide facilities for finding employment and for the distribution of male and female labour throughout the Province.

### **Regulation of industry in Alberta**

By a proclamation on October 19 the Trade and Industry Act of Alberta was declared to be effective.

The provisions of this Act were outlined in the LABOUR GAZETTE, May, 1934, page 442, in an account of the legislation at the last session of the Legislature. It provides for the establishment of a Department of Trade and Industry in the Alberta

government to inquire into conditions in any trade or industry which appear to be detrimental to the interest of trade or the public; to survey the resources of the province and plan for their development; to promote conferences of representatives of those engaged or employed in any trade so as to remedy any harmful conditions; to promote trade associations for the same purpose and to collect information regarding the various trades in the province and its resources.

If a conference of any trade agrees upon certain standards of ethics calculated to put an end to competitive practices harmful to the trade, its employees or the public, and, more particularly, agrees to establish minimum wholesale and retail prices, and minimum standards as to hours of labour and wages of employees, and if 66 per cent of those engaged in the trade, or if persons owning 66 per cent of the capital invested in the trade, approve such standards, the Lieutenant-Governor in Council may order that the code drawn up in accordance with the agreement shall be in force after a specified date and binding on every person carrying on the trade.

The Advisory Board to assist the administrator is to consist of 3 or 5 persons, one representing the consuming public. The Lieutenant-Governor in Council may make regulations to provide for the registration and licensing of persons engaged in various trades. The Act applies to wholesale and retail dealers, druggists, printers, restaurant keepers, dry cleaners, barbers, hairdressers and plumbing, heating and sanitary engineers. If a representative number of persons engaged in any other trade, petition to be brought under the Act, the Lieutenant-Governor in Council on the recommendation of the Minister may declare such trade within the scope of the Act.

Provision is made also for inquiries into wages and for conferences between employers and employees for the purpose of collective bargaining. If no agreement is reached as to wages, the Lieutenant-Governor in Council may fix a minimum wage for all classes of employees or for any specified class or in any specified district. A wage order may be varied or cancelled. An employer is not to interfere directly or indirectly with the free selection of representatives by any association or in any lawful activity of such association.

The Act also contains special provisions concerning the mining and distribution of coal.

**Progress under  
Quebec Labour  
Agreements  
Extension Act**

The Hon. C. J. Arcand, Minister of Labour of Quebec, in a speech at Montreal on October 18, announced that over 100,000 workers in the province already benefited from the legal protection of their wages which was afforded by the Collective Labour Agreements Act, passed by the Legislature this year. (The text of the Act was given in the *LABOUR GAZETTE*, May, 1934, page 417, and the various agreements have been outlined in subsequent issues as they have been extended throughout the districts to which they apply.) "I am not going too far," the Minister said, "in stating that, within a year's time, fifty per cent of industrial workers will benefit from the favourable dispositions of the Collective Labour Agreements Extension Act." The Minister expressed his satisfaction with the manner in which industry in the province had taken advantage of the Act, stating that since it was brought into force six months ago fourteen requests regarding the extension of collective labour agreements had been submitted either by employers or by employees; twelve of these had been approved and made obligatory either in one or more districts of the province or in the whole province.

"Once the collective labour agreement has been made obligatory by order in council, the contracting parties must do their best to have it observed," he continued. "In order to attain this end, the forming of a joint committee of employers and employees is authorized by the law. The representatives of such a committee may examine the pay list of employers and may prosecute, in the name of workmen, contractors who do not pay the legal minimum wages to their employees. The joint committee, therefore, is the corporate power responsible for the enforcement of the decisions it has come to." No particular fine is provided for those who violate the Act, because, Mr. Arcand said, "it seemed adequate to let workmen take advantage of their rights before civil courts."

More severe regulations regarding the duration of labour will certainly be brought into force in the province, the Minister added.

**Minimum wages  
in lumbering  
industry in  
New Brunswick**

The New Brunswick Forest Operations Commission, on October 17, published an order fixing minimum wage scales for the lumbering industry in the province. An earlier order, fixing scales of wages for logging operations, was noted in the *LABOUR*

*GAZETTE*, July, 1934, page 586. The new order provides as follows:

"The minimum rate of wages in the lumbering industry shall be thirty-two dollars (\$32) per month and board net or its equivalent in case of piece work, except in the case of booming and sorting in which the minimum rate shall be twenty cents per hour net.

"All previous wage scales fixed by the Commission are hereby superseded."

The earlier order, which is now superseded by the foregoing order, contained a section providing for a minimum wage scale for poplar pulpwood cutters of \$1.85 per cord, subject to a deduction for board not exceeding 50 cents a day. This section is now omitted, the rate specified above being made to cover the whole industry. The board consists of Mr. Justice W. C. H. Grimmer (chairman), Messrs. John H. Wallace and William S. Richards, commissioners, and H. Lester Smith, Secretary.

The provisions of the Forest Operations Act were outlined in the *LABOUR GAZETTE*, August, 1934, in an account of legislation enacted during the last session of the provincial legislature. In addition to fixing minimum wages the Commission has authority to assist in the settlement of disputes in the lumbering industry in the province on receiving an application from the employer or the workers.

**Purpose of  
Minimum Wages  
in British  
Columbia**

Mr. Adam Bell, Deputy Minister of Labour and chairman of the Industrial Relations Board of British Columbia, stated in a recent address at Vancouver that in administering the Male Minimum Wage Act and the Female Minimum Wage Act, the Board's aim is, not to set a minimum wage for every occupation in the province, but rather to stop the "wholly unjustified" decline in wages, and also to exercise a stabilizing influence "by striking a level between the too low and too high wages being paid." He appealed to employers to co-operate in carrying out the instructions of the Board, which, he said, would prove to be the best policy for their business.

**Co-operative  
dairy at  
Hamilton,  
Ontario.**

"Two years ago," says the *Canadian Co-operator* for October, "a co-operative dairy was established in Hamilton. It was organized on a basis which took into account all essential interests, namely, those of the milk producers, the dairy workers and the consumers. The first year of operation was not successful, but in the second sufficient surplus was made to pay interest on capital

for the two years, and to pay a patronage dividend of 2 per cent to the producers on the milk they had supplied and 2 per cent to the consumers on the milk they purchased. It is not surprising that such a just and equitable arrangement—one which respected the rights of producers, dairy workers and consumers—should become popular in the city, and that in the short period of two years the co-operative dairy should grow into the third largest milk distributive institution in the city."

### **British views on proposed 40-Hour Week Convention**

The Governing Body of the International Labour Office, at a meeting held at Geneva in September, decided in favour of a proposal that the 1935 conference should discuss a convention for a 40-hour working week, to be applied successively to various predetermined branches of industry. The text of the resolution on this subject appears on another page of this issue. The British Government delegate and the British employers' delegate strongly opposed any proposed convention limiting hours of work which would not at the same time deal with the question of wages. Mr. Forbes Watson, the employers' delegate, claimed that the International Conference has assumed that trade unions had equal status and influence in all countries, and that "anyone with experience in industrial negotiations knew that it was impossible to ignore wages when discussing hours." He opposed the proposed convention on the ground that it would "inevitably attack the standard of living of the British working man and imperil his chances of employment in a competitive world."

### **Boys and girls under British Unemployment Scheme**

In Great Britain, as from September 3, 1934, the minimum age of entry into unemployment insurance, which had hitherto been 16 years, has been lowered, under the provisions of the Unemployment Insurance Act, 1934, to the age (not being less than fourteen years) at which the juvenile is no longer required by law to attend school (the provisions of this Act were outlined in the LABOUR GAZETTE, August, 1934, page 744).

Every person who is required by the Unemployment Insurance Acts to become an insured contributor is under an obligation to obtain an unemployment book. Accordingly, as from September 3, it became incumbent upon all boys and girls within the lower limits of age prescribed by the Unemployment Insurance Act, 1934, to obtain unemployment

books if they are engaged in insurable employment. Boys and girls who have recently left school, and are still seeking employment, and other juveniles under 16 years of age who, though ordinarily engaged in insurable occupations, had no insurable employment during September, will receive their unemployment books only when they obtain or are about to start in insurable work. During September, unemployment books were issued to approximately 625,000 juveniles of 14 and 15 years of age, including 353,000 boys and 272,000 girls, and in the first week of October further books were being issued at the rate of over 6,000 a day.

### **Unemployment policy of Australian Government**

In a speech delivered prior to the elections on September 15, 1934, at which his Government was returned, the Hon. J. A. Lyons, Prime Minister of Australia, stated that it would be the policy of the Government to give the campaign against unemployment, with particular reference to the needs of youth, precedence over other Commonwealth activities. A conference with the State Government, he announced, was to be summoned. Hitherto the responsibility for the relief of unemployment has rested with the States. The Commonwealth Government now intends to assume a larger share of this responsibility. To this end, the Government intends to assign to a Commonwealth Minister definite responsibility for Commonwealth action in relation to employment. The Minister is to be assisted by advisory committees in the several States. Among the proposals to be considered is a comprehensive scheme for national forestry. Special attention is to be given, in conjunction with the State Governments, to proposals for the training and preparation of youths for work. The Government has also in mind a series of large public works which, though possibly not reproductive from the outset, are regarded as likely to conduce to national development.

### **Effect of building activity on recovery**

A new publication by the League of Nations: "World Economic Survey, 1933-34," shows that various evidences of recovery were apparent in 1933, and continued into 1934, but that progress in this direction has become slower, especially in the sphere of international trade. Various differences in economic policy in the countries of the world are noted, one of these being in regard to the building industry. Some of the conclusions reached in the Survey on this

branch of the subject are summarized in the *Economist* (London) as follows:—

"In some countries, building activity has powerfully contributed to such recovery as has taken place. Classifying the countries by this criterion, it appears that building activity is attaining new records in Great Britain, but hanging back in the United States; that it is expanding in Italy, and contracting in France. In Britain it is going ahead owing to 'cheap money'; in America it is handicapped by the high cost of building, and the almost complete absence of private activity is not compensated by the large, though fluctuating, expenditure of public funds. In Italy, Signor Mussolini has combined a large public works program with cheap money and a deliberate plan for reducing costs. In France, all efforts are bent on reducing taxation and balancing the Budget; public works have had to be subordinated to these aims in the hope that they will stimulate private expenditure and investment."

#### Proposals for better housing in Canada

In an address before the Social Service Workers' Club at Ottawa on October 24, Mr. J. Clark Reilly, manager of the Canadian Construction Association, dealt with slum conditions and overcrowding. He described the measures that have been taken in other countries—Great Britain, United States, the Irish Free State, etc.—to cope with these problems by means of national housing plans. For Canada Mr. Reilly advocated the appointment of a commission to study the question of housing, slum clearance and the relief of overcrowding. "I would like," he said, "to see a commission appointed to make a survey of existing housing needs in conjunction with the various agencies, both provincial and local, who might be enlisted in the task. I would ask them further to study means by which the guarantee of the Government could be placed behind financing arrangements for existing agencies, both public and private bodies, and for what other methods might be found desirable to provide the necessary houses. They might even go further and organize the supply of materials by contracting for the quantities which it might be shown would be required. This investigating commission might then be merged into a more permanent body having authority to go on with plans which have secured the approval of Parliament."

"We, on our part, in the construction industry," the speaker continued, "are prepared, as never before, to assist in the rehabilitation of the blighted areas in the city and the

organization of new communities, where necessary. In recent years there have been a number of most interesting advances made in the production of new materials and the standardization of others which should make it possible for a new low-price house to be worked out, suited to the needs of the average family and designed in good taste. If these houses of standard interior pattern, and with a number of adaptations on the exterior to prevent monotony or uniformity, are handled under proper supervision by local authorities under the direction of a central authority, they can be produced on a large quantity basis, and at a very reasonable cost."

In conclusion, Mr. Reilly referred to the employment that would be created by a program such as he proposed. "How much better," he said, "would it be for the man of the family, instead of receiving a weekly sum from the town or city for his relief, to be earning real money in the factory producing materials or out on the job erecting homes to be occupied by his own and other families at present huddled together with others in unsanitary, unhealthy surroundings."

#### Housing program in United States

The work being carried on by the Housing Administration in the United States is described by the *United States News*, Washington, in its issue of October 22, as "the administration's most successful effort." "Although the campaign for modernization of homes is barely two months old," it is stated, "about \$50,000,000 in home repair work has been launched already. Loans made directly for this purpose by the Housing Administration total about \$10,000,000. A similar amount has been advanced by finance corporations and direct bank loans. Administrator Moffett estimated that more than 70 per cent of money spent on home modernization and repair will go to labour, thereby providing a considerable stimulus to re-employed in the depressed construction industry."

President Roosevelt recently directed the Federal Housing Authority to fix at 5 per cent the basic interest rate on home mortgages insured under the law enacted by Congress at the last session. Such insurance was authorized by means of a revolving fund administered under Federal auspices, on property up to 80 per cent of its appraised value. The basic purpose of the plan is to encourage the construction of new homes by making credit more readily available for that purpose. This is the second stage in the program of the new Housing Administration. Several months

ago it initiated a vigorous campaign to stimulate the modernization and repair of homes already built.

### Labour legislation in the N.R.A.

The "new type of labour law," which came into force in the United States with the enactment of the National Industrial Recovery Act in June, 1933, is the subject of a study by Mr. G. H. Trafton, in the September issue of the *American Labour Legislation Review*. The codes established under the Act, the writer points out, are national in scope, and are legally enforceable by the Federal Government; they extend to all employees in the respective industries the protection of minimum wage and maximum hour regulations which, under state laws, had previously applied only to women and children. "The labour provisions of every code include regulations fixing minimum wage rates, limiting hours of employment, restricting the employment of minors, and setting forth the right of collective bargaining. In some codes there are also regulations dealing with home-work, contracting, and use of prison labour. Many require safe and sanitary working conditions, and in a few there are brief provisions with respect to workmen's accident compensation. One code—the coat and suit industry code—has a section looking toward future adoption of a system of unemployment insurance.

The writer quotes statements by President Roosevelt and General Johnson, the former administrator, which describe the Act as instituting a system of "modern guilds" or "industrial self-government." "The codes," he says, "provide a self-imposed industrial law; the code authorities supply the instruments of self-regulation under the codes."

General Johnson resigned early in October from his position as National Recovery Administrator, and control was vested in three Boards; executive, legislative, and judicial. The executive branch is called the National Industrial Recovery Board, and consists of five members, appointed by the President (including Sidney Hilman, President of the Amalgamated Clothing Workers). The legislative branch is called the Industrial Policy Committee, (all federal officials but one, and including the Secretary of Labour, the Secretary of the Interior, the Emergency Relief Administrator, etc). The judicial branch or Judicial Committee, will investigate violations of the N.R.A. Codes.

The Hon. J. G. Gardiner, premier of Saskatchewan, informed a delegation from the provincial Union of Municipalities on October 27 that his government would conduct an investigation into the feasibility of state medicine and hospitalization with a view to the framing of legislation on this subject.

Mr. O. H. Shenstone, president of the Industrial Accident Prevention Associations of Ontario, at the quarterly meeting of the Associations held at Toronto on October 24, stated that medical science had so far discovered no cure for pneumoconiosis, the industrial disease resembling tuberculosis and caused by dust particles in foundries and other places of work. "Compensation," he said, "amounts to between ten and twelve thousand dollars for each case. The only means of prevention lie in good ventilation and cleanliness in the shop."

Mr. George Wilkie, K.C., of Toronto, has been appointed chairman of the Ontario Workmen's Compensation Board in succession to Mr. V. A. Sinclair, K.C., and Mr. Earl Hutchinson, of Kenora, has been appointed vice-chairman of the Board succeeding Mr. H. J. Halford. Mr. George A. Kingston continues as the third member.

The Winnipeg Trades and Labour Council, on October 29, presented a memorandum to Hon. John Bracken, Premier of Manitoba, in which co-operation for the amendment of the British North America Act was recommended for the purpose of securing uniformity of legislation throughout Canada in regard to hours of labour, wages and working conditions, and in order to provide for the elimination of unfair competition between provinces as regards production costs.

More than 200,000 persons borrowed money through co-operative credit societies in the United States in 1933. This was shown by a survey recently just completed by the Bureau of Labor Statistics. The money so borrowed aggregated \$28,217,457, an average of \$138 per loan. The combined resources of these societies at the end of 1933 amounted to \$35,496,668. Reserve funds to cover possible losses amounted to \$2,372,711 and savings deposits to \$5,685,276. Uncollectible debts written off during the year formed less than one-fourth of 1 per cent of the loans granted. Dividends returned on stock amounted to nearly \$1,000,000.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

**A**N application for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act was received in the Department of Labour on October 15 from employees of the Canadian National Railways at Port Arthur, Ontario, being assistant foremen, clerks, checkers, stowers, loaders, coopers, sealers and truckers, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The cause of the dispute was stated to be the employees' demand for an agreement embodying increased wages, shorter hours and improved working conditions, as well as their request that an officer of the union be permitted to conduct the negotiations on behalf of the employees. Approximately 320 employees are directly involved in the dispute.

A similar dispute between the Western Stevedore Company, Limited, at Fort William, Ontario, and the same class of employees, members also of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, had been filed in the Department towards the close of September. This dispute directly affects 400 employees.

An officer of the Department visited Fort William on October 22 and discussed the matters involved with the representatives of the employees of the two companies; also with the general manager of the Western Stevedore Company, Limited. Although certain concessions were offered by the latter company, they did not meet the employees' demands, and, the two disputes being of practically an identical nature, the Minister proceeded with the establishment of one Board to deal with the two cases. The personnel of the Board is as follows: The Honourable Mr. Justice R. M. Dennistoun of Winnipeg, Chairman,

appointed on the joint recommendation of the other Board members, Mr. Hamnett P. Hill, K.C., of Ottawa, appointed by the Minister in the absence of a recommendation from the employing companies, and Mr. Marcus Hyman, of Winnipeg, appointed on the recommendation of the employees concerned.

An application was also received during October from employees of the Winnipeg Electric Company, being motormen, conductors, and busmen, members of the Street Railway Men's Unit, One Big Union. The application states that approximately 600 employees are directly affected or likely to be affected by the dispute, which relates to the alleged unjust dismissal of two employees. An officer of the department has been instructed to visit Winnipeg with a view to ascertaining if disposition can be made of the matter without the necessity of Board procedure.

As a result of departmental mediation, a settlement was effected during October in the case of a dispute between the Brantford Municipal Railway Commission and its street railway employees, being members of Local No. 685, Amalgamated Association of Street and Electric Railway Employees of America. An application for the establishment of a Conciliation Board had been received from the workmen involved during September. The dispute related to the employees' request for increased wages and certain changes in working conditions, 35 men being directly concerned. The Chief Conciliation Officer of the department was instructed to visit Brantford, and his efforts were instrumental in bringing the parties into accord, the company granting certain concessions with respect to working conditions, and the employees agreeing not to press their demand for wage increases.

## AGREEMENTS AS TO CHANGES IN WAGES OF EMPLOYEES ON STEAM RAILWAYS IN CANADA

**N**EGOTIATIONS between representatives of the principal steam railways in Canada and of various classes of employees as to the restoration of the basic wage scales resulted early in November in agreements providing that the existing general fifteen per cent deduction from wages calculated on basic rates will be continued until January 1, 1935, when the deduction will be reduced to twelve per cent, to be reduced again on May 1, 1935, to ten per cent.

The agreements reached toward the end of 1933, following proceedings under the Industrial Disputes Investigation Act with reference to some classes of employees, had provided for the deduction of fifteen per cent for a period of twelve months for each class, the effective dates varying from October 1, to December 31, after which the deduction was to be ten per cent unless notice of a desire for a change in the percentage had been given by either party (LABOUR GAZETTE, December,

1933, p. 1212 and November, 1933, p. 1065). Prior to this agreement the deduction had been ten per cent except that for engine, train and telegraph service employees it was twenty per cent from May 1, 1933, to November 1, 1933.

In recent weeks, in accordance with the agreements, the railway companies had notified the employees' representatives that revenues had not improved to a sufficient extent to allow of a decrease in the deduction. The employees' representatives proposed that basic rates should be restored.

In the United States, where the deduction was ten per cent, an agreement had been reached providing for a restoration of  $2\frac{1}{2}$  per cent on July 1,  $2\frac{1}{2}$  per cent on January 1, 1935, and the remaining five per cent on April 1, 1935. The railways then announced that an application for an increase in freight rates of ten per cent would be made to the Interstate Commerce Commission.

The new agreements in Canada between the principal railways and employees of various classes are based on the agreement with reference to the following classes of employees: in engine service, members of the Brotherhood of Locomotive Engineers and of the Brotherhood of Locomotive Firemen and Enginemen; in train service, members of the Order of Railway Conductors and of the Brotherhood of Railroad Trainmen; in telegraph service, members of the Order of Railroad Telegraphers. The text of the agreement follows:

AGREEMENT between the Canadian National Railway Company and the Canadian Pacific Railway Company respectively, and their Locomotive Engineers, Locomotive Firemen, Conductors, Trainmen, Yardmen and Telegraphers respectively, made at the City of Montreal on the Third day of November, 1934.

THE PARTIES HERETO AGREE—

(a) that, effective from November 1, 1934, until December 31, 1934, fifteen (15) per cent shall be deducted from each employee's pay cheques calculated on existing basic rates of pay.

(b) that, effective from January 1, 1935, and continuing until April 30, 1935, twelve (12) per cent shall be deducted from each employee's pay cheques, calculated on existing basic rates of pay, and that effective from May 1, 1935, ten (10) per cent shall be deducted from each employee's pay cheques, calculated on existing basic rates of pay, and this deduction shall continue in effect thereafter, subject to the right of either party, after July 1, 1935, to serve thirty days' notice, as required by wage agreements now in effect, of a desire to change such percentage of deduction.

Similar agreements were reached between the Railway Association of Canada, representing several of the principal railways, and Division No. 4 of the Railway Employees' Department of the American Federation of

Labour, representing the Shop Crafts, and also between the Railway Association of Canada and the Brotherhood of Maintenance-of-Way Employees; between the two railways above mentioned and signal maintainers, members of the Brotherhood of Railroad Signalmen of America; between the Canadian Pacific Railway and firemen, oilers and shop labourers, members of the International Brotherhood of Firemen and Oilers, and also between the same railway and the clerks, freight handlers and station employees members of the International Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

The agreement made a year ago as to shop trades provided that in shops working less than forty hours per week the deduction would remain at ten per cent. In such shops the new agreement provides for a deduction of only seven per cent effective from January 1, and five per cent effective from April 1, 1935.

The agreement between the Canadian Pacific Railway Company and its clerks, freight handlers and station employees also provides that employees partially exempt from the fifteen per cent deduction during the past year shall have a proportional restoration.

Arrangements have been made for negotiations during November between the Canadian National Railway officials and the representatives of the clerks, freight handlers, shop labourers, station and round-house employees, also express department employees, members of the Canadian Brotherhood of Railway Employees.

Commercial telegraph employees of the Canadian National and Canadian Pacific companies also are reported to have reached agreements for a similar modification of the deduction.

Social insurance, particularly in those aspects which concern the economical administration of medical and pharmaceutical benefits, was studied recently by a group of experts under the International Labour Office, and their conclusions have recently been published. The report draws attention "to the interest which an insurance scheme in preventing an illness rather than in curing it," and states that "emphasis should be laid on the importance of systematic prevention, which may, by itself, occasion economies in all directions." Recommendations are made under three main divisions, viz.: principles and rules for economical prescribing; drafting and application of guiding principles for economic prescribing; and control of excessive prescribing.

## CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

### Summary of Recent Decisions

**T**HREE new decisions, and an interpretation of the decision in an earlier case, were given recently by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the *LABOUR GAZETTE*, August, 1934, page 733, and in previous issues; and the fifth report of the proceedings of the Board, covering the period from October 1, 1930, to September 30, 1933, was issued as a supplement to the issue of December, 1933.

The Board was established under a voluntary agreement concluded in 1918 between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war. It has power to determine all differences arising between the railway companies and members of any of the six railway brotherhoods, "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the following railway Brotherhoods; the Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railroad Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

#### **Case No. 436.—Canadian National Railway (Western Region) and Brotherhood of Locomotive Engineers and Brotherhood of Locomotive Firemen and Enginemen.**

A dispute arose over the payment of engineers and firemen on unassigned runs through terminals. The unassigned trains in question did not finish their trips at the terminals but ran through them. The employees claimed that in accordance with the schedules 100 miles "terminal to terminal" should be allowed in addition to "arbitrariness," and such further mileage as might be made. They cited Article 4 of the Engineers' and Firemen's schedules, which stipulated in regard to the "basic day" that 100 miles or less, five hours or less in passenger, and 8 hours or less in all other service, should constitute a day, with overtime *pro rata*.

They pointed out that mileage, as claimed, had been paid up to April, 1933.

The management contended that it was at liberty to run unassigned trains through terminals, and that the 100 miles "terminal to terminal" need not be paid in such cases.

The claim of the employees was not sustained by the Board.

#### **Case No. 437.—Temiskaming and Northern Ontario Railway Commission and Order of Railway Conductors and Brotherhood of Railroad Trainmen.**

A conductor was dismissed by the Commission as an "undesirable employee" on the strength of evidence brought before a Grand Jury. This evidence, in the opinion of the management, proved that the man had been involved in the theft and sale of cases of liquor from his train.

The employees, on the other hand, contended that as the Grand Jury had brought in a decision of "no bill" in the case, an investigation should have been held in accordance with Rule 28 of the schedule, reading: "Trainmen will not be disciplined or dismissed until after investigation. They may, however, be held off for investigation for not exceeding three days" etc. They claimed that the man should be reinstated and paid for the time he was out of service.

The claim of the employees was not sustained by the Board.

#### **Case No. 438.—Canadian National Railways (Central Region) and Order of Railroad Telegraphers.**

A spare operator appeared on the payroll for 59 days in 1932. He was laid off on September 18 in that year, and was not employed thereafter. Claim was made for three days vacation with pay during 1933, but this claim was not allowed by the management. The employees' contention that the matter should be governed by Article 14, clause (g) of the Schedule for telegraphers and assistants, which reads as follows:—

"Spare telegraphers who at the beginning of the calendar year have had 306 days' cumulative service will be allowed 12 working days vacation in that year, at the minimum operator's rate, and each year thereafter will be allowed one day's vacation for each month's cumulative service during the previous year including vacation period if any."

The spare operator in question had accumulated 3 months' service during 1930, and the employees therefore asked that he be granted

three days' pay. They pointed out that from January, 1928, to January, 1933, the practice was that all spare operators submitted payrolls after January 1st of each year showing the number of days vacation due them account of service performed the previous year based upon one day's vacation pay for each month's service performed and these payrolls were paid without question. No change had been made in this rule since 1927. They requested that past practice be continued and vacation allowances be paid in accordance with the intent of the agreement.

The management cited Rules (a) and (g) of the same Article, and contended that it was not the intent of these rules that men no longer in the service should be restored to the payroll and allowed vacation with pay based on service performed during the preceding year. The claimant was, therefore, in their view, not entitled to vacation with pay during 1933, unless and until, returned to service in seniority order during 1933.

The Board decided that, as the operator was, in 1933, still on the seniority list and available as a spare operator, the provisions

of Article 14 clause (g) applied, and that he was entitled to vacation pay in 1933 on the basis of one day's pay for each 25½ days he was shown on the payroll in 1932.

#### **Supplement No. 1 to Case No. 429—Canadian National Railways (Western Region) and Order of Railway Conductors and Brotherhood of Railroad Trainmen.**

This case was outlined in the *LABOUR GAZETTE*, May, 1934, page 407. It concerned a dispute in connection with terminal payments to crews on interdivisional runs when passing through an intermediate terminal on their assignments. The Board, in their decision, had ruled that the employees' claim for terminal payments was valid where switching was performed by the train crew and not by a yard crew. The management and the employees subsequently disagreed as to the meaning of this decision, and asked for an interpretation. The Board interpreted the decision to mean that all time delayed at an intermediate terminal when switching is performed shall be paid for.

## **CANADIAN NATIONAL RAILWAYS EMPLOYEES' BOARD OF ADJUSTMENT No. 2**

### **Summary of Recent Decisions**

**R** EPORTS have been received of four cases recently settled by the Canadian National Railways Employees' Board of Adjustment No. 2. Outlines of previous cases were given in the *LABOUR GAZETTE*, July, 1934, page 620, and in previous issues. The issue of August, 1930, contained a general summary of the proceedings of the Board, covering the period from January 1, 1928, to December 31, 1929; and a similar summary of proceedings from September 1, 1925, the date of the inception of the Board, to December 31, 1927, appeared in the issue of October, 1928, page 1060. The text of the memorandum of the agreement made between the railways and the employees concerned for the establishment of the Board was given in these summaries.

The Canadian National Railways Employees' Board of Adjustment No. 2 was established for the purpose of disposing of outstanding grievances or disputes that might arise from the application, non-application or interpretation of the schedule of working conditions for "Clerks and other Classes of Employees as herein named," which are not adjusted between the officers of the railway and the representatives of the employees. The members of the Board are appointed for a

term of one year, subject to re-appointment. The Board is composed of four members selected by the management and four members selected by the representatives of the employees concerned. The decisions of the Board are binding upon the parties to the agreement. Provision was made in the agreement constituting the Board for the appointment of an arbitrator in any case in which the Board might be unable to agree upon an award.

#### **Case No. 140—Operating Department, Central Region.**

This case was heard last February, when consideration was deferred pending further negotiations. Subsequently a settlement was effected and the Board consented to its withdrawal.

The case concerned the claim of a clerk at Capreol for two weeks' vacation with pay, which claim had been refused by the management. Out of 306 working days in the calendar year 1932 he was employed 264 days and was laid off for 42 days in a reduction of staff. The employees contended that under Article 14 of the schedule for clerks and other classes of employees, and in accordance with the

Board's decision in Case No. 127 (LABOUR GAZETTE, November, 1933, page 1071), the claimant was entitled to two weeks' vacation with pay for the services performed during the year in monthly-rated positions. The management, on the other hand, gave details of the positions held by the claimant, maintaining that at the beginning of 1933 he had not held one year's continuous service with the railway in a monthly-rated position, and further contending that Article 14 contained no provision for the allowance of vacation with pay on the basis of time worked in the preceding year, with certain exceptions which called for continuous employment up to the vacation period.

#### Case No. 142—Stores Department, Montreal District.

This case also was settled by an arrangement between the parties that was reached after its first submission to the Board, and a request for its withdrawal was acceded to. A chauffeur in the Stores Department submitted that he had been denied the rights to exercise seniority as provided by Article 3, Rule (k), to the position of chauffeur at St. Henri, the management contending that dining car store employees formed a separate promotion group from that of the claimant.

#### Case No. 151—Operating Department, Central Region.

The claimant in this case was employed as a bunk room attendant at Toronto round house for a number of years. In January, 1934, he was removed from the position and an injured trainman was assigned to it. The employees contended that the position of bunk-house attendant was specified in the schedule, and that Article 1, rule (b), which defines the word "employee" as used throughout the agreement, contained no reference to trainmen; and therefore a trainman

was not an employee within the meaning of the schedule. A similar claim was decided in favour of the employee in Case No. 11 (LABOUR GAZETTE, March, 1926, page 231).

The management cited various examples of the practice of filling vacancies in positions such as that in question with disabled employees whose cases have been dealt with by the Rehabilitation Committee.

In view of the decision in Case No. 11 and of the further fact that the seniority rights of bunk-room attendants are not limited in the schedule, the Board sustained the claim of the employees.

#### Case No. 155—Operating Department, Western Region.

An assistant accountant in the superintendent's office at Edmonton claimed pay for the time in 1933 he had been improperly displaced by a junior employee from his position, and assigned to a position carrying lower pay.

Article 3, Rule (k) of the Schedule for "Clerks and Other Classes of Employees," provides that "when reducing forces, senior employees with sufficient ability to perform the work will be retained, and employees laid off in such reductions will be permitted to transfer to a position of similar character within their seniority group, displacing a junior employee."

The employees contended that these provisions were not observed in this case, and that there was proper ground for a claim for the difference in the rates of pay between the two positions in question.

The Board held that the case should be governed by the foregoing article of the schedule, and that the action of the management was based on a misinterpretation of that article, and decided that the employees' contention should be sustained to the extent that the claimant was improperly displaced from the position of assistant accountant.

### STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1934

THE following table shows the number of disputes, workers involved and time loss for October, 1934, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*Oct. 1934 ...	16	4,970	52,011
*Sept., 1934 ..	19	6,559	65,277
Oct., 1933 ..	13	1,101	18,141

\* Preliminary figures.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees, and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. In-

## STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1934\*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
<b>(a) Strikes and Lockouts in Progress prior to October, 1934</b>			
LOGGING— Loggers, Cochrane, Ont.....	500	13,000	Commenced Sept. 5, 1934; for increased wages, reduced hours, improved conditions and recognition of camp committees; terminated Oct. 31, 1934; in favour of employers.
MANUFACTURING— Boots and Shoes— Shoe factory workers, Preston, Ont.	28	150	Commenced Sept. 13, 1934; against discharge of worker; working conditions no longer affected by October 26, 1934; in favour of employer.
Textiles, Clothing, etc.— Women's clothing factory workers, (Dressmakers), Toronto, Ont.	38	456	Commenced July 12, 1934; for increased wages; terminated Oct. 13, 1934; in favour of employer.
Cap factory workers, Montreal, P.Q.	150	1,000	Commenced Aug. 31, 1934; for increased wages, reduced hours and improved conditions; terminated by October 18, 1934; partially successful.
Printing and Publishing— Compositors, London, Ont.....	75	1,950	Commenced Mar. 1, 1934; for renewal of union agreement; untermiated.
Other Wood Products— Furniture factory workers, Montreal, P.Q.	300	2,000	Commenced Sept. 13, 1934; for increased wages, reduced hours and union recognition; terminated Oct. 8, 1934; compromise.
<b>(b) Strikes and Lockouts Commencing During October, 1934</b>			
LOGGING— Loggers, Sault Ste. Marie dis- trict, Ont.	900	20,000	Commenced Oct. 3, 1934; for increased wages, reduced hours, improved conditions and recognition of camp committees; untermiated.
Loggers, Port Alberni, B.C.....	150	2,000	Commenced Oct. 10, 1934; against dismissal of workers for union activity; untermiated.
MINING, ETC.— Coal miners, Glace Bay, N.S....	1,500	7,500	Commenced Oct. 1, 1934; for increased wages for longwall mining; terminated Oct. 5, 1934; in favour of employer.
Coal miners, Wayne, Alta.....	85	680	Commenced Oct. 11, 1934; for increase in piece rates for timbering and bone; terminated Oct. 19, 1934; compromise.
Coal miners, Sydney Mines, N.S.	125	1,125	Commenced Oct. 22, 1934; for increased wages; untermiated.
MANUFACTURING— Vegetable Foods— Bakers, Winnipeg, Man.....	4	20	Commenced Oct. 25, 1934; for increased wages, reduced hours and recognition of union; terminated Oct. 31, 1934; compromise.
Boots and shoes— Shoe factory workers, Toronto, Ont.	800	800	Commenced Oct. 29, 1934; sympathetic; terminated Oct. 29, 1934; indefinite.
Textiles, Clothing, etc.— Cap factory workers, Toronto and Hamilton, Ont.	175	1,200	Commenced Oct. 22, 1934; for renewal of union agreement; untermiated.
TRANSPORTATION— Water— Pulpwood loaders, McNab Cove, N.S.	100	100	Commenced Oct. 15, 1934; for discharge of foreman; terminated Oct. 15, 1934; in favour of employer.
Longshoremen, North Syd- ney, N.S.	40	30	Commenced Oct. 18, 1934; for increased wages; terminated Oct. 18, 1934; compromise.

\*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which working time was lost to an appreciable extent.

formation as to a dispute involving a small number of employees, or for a short period of time is frequently not received until some time after its commencement.

Decreases occurred not only in the number of disputes but also in the number of em-

ployees involved and in the time loss incurred during October as compared with September. Nearly one-half of the time loss resulted from two strikes of loggers in Northern Ontario while one strike of coal miners in Nova

Scotia involved 1,500 workers with a time loss of 7,500 days. Approximately one-half of the time loss in September was due to two strikes of clothing factory workers in Montreal. The figures for October, 1933, except as to numbers of disputes, were substantially lower, the only dispute at that time involving large numbers of workers for a lengthy period being the strike of furniture factory workers at Stratford, Ont.

Six disputes, involving 1,091 workers, were carried over from September and ten disputes commenced during October. Of these sixteen disputes eleven terminated during the month, five in favour of the employers involved, five resulting in compromises or being partially successful, while the result of one is recorded as indefinite. At the end of October, therefore, there were five disputes in progress recorded as strikes or lockouts, namely: compositors, London, Ont., loggers, Sault Ste. Marie District, Ont., loggers, Port Alberni, B.C., coal miners, Sydney Mines, N.S., and cap factory workers, Toronto, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected, but which the unions concerned have not declared terminated. Information is available as to six such disputes, namely: photo-engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; moulders, Peterborough, Ont., February 27, 1934, one employer; paper mill workers, Dolbeau, P.Q., May 23, 1934, one employer; shoe factory workers, Toronto, Ont., July 25, 1934, one employer; and shoe factory workers, Preston, Ont., September 13, 1934, one employer, this last dispute being added to the list this month.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

A minor dispute involving a small number of employees in embroidery manufacturing establishments in Montreal occurred on October 1. The International Ladies' Garment Workers' Union called out employees in several establishments but only a small number of skilled men ceased work, returning the following day at increased wages. In one establishment two of these ceased work on October 10, claiming that the wages had not

been increased as arranged. The union had taken up with the provincial Minimum Wage Board the question of minimum rates of wages being set for the large numbers of women employed.

A minor dispute involved sixty-seven employees of a leather coat manufacturing establishment at Fenelon Falls, Ont., for one hour on October 8, resulting in wage increases and the signing of an agreement with the Industrial Union of Needle Trades Workers. The union had laid a complaint with the Minimum Wage Board for Ontario and the employer was prosecuted and fined on a charge of employing women after six o'clock without a permit from the Department of Labour and proceedings to enforce the Minimum Wage Act were taken.

A minor strike involving eight employees of a poultry dealer at Calgary, Alta., for a few hours occurred on October 26. Increases in wages were given and an agreement for one year was signed with the Food Workers' Industrial Union. This is summarized elsewhere in this issue.

Strikes of bakers in two bakeries in Montreal on October 16, for certain increases in wages, have been reported in the press but particulars have not been received. A third bakery was reported to be involved in a strike on October 21. Arrests in connection with picketing were reported.

A one day cessation of work by 850 coal miners in one colliery at Florence, N.S., on October 22 as a result of a dispute as to the erection of booms has been reported in the press. Work was resumed pending the report of an investigation by the mine inspectors. Particulars as to the dispute have not been received.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

**PULPWOOD CUTTERS, COCHRANE DISTRICT, ONT.**—The strike commencing on September 5, to secure increases in wages, reduced hours, recognition of camp committees, a maximum rate of 75 cents per day for board and a number of other conditions, was terminated at the end of the month, the strikers returning to work without securing their demands. The strikers were reported to be chiefly members of the Lumber Workers' Industrial Union, employed by contractors for pulpwood and railway ties. Many of the camps did not cease work. In connection with picketing and attempts to induce those working to strike, a number of strikers were arrested, some being convicted on charges of assault, resisting arrest, etc., and sentenced to terms of imprisonment.

**SHOE FACTORY WORKERS, PRESTON, ONT.**—In connection with this strike against the discharge of one worker for infraction of a shop rule, alleged by the Shoe and Leather Workers' Industrial Union to be in reality a result of union activity, a ten per cent wage increase having been demanded, by October 3 the employer had replaced the strikers but the pickets continued to picket the establishment. A number were arrested on charges of assault, two of these electing trial by jury; another was given a suspended sentence. On October 26 the employer refused to negotiate with the strike committee as all positions had been filled. The union, however, claimed the strike was still in effect, and it is, therefore, included in the list of such disputes in a previous paragraph.

**DRESSMAKERS, TORONTO, ONT.**—This dispute, resulting from a request for an increase in wages, piece rates, involving thirty-eight members of the International Ladies' Garment Workers' Union in one establishment, was called off by the union on October 13.

**CAP FACTORY WORKERS, MONTREAL, P.Q.**—At the middle of October it was reported that a number of the employers involved in this dispute had settled with the union but that the other employers involved had replaced the strikers, and the dispute has, therefore, been recorded as terminated.

**FURNITURE FACTORY WORKERS, MONTREAL, P.Q.**—This dispute, commencing September 13, was reported terminated by October 8, the workers securing increases in wages of ten to twenty per cent and the forty-four hour week but not union recognition.

**LOGGERS, SAULT STE. MARIE DISTRICT, ONT.**—A number of the employees of pulpwood contractors, some being members of the Lumber Workers' Industrial Union and some of the Industrial Workers of the World, ceased work on October 3 and succeeding days to secure conditions similar to those demanded by the strikers in the district around Cochrane, Ont. The strikers also made it a condition that the demands of the strikers in the Cochrane district should be conceded, the same pulp and paper company being affected. The provincial Minister of Lands and Forests, the Honourable Peter Heenan, formerly Federal Minister of Labour, as in September in connection with the strike in the Cochrane district, visited the locality and proposed that the dispute be referred to a board of inquiry which would ascertain whether the employers could pay the wages demanded, stating that the province might be able to reduce the timber dues. On the

other points in dispute he indicated that concessions to the strikers could be made. This proposal was rejected by the workers. The strikers attempted to induce those continuing to work to leave the camps and some intimidation was reported in the press. One picket at a railway station was arrested on charges of interfering with a passenger boarding a railway train. Toward the end of October and early in November it was reported that some of the strikers were resuming work.

**LOGGERS, PORT ALBERNI, B.C.**—Employees in one logging camp of a lumber company ceased work on October 10, their demand for the reinstatement of four employees organizing for the Lumber Workers' Industrial Union being refused. The employer stated that at the termination in May of the Vancouver Island loggers' strike it was stipulated that no organization or camp meetings would be permitted in his establishment. The saw-mill employing about 350 men was shut down owing to the lack of logs. The strikers were partly replaced so that toward the end of the month the camp and mill were again operating, apparently on a reduced scale.

**COAL MINERS, GLACE BAY, N.S.**—A number of employees in one colliery, members of the Amalgamated Mine Workers of Nova Scotia, ceased work on October 1 to secure higher rates of wages for longwall miners. A tentative rate per ton had been set for some new work, subject to negotiations under the agreement between the company and the United Mine Workers of America. A revised rate was referred by the local concerned to the district officers for further negotiations, but the members of the other union ceased work and picketed the mine and no work was done except by maintenance men. Later, maintenance men on one shift were kept out but officials performed the work. Attempts to bring about sympathetic strikes in other collieries were successful to only a slight extent, one being affected for a few days by a breakdown of machinery. The company, however, was unable to fill contracts for coal at Montreal and released the ships chartered for its delivery. The United Mine Workers' union adopted a resolution that its members should resume work on Saturday, October 6, the officers to resume negotiations with the company. A sufficient number of men to partially operate the colliery reported for work and the Amalgamated Mine Workers' Union called the strike off on Monday. A small number of strikers have been arrested on charges of intimidation in connection with picketing, being released on bail.

**COAL MINERS, WAYNE, ALTA.**—Employees in one mine ceased work on October 11 as a result of a dispute as to the piece rate for timbering. The mine had been operated under a co-operative agreement until a strike in September (LABOUR GAZETTE, October, 1934, p. 908). It was arranged that the wage scale in the district would be paid but when negotiating an agreement the dispute as to timbering arose. The employer offered to increase the rate but this was not accepted until the strikers returned to work on October 19, terminating the strike. The agreement is to be in effect until March 31, 1935.

**COAL MINERS, SYDNEY MINES, N.S.**—Employees of one company ceased work on October 22 when their demand for an increase in wages similar to that given in other mines in the district some time ago was refused. The employer offered to make certain changes but this was not accepted, and at the end of the month no settlement had been reported.

**BAKERS, WINNIPEG, MAN.**—Bakers in one establishment ceased work on October 25 demanding increases in wages, reduction in hours to eight per day and recognition of the Food Workers' Industrial Union. The establishment was closed, indirectly involving about twelve other employees. Work was resumed after five days, the piece rates being increased, which the employer stated would raise weekly earnings about \$1 per week, making the level from \$19 to \$21. The dispute as to hours appears to have been regarding overtime, on which the union reported a concession was made.

**SHOE FACTORY WORKERS, TORONTO, ONT.**—A number of employees in some fifteen factories in Toronto ceased work for one day on October 29 in protest against the arrest of members of the Shoe and Leather Workers' Industrial Union picketing an establishment in New Toronto involved in a strike from July 25, 1934, to the end of August. The strikers have been replaced but the union has continued to picket. Following some violence the municipal authorities stopped the picketing but later offered to allow the strikers only to picket. The union officers interviewed the provincial Attorney-General and later arranged with the municipal authorities to restrict the picketing to the strikers and union officers pending the trial of the other pickets.

**CAP FACTORY WORKERS, TORONTO AND HAMILTON, ONT.**—Employees in fifteen cap factories ceased work on October 22, the agreement between the United Hat, Cap and Millinery Workers' International Union and employers,

members of the Cap Manufacturers' Guild, having expired on September 5 and not been renewed. The employers proposed reductions in wages and a change in hours from forty per week to forty-four. The union proposed some wage increases. As a result of negotiations, settlements were reached with the two Hamilton firms and most of the Toronto firms, work being resumed about October 26. The forty hour week was retained, with some adjustment in wages. At the end of the month the dispute with the remaining employers was in progress. The agreement is summarized elsewhere in this issue.

**PULPWOOD LOADERS, McNAB COVE, N.S.**—Men engaged to load a boat demanded that the foreman be discharged, and, this being refused, ceased work about October 15 and were replaced by other employees of the company.

**LONGSHOREMEN, NORTH SYDNEY, N.S.**—The employees who were involved in this dispute had demanded a wage rate of 40 cents per hour for day work and 50 cents for night work instead of payment by the ton with a guarantee of 40 cents per hour under which it was stated the earnings averaged 45 cents per hour. The demand being refused, the employees ceased work for six hours on October 18, most of them returning under an arrangement by which the number of men was adjusted so that earnings averaged 40 cents per hour for day work and 45 cents to 50 cents for night work. Some of the night men picketed the operations and police supervision was secured.

The United States Department of Labor has recently published a report of the discussion of industrial accidents and diseases at the 1933 meeting of the International Association of Industrial Accident Boards and Commissions. Addresses on the many phases of workmen's compensation and its allied subjects were presented at the convention by leading authorities.

President Roosevelt, on October 12, signed an executive order establishing the 36-hour work week in the cotton garment manufacturing industry in the United States, effective December 1. The action was taken on recommendation of a special impartial committee which had been created under an agreement of the parties that the findings would be accepted as final. Under the order, not only will the work week be shortened from the present forty hours, but weekly wages will be kept at the present total, and piece rates will be increased by 10 per cent.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing down to date that given in the issue of February, 1934, in the review of Strikes and Lockouts in Canada and Other Countries, 1933. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in September was 18 and 6 were in effect from the previous month, making a total of 24 disputes in effect during the month, involving 4,100 workers, with a time loss of 29,000 working days for the month.

Of the 18 disputes beginning in September, 5 were over demands for increases in wages, 6 over other wage questions, 3 over questions respecting the employment of particular classes or persons and 4 over other questions. During September, 18 disputes were terminated, of which 4 were in favour of workers, 4 in favour of employers and 10 ended in compromises.

### Irish Free State

The number of disputes beginning in the year 1933 was 88, involving 9,059 workers resulting in a time loss of 200,126 working days during the year. Of the 88 disputes beginning in the year, 37 were over wages questions and 32 over the engagement or dismissal of workers. The industries most seriously involved were transportation and building.

During the year, 85 disputes were terminated, of which workers' claims were admitted in 25 cases, admitted in part in 27 cases, and rejected in 18 cases, while employers claims were wholly successful in 6 cases, successful in part in 5 cases. In 4 other disputes, the result was indeterminate.

### Belgium

A dispute involving 16,000 employees in the woollen textile industry at Verviers and district was in effect from February 26 to July 31 over demands for changes in working conditions, but these demands were not secured.

### France

The number of strikes beginning in the year 1932 was 330, involving 54,088 workers. In the year 1933, 331 strikes began, involving 84,391 workers. The results of strikes terminated in 1932 were: 39 in favour of workers, 104 in favour of employers and 46 ended in compromises; while in 1933 the results of strikes terminated were: 38 in favour of workers, 123 in favour of employers and 82 ended in compromises.

### Hungary

At Pecs, 1,200 coal miners remained in a mine without food for five days to enforce their demands for increased wages and more days work per week. At the end of this time, a compromise was reached whereby an advance in wages rates and more work was granted, although not all the concessions the miners had originally demanded were granted.

### United States

The number of disputes beginning in July was 97 and 105 were in effect at the end of the month. The number of workers involved in disputes in effect at the end of the month was 77,557 and the time loss for the month 2,595,185 working days.

A strike of 5,000 fishermen and allied workers at Boston began October 8 and was reported to have terminated November 6. The demands made for a larger share in the proceeds of catches and higher wages for shore workers were not secured, it was reported.

At the expiration of their agreement, 25,000 silk and rayon dyers at Paterson, New Jersey and neighbouring centres went on strike October 24, demanding a new agreement providing for closed shop and an increase in wages with a shorter work week. Efforts were being made by the Textile Labour Relations Board to settle the dispute and joint conferences were held, but no agreement had been reached at the end of October.

The award of the board appointed by the President of the United States at the conclusion of the longshoremen's strike on the Pacific coast, which strike was reported in the *LABOUR GAZETTE*, June, July and August, provided that hiring halls are to be under joint management of the employers and the union, with the dispatcher to be chosen by the union, the establishment of labour relations committees, a reduction in hours to 6 per day with a 5 day week and an increase in hourly wage rates of 10 cents per hour, making wages 95 cents an hour for straight time.

OLD AGE PENSIONS IN CANADA  
Financial Summary as at September 30, 1934

THE accompanying table gives a financial summary to September 30, 1934, of operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156, amended by Statutes of 1931, Chapter 42) and under the concurrent Acts adopted by the provinces participating in the scheme.

FINANCIAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT SEPTEMBER 30, 1934

	Alberta	British Columbia	Manitoba	Nova Scotia	Ontario	Prince Edward Island	Saskatchewan	Northwest Territories	Totals
	Act. effective Aug. 1, 1929	Act. effective Sept. 1, 1927	Act. effective Sept. 1, 1928	Act. effective March 1, 1934	Act. effective Nov. 1, 1929	Act. effective July 1, 1933	Act. effective May 1, 1928	Order in C. effective Jan. 25, 1929

## COMBINES INVESTIGATION ACT

### Coal Combine Conviction Upheld on Appeal

THE conviction of the five coal companies found guilty of forming a combine in violation of the Combines Investigation Act (reported in LABOUR GAZETTE, January, 1934, pages 30-35) was upheld by a unanimous judgment of the Quebec Court of King's Bench, Appeal Side, delivered on October 5, 1934. The five accused companies, engaged in the importation and distribution of British anthracite coal, were convicted at Quebec City on December 12, 1933, following an investigation under the Combines Investigation Act. The appeal of the companies found guilty was heard in May, 1934, and has been dismissed by the present judgment.

The lengthy reasons for judgment read in French by Mr. Justice St. Germain on the dismissal of the appeal are reviewed below. A briefer statement of reasons for judgment was also written in English by Mr. Justice Bond, who, stating "it is unnecessary for the purposes of the present cause to attempt to determine what would be a fair price for coal, even if it were feasible to do so," finds that "the appellants' intention was to gain control of the industry so as to exclude (as, indeed, they succeeded in doing to a marked degree) competition in the trade, and by so doing to enable them to create a price structure based not upon the intrinsic merits of the business, that is, the cost of coal laid down at the wharf and subsequently delivered to the consumer, or the fair return upon capital invested, or upon the turnover, or upon the net profit per ton,—on the contrary, an arbitrary price structure was agreed upon, as a result of the combination, based upon American differentials, and this, in my opinion, brings the agreement within the prohibitions as being undue and detrimental to the public, and also designed to restrict competition unduly between the Canadian Import Company and the Weaver Company.

"Similar comment applies to the manoeuvres adopted by the appellants to exclude Russian coal from entering the territory in competition, and, in a lesser degree, Scotch anthracite and German."

The five convicted firms were found guilty at the trial under one charge laid under the Combines Investigation Act and two counts concerning violations of section 498 of the Criminal Code, and were sentenced to pay fines totalling \$30,000. The charge under the Combines Investigation Act was stated in the indictment as that of forming a combine—

"which had and was designed to have the effect of preventing and lessening competition in the purchase, barter, sale and supply of coal and coke, and which has operated, is operating and is likely to operate to the detriment or against the interest of the public, to wit: consumers, other dealers in coal and in coke, and others."

The acts in violation of section 498 of the Criminal Code under which also the firms were convicted were generally described in the Crown's bill of indictment as those of conspiring to unduly limit the facilities for transporting, supplying, storing and dealing in coal, in coke, and of similar action to unduly prevent or lessen competition in the purchase and sale of these classes of fuel.

The contentions of the appellants are considered by Mr. Justice St. Germain in the appeal judgment under the following principal heads:

1. the basic agreements,
2. combine to prevent independent importers in Canada from securing supplies of Welsh anthracite,
3. the lessening of competition of Russian coal,
4. the lessening of competition of German coal,
5. the eliminating or lessening of competition of British coke,
6. control of prices.

Stating that the facts concerning the case as set out in the judgment delivered at the trial are not contested by the appellants, Mr. Justice St. Germain proceeds to point out that "the sole question for us to decide is whether the conviction appealed against is justified in law, in relation to the said facts."

In 1929 and 1930 two basic agreements providing for a wide measure of control of the importation of anthracite coal from Great Britain were signed by the major companies accused. The trial Judge had held that the original agreement of 1929 was unlawful with respect only to three clauses concerning the fixing by the Canadian Import Company and the Weaver Company of wholesale and retail selling prices. The judgment of the Appeal Court finds the basic agreements to be unlawful not only in the matters condemned by the trial judge but also in other matters for which these agreements provided, including arrangements made to exclude Russian anthracite from Canada prior to the placing of an embargo on that commodity by the Dominion Government and arrangements for the selling of British anthracite at a common price by the Weaver and Canadian Import companies.

In concluding his examination of the nature of the basic arrangements between the accused companies, Mr. Justice St. Germain states:

"At no point is it established that the difficulties which had accompanied the development of the anthracite trade preceding the

formation of the agreement in question were the result of the lowering of prices by too active competition.

"... I am of the opinion that the motive which ruled in drawing up the agreement was one likely to operate to the detriment of the public, aimed at unduly lessening competition. In addition, the operations which followed closely after its formation could, in my belief, not fail to confirm this interpretation."

Regarding Russian coal, the judgment of the Appeal Court goes further than that of the trial Judge and declares that the object of the agreement of the coal importers was to maintain the price of Welsh coal by preventing competition from Russian coal. That agreement, the judgment says, was likely to operate against the public interest. Confirmation is given to the findings of the trial Court

against the combined efforts of the appellants to prevent independent importers in Canada from securing supplies of Welsh anthracite and to prevent or lessen the competition of German coal and British coke. The appeal judgment quotes with approval the comments of the trial Judge in condemning the agreements to maintain common wholesale prices which the appellants entered into with the Hartt and Adair Coal Company and the Scotch Anthracite Coal Company, and also the trial Judge's findings against the arrangements regarding uniform retail prices which these companies made with other members of the Montreal Coal Association.

Five other coal companies indicted as members of the combine have not yet been tried and arrangements for trial of the latter firms are now being made.

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include the extension to all employees and employers in the industry and district, by Orders in Council, of an agreement affecting marble and tile setters and terrazzo layers at Quebec, building trades at Joliette, and ornamental iron and bronze workers at Montreal, the correction of one clause of the Order in Council affecting printing trades in Quebec city and district; and also applications for the extension of agreements affecting painters in Three Rivers and district and building trades in St. Hyacinthe and district.

Under the Collective Labour Agreements Extension Act, Quebec, the text of which was printed in the LABOUR GAZETTE, May, 1934, page 417, applications may be made to the provincial Minister of Labour by any association of employees or employers who are parties to a collective agreement to have those terms of such agreement which concern rates of wages and hours of labour made obligatory on all employees and employers in the same trade or industry within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" for the establishment of these conditions, an Order

in Council may be passed making the terms obligatory on all employees and employers in the trade or industry in the territory included in the agreement, from the date of the publication of the Order in Council in the *Quebec Official Gazette* and for the duration of the agreement. The provisions of an agreement thus made obligatory are to govern all individual labour contracts in the specified trades and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement. Applications for the extension of certain agreements and Orders in Council subsequently passed under this Act have been noted in the LABOUR GAZETTE each month, beginning in June, 1934.

*Marble and tile setters, terrazzo layers, etc., Quebec City and District.*—The application for the extension of the agreement in these trades was noted in the LABOUR GAZETTE, October, page 913. The agreement was made between five terrazzo, tile and mosaic contractors and the Catholic Union of Labourers. An Order in Council, approved October 18, 1934, makes the conditions in the agreement obligatory for all employees and employers in the trade in the district named according to the following conditions:—

1. (a) In the present contract the term "terrazzo layers" signifies and includes any man levelling the surface so as to lay the terrazzo and measures, divides the said surface and draws the lines, and prepares the

samples and mixes the materials and spreads the mixture and supervises the rolling and polishing of the terrazzo;

(b) The term "tile setter" signifies and includes any man who measures the surface in order to receive the tile and who sets the tiles;

(c) The term "marble setter" signifies and includes any man who measures the surface in order to receive the marble, cuts and sets the marble.

2. In the cities of Quebec and Lévis, and within a radius of ten miles of their limits; in the towns of Rivière du Loup, Thetford Mines, the rate of wages for the trades hereinafter mentioned will be the following:—

	per hour
Marble setters (current work) . . . .	\$0 50
Tile setters (current work) . . . . .	0 50
Terrazzo layers (current work) . . . .	0 50
Raw cement layers . . . . .	0 40
Men working on machines . . . . .	0 40
Joint finishers . . . . .	0 50
Labourers (common) . . . . .	0 35

3. In the judicial districts of Quebec, Beauce, Kamouraska, Rimouski, Gaspé, Saguenay, Arthabaska, with the exception of the economic zones mentioned in the preceding article, the rate of wages, hereinafter specified, will be the following:—

	per hour
Marble setters . . . . .	\$0 45
Tile setters . . . . .	0 45
Terrazzo layers . . . . .	0 45
Raw cement layers . . . . .	0 35
Men working on machines . . . . .	0 35
Joint finishers . . . . .	0 45
Labourers . . . . .	0 30

4. The time of labour shall conform with the provisions of the Order in Council No. 1496 of July 12, 1933, for the putting into force of the Act respecting the Limitation of Working Hours, 23 Geo. V, chap. 40).

5. Duration of the agreement.—The present agreement shall remain in force until the 30th of April, 1935, and shall renew itself automatically for another year unless one of the parties hereto notifies the other party of its intention to modify or revoke same and such within thirty days before its expiration. In the case of work being carried on at the date of the expiration of the present agreement, the same conditions shall continue until the completion of the said work.

*Building Trades, Joliette and District.*—The agreement was made between the Montreal Builders' Exchange, Incorporated, and the Workers' Association of Joliette, and the application for its extension was noted in the LABOUR GAZETTE, October, page 912. An Order in Council, approved October 11, 1934, and amended October 24, makes the agreement

obligatory for the employees and employers of the following trades according to the following conditions:—

1. The rate of wages to be the following for each of the trades mentioned below:—

Trade	Wage rate per hour. cents
Bricklayers . . . . .	50
Carpenters and joiners . . . . .	45
Cement finishers . . . . .	40
Electricians . . . . .	45
Hod carriers . . . . .	30
Labourers, common . . . . .	25
Lathers—metal . . . . .	40
Lathers—wood . . . . .	35
Marble setters . . . . .	50
Masons, stone . . . . .	50
Ornamental ironworkers:	
Erectors . . . . .	40
Helpers . . . . .	35
Painters . . . . .	40
Plasterers . . . . .	40
Roofers—slate and tile . . . . .	40
Roofers—composition . . . . .	35
Sheet metal workers . . . . .	40
Tile setters . . . . .	40
Terrazzo layers . . . . .	40
Plumbers and steamfitters . . . . .	45
Stationary enginemen . . . . .	40
Stone breakers in quarries . . . . .	30

2. The hours of labour will be in conformity with the provisions of the Order in Council No. 1253 of June 14, 1933, for the putting into force of the Act respecting the limiting of working hours (23 Geo. V, ch. 40).

3. The territorial jurisdiction determined by the present agreement includes the counties of Joliette and Montcalm.

4. Notwithstanding paragraph one (1) of the present conditions, it is stipulated and agreed that, in the city of Joliette, the following rate of wages shall be in force:—

Trades.	Wages per hour. cents
Bricklayers . . . . .	60
Carpenters and joiners . . . . .	50
Carpenters and joiners' apprentices . . . . .	35
Cement finishers . . . . .	40
Electricians . . . . .	45
Hod carriers . . . . .	35
Labourers, common . . . . .	30
Lathers—metal . . . . .	40
Lathers—wood . . . . .	35
Marble setters . . . . .	50
Masons, stone . . . . .	60
Ornamental ironworkers:	
Erectors . . . . .	40
Helpers . . . . .	35
Painters . . . . .	40
Plasterers . . . . .	60
Roofers—slate and tile . . . . .	40
Roofers—composition . . . . .	35
Sheet metal workers . . . . .	40
Tile setters . . . . .	40
Terrazzo layers . . . . .	40
Plumbers and steamfitters . . . . .	50
Stationary enginemen . . . . .	45
Stone breakers in quarries . . . . .	35

5. It is expressly stipulated that building contracts given and signed before the adoption of the Order in Council approving the present petition shall not be subject to the provisions of the present agreement.

6. The present agreement shall be in force from the date of the publication in the *Quebec Official Gazette* of the Order in Council approving the present petition and shall remain in force until the 31st of March 1935.

*Ornamental Iron and Bronze Workers (Shopmen) Montreal and District.*—The agreement was made between eight building and contracting firms and the Canadian Union of Ornamental Iron and Bronze Workers of Montreal and the application for its extension was noted in the *LABOUR GAZETTE*, October, page 912. An Order in Council was approved October 11, 1934, making the agreement obligatory for all employees and employers in the trades according to the following conditions:—

1. The rate of wages to be the following:

Trades.	Wages. cents
Mechanics.. . . .	55
Fitters.. . . .	45
Helpers.. . . .	35

2. The hours of labour to be 8 hours per day and 45 hours per week; the time of labour to be from 8 a.m. to noon and from 1 o'clock p.m. to 5 o'clock p.m., with the exception of Saturday when there shall be no work during the afternoon. All overtime shall be paid at the rate of time and a half based on the regular wages. Double time will be paid for work carried on on legal holidays and from midnight to 8 a.m., on ordinary working days.

3. The territorial jurisdiction determined by the present agreement comprises, in addition to the island of Montreal and l'Isle Bizard, the following counties: Assomption, Terrebonne, Laval, Two Mountains, Argenteuil, Vaudeuil, Soulanges, Beauharnois, Chateauguay, Laprairie, Chambly and Verchères.

4. It is expressly stipulated that contracts given and signed before the adoption of the Order in Council approving this petition, shall not be subject to the provisions of the present agreement.

5. The present agreement applies only to employees of workshops.

*Printing Trades, Quebec City and District.*—In the Order in Council governing conditions in the printing trades in Quebec city and district, which was printed in the *LABOUR GAZETTE*, October, page 911, article 10 should be deleted and the following substituted:—

10. Double overtime will be paid for any work done on Sunday, Christmas day, New

Year's day, Labour day. This clause does not apply to men regularly employed on night shifts.

*Painters, Three Rivers.*—Notice of application for the extension of the agreement between painting contractors and the National Catholic Union of Painters of Three Rivers was published in the *Quebec Official Gazette*, November 3. This agreement provides for a wage rate of 45 cents per hour for painters.

*Building Trades, St. Hyacinthe.*—Notice of application for the extension of the agreement between the Montreal Builders' Exchange and the National Catholic Union of Building Trades of St. Hyacinthe was printed in the *Quebec Official Gazette*, November 3. The wage scale for the various trades in this agreement is the same as the scale of wages for the counties of Joliette and Montcalm but outside of the city of Joliette, which is printed above in the Order in Council covering building trades in Joliette and district, with the exceptions that in application for St. Hyacinthe the rates for bricklayers, masons and plasterers are 60 cents, for electricians 50 cents and stone breakers in quarries are not included.

## Coal Production in Canada in September

Canadian coal mines produced 1,293,867 tons of coal during September as compared with 1,140,978 tons a year ago. The average production for September during the past five years was 1,150,150 tons. The output of bituminous coal during September totalled 881,621 tons; sub-bituminous coal, 40,417 tons, and lignite coal, 371,829 tons. Nova Scotia's production was recorded at 596,649 tons or an increase of 19.4 per cent over the September, 1933, total of 499,850 tons. Alberta mines produced 479,662 tons consisting of 141,131 tons of bituminous coal, 40,417 tons of sub-bituminous coal, and 298,114 tons of lignite coal. In September, 1933, Alberta's output was made up of 117,799 tons of bituminous coal, 62,169 tons of sub-bituminous coal, and 256,720 tons of lignite coal. Production from British Columbia sources amounted to 116,070 tons, a 3.1 per cent advance over the total for the corresponding month of 1933. A 9.5 per cent increase was shown in Saskatchewan's output; in September 73,715 tons were mined and a year ago 67,330 tons. New Brunswick operators reported an output of 27,771 tons as against 24,288 tons in September, 1933.

Canada's coal supply, including imports, in September was computed at 2,867,007 tons; the average for the month during the past five years was 2,760,078 tons.

## MINIMUM WAGES IN MANITOBA

### 10 Per Cent Reduction to Terminate December 31, 1934

THE Minimum Wage Board of Manitoba has issued a ruling (published in *The Manitoba Gazette*, October 6), extending to December 31, 1934, "but not thereafter," the 10 per cent reduction in the scale of minimum wages for female employees which had been in effect since March 1, 1933. It is stipulated the reduction shall not be applicable to Regulation No. 5, governing employment in hotels, restaurants, etc. This reduction was first put into effect for one year by an Order operative from February 28, 1933 (*LABOUR GAZETTE*, March, 1933, page 280). The text of the Order continuing the reduction is as follows:

Public notice is hereby given that the Minimum Wage Board, at its meeting held on Tuesday, September 25, A.D. 1934, ruled that the ten per centum (10%) reduction in the scale of minimum wages for female employees in the Province of Manitoba effected by the Board on March 1, A.D. 1934, and extended until September 1, 1934, shall continue and remain in force until the thirty-first day of December, A.D. 1934, but not thereafter. And further that the said ten per centum (10%) wage reduction shall not apply on Regulation No. 5, governing the employment in hotels, restaurants, clubs, victualling houses and refreshment stands, which said regulations became effective August 14, A.D. 1934.

Dated at Winnipeg, this 26th day of September, A.D. 1934.

GEORGE N. JACKSON,  
*Chairman, Minimum Wage Board.*

### Minimum Wage Reductions in Saskatchewan Restored

The Minimum Wage Board of Saskatchewan recently decided, pending further investigation, to restore as from September 1 the reductions that had been made in the minimum wages in certain occupations. Order No. 6, which provided for a reduction in the minimum wages for female workers in shops and stores, laundries and factories, hotels, restaurant and refreshment rooms, beauty parlours and barber shops, was amended last July, the previous reductions of 10 per cent for minimum wages under \$13, and 15 per cent for minimum wages of \$13 and over, being reduced to 5 per cent and 10 per cent respectively. That order was to continue in force until September 30, 1934 (*LABOUR GAZETTE*, August, 1934, page 753).

The provincial Board now consists of the following members:—R. J. Dickenson, Moose Jaw; Miss F. V. Pearce, Regina; Mrs. J. F. Cairns, Saskatoon; Miss Irene Campbell, Moose Jaw; and Alderman Ralph Heseltine, Regina.

## WOMEN'S MINIMUM WAGES IN QUEBEC

### New Order governing Employment in Laundries, Dyeworks and Dry Cleaning Establishments

THE Minimum Wage Board of the Province of Quebec has re-issued Order No. 1, governing laundries, dyeworks, etc., in the Province. The method followed in the present order differs from that in the order dated January 1, 1929, which it replaces (*LABOUR GAZETTE*, February, 1929, page 175). That order in turn amended the original Order No. 1, which was published in the *LABOUR GAZETTE*, December, 1926, page 1195. In the order of 1929, the minimum wage was fixed at \$12 per week in Montreal; and \$9 per week in the remainder of the Province, with corresponding minimum wages for inexperienced workers during two periods of 6 months each. The new order, which follows, provides that 70 per cent of the working force shall be paid fixed hourly wages of 22 or 18 cents, lower wages at hourly rates being fixed for the remaining workers.

ORDER No. 1 (replacing Orders 1a and 2a, in force since January 1, 1929) governing female employees and males when replacing females in any class of employment, in Laundries, Dye Works, Dry Cleaning Establishments and all Services connected therewith.

1. *Minimum.*—No wage shall be less per week than is set forth in the following table:—

City and Island of Montreal, and radius of 30 miles around and beyond the Island.

15 per cent of the employees at not less than 16 cents per hour.

15 per cent of the employees at not less than 20 cents per hour.

70 per cent of the employees at not less than 22 cents per hour.

Province of Quebec, excepting the City and Island of Montreal and a radius of 30 miles around and beyond the Island of Montreal.

15 per cent of the employees at not less than 13 cents per hour.

15 per cent of the employees at not less than 15 cents per hour.

70 per cent of the employees at not less than 18 cents per hour.

The worker's salary shall be paid to her in cash; a part or the whole of the salary cannot be retained for any cause or purpose whatever. This salary shall be given to her in a sealed envelope on which shall be written: her name, her register number, the date of the week or of the fortnight she has worked, the number of hours she has performed, the rate per hour, the amount of money included in the envelope; same must be initialed by the person who paid the employee.

2. All employees are subject to the above specified minimum wages.

3. *Hours of Work.*—The total of working hours cannot in any case exceed 55 hours per week unless a special permit has been obtained from the Industrial and Commercial Establishments Inspection Department (Chap. 182, R.S.P.Q., 1925).

4. *Waiting Time.*—Any employee required to wait in the establishment shall be paid for the time thus spent.

5. *Discharge of Employees.*—No employer shall discharge or threaten to discharge or in any way discriminate against any employee, because such employee has lodged a complaint with the Board or has testified or is about to testify in any investigation or proceedings permitted or prescribed by or taken under the provisions of this Act.

6. *Penalties.*—Any violation of this Order is punishable by fine or imprisonment. (See Section 12 of the Act.)

7. *Posting.*—Each establishment shall keep a copy of this Order posted in a conspicuous place where the employees have access.

8. This Order shall come into force and be effective on January 1, 1935, and is replacing Orders Nos. 1a and 2a which were in force and effective since January 1, 1929.

GUS. FRANCO, *Chairman*.  
OMER BRUNET,  
C. J. GRIFFIN,  
EUG. BRUNET.

MONTREAL, October 17, 1934.

## BRITISH COLUMBIA BOARD OF INDUSTRIAL RELATIONS

### Order Prohibiting the Carrying on of Certain Agreements under the Male Minimum Wage Act

THE following order of the Board of Industrial Relations, which administers the Male Minimum Wage and other Acts was published in the *British Columbia Gazette*, October 18, 1934:—

#### MALE MINIMUM WAGE ACT

*ORDER prohibiting the Carrying-on of the Agreements, Schemes, Joint Contracts, or Undertakings Hereinafter mentioned.*

The Board of Industrial Relations, a Board duly appointed under the provisions of the "Male Minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, by virtue of the powers conferred upon it under section 8 of the said Act and all other powers it thereunto enabling, having held such inquiry as the Board considers adequate, and being of the opinion that the hereinafter-mentioned agreements, schemes, joint contracts, or undertakings are intended to have the effect, either directly or indirectly, of defeating the true intent and object of the said Act in respect of the payment of a minimum wage, hereby *orders*:—

1. That the carrying on of the agreement, scheme, joint contract, or undertaking entered into between the Empress Taxi & Sightseeing Co., Limited, of the one part, and David McVie, Frank Whitford, David Charter Milne, and Alexander V. Stevens, of the other part, under the terms set out in a written communication addressed to A. E. Chilton, Superintendent of the said Empress Taxi & Sightseeing Co., Limited, Victoria, B.C., dated the 27th day of September, 1934, and signed by the said David McVie, Frank Whitford, David Charter Milne, and Alexander V. Stevens, is hereby prohibited in whole or in part, and that, except as to

transactions which took place prior to the coming into force of this Order, the payment of any money and the doing of any person of any act, or thing in connection with the aforesaid agreement, scheme, joint contract, or undertaking are hereby prohibited.

2. That the carrying-on of the agreement, scheme, joint contract, or undertaking entered into between the Empress Taxi & Sightseeing Co., Limited, of the one part, and Monte T. Powell, of the other part, under the terms set out in a written communication addressed to A. E. Chilton, Superintendent of the said Empress Taxi & Sightseeing Co., Limited, Victoria, B.C., on the 1st day of October, 1934, and signed by the said Monte T. Powell, is hereby prohibited in whole or in part, and that, except as to transactions which took place prior to the coming into force of this Order, the payment of any money and the doing by any person of any act or thing in connection with the aforesaid agreement, scheme, joint contract, or undertaking are hereby prohibited.

Dated at Victoria, B.C., this 15th day of October, 1934.

*Board of Industrial Relations,*  
ADAM BELL, *Chairman*,  
WILLIAM ALEXANDER CARROTHERS,  
CHRISTOPHER JOHN McDOWELL,  
JAMES THOMPSON.

In the official list of ministerial appointments appearing in the Saskatchewan Gazette of August 15, the Hon. George Spence is designated as Minister of the Department of Railways, Labour and Industries, and Hon. Charles M. Dunn, as Minister in charge of the Child Welfare Act.

## FINDINGS OF THE LIEUTENANT GOVERNOR'S COMMITTEE ON HOUSING IN TORONTO

THE Hon. Herbert A. Bruce, Lieutenant-Governor of Ontario, in his address at the recent convention of the Trades and Labour Congress of Canada (LABOUR GAZETTE, October, 1934, page 922) dealt with housing problems and slum clearance, with special reference to conditions in Toronto. He submitted the conclusions reached by the Housing Committee, representing various social groups, which had been appointed by the Board of Control in Toronto last March in response to an appeal by the Lieutenant-Governor on behalf of slum dwellers in the city. The report, which was presented to the mayor and corporation of Toronto on November 5, reports in part as follows:—

### The Problem Stated

There is a housing problem in Toronto. Our limited survey has revealed some 1,500 houses that are unhealthy, along with many others that are lacking in the elementary amenities that should be present in Canadian cities. While all of these houses in Toronto are by no means concentrated in particular areas, there are certain districts which are especially bad and which may be termed "blighted" areas. In these districts the defects of the environment often makes unsatisfactory even those houses that are in good condition. These unfit houses and bad districts undoubtedly play a part in generating health and social problems towards the alleviation of which the city must spend large sums of money. Moreover, there is a physical shortage of suitable dwellings in the city for the existing population. This is partially obscured at present by much doubling up and overcrowding. But if the wage-earners of the city were to recover reasonably full employment within a short time it is probable that, as computed in our preliminary report, a shortage of some 25,000 dwelling units would become apparent.

The major reasons for the existence of this housing problem appear to be as follows: Many tenants cannot afford to pay rents high enough to give them good housing. Even those heads of families who are regularly employed do not earn enough, in many cases, to obtain good housing. Satisfactory houses for families of average size cost at least \$25 or \$30 a month at present, while many employed heads of families can pay no more than \$12 to \$15. At present one of the biggest problems of the whole housing question in Toronto is the provision of adequate dwell-

ings for families whose average earnings, on account of low wage rates and seasonal and interrupted employment, amount to no more than \$50 per month. For these, the rentals should not exceed \$10 per month.

While this condition has been particularly acute during the last two years, on account of the great decrease in wage rates which has affected large numbers of workers, the problem is not a new one. Prior to the depression there were many who could not afford decent housing of the kind then available, and there is little prospect that the reappearance of "prosperity" in itself, will end the problem. As for the unemployed, they, of course, have been quite without means to pay for proper housing, and the relief system in Toronto does not provide adequately for rentals, so that they have been forced into the poorest and most unsanitary dwellings in the city. The poverty of so many wage earners means that a solution of their housing problem through home ownership is impossible. Home ownership is completely out of the question for the poorer wage-earners and there are many objections to the great bulk of the workers undertaking to buy their own homes. Indeed, it may be said that home ownership has become a luxury which only a minority of the population may now enjoy.

Failure to provide good housing more cheaply, in place of the old unsatisfactory buildings which are now rented for what they will bring, is due to reasons such as the following:—

(a) In certain districts where there are unfit houses, notably in the central down-town section, land prices are very high. This land is usually held for speculation in the hope that it will later be in demand for business purposes. Housing cannot possibly yield sufficient revenues to make adequate returns on land held at such prices. Where there are old dwelling houses on this land they are rented for what they will bring, and often the landlords do not find it worth while to keep them in decent repair. They certainly see no advantage in putting up new dwellings on this high-priced land.

(b) The use of land in Toronto is very uneconomical. There is a low average density of population, even in the downtown sections, and a large amount of land is devoted to streets. Hence the mileage of sewers, street lighting systems, etc., is relatively high. The resulting high costs of civic development and services make for a heavy burden of

taxes per acre of land and thus create charges that must be covered by rents. In large part, this condition is a reflection of the fact that Toronto for long years "just grew," without any far-sighted planning to guide its development in the social interest.

(c) With the existing methods of building and financing houses the costs of construction are such that even were there cheap land and low taxes it would be difficult or impossible to provide good houses cheaply enough for the poorer tenants. In many respects our existing building and financing methods are wasteful and expensive. The construction of a single house on a single lot, the system that has prevailed, is uneconomical since it does not make possible certain economies inherent in larger scale operations on good-sized plots of land where a housing scheme is set up as a unit for the whole area.

Apart from considerations of cost, the present unplanned single house single lot system is unsatisfactory, uneconomical and out of date. It involves very uneconomical use of land. It does not provide open spaces close to houses for children's play, adult recreation and aesthetic satisfaction. It produces drab environments that may easily become slums.

Certain older districts in Toronto have become "blighted" areas already, as mentioned above. There is no prospect of these areas being improved unless there is a planned community attack upon the problem that they represent. Other areas are deteriorating and inevitably moving towards the slum stage.

Our existing legislation is insufficient to protect us against the slum menace. The health and building regulations do not give sufficient powers to the city to order the demolition of houses which fall far below any acceptable minimum standard of fitness for dwellings. The city's zoning system is ineffective to prevent the further deterioration of certain districts. The civic planning that is in effect in Toronto is doing nothing constructive to destroy old slums or to prevent new ones from emerging.

#### *Recommendations*

The provision of housing accommodation up to a minimum standard for every family in Canada, at a rent within the family capacity to pay, is a public responsibility. There is an urgent need for re-housing in certain areas, so that poorer people can be provided with good low cost dwellings. Since private enterprise cannot fulfill this task the governments, national, provincial and municipal, must take the necessary steps to meet the problem. The

policy adopted should be guided by the following principles:—

1. Any re-housing scheme must be a socially planned undertaking. The rehabilitation or replacement of individual unfit dwellings is not enough. Re-housing must extend over a whole area to obtain maximum economies and benefits.

2. The possibility of speculative profit resulting from any community housing scheme should be prevented by adequate legislation.

3. All the land of the area for development must be acquired at a reasonable figure without undue delay. The existing system of land acquisition for public purposes is too slow, and too costly.

For any centre where the problem is to be dealt with on a considerable scale, as in a city such as Toronto, a permanent town planning commission should be appointed. The commission's duty would be to plan schemes of development for the city. The commission would have no power to expend money in actual development. This is a function which must continue to be vested in the hands of the city council. To guarantee complete independence of the commission it should have funds provided for it definitely from year to year and should have full power to make public its proposals. After their appointment, the commissioners should arrange for the construction of a master plan for the development of the city, and experts should be engaged to undertake this work. The commission and its staff would then be able to carry on with the amendments and the changes of the new schemes that would be necessary from time to time.

Town planning should be extended beyond the problems of street and traffic adjustment, so that it may provide a basic plan of community development within which intelligent housing and slum clearance schemes can be worked out. Successful housing, either by private or by public enterprise, depends very largely upon effective town planning. There should be formed a sub-committee or a division of the town planning commission to be known as a housing committee. The function of this body would be to study the housing problems, to correlate housing reform with town planning, and generally to work for the improvement of housing conditions.

A provincial town planning bureau should be organized to approve housing schemes for grants-in-aid through relief funds or other funds to assist local communities in preparing housing schemes, to nominate directors to housing corporations to which the province has subscribed money, and to give assistance and

leadership to municipalities in their planning activities.

Health and building legislation should be strengthened to provide greater powers to condemn dwellings that do not measure up to a reasonable minimum standard of health and decency, or to order their improvement up to this standard.

Specifically, the following policies regarding new housing are recommended:—

1. New housing schemes should be undertaken by municipal public housing authorities.

2. Financial assistance should be provided by the Dominion, the province and the municipalities concerned, whether by direct payment or by guarantee.

3. There should be careful survey and planning work done by town planning commissions to determine the proper sites for low-cost housing schemes. Any housing schemes undertaken should be worked as part of a long-term scheme of community development for a larger area. All housing schemes should be based upon modern methods of effective land utilization to provide maximum access for inhabitants to light, air, open spaces, and community amenities.

4. The management of housing schemes should be vested in capable persons who follow methods of dealing with tenants such as

those initiated by Octavia Hill in England, and pursued with success in many European schemes. Management of this kind will go far to prevent people from making slums out of their new quarters.

5. Legislation should be enacted to enable municipalities to acquire properties in an area for re-housing at reasonable prices and without undue delay.

6. Safeguards should be established to ensure that only low wage-earners be given accommodation in housing subsidized by public funds.

In conclusion, we are convinced that there must be Dominion leadership and guidance with respect to housing in Canada. The Dominion can enormously assist housing reform if it will provide funds for housing projects. As an item of permanent policy, it should go far beyond this, providing funds to assist housing projects, as well as providing an expert service of advice and assistance to provinces and municipalities, and generally giving leadership in the field of housing reform. In addition we believe that our proposals, if adopted on a sufficiently ample scale, would eventually do away with a great part of the present unemployment, and the necessity for the payment of large sums of money for relief purposes.

## UNION OF CANADIAN MUNICIPALITIES

### Recommendations on Methods of Unemployment Relief

**F**ORMULATING plans for reorganization as an Association of Dominion Mayors, the Union of Canadian Municipalities recently held its annual convention at Quebec-Three Rivers with a representative attendance of delegates. According to a synopsis of the convention in a recent issue of the *Municipal Review of Canada*, the policy of reorganization will proceed at an early date. It was further intimated that Mayor W. G. Bullbrook, of North Bay, had accepted the presidency on the following conditions: (1) that the U.C.M. shall be reorganized as an Association of Dominion Mayors; (2) that it shall be a parent body to the provincial mayors either organized or otherwise; (3) that its aim would be to further legislation in the interest of municipalities with every effort being made to make personal contact, so that the mayors, knowing one another better, might co-operate more easily; and (4) that reasonable efforts be made to interest all municipalities.

### Resolutions on Relief Matters

Featuring the discussions was the debate on the problem of relief, which resulted in the adoption of two resolutions. The first of these, after pointing out that municipalities were restricted in their sources of revenue, declared: "that the Dominion Government assume the whole responsibility for all necessary relief costs," and further recommended to the Dominion Government "the advisability of their undertaking certain public works in lieu of direct relief, that would be applicable to the location, and that they bear 100 per cent of the cost of such public works after making due investigation as to the location and the municipalities in which this work would be undertaken."

The second resolution advocated a special Relief Tax, as follows: "Whereas unemployment and necessary relief measures are national problems; and whereas a portion of the cost of providing food, clothing, shelter,

medical supplies and means of life is a charge upon taxpayers, many of whom have accumulated heavy tax arrears due to adverse economic conditions which have, in turn, affected the industrial, mercantile and professional sections of our population; and whereas some communities have no unemployment or relief problems whilst others are heavily burdened, thus throwing disproportionate costs on those least able to pay; and whereas many citizens of the Dominion who have, in times of prosperity, made large fortunes which are now preserved and invested in such a manner that they have not shared responsibility with the average home and property owner; therefore be it resolved that in order to make the most equitable spread of this national responsibility a special tax, to be known as the Relief Tax, be levied in such a manner as to produce all necessary funds from those whose incomes can best support this national charge."

The convention also urged as a measure "absolutely essential to the well being and independence of home life" that "the Dominion government be asked to consent to and to recommend the giving of cash instead of the present direct relief."

### Canned Food Production in Canada

Statistics of canned food production in Canada in 1931 and 1932 were published recently by the Dominion Bureau of Statistics as a bulletin in the annual Census of Industry Series. The development in the production of canned foods in Canada, it is stated, showed a remarkable expansion since the beginning of the twentieth century. In 1900 the total value did not exceed \$8,250,000, whilst in 1930 it had increased to more than \$55,000,000 or six and one-half times as much. In 1932 the value of production dropped \$33,000,000. The principal commodities used in the canning industry are fish, fruits and vegetables, milk and meats, whilst the industry itself forms an adjunct of considerable importance to other industries, notably the tin can industry, the wooden box industry and the paper and printing industry.

The development of the canned foods trade has effected great changes in the relation of foods to seasons. Fruits and vegetables of many kinds are to be had at all times of the year, not always with all the flavour of the freshly gathered product, but with much of their original freshness and flavour. The pro-

### Other Recommendations

Among the chief recommendations contained in the other resolutions adopted were:—

Consideration of radio dissemination of information concerning methods and operation of municipal, provincial and federal governments.

Enactment of national legislation for wider powers of taxation for municipalities.

Establishment of a joint commission to inquire into delimitation of the spheres of taxation among the different taxing bodies in order to remove as far as possible any existing duplication of taxes.

Care of immigrant temporary relief by the Dominion Government.

Enactment of unemployment insurance by the Dominion Government.

Enactment of national legislation providing for a minimum wage for men.

Reduction of the age limit for old age pensions from seventy to sixty-five years.

Extension of the benefits of mothers' allowances legislation to include mothers with one child under sixteen.

Indigent hospitalization to be paid for on an equal basis between the municipality and the government.

ducers in the country are provided with an enormously extended market and the consumer in both city and country with cheap and wholesome food in great variety. The consumer also enjoys the protection by frequent inspection under the "Meat and Canned Foods Act, 1907" and subsequent amendments, administered by the Health of Animals Branch of the Federal Department of Agriculture.

The principal statistics of the industry for 1932 are shown in the following table:

PRINCIPAL STATISTICS OF THE INDUSTRIES PRODUCING CANNED GOODS, 1932

1932	Fish, canned	Fruit and vegetable preparations	Condensed and evaporated milk	Meats, canned
Establishments....	442	258	26	25
Capital invested...\$	10,429,754	40,586,892	6,469,831	405,000 <sup>1</sup>
Employees.....	11,164	5,954	745	70 <sup>1</sup>
Salaries and wages \$	1,810,623	4,056,746	968,948	79,000 <sup>1</sup>
Gross value of products.....\$	11,462,577	30,034,537	7,392,897	685,765

<sup>1</sup> Estimated.

## AMERICAN FEDERATION OF LABOUR

### Summary of Proceedings of the 54th Convention

**T**HE fifty-fourth annual convention of the American Federation of Labor was convened at San Francisco, Calif., on October 1, 1934. Mr. Edward D. Vandeleur, president of San Francisco Central Labor Council, after calling the convention to order, presented Archbishop Edward J. Hanna, who gave the invocation. A welcome from organized labour of the State was extended by Paul Scharrenberg, secretary, California State Federation of Labor, while the civic welcome was extended by Hon. Angelo J. Rossi, Mayor of San Francisco.

President William Green, after accepting from the temporary chairman a gavel made by the members of the District Council of Carpenters of San Francisco, thanked the previous speakers for their welcome and continued: "At these annual conventions, when the Congress of Labor meets for the purpose of appraising the past and planning for the future, it is well we restate anew those things for which we stand and those things to which we are uncompromisingly opposed." Speaking of unemployment, the president suggested as a remedy the distribution of the amount of work available among all those who are entitled to work, and stated that the Federation insisted "that the hours of labour in America shall be reduced to a point where the slack of unemployment shall be taken up, and for that reason we stand unflinchingly for the application of the six-hour day and the five-day week in this country." The advantages gained by organized labour under the National Recovery Act were explained by the speaker, who stated further that the program of the Federation provided for unemployment insurance, old age pensions, abolition of child labour, and the development of a comprehensive social program. He asserted the opposition of the Federation to communism and fascism, and all subversive forces that are constantly attempting to undermine free institutions, democracy and liberty.

After the appointment of the convention officers, the report of the credential committee was presented, which showed that there were credentials received from 433 delegates, representing 89 international and national unions, 2 departments, 23 state branches, 76 central bodies, 97 local trade and federal labour unions, and 3 fraternal delegates, one of whom represented the Trades and Labour Congress of Canada, and two the British Trades Union Congress.

*Executive Council's Report.*—In this report, under the heading "organizing work and problems," mention was made of the gains recorded in organization in the mass production industries and industries that are making best use of technical progress. The report further referred to the growth of federal unions in specific industries, such as rubber, automobiles, chemical industries, aluminum, lumber and sawmills, filling stations, et cetera. The total union membership was placed at 5,650,000, and union strength, based on elections held under N.R.A. boards at 12,000,000. A total of over \$40,000,000 was paid in trade union benefits by national and international unions during the year 1933. Under the caption "National Legislation" the report called attention to two bills fundamentally affecting labour, the Industrial Disputes Bill and the Railway Labor Act. Other legislation passed by Congress was referred to in the report, including (1) Restoration of 10 per cent of the 15 per cent wage-cut for government employees; (2) Improving conditions of rural letter carriers; (3) Creation of Adjustment Board to adjust disputes; (4) Retirement system for railroad employees; (5) New Philippine Independence Act which eliminates immigration from the Islands; (6) Bank deposit guarantee extended for a year and raised to \$5,000; (7) Appropriation of \$950,000,000 for unemployment relief; (8) Authorizing the President to appoint boards to adjust disputes in private employment; (9) Appropriation of \$3,000,000 for vocational education; (10) Authorizing construction of 102 naval vessels and 1,100 air crafts; (11) Restoration of automatic promotions for Government employees.

Under the section "Labour in the National Recovery Administration" were shown the effects of the N.R.A. as judged by trends in weekly earnings, hours of work, child labour and home work, enforcement machinery, and coverage of codes. Reference was also made to the various industrial relations boards set up under the National Recovery Act.

Other subjects dealt with in the report were: Unemployment; relief; national income; public education; adult education; jurisdictional problems; progress in special industries; and international.

A supplementary report was submitted upon that section of the executive council's report under the caption "building trades." It mentioned the efforts put forth to find a solution of existing difficulties and a settle-

ment of the differences which had arisen between the Building Trades Department of the A.F. of L. and the United Brotherhood of Carpenters and Joiners of America, the Bricklayers, Masons and Plasterers International Union, and the International Brotherhood of Electrical Workers.

During the Wednesday morning session the reports of the fraternal delegates to the British Trades Union Congress and the Trades and Labour Congress of Canada were presented, and later in the day they addressed the convention.

According to the report of the audit committee, total receipts, including balance brought forward, amounted to \$1,472,565.60, expenditures totalled \$906,859.24, leaving a balance on hand as of August 31, 1934, of \$565,706.36.

*Committee on Organization.*—This committee in its report made reference to the many subjects dealt with in the executive report under the caption "Organizing Work and Problems." While difficulties were met with in organizing the workers in certain industries, it was stated that 800,000 new members had been admitted to the labour movement during the year ending August 31, 1934.

The following resolutions were concurred in by the Committee and adopted by the convention: (1) Favouring the organization of agricultural and packing and cannery workers in unions affiliated with the American Federation of Labour; (2) favouring further organization work among hotel, restaurant and cafe employees and seeking the co-operation of all organizations affiliated with the A. F. of L. in attaining this objective; (3) Authorizing the appointment by President Green of a committee of five to investigate the conditions of the coloured workers of the United States and report to the next convention.

*Committee on State Organizations.*—The report of this committee reviewed the events of interest to workingmen in Puerto Rico. It also urged state federations of labour to press for the enactment of minimum wage laws.

*Committee on Executive Council's Report.*

—In opening its report, the committee referred to the large decline in fraternal contributions, which was attributed to the shrinking incomes of the employed rather than to a lessening of the needs of the members. The affiliated organizations were urged to continue these benefit features, thereby relieving to a degree the suffering and distress among the membership. Pleasure was expressed at the increased number of members working the five-day week and it was recommended that the executive council and affiliated organi-

zations continue their efforts to secure the shorter work week for all workers, which in the opinion of the committee was the only effective remedy for the prevailing unemployment situation.

In referring to that part of the executive report under the heading "organization and collective bargaining" which subject is covered in section 7A of the National Recovery Act, the committee commented on the experiences of the industrial relations boards in the cotton, textile, bituminous coal, automobile, petroleum and construction industries, and it was the judgment of the committee that practically all of the more recent strikes which have occurred can be charged to: (a) The failure of employers to recognize the right of employees to organize into *bona fide* labour organizations of their own choosing, without interference, or coercion of employers; (b) The discrimination and discharge of employees by employers, because of joining *bona fide* labour organizations; (c) The refusal of employers to recognize and make effective the principle of collective bargaining; (d) The refusal of employers to negotiate agreements with the representatives chosen by the employees, members of *bona fide* labour organizations; (e) The failure of employers to co-operate with the agencies of the Government and the employees in setting up machinery to promptly hear and decide disputes; (f) The refusal of employers to observe the Labour provisions of the law, or place in effect decisions rendered by constituted authority that were favourable to employees, while at the same time demanding and accepting all of the benefits accruing to industry under the same law.

The officers of national and international unions were urged by the committee to be prepared to meet any and all new conditions developing out of the present financial situation referred to in the executive report under the heading "National income."

Regimentation of workers should not be allowed a place in American industry, the committee declared, and this practice, wherever encountered, should on every occasion be condemned and protested by the representatives of labour.

In regard to the jurisdictional dispute between the brewery workers and the Teamsters, Engineers and Firemen, the committee's recommendation that the A. F. of L. continue their efforts to bring about a condition under which the decision of the Washington convention will be observed and complied with, was adopted by the convention on a roll call vote.

*Committee on Shorter Work Day.*—After reviewing the unemployment situation and its causes at considerable length, the committee recommended that the convention strongly reaffirm its endorsement of the six-hour five-day, work week and record itself in advocacy of and as proposing to the country the universal adoption without delay of this program. And further that such reduction in labour hours should carry with it no reduction in weekly pay. The committee also recommended that the executive be directed to spare no effort to have legislation enacted that would give full effect to the 30-hour week. These recommendations were unanimously adopted by the convention. Before continuing, the chairman of the committee requested President Green to speak on the subject as he felt that it was of such importance to all the people of the country that it should not be passed over without any impressive record.

President Green, in speaking on the subject of the short work week, declared that the American Federation of Labor "pioneered in offering this proposal, not for the purpose of enabling men to work less, but for the purpose of creating work opportunities for more and as a remedy for unemployment. And it is upon that sound foundation that we eternally and immovably stand." Continuing, the president said: "And so that there may be no misunderstanding here or elsewhere, I wish to declare with all the emphasis that I possess that it is the unalterable, uncompromising purpose of the American Federation of Labor to drive onward and forward until the six-hour day and the five-day week are universally accepted and universally applied. We shall secure it by one of two methods, or perhaps through the application of both. We shall secure the six-hour day and the five-day week through the mobilization of our economic strength, through its continuous pressure upon industry and upon the owners of industry, or we shall secure it by legislation enacted by the Congress of the United States."

President Green stated further that the officers of the International Union of Elevator Constructors had already negotiated an agreement with their employers providing for the 6-hour day and 5-day week for that industry, with the reservation in the agreement that the Elevator Constructors' organization is at liberty to support any other building trades' organization that may determine to make a fight for the shorter work day and week. "There is the position of the American Federation of Labor," the president concluded; "we offer it as a challenge to industry and to the government. Out from this convention will go a determined, united army, mobilized

and strengthened and enlisted for the purpose of driving home the acceptance of the six-hour day and the five-day week, and nothing will stop us in our realization of this economic reform."

The following resolutions in which the committee on shorter work-day concurred were adopted by the convention: (1) Favouring the enactment of Federal legislation reducing working hours without reducing wages; (2) supporting the movement for an 8-hour day with one day off in seven for all fire fighters in the United States and Canada. The report of the committee as a whole was adopted.

*Report of Committee Upon the Action of the Previous Convention Relating to the Boycott on German Goods and German Services.*—This committee in its report set out the reasons why the American Federation voted to use the boycott against German goods and services and presented statistical data to show the result attained. The following recommendations made by the executive council to the convention were concurred in by the committee: "(1) That we renew our vigorous protest to the crushing of trade unions and the enslavement of the erstwhile free workers of Germany; (2) That we renew our pledge to fight 'by moral and economic force' against the military brutality imposed upon our fellow men; (3) That we, as trade unionists, continue to employ in this fight the traditional trade union weapon, the boycott against the Nazi government, until labour in Germany is again made free and the persecution authorized by this Nazi government of our fellow men—simply because of their race or creed—shall cease; (4) That we heartily endorse the appeal made by President Green in his letter of December 26, 1933, to all organized labour for definite, co-ordinated action to make thoroughly effective this boycott of Nazi-made goods and Nazi-controlled services."

*Union Labels.*—The committee on union labels paid tribute to the memory of John J. Manning, for many years chairman of this committee, who died during the past year. Two resolutions were submitted to the committee and on its recommendation were adopted by the convention: (1) That a united and emphatic demand for the union store card be made by members of all affiliated organizations and that an organizing campaign be carried out in all branches of retailing; (2) calling upon the officers, members and friends of the labour movement to patronize only those places where union shop cards and buttons are properly displayed.

*Committee on Legislation.*—This committee expressed gratification at the gains made in

securing legislation beneficial to the workers and recommended continuation of efforts in this direction. In comment on that section of the executive report dealing with rural letter carriers, air mail legislation and Government employees, the committee drew attention to the effectiveness of the American Federation of Labor as a protection for government employees and for maintaining proper standards of employment in government service. Some criticism was expressed by the committee of the lack of progress in naval vessel and aircraft construction as a means of relieving unemployment, and highway construction as an emergency program for re-employment was recommended.

In dealing with the subject of convict labour, attention of the delegates was drawn to the fact that convict-made goods were allowed to carry the N.R.A. label and they were asked to instruct the executive council to protest against this practice. The foregoing recommendations, as well as the following resolutions approved of by the committee were adopted by the convention: (1) immediate restoration of wages, salaries and allowances of government employees and that funds available be sufficient to meet the restored payroll; (2) opposing the use of cost-of-living standards as a basis for determination of wages or salary; (3) that prevailing rates of wages prescribed by the various trade unions in the various industries be paid on government contracts awarded to private business and commercial concerns; (4) in favour of higher government standards for employees in its employ; (5) optional retirement after 30 years; (6) establishment of a civil service court of appeal; (7) approval of the Employees' Compensation Commission; (8) retirement for Panama Canal employees after 25 years; (9) protesting against legislation affecting the civil service status of employees in the prohibition bureau, United States Department of Justice; (10) right of vote for citizens of District of Columbia; (11) that federal legislation be enacted to prohibit enlisted men doing building construction work or enlisted personnel from doing repair work on naval vessels; (12) to secure such clarification of the National Industrial Recovery Act, especially Section 7A, as would make official misinterpretation impossible and definitely outlaw company unions; (13) that the age limit for temporary employment in the United States Civil Service be raised to 55 years; (14) advocating legislation to prevent lynching; (15) that the United States exclusion laws and contract labour laws be made applicable to seamen; (16) in favour of

greater protection for United States seamen by restoring provisions of Seamen's Act.

*Committee on Industrial Relations.*—To this committee were referred two resolutions bearing on the labour policy of two concerns. It was recommended that every assistance possible be given the workers with a view of correcting the conditions complained of. In both cases the recommendation of the committee was adopted.

*Committee on Education.*—This committee drew attention to the program of retrenchment in public education, which it was claimed, "has reduced school efficiency and educational opportunity beyond the point of retrenchment to the point of extinction." After reviewing the results of the alleged retrenchment in public school education the committee stated: "And now the organized labour movement of America, the American Federation of Labor, wholeheartedly and unreservedly pledges itself to the defence of the public school system of America, to its full and complete restoration, to the maintenance of educational standards for the development of character, culture, and citizenship, and to the principle of equal educational opportunity for all the children of America regardless of race, creed, or social status." The committee also declared vocational education to be an essential part of a socially balanced educational program. The convention adopted, on the recommendation of the committee, the following resolutions in favour of: federal aid to schools; the extension of free high school and college educational facilities; cessation of the policy of retrenchment in public education; development of the educational program of the Civilian Conservation Corps and the correlation of their vocational training with public employment agencies; closer co-operation between the educational authorities and the Workers' Education Bureau.

The committee further urged the members of organized Labour to unite in an effort to secure ratification of the proposed Child Labour Amendment to the constitution by a sufficient number of State Legislatures during the coming year.

*Committee on Adjustment.*—To this committee was referred the supplementary report and decision of the executive council in connection with the appeal of representatives of the United Brotherhood of Carpenters and Joiners of America, the Bricklayers, Masons and Plasterers' International Union of America, and the International Brotherhood of Electrical Workers, from the decision of the Building

Trades Department with reference to affiliation of these organizations with the Department. After hearing those interested in the case, as well as representatives from other organizations, the committee were of the opinion that the following recommendation of the council was the only hope of adjusting the differences and so recommended:—

The Executive Council will continue its efforts to compose the differences existing between the Building Trades Department and the United Brotherhood of Carpenters and Joiners of America, the Bricklayers, Masons and Plasterers' International Union of America, and the International Brotherhood of Electrical Workers of America, and to reach a settlement of the differences which exist. In the event a settlement is brought about and an agreement reached satisfactory to the executive officers of the Building Trades Department and the three organizations named, it shall be approved and accepted by the Executive Council of the American Federation of Labor.

In the event, however, that no such agreement is reached a convention of the Building Trades Department shall be called to meet at the headquarters of the American Federation of Labor in the City of Washington within forty-five days from the adjournment of the convention of the American Federation of Labor, for the purpose of transacting the business of the Building Trades Department in a legal manner and in accordance with the laws, principles and policies of the American Federation of Labor; the call for this convention to be issued by the President of the American Federation of Labor to all organizations affiliated with the Building Trades Department as determined by the Executive Council of the American Federation of Labor; the President of the American Federation of Labor to preside at said convention, and the action taken at said convention to be regarded and accepted as the legal action of the 1934 convention of the Building Trades Department. The business transacted at this convention in accordance with the laws of the Building Trades Department shall be regarded as legal and binding by the American Federation of Labor upon all affiliated organizations, and the officers elected by the convention shall be recognized as the legally elected officers of the Building Trades Department.

After a discussion which occupied the greater part of two sessions the recommendation of the committee was adopted after several amendments had been voted down.

*Committee on Laws.*—To this committee were submitted two resolutions for the enlarging of the executive council, two in regard to amending the laws of the Building Trades Department, and three involving a reduction and re-apportionment of *per capita* tax. For the first two resolutions, the committee substituted the following, which was adopted by the convention after a lengthy discussion, and after several amendments had been voted down:

"The officers of the Federation shall consist of a president, fifteen vice-presidents, a secretary,

and a treasurer, to be elected by the convention on the last day of the session, unless otherwise determined by the convention, and these officers shall be the executive council."

Non-concurrence was recommended in resolutions favouring a lower *per capita* tax and this was adopted.

The two resolutions coming from the Building Trades Department in regard to changing its constitution were not dealt with owing to the fact that the convention at an earlier session upheld the decision of the executive council that the convention of the Building Trades was not legally held.

*Committee on International Labour Relations.*—In the report of this committee mention was made of the appointment by President Roosevelt, as authorized by resolution of the Senate, of John L. Lewis as labour representative in the United States delegation to the International Labour Conference held in Geneva, Switzerland, June, 1933. It was the opinion of the committee that closer contact with the International Labour Organization would benefit the A. F. of L. The committee recommended that the A. F. of L. through the Pan-American Federation of Labor continue to offer counsel and support to those organizations that are seeking the welfare of wage earners along constructive union principles. The convention adopted the report of the committee.

*Committee on Local and Federated Bodies.*—To this committee was referred a resolution urging the affiliation of local unions with state and central bodies. The subject matter of this resolution was approved by the committee and its recommendation to that effect was adopted by the convention.

*Committee on Building Trades.*—Satisfaction was expressed by this committee that an act had been passed by the federal government which would prevent contractors and other employers compelling employees to "kick-back" part of their wages in order to hold their jobs. The committee urged the Executive Council to endeavour to have the administrator of the Federal Housing Act set up immediately the machinery which will provide loans to launch the housing projects as provided for in the Act. The report of the committee was adopted.

*Committee on Union Labels.*—The committee expressed approval of that part of the executive council's report dealing with "Union Labels," and made the following recommendation, their report being adopted by the convention:—

Let every craft or organization using the label see to it that the same is registered in every

State in the Union for the protection which it will insure and for the educational value to the general public which is bound to follow.

**Resolutions.** The committee on Resolutions in commenting on that portion of the executive report under the heading "Labour and the National Recovery Administration," alleged that only a slight advance had been made during the year ending July, 1934. Employment in the sixteen industrial pursuits, it was stated, showed increase in employment of 9.8 per cent with average weekly wages up 6.4 per cent, and an increase in the cost of living of 6.3 per cent.

The committee declared that the N.R.A. had made a distinct gain in the elimination of child labour in many industries and that home work for women and children had been measurably improved by the standards set up under the codes.

The committee endorsed the opinion of the executive "that the major defects of the N.R.A. had been in its enforcement machinery," and that "the condition of improving the labour provisions of the codes depends upon first, an increase in wages; second, a drastic shortening of working hours; third, an accurate system of reporting, and fourth, labour representation."

Dealing with unemployment the committee joined with the executive in hoping for such a solution as may "avoid a radical departure from our present order," and submitted that "employment opportunities for all able and willing to work must be had and our army of unemployed must not be allowed to become a permanent burden upon the community." The necessity of a sound program of old age pensions was reaffirmed by the committee, as was also the need for adequate medical care for all in the low income group.

The committee also approved of that part of the executive report referring to the subject "wages in Canada" in which the opinion was expressed that as a result of an agreement between the railway managements and employees there would be closer co-operation between the standard railway organizations.

In lieu of fourteen resolutions dealing with the form of organization in the American Federation of Labor, the committee, after reviewing the condition prevailing in mass production industries, recommended the following:—

To meet this new condition the Executive Council is directed to issue charters for national or international unions in the automotive, cement, aluminum and such other mass production and miscellaneous industries as in the judgment of the Executive Council may be necessary to meet the situation.

That the Executive Council shall at the earliest practical date inaugurate, manage, pro-

mote and conduct a campaign or organization in the iron and steel industry.

That in order to protect and safeguard the members of such national and international unions as are chartered, the American Federation of Labor shall for a provisional period direct the policies, administer the business and designate the administrative and financial officers of such newly organized unions.

After considerable discussion the convention adopted the recommendation of the committee.

Eleven resolutions were grouped under the heading of social insurance and the committee recommended the endorsement of the general proposals for social insurance approved by previous conventions. This was approved by the delegates.

On the committee's recommendation the following resolutions were adopted by the convention:—

Equal pay for equal work.

Barring all commuting of workers from countries bordering the United States for purposes of employment.

Increase in maximum of relief per family.

Declaring for state fund workmen's compensation legislation.

Instructing the executive council to continue its efforts to have a practical and far-reaching housing program put into effect.

Approving of the Ohio Workmen's Compensation Act as the model Workmen's Compensation law.

That dramatization of labour history, statements of the principles and purposes of the American Federation of Labor and addresses dealing with labour problems be prepared for electrical transcription.

Increasing wages and decreasing hours of labour on the Boulder Dam project.

Adoption of a code for the book-keepers, stenographers and accountants' union.

Adoption of Child Labour Amendment.

That the executive council prepare necessary legislation for the regulation of apprenticeship and the adequate training of apprentices.

Securing of a national cleared radio channel for radio station WCFL, Chicago, Ill.

That public employees have the right to organize.

That telegraph and telephone companies be compelled to comply with the law and give more reasonable rates and improved service to consumers.

Enactment of a federal anti-lynching law.

Safeguarding of the American trade union movement from racketeering or gangsterism.

That the American Federation continue its efforts to secure the unconditional pardon of Tom Mooney and Warren K. Billings.

A code for telegraph communications industry.

That Public Works Administration should not employ non-union workers.

A civil service court of appeals.

Protesting against the abrogation of the building trades agreement covering Public Works Administration work, relating to employment agencies.

That cases of non-compliance of employers with decisions of N.R.A. Labor Board be placed before President Roosevelt.

Appointment of a committee to devise means of providing for workers displaced by automatic machinery.

Opposing any extension of sales taxation and urging the extension of income and inheritance taxes.

Equal wages for equal work, regardless of sex, race or colour.

Revival of the Civil Works Administration.

A code for the zinc industry.

Study of health insurance by the executive council of the A. F. of L.

Participation of the A.F. of L. in campaigns to promote the program of the Federal Housing Administration.

Adequate protection for all wage-earners from unfair competition, from price cutting, and from all unfair practices.

Labour representation on emergency relief projects committees.

Union co-operation in whisky and wine industry.

A code for the barber trade.

A resolution of sympathy to be transmitted by President Green to A. G. Walkden, fraternal delegate from the British Trades Union Congress, on the death of his wife was unanimously adopted by the convention.

*Address of Frances Perkins, Secretary of Labour.*—After thanking the President and delegates for the cordial welcome extended to her, Secretary Perkins stated that it was not the place of a government official to advise the Congress as to what should be its internal policies but rather to listen to the delegates statement on their problems, to hear, digest, reconcile and to transmit for further consideration the thoughts, ideals and aspirations of the working men and working women as represented in the American Federation of Labor. Miss Perkins was of the opinion that "insofar as the pay envelopes of America are full, insofar will America be a prosperous, successful and happy country." "It is in the building up of this great internal market of wage earners and farmers that the future prosperity, and future hope and future effectiveness of this great constitutional democracy

which we call our country and to which we are all devoted lie." She reviewed the events of chief interest during the past year, more especially with reference to the National Recovery Administration and stated the position of Labour and the Labour Advisory Committee in relation to this administration. Under the N.R.A. Labour had to assume new responsibility, but the speaker expressed confidence that the Federation would discharge this new responsibility with its usual statesmanship. A stable and healthy industrial life cannot be built, she declared, unless a sound and co-operative relationship exists between those who manage industries and those who labour for them.

The Secretary referred to the establishment of boards of arbitration and conciliation for the purpose of keeping industrial peace for the benefit of employers and labour and in the public interest. In dealing with the subject of strikes she compared the first half of the year 1919 with the first half of 1934, both years being years of recovery after a depression, and showed that in 1919, 1,300,100 men were involved in strikes, while for 1934 there were only 523,000. About two-thirds of the subjects coming before the National Labour Board were connected with alleged violations of Section 7A of the National Recovery Act, which section gives to labour the opportunity to bargain collectively, and which provides that labour shall be free from coercion or influence of employers in choosing its representatives for collective bargaining. The various regional conferences and the inter-state conference on labour laws held in Washington last March held under the auspices of the Department of Labour were forward and significant steps and in the speaker's opinion should go far toward bringing about better and more uniform state labour legislation.

The Secretary announced that Labour Service and Labour Standards Division of the Department was now functioning, its duty being to study the problem of industrial health and safety, wages, working hours, housing, education and many other factors bearing upon the workers' life. She mentioned the program of social security which had been referred to by President Roosevelt in a message to Congress and which are now being worked out by a commission. The program would include the following features: unemployment insurance—stabilization of incomes to the aged—assistance to those who are put in the poverty class because of invalidism and illness—development of continuing and continuous work, and those based on social needs.

*Other Addresses.*—The address of Mr. Harold Butler, Director of the International Labour Organization, Geneva, is outlined elsewhere in this issue. Other addresses were delivered by the following speakers: Mrs. Mary E. Ryder, president of the National Federation of Trade Union Auxiliaries; Mr. Max Winter, former Senator of the Austrian Parliament; Hon. Richard Welch, United States congressman; Andrew Furuseth, International Seamen's Union of America; Spencer Miller, Jr., secretary, Workers' Education Bureau; Hon. Joseph A. Padway, general counsel, Wisconsin State Federation of Labor; Senator James J. Davis; Sol. Rosenblatt, Divisional administrator under the N.R.A.; Dr. A. Meiklejohn, Director, Experimental College of the University of Wisconsin; Hon. Charles R. Mabey, Vice-Commander, American Legion; Francis J. Gorman, Vice-president, United Textile Workers of America; Walter M. Citrine, President, International Federation of Trade Unions and general secretary of the British Trades Union Congress; B. Charney Vladeck, general-manager, *Jewish Daily Forward*; James C. Vanzant, Commander, Veterans of Foreign Wars of the United States.

President Green made presentations to the fraternal delegates from the I.F.T.U., the British Trades Union Congress, and the Trades and Labour Congress of Canada.

*Election of Officers.*—The election of officers resulted as follows: President, William Green, Washington, D.C.; First vice-president, Frank Duffy, Indianapolis, Ind.; Second vice-president, T. A. Rickert, New York, N.Y.; Third vice-president, Matthew Woll, Washington, D.C.; Fourth vice-president, John Coefield, Washington, D.C.; Fifth vice-president, A. O. Wharton, Washington, D.C.; Sixth vice-president, Joseph N. Weber, New York, N.Y.; Seventh vice-president, G. M. Bugniazet, Washington, D.C.; Eighth vice-president, George M. Harrison, Cincinnati, Ohio; Ninth vice-president, Daniel J. Tobin, Indianapolis, Ind.; Tenth vice-president, W. L. Hutcheson, Indianapolis, Ind.; Eleventh vice-president, Major L. Berry, Pressmen's Home, Tenn.; Twelfth vice-president, John L. Lewis, Washington, D.C.; Thirteenth vice-president, David Dubinsky, New York, N.Y.; Fourteenth vice-president, Harry C. Bates, Washington, D.C.; Fifteenth vice-president, Edward J. Gainer, Washington, D.C.; Treasurer, Martin F. Ryan, Kansas City, Mo.; secretary, Frank Morrison, Washington, D.C.

Fraternal delegates to the British Trades Union Congress, Henry F. Schmal, St. Louis, Mo., and Dennis Lane, Chicago, Ill.

Fraternal delegate to the Trades and Labour Congress of Canada, Jack O'Connell, San Francisco, Calif.

The choice of convention city for 1935 was referred to the executive council.

## RECENT LABOUR UNION ACTIVITIES

### Ontario and Quebec Conference of Typographical Unions

The twenty-third annual convention of the Ontario and Quebec Conference of Typographical Unions was held in Toronto recently with a representative attendance of delegates from provincial centres.

Dealing with the application of the NRA codes in the United States the officers' report stated that while the codes were a factor in enforcing proper working conditions in the States, yet in Canada "it is left almost solely to organized labour to establish the conditions that make for the standard of living." The report also pointed out that "the continued agitation of organized labour for a system of contributory unemployment insurance seems to be bearing fruit." By a resolution adopted later in the proceedings the Dominion Government was urged "to immediately establish a national system of contributory unemployment insurance."

The apprenticeship situation as it affected the printing trades was reviewed in a report by the vice-president in charge of apprentices. Reporting on the matter, the committee on

officers' reports advocated a reduction in the quota of apprentices and regretted "there was no reference to the advisability of a standard contract with uniformity of matrix laws and general working conditions being fostered by the unions."

The strike in the London newspaper offices formed the subject of an adopted resolution which saw in the dispute "a concerted and determined effort on the part of certain unfair employers to destroy not only the International Typographical Union but the international trade union movement in Canada." The resolution requested the assistance of the Ontario Government to bring the struggle to an end.

Another resolution urged that the Collective Labour Agreements Extension Act of Quebec be given a fair trial by the Quebec local participating therein. All information concerning the operation of the law is to be disseminated among affiliated locals. The Quebec Government was also asked to amend the law so as to provide for limitation of apprentices in the printing and other trades.

## International Typographical Union

Officer's reports presented at the seventy-eighth annual convention of the International Typographical Union held recently in Chicago made reference to the position of Canadian locals. In particular, the report of the second vice-president, Francis G. Barrett, dealt with the Canadian jurisdiction. Referring to the application of the five-day week in Canada, this official declared that it caused members of the union executive considerable trouble, owing to certain conditions which he enumerated as follows:—

"First, we are confronted with a strong minority, who do not favour the law. Second, there is a strong nationalists' movement for a national Canadian typographical union. Third, there appears to be a concerted action on the part of employers to eliminate from Canada the International Typographical Union and delete from contracts any reference to the International organization."

That part of the report dealing with Canadian membership, finances, etc., was as follows:—

"The membership in Canada is a little less than 5,000, divided into forty-six local unions throughout the entire Dominion. From May 31, 1919, to June 20, 1933, there was expended

for defensive purposes on Canadian members \$4,740,798.55, while the income from the same source which could be allotted for that purpose was \$1,077,588.09. The Canadian members represent about 6 per cent of the I.T.U. membership. It is important to note that in the fourteen years mentioned above there was \$17,107,124.86 spent in the entire jurisdiction of the International Union. Of this amount \$4,740,798.55 was paid to our Canadian brothers, so that we find in the last fourteen years 6 per cent of the membership received 28 per cent of total disbursements for defence." It was explained that these amounts did not include the fraternal features such as pension and mortuary.

In the report of the secretary-treasurer, tabular statistics were presented of the receipts from Canadian unions and the benefits paid to Canadian unions during the period June 21, 1933, to June 20, 1934. The total receipts from Canadian locals, applied to various benefits, amounted to \$145,977.92, while the total amount of benefits expended in Canada was \$144,224.92.

Montreal was selected as the convention city for 1935.

## Federated Association of Letter Carriers

The twenty-fifth convention of the Federated Association of Letter Carriers was recently held at Ottawa with a representative attendance of delegates.

Prior to the business proceedings, the convention was welcomed by Mayor P. J. Nolan, of Ottawa; Tom Moore, President of the Trades and Labour Congress of Canada; V. C. Phelan, President of the Civil Service Federation of Canada; and A. Frechette, Postmaster of Hull, Que. During the convention Mr. Phelan addressed the delegates on matters more directly pertaining to the welfare of the organization and the Federal Civil Service. Mr. E. J. Underwood, Chief Post Office superintendent, also spoke to the delegates as the representative of the Department.

The following recommendations, among others, were contained in the resolutions adopted:

Shortening of the period during which holidays may be taken to eight months instead of twelve, namely from April 1, to November 30.

Restoration of statutory increases as from April 1, 1932.

Filling of vacancies at the salary of the grade.

Payment of overtime in cash at the rate of time and one-half.

Strict adherence to seniority rights in promotions made locally or through the Department.

Adoption of a more uniform size of envelope to facilitate the handling of first class mail.

"That all investigations demanded by the officers of a postal station be not made in the present established manner of demanding the version of the accused, but to control and verify the accusations brought by said officers."

That the part time employee who has not outside position be placed at the head of the list of those eligible for a permanent position.

The placing on each carriers' walk of suitable receptacles for relayed mail (provided with lock and key) so as to dispense with the carrying of unnecessary loads.

That where a letter carrier has more mail than can comfortably be carried, bundles be sent out by vehicle.

The printing of address labels at the top of magazine covers and not upside down.

That all misdemeanour, major or minor, be punishable to the individual and not to the service as a whole.

The prohibition of mail matter wrapped in cellophane owing to the impossibility of redirecting.

The granting of reduced rates of postal workers on the government railway, and that the association endeavour to receive from the railway companies a fare of one cent per mile for carriers and their families.

### International Photo-Engravers' Union Canadian Conference

Commencing October 13, a two-day session of the Canadian Conference of the International Photo-Engravers' Union was held in the Royal York Hotel, Toronto. Delegates were present from Montreal, Ottawa, Toronto, and Winnipeg, and the meeting was presided over by W. C. Golby, third vice-president of the international organization.

In his opening address, the chairman advised the delegates that the calling of the conference was the result of a suggestion contained in a resolution sponsored by F. D. Smith, Toronto, and adopted by the delegates at the recent convention of the International Photo-Engravers' Union in Indianapolis, Ind. The delegates were further advised that the object of the conference was to improve the condition of Canadian locals by solving the problems confronting them. He suggested that the following matters should be taken up and discussed: The open shop "menace"; the number of competent workers to be found in non-union shops; the organization of non-union men and past members of the union; agreements terminating next year; ladies' auxiliaries; permitting union members to work in non-union shops; and unemployment, and unemployment benefits.

Reports of conditions in each of the cities represented were presented and showed that steady progress both financially and in the matter of unemployment had been made since 1932, which was considered the worst year from a financial standpoint. The report of the Montreal delegate indicated that the sum of \$41,209.29 had been paid out to members out on strike or unemployed in a period of a little over three years by this local which had an average membership of 112 during the period mentioned.

There was considerable discussion on clothing for letter carriers, and also a revised constitution was adopted.

The officers elected were: President, J. W. Fitchett, Toronto; Vice-president, Joel Sauve, Montreal; Secretary-treasurer, J. J. Reaves, Toronto.

Quebec City was unanimously selected as the convention city for 1935.

The conference went on record as being in favour of Class "A" membership plan (a special and classified membership at a nominal initiation fee with limited dues and exemption from international and local assessments), to be left to the discretion of each local committee as to when it should be put in force.

A suggestion that an effort be made to have all future agreements terminate at the same time was approved by the conference. No definite action was taken in regard to permitting members to work in non-union shops, but the question is to be given serious thought by the delegates.

A message of greeting and assurance of international co-operation was received from International President Edward J. Volz.

After a full discussion the principle of ladies' auxiliaries for Canada was endorsed.

### New Labour Organizations in Canada

The Trades and Labour Congress of Canada has issued a charter to a Trades and Labour Council in the town of Fort Frances, Ontario, the chief officials being as follows: President, Albert W. Locking; secretary, Bruce F. Warner.

Two federal labour unions in Toronto were chartered recently by the Trades and Labour Congress of Canada, namely:

Toronto Radio and Electrical Appliances Employees Federal Labour Union No. 25; president, A. Gutherless, 28 Mechanics Ave., Toronto; recording secretary, Miss E. Lefevre.

Toronto Optical Workers Federal Labour Union No. 42; president, D. Oakley, 44 Doncaster Ave., Toronto; recording secretary, W. McGuire, 26 Wolfrey Ave., Toronto.

### New Trade Union Regulations in Brazil

A new system of trade union regulation was promulgated last July by the provisional government of Brazil to take the place of an Act passed in 1931. Trade unions are defined in the decree as organizations of the economic and vocational groups of the population. Their function will be to defend the interests

of the group or trade and those of their members, to co-ordinate the rights and obligations of employers and workers in relation to economic and social conditions and to co-operate with the Government in the study and solution of problems directly or indirectly affecting the interests of particular groups. In their

capacity as organs for the defence of particular trades, the unions are entitled to approach the administrative and judicial authorities not merely on their own behalf or on that of their members, but also as representatives of the trade or group. They may establish and administer employment agencies, schools, and all other institutions for social welfare and relief, with the exception of co-operative institutions, which fall within the province of the co-operative societies alone. As organs of the co-ordination of the rights and obligations of employers and workers, the trade unions will have the right to conclude or approve collective agreements and to co-operate, in conciliation boards and labour courts, in settlement of disputes between employers and workers.

The following classes of persons are entitled to form unions: employers carrying on an agricultural, industrial or commercial activity of the same character; workers employed in the same or similar or kindred trades; persons engaged in a liberal profession, and persons working on their own behalf. The right to form trade unions does not extend to public servants other than manual, professional or technical workers in the service of an agricultural, industrial or transport undertaking managed by the Federal Government, a State Government, or a municipality. The exception made by the former Act in the case of domestic servants does not appear in the new Decree. It may be added that only workers in possession of a trade book, issued to them in accordance with law, are entitled to form trade unions or to become members thereof.

The conditions with which unions must comply are not the same for employers as for workers. Employers' unions must include at least five undertakings or, if this number is not reached in a particular locality, at least ten individual members. Workers' trade unions must be composed of at least one-third of the workers practising the same trade in the locality concerned.

The exercise of administrative and representative functions must in all cases be honorary. But if a person has to leave his work in order to carry out his functions as an officer of a union, the general meeting may in case of necessity grant him an allowance, which may not exceed his earnings in the exercise of his own occupation. An officer of a union may not hold any lucrative post under the union. The Decree prohibits all political or religious propaganda by unions and all propaganda on behalf of candidates at an election in which, by reason of its nature or its object, the union is not directly concerned.

Membership of unions is open to all persons of either sex over 14 years of age who are engaged in the occupation concerned and comply with the conditions laid down by the rules and by law, unless their incapacity is regularly proved. A member does not lose his rights when he abandons the exercise of his trade through retirement, invalidity or unemployment. Persons involuntarily unemployed are not obliged to pay subscriptions, but may not hold any executive office.

The Decree makes provision for the right to establish local councils of unions representing different occupations and federations of unions belonging to the same occupational group and for the right to combine three or more federations in a confederation, which must have its headquarters in the capital of the Republic.

A trade unionist who loses his employment by reason of the abolition of his post shall be given preference, other things being equal, when the post is restored. Employers are prohibited from taking any action against workers on the ground of their activities as trade unionists. If a worker is discharged in these circumstances, he is entitled to an allowance equivalent to as many months' wages as he has years of service. If his wage is withheld or reduced, he will be entitled to payment in full. In addition, the employer may be punished by a fine.

Workers organized in recognized unions must be given preference for employment in the public services and on public works.

Measures undertaken by non-official agencies in the United States to improve the conditions of employment of domestic workers are described in Bulletin No. 112 of the Women's Bureau, U.S. Department of Labor. It is shown that a considerable number of placement agencies, including educational institutions and welfare organizations such as the Young Women's Christian Association, have developed standards for conditions of household work. Recommendations as to the observance of proper conditions are made to the prospective employer, or special types of placement procedure are adopted. Most of the standards for full-time workers, junior or adult, contain some provision setting a minimum wage. Hours of work are not usually specified, though some agencies try to restrict the working hours of adult workers to 8 or 10 hours a day, and to enable junior workers to attend classes. Most of the standards contain a provision regarding time-off, and require that the employee shall have a private room.

## RECOMMENDATIONS SUBMITTED TO ONTARIO GOVERNMENT BY JOINT LEGISLATIVE COMMITTEE OF RAILWAY BROTHERHOODS

**R**EPRESENTATIVES of the Ontario Joint Legislative Committee of the Railway Brotherhoods met the Ontario Government on October 19 and submitted their memorandum of proposed legislation. The Brotherhoods were represented by: A. J. Kelly and J. L. Lebreche, Railroad Trainmen; A. H. Nethery, Railroad Conductors; J. T. Wilson, Locomotive Engineers; and W. L. Best and H. B. Crawford, Locomotive Firemen and Enginemen. The representatives of the government present were: Hon. Mitchell F. Hepburn, Premier and Provincial Treasurer; Hon. Harry C. Nixon, Provincial Secretary; Hon. Arthur Roebuck, Attorney-General and Minister of Labour; Hon. David A. Croll, Minister of Municipal Affairs and Public Welfare; Hon. T. B. McQuestin, Minister of Highways and Public Works; and Hon. Peter Heenan, Minister of Lands and Forests and Northern Development.

*Mother's Allowances Act.*—Under this legislation the Brotherhoods urged a number of amendments "in order to make less restrictive the conditions under which allowances may be made." Enumerating these, the memorandum requested the following changes in the Act: (1) In cases of desertion the law at present stipulates five years as the waiting period before a mother may receive an allowance. It was asked that this be reduced to two years. (2) Instead of a residence qualification of two years, one year was urged as being sufficient to qualify. (3) At present, only mothers with two or more children under sixteen years of age, and foster mothers with two or more orphan children are eligible for allowances. It was requested that this be amended so that mothers with one child could become beneficiaries.

*British North America Act.*—It was urged that the Ontario Government pass at its first session a resolution favouring an amendment to the British North America Act restricting the powers of the Senate to veto a bill passed by the House of Commons more than twice, in harmony with the present practice of the Parliament of Great Britain.

*Workmen's Compensation Act.*—Several amendments to the Workmen's Compensation Act were urged. The Brotherhoods asked first for an amendment that would clarify the inclusion, within the Act, of employees of municipal corporations, public utilities, hospitals, school boards, etc., along the lines of a reso-

lution adopted by the Trades and Labour Congress Convention of 1933. This resolution sought legislation making it compulsory upon all public bodies to insure their employees under the Act.

A broader and more liberal application of Section 2 was sought in order: "(a) to ensure the payment of compensation for all injuries or diseases arising out of and in the course of employment, and (b) that an injury should not be regarded as attributable solely to the serious and wilful misconduct of the workman, unless it can be proven conclusively that the injury was the result of a wilful and intentional act on the part of the injured workman."

An amendment to Section 17 was sought to "make it more clear that an employer shall not, either directly or indirectly, deduct from the wages of any of his workmen any part of any sum which the employer is or may become liable to pay to the workman as compensation under the Act, or to deduct from the wages of any of his workmen any amount by reason of such workman receiving compensation for a permanent partial disability."

The memorandum declared it essential that provision should be made for the appointment of a medical committee of review which would adjudicate upon disputed or contested claims involving the physical condition of an injured workman or his fitness to resume employment.

This part of the memorandum, with the sections concerned is given below, the recommendations being in italics:—

"20. (1) A workman who claims compensation, or to whom compensation is payable under this Part, shall if so required by his employer submit himself for examination by a duly qualified medical practitioner provided and paid for by the employer and shall if so required by the Board submit himself for examination by a medical referee *or by a medical committee of review, paid for from the accident fund if the workman examined is under Schedule 1, and paid for by the employer if the workman is under Schedule 2.*

"21. (1) Where a workman has upon the request of his employer submitted himself for examination, or has been examined by a duly qualified medical practitioner selected by himself, and a copy of the report of the medical practitioner as to the workman's condition has been furnished in the former case by the employer to the workman and in the latter case by the workman to the employer the Board may, on the application of either of them refer the matter to a medical referee; *provided that where any claim for compensation involving the physical condition of an injured workman has been contested, such claim shall be referred for*

*review to a committee composed of three medical practitioners appointed by the Board, one of whom shall be selected by the injured workman, one selected by the employer, and the third who shall be chairman selected by the Board, such committee to be known as a 'Medical Committee of Review,' shall have access to all the files of the Board pertaining to the claim.*

(2) The medical referee or the Medical Committee of Review to whom a reference is made under the next proceeding subsection or who has examined the workman by the direction of the Board under subsection 1 of Section 20, shall certify to the Board as to the condition of the workman and his fitness for employment, specifying where necessary the kind of employment and if unfit the cause of such unfitness, and the said certificate shall be conclusive as to the matters certified."

The memorandum registered opposition to the creation of appeal boards for making final decisions, and urged that in cases of permanent total disability "compensation be continued until the workman is able to resume his former occupation or has been placed in other suitable and equally remunerative employment." In cases of permanent partial disability, where the workman has not been able to resume former employment and has not been placed in suitable employment, it was recommended that compensation be paid at the full rate for total permanent disability "until the workman has been placed in and is able to perform some suitable employment."

Amendments to the medical aid provisions were sought whereby "medical aid" was to include "all medicine necessary as a result of an injury or industrial disease." It was also urged that the words "for a period of one year" be eliminated in the section providing for the repair of dental appliances and artificial apparatus.

*Unemployment Insurance.*—Reiterating their endorsement of national unemployment insurance, the Brotherhoods urged that "your Government give favourable consideration and lend its influence towards clearing up any constitutional questions which may be involved in order that a national unemployment plan may be given legislative effect in Canada as early as practicable."

Believing that in any system proposed, "due consideration should be given to the appropriate share of the cost to be borne by industry and the state," the memorandum added: "Whilst we do not contend that any unemployment insurance scheme would furnish a complete solution of our unemployment problem, we do believe that such a measure based upon sound actuarial principles, efficiently administered and with the endorsement and co-operation of provincial and municipal governments will constitute a forward step

towards effecting an orderly and systematic method of providing out-of-work benefits for many of our citizens."

*Highway Traffic Act.*—The two objectives sought under this legislation were: (a) uniform traffic regulations with all provinces in Canada; (b) that all operators of motor vehicles be required to pass a qualifying examination as to visual acuity, colour perception and hearing.

Reference was also made to protection at highway crossings, and the continuation of the policy of eliminating all level crossings was recommended, having "first consideration for those crossings which are found most dangerous." Pending complete elimination, it was pointed out that adequate protection should be given by warning signals or an effective stop law. Subways or overhead bridges were recommended on new highway construction.

*Regulation of Motor Vehicle Competition.*—After referring to the campaign for regulatory measures to improve highway transportation and to "equalize the opportunity between motor vehicle and steam railway service" the memorandum drew attention to the policy as submitted by the Brotherhoods to the Federal Interprovincial Conference which met on December 14, 1933. These recommendations included the placing of all truck and bus transportation under the supervision of a transport commission with powers similar to those of the Board of Railway Commissioners; the licensing and taxing of all commercial vehicles, commensurate with the use made of the highways, the establishing of reasonable standards of working conditions, and guarantees of financial responsibility, etc. The memorandum then referred to the resolutions adopted by the Federal Interprovincial Conference (LABOUR GAZETTE, February, 1934, page 96), claiming that these fall "very short of the more constructive suggestions" that should have resulted. In conclusion, the memorandum emphasized that "existing regulations lacked effective control"; that "no good cause can be shown why motor vehicle transportation should not be subjected to requirements similar to those imposed on steam railways"; and that the solution lay in "some central government authority possessing Dominion-wide jurisdiction" and vested with the authority "to eliminate and prevent destructive competition."

Two other matters recommended in the memorandum were assistance to parents in the purchase of school books for children attending the public and separate schools, and the maintenance of existing exemptions under the Income Tax Act.

## UNITED STATES RAILROAD RETIREMENT ACT DECLARED UNCONSTITUTIONAL

**I**N an action brought by Class I railway and other transportation companies in the United States for the purpose of testing the constitutionality of the Railroad Retirement Act passed by Congress at the last session (LABOUR GAZETTE, July, 1934, page 655), Chief Justice A. A. Wheat of the Supreme Court of the District of Columbia declared that the Act was unconstitutional. In the course of this judgment the Chief Justice said:—

“The plaintiff's claim in a broad way is that the act is not a regulation of interstate commerce and in addition points out certain provisions of the act which they claim invalidate it because they are not regulative of interstate commerce or are arbitrary, unreasonable, capricious and confiscatory, and amount to a taking of their property without due process of law. . . .

“I am not prepared to say that the enactment of a statute providing for the compulsory retirement at a certain age of employees of railroads engaged in interstate commerce, together with provisions for the pensioning of employees so retired is beyond the power of Congress under the interstate commerce clause of the Constitution. Congress has power to regulate the relation of master and servant between interstate carriers and such of their employees as are actually engaged in interstate commerce. The fact that so many of the plaintiff carriers have for many years maintained voluntary retirement and pension systems furnished persuasive evidence of their belief that such systems tend to promote the efficiency of their personnel by stimulating loyalty, encouraging continuity of employment with resulting security for old age, and thus increasing the morale of those in the organization. It is argued, however, that the features of the voluntary pension systems which tend to promote these desirable ends not only are absent from the retirement act but that it contains other provisions wholly subversive of those ends. . . .

“When the act is examined in detail, however, I find it contains provisions which, in my opinion, were beyond the power of Congress and which render it unconstitutional. In the first place, the act is unconstitutional because it extends its provisions to persons not engaged in interstate commerce. The Retirement Act confers its benefits upon all employees of any company to which it relates without regard to distinction between

interstate commerce, intrastate commerce, or activities which do not constitute commerce at all. . . .

“The present act applies to all employees of the plaintiffs. Indeed, there is no claim that it does not. It appears from the record in this case that some 200,000, approximately one-fifth of all the employees of the plaintiffs, do not work in interstate commerce or in work so closely connected therewith as to be a part thereof. Among these men may be mentioned mechanical employees, executive and general officers and their staffs, not including the operating vice-presidents and their staffs; those engaged in accounting not having a direct relationship to interstate transportation; those engaged in the construction of buildings, or the construction of new equipment; those who devote themselves to finances, custody and administration of funds or corporate proceedings and records; those engaged exclusively in work relating to real estate taxes and titles, in the management, operation, care and protection of buildings or lands not devoted to or used in connection with transportation and men employed in coal mines. As to some of these men, there may be room for differences of opinion as to their proper classification, but it is plain that there are many who are not in any real sense engaged in interstate commerce. . . .

“It seems to me that Congress exceeded its power to regulate interstate commerce, when it attempted to make all employees of the plaintiffs beneficiaries under this act, making no distinction between those engaged in interstate commerce and those not so engaged. . . .

“Furthermore, the act provides annuities for all persons, who, at the time of its enactment, were, or within the period of one year before its enactment had been, in carrier service and who had attained, or thereafter should attain, the age of 65 years, or had completed or thereafter should complete 30 years of such service. The right to the annuities is not dependent upon the rendition of service subsequent to enactment and the computation of the annuities is not confined to service rendered subsequent but includes service rendered prior thereto. . . .

“The statute provides that upon the re-employment hereafter by any carrier of any man previously in railroad service all of his prior service is to be counted as part of the service entitling him to the annuity. The

evidence tended to show that there are to-day over a million persons with that possibility. To require the plaintiffs to contribute huge sums of money to be devoted to the payment of pensions or annuities based upon services long since completed and fully paid for seems to me to take their property without due process of law.

"I am constrained, therefore, to hold that the act is unconstitutional."

In reference to the foregoing decision it is reported that employees of United States lines in Canada have had 2½ per cent taken out of their pay-checks every two weeks to create a pension fund under the Act. Approximately 75 men at St. Thomas, Ontario, for example, were to be retired on February 1, 1934, while others would have been retired at Windsor, Niagara Falls, Fort Erie and at other points where United States railway companies operate lines in Canadian territory.

## WORK OF THE INTERNATIONAL LABOUR ORGANIZATION

### Address by the Director, Mr. Harold Butler, before the American Federation of Labour

THE aims and accomplishments of the International Labour Organization were set forth by Mr. Harold Butler, the Director, in an address delivered before the American Federation of Labour at the convention at San Francisco on October 11.

President William Green, in welcoming Mr. Butler, said: "It might be appropriate for me to explain that when the International Labour Office was formed the distinguished President of the American Federation of Labour, our late beloved Samuel Gompers, presided at the conference. The Director of the International Labour Office, who is here with us now, Director Butler, was the secretary of that conference. . . . For more than fifteen years Director Butler has been connected closely with the work of the International Labour Office. He is a distinguished scholar, an economist, a philosopher."

Mr. Butler opened his address with a reference to the entry of the United States into the Organization. "The invitation to address this convention," he said, "was extended to me on the very day when the Government of the United States announced its willingness to accept membership of the International Labour Office and when, by the unanimous vote of the delegates representing the Government's employers and workers of some forty-five nations, an invitation to membership was immediately extended. That was for me a doubly historic occasion. I could not help casting my mind back more than fifteen years to the morning when Samuel Gompers was elected to the chair of the Committee appointed by the Peace Conference to report on Labour questions. I remembered well how the great leader of the American trade union movement skilfully guided the discussions which resulted in the Labour Charter to which the International Labour Office owes its existence and under which it functions to-day. It was fitting that he should have held that

position. He had systematically fought for the right of labour claimed by your convention in 1914 to assist in 'restoring fraternal relations protecting the interests of the toilers and laying the foundations of a lasting peace.' This very thought is embodied in the Preamble to our Constitution, which declares that 'there can be no lasting peace without social justice.'"

After further words of introduction, Mr. Butler proceeded with his address as follows:—

"I want to give you a short outline of what the International Labour Office is and what it has done.

"First of all I want to make it abundantly clear that it is not a political body. It does not serve or seek any political aims or objects. It stands entirely aloof from the international rivalries and antagonisms which bulk so largely in foreign politics.

"Its objectives are social and economic. Its principal motive is to maintain and improve standards of Labour and living, by helping to insure the social security of the worker, by affording him protection against the social risks—unemployment, accident, sickness, old-age, and by upholding minimum standards which will prevent commercial competition—national and international—being fought out at the expense of the worker.

"Many of these objects can only be achieved through the action of governments in execution of laws duly passed by parliamentary assemblies. In the struggle against unemployment, in guaranteeing of compensation against accident, in assisting the aged, the community has a responsibility towards each of its citizens, which can only be discharged by legislative measures. In most industrial communities the state has taken action along these lines. When it comes to setting up international standards which gov-

ernments bind themselves to observe, the state alone can guarantee their observance. Hence the International Labour Office is in the first place an association of governments.

"But it is not an association of governments alone. In industrial affairs governments cannot do everything—nor is it desirable that they should. Industrial questions are the primary concern of the partners of industry—the employers and the workers. Questions affecting wages, hours and conditions of Labour cannot be settled without negotiation between the accredited representatives of capital and Labour through the process of collective bargaining. Hence the International Labour Office includes capital and Labour as well as governments. It is a three-party organization. At all our meetings the chosen representatives of organized employers and organized labour sit alongside the representatives of governments with the same freedom of speech and the same right to vote. They are not tied down by any official instructions. They can speak as they like and vote as they like on every issue that comes under discussion. The International Labour Conference is not a formal, lifeless gathering of government officials and diplomats, but a live and active industrial Congress reflecting the moods and opinions of every branch of industrial life.

"What then are the principles which guide this international parliament of industry, and how does it work? It has two governing aims laid down in the preamble to its constitution. The first is removal of conditions of labour 'involving injustice, hardship and privation to large numbers of people' in the world. The second is the removal of the competitive advantage derived by those who 'fail to adopt humane conditions of labour.' To attain these ends the conference works out 'draft conventions' or treaties. To be adopted by the conference they require a two-thirds majority; but they do not become binding in any country until they have formally been ratified by its government—that is to say—until its legislature and its executive have proved them and have declared themselves ready to accept the obligations they entail. Every country is free to make its own final decision, to accept or to reject any draft convention. The International Labour Organization is based on the principle of voluntarism. Moreover in the case of Federal states there is a special provision which allows them to treat a draft convention simply as a recommendation in cases where the power to enforce its provisions belongs to the states and not to the federal power. Canada and Australia have adopted this procedure in reference to conventions which cannot be dealt with federally.

There is also another important provision of the constitution under which no country can be called upon to lower its existing standards. In point of fact I know of no case in which a country has lowered its standards by accepting a draft convention, though there are hundreds of cases in which standards have been raised.

"Up to the present time 44 of those labour treaties have been adopted and no less than 633 formal ratifications have been recorded, while there are a great number of cases in which countries have gone far towards conforming with labour treaties without being able to accept them in every particular. These treaties touch almost every phase of industrial life. They deal with child labour, with the protection of women in industry, with hours of work in manufacturing and mining industry, with conditions on board ship, with safety and industrial diseases, with unemployment and with all branches of social insurance. They constitute a real international labour code. Perhaps I can give you the best idea of its scope and effect by picturing the position of a worker, whose country has put the major labour treaties into operation.

"First of all he cannot be employed until he is 14 years old, in industry or commerce. While under the age of 16 he may not work at night in any industry, and in most industries not till he is 18. His hours of work in any industrial occupation may not as a rule exceed 48 per week and he will be entitled to one day's rest in seven. If he meet with an accident or is stricken by any of the principal industrial diseases, he will have compensation guaranteed to him by law, and he will have the protection of a government controlled fund against sickness, old age or invalidity. Finally if he is unemployed, a government employment service will help him to find a job, and if he cannot do so, he and his family will be preserved from destitution by a state scheme of insurance or relief.

"I might add that if he is a seaman, he can apply for a job to an employment office jointly administered by shipowners and seamen. When he is engaged, it will be under articles of agreement protecting his rights, and if he meets with shipwreck, he will be entitled to be repatriated and compensated during the period of unemployment at the cost of the shipowner.

"From these few examples you will see that the international labour code is a reality. It has meant a permanent improvement in the conditions of labour in many European countries. More than that it has brought about a marked advance in the conditions of great eastern countries like India and Japan, where

products are now beginning to compete in the world's markets. They are already carrying out a number of draft conventions, which means that they are progressing towards western standards.

"I should like to emphasize, however, that the standards set by the international labour code are minimum standards. It fixes no maximum levels and prevents none being fixed. It operates on the same principle as the codes in this country. It does not replace collective bargaining, but lays down general limits. Just as under the NRA any industry may go beyond the minimum standards of hours and wages, so may any country that chooses go beyond the standards set by the international labour code. In fact, it may well be called a code of fair international competition, and it is coming more and more to be so regarded.

"One other point I should like to make. The standards already set are not fixed for all time. They are subject to change and revision. In the last few years three conventions have been improved by revision. Now we are engaged in revising the standard laid down for hours of labour. Fifteen years ago it was set at 48 hours per week. The great technical changes which have been made in industry have caused great and widespread displacement of labour. In every country there is an army of unemployed. As President Roosevelt said the other day, it is impossible to contemplate these armies becoming permanent standing armies. The world has got to solve the unemployment problem. It will not be easily solved, but the conviction is gaining ground that it cannot be solved without a reduction of hours. The question of an international 40-hour week was first raised by the International Labour Office in 1932. So far we have not succeeded in securing agreement, but the question is set down for further consideration at next year's conference. When that debate takes place, the influence of the United States, the only country in the world that has yet introduced shorter hours and has first-hand experience, will be very powerful and will give a strong impulse towards a shorter working week being adopted internationally. The United States has set the example, and the presence of American delegates at Geneva will help the rest of the world to follow it.

"But I don't want to think that the International Labour Office is just a machine for international labour legislation. It is much more than that. It is confronted with the great economic and social problems of our time. It is clear that the world as a whole is passing into a new age, which requires a

new adjustment of its economic forces. Things are not going to right themselves automatically. Not only the United States but every industrial country is trying to work out a new economic balance. It is becoming more and more evident that the welfare and happiness of the great mass of individuals cannot be secured without some measure of forethought and well-conceived action on the part of the community. Here in the United States you have a very important committee considering the problem of economic security under the able chairmanship of the Secretary of Labour. The whole NRA program is a great concerted effort to readjust the economic life of the American people to the new conditions of the post-war age. You are tackling the fundamental problem of our age boldly and directly. But every nation has to solve the same problem. Its setting may vary with local conditions, but in essence it is the same everywhere. In the last analysis it is an international problem, a world problem. It involves the whole question of trade between nations, of fair competition between nations, of the exchange of goods and services between nations, of the international adjustment of currency values. It involves not only an effort by each nation to attain a new economic balance internally, but also a co-operative effort between nations to set the world's economic house in order. That cannot be done in a day or in a year. There is no short-cut to international recovery. During the past year some real progress has been made. The world as a whole is better off than it was eighteen months ago. But a great deal of reconstruction remains to be done before a return to prosperity is achieved. It can only be worked out on democratic lines, by free discussion, by the conflict of ideas and interests leading to open covenants openly arrived at. That is the American way as it is the British way. It is the way in which the International Labour Office is making its contribution towards working out a new economic and social order. The whole of our discussions are founded in the belief that the right way will be found through the prevailing ideas of right and justice, not through methods of violence. The spirit of our constitution is utterly opposed to arbitrary and oppressive action, whether from the right or from the left. It is for that reason, because it is shaped in conformity with American ideals of co-operation and of free discussion, that we warmly welcome the help that the United States more than any other country can give, and that we look to the powerful support of the American Federation of Labor as embodying the concepts of liberty and

justice which have inspired the Labour Movement of this country. We would say to you in the words of St. Paul 'Come over and help us.'"

### New Members of the Organization

During the month of September three states previously outside the League of Nations and the International Labour Organization became members.

On September 18, during the Fifteenth Session of the Assembly of the League of Nations, the Union of Socialist Soviet Republics was admitted to membership.

On September 27, the Kingdom of Afghanistan was admitted by the Assembly.

On September 28, the Republic of Ecuador notified Secretariat of the League that it had decided to ratify the Treaty of Versailles (to which it was a signatory but which it had not ratified) in respect of those parts which embody the Covenant of the League and the Constitution of the International Labour Organization.

The total membership of the International Labour Organization is thus brought to 62 states.

### 68th Session of the Governing Body

The Governing Body of the International Labour Office held its sixty-eighth session at Geneva from September 26 to 28. This was the first session which had been held since the membership of the Governing Body was increased from twenty-four to thirty-two.

Mr. deMichelis, Italian Government representative, was appointed chairman of the Governing Body for the year 1934-35. He emphasized the importance of the increase in the number of countries represented on the Governing Body and also of the entry of the United States of America and the Union of Socialist Soviet Republics into the Organization. The latter development would give rise to new problems which the Governing Body would endeavour to solve in a spirit of understanding and justice. The prestige of the Organization would be enhanced by these new developments, and he hoped that there would be a corresponding increase in the effectiveness of its work.

The following vice-chairmen of the Governing Body were elected: Government Vice-Chairman, Dr. W. A. Riddell, Canada; Employers' Vice-Chairman, Mr. Oersted, Denmark; Workers' Vice-Chairman, Mr. Mertens, Belgium.

The Governing Body was called upon to decide what steps to take as a result of the

resolution of the reduction of hours of work adopted by the International Labour Conference in June, 1934. By 22 votes to 7, the Governing Body adopted the resolution following:—

"The Governing Body decides:

"(1) to place the reduction of hours of work on the agenda of the Nineteenth Session of the Conference;

"(2) to instruct the Office to draw up a draft for a single Convention providing for the reduction of hours of work in all classes of establishments. The Conference shall determine at that Session and at subsequent Sessions the classes of establishments to which this reduction shall apply and the methods of application for each of them;

"(3) to reserve until the next Session of the Governing Body—which will have before it reports to be prepared by the Office, including the information received in the meantime from the Governments—the final selection of the industries, establishments or categories to which it is proposed that the Nineteenth Session of the Conference should apply the reduction of hours of work."

After the vote, the Chairman announced that, according to the Standing Orders, he would himself place on the agenda of the next session of the Governing Body the question of workers' spare time in relation to the reduction of hours of work.

The Robert Owen Foundation for Co-operative Organization of Industry and Commerce announces the annual national essay contest for 1935, open to all persons living in Canada over 17 and under 30 years of age. Essays, not exceeding 3,000 words in length, should be received by the President (Mr. H. E. Langford, 91 Gothic Avenue, Toronto) before January 15, 1935. A cash prize of \$50 will be granted to the writer of the best essay on one of the following subjects: (1) Democracy in industrial management, and its relation to efficiency; (2) How can a Canadian government, federal or provincial, encourage and support co-operative enterprise; (3) Co-operative goal versus State socialism. The name of the writer must not appear on the essay itself, but must be submitted on a separate sheet, together with a note stating address, occupation, place and date of birth, and education received. The Robert Owen Foundation was started in 1931, for the purpose of promoting interest in the application of co-operative principles to economic life. Further information may be obtained from the Secretary, Robert Owen Foundation, Toronto, Ontario.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF OCTOBER, 1934

### Reports of Superintendents of the Employment Service

**T**HE employment situation at the end of October was reported by the superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces were busy with fall ploughing and ordinary farm chores. City markets showed an off-period between the peak months of summer buying and of Christmas sales. Despite this and the fact that the weather had been unpleasant, business was brisk. Logging continued active with many men reporting to camps for the winter cut. Good catches of mackerel were reported, although heavy storms and fogs hindered shore fishermen in some localities. Coal mines in the New Glasgow area operated from four to six days per week, while those in Cape Breton and vicinity worked five, five and one-half and six days. Manufacturing showed moderate activity, but some idleness was registered in the iron and steel industry. Not much work was available in the building line, and highway construction and National Defence camps continued as a relief measure. Railway and steamship companies reported business slightly on the increase. Trade was fair. A number of requests for housemaids and charworkers was received in the Women's Division and many placements made.

There was little activity in farming in the Province of Quebec, but logging companies were busy, and numerous vacancies for bushmen were listed and filled. Manufacturing industries were slack, with the exception of textiles and clothing at Montreal, furs and clothing at Quebec City, and cottons and machine shops at Three Rivers. Building construction showed some improvement, particularly at Montreal, where substantial orders were received for building tradesmen, including bricklayers, plasterers and joiners, and at Three Rivers, where wharf and warehouse construction, besides other undertakings, furnished work for a number of carpenters and bricklayers. In Hull, increased placements of men were recorded on highway work. Transportation at Three Rivers and Quebec City was active, but throughout the province trade was dull. Many vacancies for household workers were listed in the Women's Division, and although the number of applicants registered was high, difficulty was experienced in filling all positions offered, especially at Montreal.

A number of orders were listed in Ontario for experienced ploughmen, but the demand for general farm labour was light. The volume of activity in logging was responsible for a greater call for men than has hitherto prevailed, small gangs being sent out almost daily from the North Bay office. In the camps further north strike trouble prevailed and this handicapped the industry. Plenty of applicants were available, however, to meet all demands. Fine weather had prolonged operations in the mining districts, but it was expected a large portion of the work now in progress would be stopped during the winter except where development had reached the shaft sinking stage. In general, the industrial situation continued with little change recorded, although some industries reported increased working hours and additional staff employed, as a result of the re-hiring of former workers. The metal trades, also, which for some time had been passing through a period of extreme slackness, showed decided improvement. Quietness prevailed in building construction and highway work was somewhat slacker than usual, due to the approach of winter. At Hamilton, transportation by rail and water was active, but at Sarnia and St. Thomas, conditions were not quite so satisfactory, while at Stratford, prospects in railroad shops were more favourable. The demand for domestics in the Women's Division continued good, but openings for clerical help were scarce, as were also those for hotel and restaurant workers.

Little change was noted in the placement of farm hands in the Prairie Provinces, except for the seasonal layoffs due to the completion of the harvesting or threshing season. Some difficulty was experienced in obtaining men for general farm labour, partly owing to low wages offered and partly to their preference for camp work. Although there was little demand for loggers, conditions were gradually improving. Mining was fair, with a slight increase noted in applications and placements. No change was noted in manufacturing, which, for the most part, was very quiet. Building construction was practically over for the season, but building permits at Winnipeg had made a very good showing and had proved that month to have been one of the best of the year. Road work, both city and country, was progressing rapidly. There was also a greater movement of men to the

Federal and provincial relief camps. At Lethbridge, railway operation was steady, with most C.P.R. employees working full time. Retail trade was better, particularly in furniture sales and collections were fair to good. The Women's Division was somewhat more quiet than previously noted, with sufficient applicants on hand to meet all local demands.

Farming in the Province of British Columbia was quiet and applicants for positions plentiful. The fall rush in the fruit industry was over and a number of fruit packers had been laid off, though the crop for the year had been a good one and fairly large. Logging was quiet, with saw and shingle mills

running with limited output. Mining was active, but no demand for miners. Salmon fishing had ceased for a few days owing to low water in the streams, but catches were reported as fair. Factories at Nelson continued busy. Building construction was very slow, with few new undertakings in sight, and relief camps alone seemed the only outlet for the unemployed. Shipping and longshoring were active at New Westminster and Victoria, but quiet at Vancouver. Trade, both wholesale and retail, was fair, with collections slow. Orders for women domestic workers were fairly plentiful, but there were numerous applicants to meet all demands.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN SEPTEMBER, 1934

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on October 1 was 8,864, the employees on their payrolls numbering 933,486 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for September was 1,700, having an aggregate membership of 159,675 persons, 16·4 per

cent of whom were without employment on October 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 65 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 61 cities throughout Canada, showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the Beginning of October as Reported by Employers

Industrial employment at the beginning of October showed a considerable increase, according to statements received by the Dominion Bureau of Statistics from 8,864 firms, whose staffs aggregate 933,486 persons, as compared with 923,078 in the preceding month. Activity has frequently declined between September and October in the thirteen preceding years for which statistics are available, the change, on the average, being a fractional reduction, so that the substantial gain this year is particularly important. The index (based upon the average for the calendar year 1926 as 100) stood at 100·0 on October 1, 1934, compared with 98·8 on September 1, 1934,

and 90·4 on October 1, 1933. On the same date in the twelve preceding years, the index was as follows: 1932, 86·7; 1931, 103·9; 1930, 116·2; 1929, 125·6; 1928, 118·8; 1927, 110·3; 1926, 106·5; 1925, 99·5; 1924, 95·0; 1923, 100·7; 1922, 95·8; and 1921, 91·3.

The most outstanding feature of the October 1 survey of employment was the unusually pronounced expansion in bush operations, which directly provided work for over 7,600 persons among the co-operating firms, an increase that in the fourteen Octobers for which statistics are available has only once been exceeded (viz., in 1929). Mining showed the greatest October 1 gain on record; transpor-

tation, building construction and trade also reported considerable improvement over the preceding month. A slight advance occurred on the whole in manufacturing, being the ninth consecutive gain since the opening of the year. On the other hand, communications, highway and railway construction and hotels and restaurants released a large number of persons as the active season drew to a close.

A fuller analysis of the situation in the various industries is given below.

### Employment by Economic Areas

Firms in British Columbia showed a moderate decrease, while the tendency in the remaining economic areas was favourable, the

(mainly of lumber products), railway construction and services reported decreases as compared with the preceding month, but there were gains in logging, coal-mining, shipping, building and highway construction, and also in vegetable food factories.

*Quebec.*—For the sixth consecutive month, activity advanced in Quebec. The expansion took place chiefly in logging, railway transportation, shipping, laundering, and dry cleaning and trade. On the other hand, manufacturing as a whole, building, highway and railway construction, mining and hotels and restaurants showed curtailment; within the manufacturing group, lumber, leather, pulp and paper, iron and steel and non-metallic

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

largest advances taking place in Ontario and the Prairie Provinces.

*Maritime Provinces.*—A further increase was indicated in the Maritime Provinces, where the 610 co-operating employers enlarged their payrolls from 72,147 persons on September 1, to 73,015 at the beginning of October. This was the sixth consecutive monthly advance recorded since April 1; it compared favourably with the decline noted at the same date of last year, when the index, at 90.9, was over twelve points lower than that on October 1, 1934, viz., 103.1. Manufacturing, as a whole

mineral plants were slacker, while vegetable food, fur, textile, electrical apparatus, non-ferrous metal and miscellaneous manufacturing establishments recorded improvement. Statistics were compiled from 2,127 firms in Quebec with 262,706 workers, compared with 261,078 at the beginning of September. A more extensive advance had been noted on October 1, 1933, but the index then was lower.

*Ontario.*—The trend was upward in Ontario, according to 3,899 employers of 398,349 persons, or 5,317 more than at the beginning of September. A rather larger gain over the

preceding month had been reported on October 1, 1933, when the index, at 89.6, was considerably lower than that at the latest date, viz., 104.8. Manufacturing as a whole (particularly in textile and canning factories), logging, mining, building construction and retail trade showed heightened activity as compared with the preceding month, while employment declined in iron and steel plants, transportation, highway construction and services.

*Prairie Provinces.*—There was an increase in employment in the Prairie Provinces at the beginning of October, improvement occurring in manufacturing, logging, transportation, trade, construction and mining, while services were seasonally quieter. Within the manufacturing group, vegetable food, pulp and paper, textile and non-metallic mineral plants showed heightened activity, but lumber mills were slacker. The additions to staffs in mining were especially noteworthy. Returns for the date under review were received from 1,309 firms with an aggregate working force of

120,211 employees, compared with 116,888 on September 1. A much larger advance had been recorded at the beginning of October in 1933, when it was due to a considerable extent to unemployment relief undertakings; the index was then three points higher than the 95.7 of the latest date.

*British Columbia.*—Employment in British Columbia showed moderate curtailment, mainly in manufacturing (owing to the termination of the fish and fruit canning season), while transportation and services also released employees. On the other hand, logging, mining, construction and trade reported greater activity, and, within the group of factory employment, lumber mills also recorded improvement. Data were tabulated from 918 employers, whose payrolls declined from 79,933 persons on September 1, to 79,205 at the beginning of October. Losses on a much greater scale were registered on October 1, 1933, and the index then, at 85.6, was lower by nearly ten points than the 95.4 on the date under review.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Oct. 1, 1921.....	91.3	104.5	85.0	91.5	99.3	85.5

Relative Weight of Employment by Economic Areas as at Oct. 1, 1934.....	100.0	7.8	28.1	42.7	12.9	8.5

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated areas to the total number of all employees reported in Canada by the firms making returns for the date under review.

Table I gives index numbers by economic areas.

### Employment by Cities

The trend of employment was downward in Quebec City, Hamilton, Windsor and the adjacent Border Cities and Vancouver, but upward in Montreal, Toronto and Winnipeg, while in Ottawa practically no general change took place.

*Montreal.*—There was a further increase in employment in Montreal, where the 1,229 co-operating establishments employed 129,092 persons, or 491 more than on September 1. Manufacturing, shipping and trade showed the greatest gains; within the manufacturing group, vegetable foods, textiles and non-ferrous metals indicated considerable expansion, while leather, iron and steel and non-metallic mineral plants were slacker; construction also released workers. Much larger advances on the whole had been noted on the corresponding date of last year, and the index of employment was then fractionally higher.

*Quebec.*—Activity in Quebec declined at the beginning of October, 346 workers having been laid off since September 1 by the 167 employers whose returns were compiled, and who had 12,845 on their paylists at the date under review. There were seasonal losses in services, and shipping and manufactures were also slacker. The index was slightly lower than at the beginning of October, 1933, when a smaller decrease had been reported.

*Toronto.*—Continued expansion was indicated in Toronto, according to 1,309 firms, employing 116,540 persons, compared with 113,802 in their last report. Manufacturing was much busier, particularly in the textile, vegetable food, electrical apparatus, iron and steel, pulp and paper, leather and miscellaneous manufacturing groups, and trade also absorbed many more workers. On the other hand, transportation and services were slacker. Rather larger additions to staffs had been reported on October 1 of a year ago, but employment generally continues at a better level, the index, at 96.5 at the latest date, being 5.6 points higher.

TABLE II.—INDEX NUMBERS OF EMPLOYMENT BY PRINCIPAL CITIES

(AVERAGE CALENDAR YEAR 1926=100)

—	Montreal	Quebec	Toronto	Ottawa	Hamilton	Windsor	Winnipeg	Vancouver

Aug. 1.....	86.4	99.4	92.9	103.4	87.8	100.7	84.0	91.5
Sept. 1.....	86.6	99.9	94.3	100.9	84.9	91.0	85.2	91.8
Oct. 1.....	87.0	97.5	96.5	100.8	84.4	86.7	86.5	90.5
Relative Weight of Employment by Cities as at Oct. 1, 1934.....	13.8	1.4	12.5	1.4	2.9	1.3	3.9	3.0

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

*Ottawa.*—Construction was not so active, while manufacturing and trade showed small gains. The forces of the 163 employers furnishing data aggregated 12,903 workers, or 24 fewer than on September 1. The index of employment was several points higher than on the same date in 1933, when a slight increase had been indicated.

*Hamilton.*—A moderate falling-off occurred in Hamilton, mainly in manufacturing, where there were small declines of a general character. The non-manufacturing industries showed, on the whole, only minor changes, except that trade was rather busier. Statements were tabulated from 260 firms with 26,875 employees, compared with 27,000 in the preceding month. The index number at the beginning of October of last year was lower, a much larger reduction on the month having then been reported.

*Windsor and the adjacent Border Cities.*—There was a decline in the number employed

in the Border Cities, chiefly in the automobile and allied trades. One hundred and fifty-seven establishments employed 11,671 workers, as against 12,227 on September 1. An increase had been noted on October 1, 1933, when employment was in smaller volume.

*Winnipeg.*—Further improvement was indicated in Winnipeg on October 1, when the 427 co-operating firms employed 36,764 workers, or 491 more than in the preceding month. Manufacturing, building and trade were more active, while road construction and transportation reported curtailment. The situation at the beginning of October a year ago had remained practically the same as in the month before, and the index then was a few points lower, standing at 82.3, as compared with 86.5 on October 1, 1934.

*Vancouver.*—Employment in Vancouver showed its first curtailment since January 1, according to 381 employers with 28,397 persons on their payrolls, compared with 28,790 on

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES  
(AVERAGE CALENDAR YEAR 1926=100)

	All industries	Manufacturing	Logging	Mining	Communications	Transportation	Construction	Services	Trade

Relative Weight of Employment by Industries as at Oct. 1, 1934.....	100.0	50.6	3.3	5.8	2.3	10.7	14.7	2.6	10.0

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

September 1. Manufacturing reported little general change, but there was a falling-off in communications and transportation. A similar reduction on the whole had been recorded on October 1, 1933, when the index stood at 85.9, as compared with 90.5 at the beginning of October of the present year.

Index numbers by cities are given in Table II.

### Employment by Manufacturing Industries

There was a further slight advance in factory employment on October 1, when the 5,288 co-operating establishments reported 471,930 operatives, or 407 more than on September 1. Seasonal curtailment was noted in clay, glass and stone, rubber, fish-preserving, sawmilling, and iron and steel plants, while the manufacture of non-metallic mineral products was also slacker. On the other hand, vegetable food, pulp and paper, textiles, to-

bacco and beverage, electrical current, electrical apparatus, non-ferrous metals and miscellaneous manufactures afforded augmented employment.

The slight increase noted, on the whole, on October 1 continues the uninterruptedly favourable movement that has characterized factory employment since the opening of the year. During the last nine months, nearly 72,200 persons have been added to the staffs of the approximately 5,200 reporting firms, while the index has advanced from 80.0 on January 1 to 94.4 at the beginning of October, or by 18 per cent. The period of expansion in 1933 was shorter by a month, and the index, at 86.7 on October 1, though 16.5 per cent higher than at January 1, 1933, was 8.9 per cent lower than at the latest date.

*Animal Products—Edible.*—There were losses in dairies and fish-preserving establishments, those in the latter being especially

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	Oct. 1 1934	Sept. 1 1934	Oct. 1 1933	Oct. 1 1932	Oct. 1 1931	Oct. 1 1930	Oct. 1 1929

Miscellaneous.....	.6	121.7	114.2	104.1	99.1	103.2	115.1	116.6

<sup>1</sup>The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

pronounced following an unusually active season. Statistics were received from 257 manufacturers, employing 21,078 persons, as compared with 23,369 in the preceding month. This contraction, which was most pronounced in British Columbia, was on a smaller scale than that registered on the corresponding date of last year, when the index was nearly five points lower.

*Leather and Products.*—Practically no change was indicated in the leather industry on October 1, footwear factories showing reductions in staffs, while miscellaneous leather goods afforded more employment. The 259 employers making returns reported 20,101 workers, or 14 more than on September 1. A decline had been noted at the beginning of October of a year ago; the index number then stood at 100.1, compared with 100.0 on the date under review.

*Lumber and Products.*—Further seasonal contractions in personnel were indicated in the lumber group, in which employment was at a higher level than on October 1, 1933. The decrease on the date under review took place almost entirely in rough and dressed lumber mills, while furniture and other wood-using factories were decidedly busier. A combined working force of 37,555 persons was reported by the 792 co-operating manufacturers, as compared with 38,813 at the beginning of September. The tendency was downward in the Maritime and Prairie Provinces and Quebec, but was elsewhere favourable.

*Musical Instruments.*—A slight gain was registered in musical instrument plants, in which employment was brisker than during last autumn. Thirty-five establishments reported 1,437 employees, as compared with 1,371 in the preceding month.

*Plant Products, Edible.*—Practically all branches of the vegetable food division showed improvement; the largest gains, however, occurred in canning and chocolate and confectionery factories. The staffs of the 438 reporting firms aggregated 38,707 persons, or 2,693 more than in their last return. Employment was more active in all provinces except British Columbia, firms in Ontario showing the most pronounced advances. The general increase was much greater than that registered on the corresponding date in 1933, when the index was slightly lower.

*Pulp and Paper Products.*—There was an increase in the staffs reported by 572 employers in this group, who had 57,431 workers on their payrolls, as compared with 57,014 at the beginning of September; this took place very largely in printing and publishing houses.

Considerable gains were recorded in Ontario and the Western Provinces, but there were losses in Quebec. An important reduction, on the whole, had been indicated at the beginning of October a year ago, and the index number then was several points lower.

*Rubber Products.*—Employment in rubber goods showed a decline on October 1, 1934; data were compiled from 50 firms with 11,698 employees, as against 12,023 in their last report. A small increase had been recorded on the same date in 1933, when employment was generally quieter.

*Textile Products.*—Hosiery and knitting and garment factories reported heightened activity, but there was a falling-off in cotton and woolen mills; 919 manufacturers enlarged their payrolls from 91,732 workers at the beginning of September, to 92,913 on the date under review. Ontario recorded the bulk of this expansion, although the tendency was generally favourable. Greater gains had been noted at the beginning of October last year, but the index then was lower than on October 1, 1934.

*Tobacco, Distilled and Malt Liquors.*—There was an increase in employment in these industries at the beginning of October, according to 161 establishments furnishing statistics, which employed 14,946 workers, or 161 more than on September 1; tobacco factories showed greater activity. Employment was in smaller volume than in the autumn of 1933, when improvement on a larger scale had been shown.

*Clay, Glass and Stone Products.*—Reductions in staff were indicated in building material plants, in which employment was brisker than on October 1, 1933. The forces of the 190 co-operating employers were decreased by 155 persons to 8,155 at the beginning of October of the present year.

*Electric Current.*—Slight improvement occurred in electric current plants on October 1, when 98 establishments employed 14,815 workers, compared with 14,710 on September 1. No general change had been indicated on the corresponding date of last year; the index number then stood at 112.2, compared with 117.6 on October 1, 1934.

*Electrical Appliances.*—Additions to staffs were made in electrical apparatus works, 106 of which had 11,865 employees, or 394 more than in their last report. This gain, which took place mainly in Quebec and Ontario, was rather smaller than that noted on October 1, 1933, but the index was then many points lower.

*Iron and Steel Products.*—The heating appliance, steel shipbuilding, wire, pipe, foundry and machine shop and some other branches of the iron and steel group registered increased employment, while there were reductions in the automobile, agricultural implement and crude, rolled and forged divisions. Statements were received from 809 manufacturers, whose payrolls aggregated 92,825 persons, as compared with 93,686 in the preceding month. Employment declined in Quebec, Ontario and the Prairie Provinces, while a betterment was shown in the Maritimes and British Columbia. Less extensive curtailment had been indicated at the beginning of October last year, but employment was then at a lower level, the index standing at 62.5, compared with 70.6 on October 1, 1934.

*Non-ferrous Metal Products.*—A combined working force of 17,753 persons was reported by the 147 co-operating employers, who had 17,632 at the beginning of September. There was improvement in the precious and the base metal division, while smelters and refineries were slacker. The index was some 21 points higher than in the autumn of 1933.

### Logging

Statements were tabulated from 271 logging companies, whose staffs were enlarged by 7,619 workers to 31,272 on the date under review. This advance was on a much greater scale than in the early autumn of 1933, or of any other year of the record except 1929. The index, at 113.4, on October 1, 1934, was only once exceeded on that date in the last thirteen years, viz., by that of 117.1 indicated at the beginning of October 1, 1929. Camps in Quebec and Ontario absorbed most of the men added to payrolls on October 1 of the present year, but the trend was generally upward.

### Mining

*Coal-Mining.*—There was an important increase in coal-mines, in which the index of employment was higher than on October 1, 1933, when the improvement over the September 1 payrolls was on practically the same scale. Returns were received from 101 operators employing 24,621 persons, as compared with 22,488 in their last report. Gains were indicated in both Eastern and Western coal-fields, those in Alberta being most pronounced.

*Metallic Ores.*—Employment in this group showed a further increase on October 1; 122 employers reported 23,314 workers, or 870 more than at the beginning of September. Ontario registered most of the advance. A smaller

gain had been noted on the corresponding date last year, and the index number then was many points lower.

*Non-Metallic Minerals, other than Coal.*—A reduction was made in this group, in which statistics were received from 80 firms employing 5,969 persons, compared with 6,469 in the preceding month. The index was decidedly higher than on October 1, 1933, when little general change in the situation had occurred.

### Communications

There was a falling-off in employment in communications, in which the companies and branches furnishing data reported 21,513 employees, as compared with 21,841 on September 1. The index was slightly lower than in the autumn of 1933, when the tendency was also downward.

### Transportation

*Street and Electric Railways and Cartage.*—A minor increase was indicated in local transportation, 50 persons being added to the forces of the 193 co-operating firms, who had 25,140 on their payrolls. Employment in this industry was in slightly greater volume than on October 1 of last year, when a small decline had been shown.

*Steam Railways.*—Statistics were tabulated from 99 employers in the steam railway operation group, whose payrolls increased from 59,100 on September 1, to 59,665 at the beginning of October. A contraction had been indicated on the same date of last year, and the index was then lower. There were reductions on the date under review in Ontario, but gains in Quebec and the Prairie Provinces.

*Shipping and Stevedoring.*—Improvement was registered in the water transportation group, in which 97 companies employed 15,351 workers; this was an increase of 842 as compared with their payrolls in the preceding month. A smaller advance had been noted on October 1 of last year, when the index stood at 94.2, as compared with 92.3 at the beginning of October of the present year.

### Construction and Maintenance

*Building.*—There was an increase in employment in building, 513 persons being added to the forces of the 659 co-operating contractors, who had 23,422 employees; this number exceeded that reported at the beginning of October of a year ago, when a decrease had been indicated. In Quebec, the tendency was unfavourable, but elsewhere improvement took place.

*Highway.*—Employment in this group declined in Quebec and Ontario, while the remaining provinces showed heightened activity. Statements were tabulated from 346 employers, whose staffs, standing at 82,041, were smaller by 893 workers than on September 1. The number of persons employed in the group was greater than on October 1, 1933, although important gains had then been noted.

*Railway.*—A considerable falling-off in employment was reported on railway construction. The forces of the 35 companies and divisional superintendents furnishing returns declined from 32,674 at the beginning of September, to 31,487 on the date under review. A slight reduction had been registered on October 1, 1933, when the level of employment was lower.

### Services

The closing of summer hotels caused a pronounced contraction in employment in this group, which was partly offset by moderate gains in laundries and dry cleaning establishments. The staffs of the 428 firms in this group whose returns were received, numbered 24,660 on October 1, as against 26,527 in the

preceding month. The seasonal declines also indicated on the same date last year involved a smaller number of workers, but employment then was not so active in the service division.

### Trade

Retail and wholesale trading establishments increased their personnel; 1,061 firms reported 93,101 employees, compared with 90,917 in the preceding month. This advance was rather smaller than that indicated on October 1 of 1933, but exceeded that noted at the beginning of any other October for which statistics are available. The index on the date under review stood at 120.0, compared with 115.0 on October 1, 1933.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns on the date under review.

## (2) Unemployment in Trade Unions at the Close of September, 1934

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle owing to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The unemployment level among local trade unions at the close of September varied very slightly from that of the preceding month, what nominal change was noted being in a favourable direction. This was apparent from the returns tabulated from 1,700 labour organizations covering 159,675 members. Of these, 26,204 were reported idle on the last day of the month, a percentage of 16.4 in contrast with 16.5 per cent of inactivity in August. There was a greater employment prevalence shown also from September, 1933, when 19.8 per cent of the members reported were without work. Alberta and British Columbia unions registered moderate gains in activity from August and conditions in Manitoba

were slightly better. In addition, Nova Scotia, Ontario and Saskatchewan members showed fractional employment advances. Quebec unions, on the other hand, reported some falling off in work available from August, more particularly in the garment trades, and, in a smaller way, among iron and steel workers, while the declines registered from New Brunswick were but nominal. All provinces participated in the favourable movement noted from September of last year, although the gains were not of particular importance in any one province, Ontario, Manitoba, Saskatchewan and Alberta unions showing employment expansion of somewhat over 4 per cent and the remaining provinces improvement of slightly lesser degree.

Each month records of unemployment for the largest city in each province, with the exception of Prince Edward Island, are tabulated separately. Of these, Edmonton unions during September showed increases in activity of about 4 per cent from August and in Regina and Winnipeg gains, on a somewhat smaller scale, were recorded. On the contrary, Vancouver and Toronto unions indicated curtailment in activity of over 3 per cent, and in Montreal lesser declines occurred, Saint John unions showing but a fractional drop in activity. From Halifax the unem-

ployment percentage reported was identical with that of the previous month. When contrasted with the returns for September of last year Saint John unions showed the most pronounced employment advances during the month reviewed. Heightened activity, on a more moderate scale, was reflected by Winnipeg, Halifax, Montreal, Toronto, Regina and Vancouver unions. In Edmonton, however, the trend of employment was adverse, though the change from September a year ago was less than one per cent.

Appearing with this article is a chart which shows the trend of unemployment by months from January, 1928, to date. At the close of

percentage of 16.0, contrasted with 13.6 per cent in August. The determining factor in this less favourable employment movement shown from August was between-season quietness in the garment trades, particularly in Montreal, while curtailment of activity, of much lesser proportions, was apparent among iron and steel, fur, glass, hat and cap workers, general labourers, brewery workers, bakers and confectioners, and metal polishers. Textile and carpet workers, however, were much better engaged than in August, as were also cigar makers, and marked gains were reflected by woodworkers, and meat cutters and butchers. Among papermakers, printing

#### PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

September the curve rested at almost the same level as in August, though the tendency was towards a greater employment volume. In this slight movement it followed the course of September a year ago, the same volume of change being shown from August to September this year as in the corresponding two months of 1933, though the situation as indicated by the curve was more favourable than in September a year ago.

There was some slowing up of industrial activity evident in the manufacturing industries during September from the previous month as manifest by the reports tabulated from 462 local unions, with an aggregate of 50,185 members. Of these, 8,019 were without employment on the last day of the month, a

tradesmen and leather workers nominal improvement only was indicated. Considerable employment recovery was shown in the manufacturing industries from September a year ago when 21.3 per cent of the members reported were idle. In this comparison the iron and steel trades registered increases in activity affecting the greatest number of members which was partially offset by the curtailment evident in the garment trades. Among leather workers and metal polishers large percentage increases in employment were reflected. Textile and carpet, jewellery and woodworkers, papermakers, printing tradesmen and general labourers also indicated noteworthy employment advances and heightened activity, of lesser degree was apparent among brewery,

and hat and cap workers, cigarmakers, bakers and confectioners, and meat cutters and butchers. Glass workers, however, reported a sharp drop in work available, while fur workers indicated an unchanged situation from September of last year.

The substantial improvement noted in the coal mining industry during August was sus-

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

tained throughout September and increased slightly by the close of the month, unemployment standing at 11.5 per cent, as compared with a percentage of 13.7 in August. The September percentage was based on the reports compiled from 51 unions with a total of 16,492 members. Nova Scotia, Alberta and British Columbia unions were all afforded a better volume of work than in August, Alberta unions showing the greatest gains. Activity in the coal mining industry, as a whole, was slightly retarded from September a year ago, when 9.8 per cent of idleness was reported. Conditions for British Columbia miners were moderately better than in September last year and little change occurred in Nova Scotia, though the tendency was favourable. Minor contractions in employment, however, were manifest in Alberta. Short time work continued to be in evidence in both the eastern and western coal areas.

Some lessening of the unemployment volume was indicated in the building and construction trades during September, the 195 organizations reporting, with a total of 17,227 members, showing that 9,283 or 53.9 per cent were without work at the end of the month, in contrast with 57.3 per cent in August. Heightened activity in substantial measure was noted from September a year ago when the percentage of idleness stood at 65.8. Electrical workers, and bridge and structural iron workers were considerably better engaged than in August and gains of much lesser magnitude, though noteworthy, were reflected by granite and stonecutters. A favourable employment tendency was indicated also by bricklayers, masons and plasterers, carpenters and joiners, painters, decorators and paper-hangers, and tile layers, lathers and roofers, though the changes were slight. Among steam shovelmen and hod carriers and building labourers there was no variation in the percentage of unemployment reported from August. Activity for plumbers and steamfitters, however, eased off slightly. In contrasting with the returns for September of last year in the building and construction trades, bricklayers, masons and plasterers, carpenters and joiners, electrical workers, granite and stonecutters and painters, decorators and paper-hangers, all indicated extensive employment recovery during the month reviewed. In addition, steam shovelmen and hod carriers and building labourers registered important increases in activity. Tile layers, lathers and roofers, however, were considerably slacker than in September, 1933, and recessions, on a moderate scale, were indicated by plumbers and steamfitters and bridge and structural iron workers.

November, 1923	1																															

The transportation industries, with 753 organizations reporting a membership of 52,328 persons in September, showed that 4,234 were idle at the end of the month, a percentage of 8.1, in contrast with 9.2 per cent in August and 12.0 per cent in September, 1933. The steam railway division, which included over 78 per cent of the entire group membership reported, accounted for the slightly better situation which obtained in comparison with August. The same level of activity was shown by street and electric railway employees and teamsters and chauffeurs as in the previous month, while among navigation workers employment was slightly retarded. The improvement registered in the transportation industries over September last year was attributable almost exclusively to the more favourable conditions existing for steam railway employees, fractional gains only occurring among street and electric railway employees. Greater depression was evident among navigation workers than in September a year ago, the drop in activity recorded being about 5 per cent, and among teamsters and chauffeurs there was little change, though the tendency was towards a lessening of the employment volume.

Contractions in activity on a moderate scale were reported by retail clerks during September from the previous month, the 5 associations making returns, with 1,788 members, showing that 213, or 11.9 per cent, were idle at the end of the month, in contrast with 8.2 per cent in August. Extensive employment losses, however, were recorded from September a year ago when only 0.6 per cent of idleness was indicated.

There was but slight variation in conditions among civic employees during September from the previous month, though the tendency was favourable, unemployment standing at 3.2 per cent in contrast with a percentage of 3.4 in August. The September percentage was based on the returns tabulated from 77 associations of these workers with a total of 8,055 members, 256 of whom were without work on the last day of the month. Improvement, of somewhat greater extent,

was reflected from September a year ago when 5.2 per cent of the members reported were idle.

The miscellaneous group of trades afforded a better volume of work during September than in the previous month, the 109 unions furnishing reports with 3,626 members showing that 529, or 14.6 per cent, were unemployed at the end of the month as compared with 16.8 per cent in August. Theatre and stage employees reported the most noteworthy advances in work afforded from August, stationary engineers and firemen, barbers and unclassified workers showing slight gains in activity only. Hotel and restaurant employees alone reported a less favourable tendency, though the change was but fractional. The situation in the miscellaneous group of trades, as a whole, was considerably better than in September last year, when 20.2 per cent of the members reported were idle. All tradesmen shared in this favourable movement, the most important of whom were the hotel and restaurant employees, though among theatre and stage employees and unclassified workers the gains were also noteworthy.

Fishermen reported marked increases in work afforded during September from the previous month, though conditions were still quite slack, unemployment showing a drop from 66.7 per cent in August to 44.4 per cent in September. Greater depression was evident than in September a year ago, when 24.8 per cent of inactivity was recorded.

From unions of lumber workers and loggers 3 reports were received during September, covering 1,457 members, 652, or 44.7 per cent, of whom were idle at the end of the month, in contrast with percentages of 37.0 in August and 16.9 in September, 1933.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1933, inclusive, and also the percentage of unemployment by provinces for September of each year from 1919 to 1931, inclusive, and for each month from January, 1932, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for September, 1934

The volume of business transacted by the offices of the Employment Service of Canada, as shown by the average daily placements effected during September, 1934, showed gains of nearly 6 per cent and 11 per cent, respectively, over those recorded daily during the previous month and also the corresponding month a year ago. Under each comparison logging, services, mining, trade and transporta-

tion registered gains, and farming and construction and maintenance losses, while manufacturing showed more placements than in August, 1934, but fewer than in September, 1933. The highest gains recorded in both instances were in logging and the heaviest losses from August in farming and construction and maintenance and from September, 1933, in construction and maintenance and

manufacturing. Changes in groups other than these were comparatively small.

The accompanying chart shows the trend of employment since January, 1932, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curve of vacancies and of placements in relation to applications declined steadily throughout the month, but at the close of the period under review was still slightly above the level recorded at the end of September a year ago. The ratio of

the Service during the month under review was 2,414, in comparison with 2,162 in August, 1934, and with 2,504 in September last year.

The average number of placements made daily by the offices of the Service during September, 1934, was 1,269, of which 797 were in regular employment and 472 in work of one week's duration or less, as compared with a total daily average of 1,200 during the preceding month. Placements in September a year ago averaged 1,142 daily, consisting of 630 placements in regular and 512 in casual employment.

During the month of September, 1934, the offices of the Service referred 32,502 persons

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o—o—o—o—o—o

vacancies to each 100 applications was 59.1 during the first half and 52.7 during the second half of September, 1934, in contrast with the ratios of 44.6 and 51.5 during the corresponding periods of 1933. The ratios of placements to each 100 applications during the periods under review were 55.1 and 50.1, as compared with 42.6 and 49.1 during the corresponding month of 1933.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during September, 1934, was 1,348, as compared with 1,271 during the preceding month and with 1,198 in September a year ago.

The average number of applications for employment received daily by the offices of

to vacancies and effected a total of 30,441 placements. Of these, the placements in regular employment were 19,117, of which 14,651 were of men and 4,466 of women, while placements in casual work totalled 11,324. The number of vacancies reported by employers was 23,507 for men and 8,843 for women, a total of 32,350, while applications for work numbered 57,916, of which 43,816 were from men and 14,100 from women. Reports for August, 1934, showed 34,304 positions available, 58,372 applications made and 32,378 placements effected, while in September, 1933, there were recorded 29,935 vacancies, 62,579 applications for work and 28,534 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1924, to date:

Year	Placements		
	Regular	Casual	Totals
1924.....	247,425	118,707	366,132
1925.....	306,804	106,021	412,825
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328
1929.....	260,747	137,620	398,367
1930.....	187,872	180,807	368,679
1931.....	175,632	295,876	471,508
1932.....	153,771	198,443	352,214
1933.....	170,576	181,521	352,097
1934 (9 months).....	168,730	138,607	307,337

#### NOVA SCOTIA

During the month of September, 1934, positions offered through employment offices in Nova Scotia were 4 per cent less than in the preceding month, but over 41 per cent above the corresponding month of last year. There was a decline of over 8 per cent in placements when compared with August, but a gain of nearly 49 per cent in comparison with September, 1933. All industrial divisions except services participated in the increase in placements over September of last year, the largest gains being in the highway division of construction and maintenance, and in logging. Placements by industrial divisions included: logging, 78; construction and maintenance, 580; trade, 19; and services, 256, of which 206 were of household workers. During the month 229 men and 79 women were placed in regular employment.

#### NEW BRUNSWICK

There was a decline of over 3 per cent in the number of orders received at employment offices in New Brunswick during September when compared with the preceding month and of nearly 19 per cent in comparison with the corresponding month of last year. Placements were nearly 3 per cent higher than in August but over 17 per cent less than in September, 1933. The decline in placements from September a year ago was due to fewer men being sent to relief work on highway construction, as with this exception and a small loss in transportation, all industrial divisions showed gains. Placements by industrial divisions included: manufacturing, 60; construction and maintenance, 384; and services, 424, of which 329 were of household workers. There were 403 men and 90 women placed in regular employment during the month.

87513-5

#### QUEBEC

During September, employment offices in the Province of Quebec received orders for over 19 per cent more workers than in the preceding month and over 90 per cent more than during the corresponding month of last year. Placements were nearly 25 per cent above August and 108 per cent above September, 1933. All industrial divisions except manufacturing participated in the increase in placements over September of last year, but bush placements were largely responsible for the substantial increase under this comparison. Noteworthy gains were also reported in construction and maintenance, and services. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 69; logging, 1,624; construction and maintenance, 893; trade, 142; and services, 2,211, of which 1,897 were of household workers. There were 2,869 men and 1,572 women placed in regular employment.

#### ONTARIO

Orders listed at employment offices in Ontario during September called for over 6 per cent less workers than in the preceding month, but over 3 per cent more than during the corresponding month of last year. There was a decline of over 8 per cent in placements when compared with August, but a gain of over 2 per cent in comparison with September, 1933. Increased placements were reported in logging, farming, services, mining and transportation when compared with September a year ago. These gains were offset in part by declines in construction and maintenance, manufacturing and trade. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 479; logging, 1,166; farming, 955; mining, 113; transportation, 151; construction and maintenance, 5,712; trade, 256; and services, 3,273, of which 2,045 were of household workers. Placements in regular employment numbered 4,534 of men and 1,487 of women.

#### MANITOBA

Opportunities for employment, as indicated by orders received at employment offices in Manitoba during September, were nearly 16 per cent less than in the preceding month and nearly 2 per cent below the corresponding month of last year. Placements also were nearly 16 per cent less than in August and nearly 8 per cent fewer than during September, 1933. Declines in construction and maintenance and services accounted for the decrease in placements from September of last year, as

the losses in these two groups more than offset the gains in all other divisions. Placements by industrial divisions included: logging, 122; farming, 483; construction and maintenance, 1,463; trade, 44; and services, 651, of which 529 were of household workers. There were 1,816 men and 330 women placed in regular employment during the month.

#### SASKATCHEWAN

There was a decline of nearly 23 per cent in the number of workers required through employment offices in Saskatchewan in September when compared with the preceding month and of nearly 3 per cent in comparison with the corresponding month of last year. Placements also were nearly 23 per cent less than in August and nearly 4 per cent below September, 1933. The only loss of importance in placements from September of last year was in farming. In addition, minor declines were reported in transportation and trade. While there were gains in all other groups, none was important. Placements by industrial divisions included: manufacturing, 47; farming, 1,114; mining, 83; construction and maintenance, 513; trade, 48; and services, 696, of which 478 were of household workers. During the month 1,422 men and 351 women were placed in regular employment.

#### ALBERTA

Employment opportunities, as indicated by orders received at employment offices in Alberta during September, were nearly 4 per cent less than in the preceding month and nearly 5 per cent below the corresponding month of last year. There was a nominal increase in placements when compared with August, but a decline of 5 per cent in comparison with September, 1933. The decrease in placements from September of last year was mainly due to a reduction in the number of workers sent to farms, as losses in construction and maintenance and logging were offset by gains in mining and trade. The changes in other groups were nominal only. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 30; farming, 1,062; mining, 101; construction and maintenance, 1,034; trade, 44; and services, 499, of which 368 were of household workers. During the month 1,857 men and 289 women were placed in regular employment.

#### BRITISH COLUMBIA

During the month of September, positions offered through employment offices in British Columbia were over 14 per cent less than

both those in the preceding month and in the corresponding month of last year. There was a decline also in placements of over 13 per cent when compared with August and of over 14 per cent in comparison with September, 1933. A reduction in placements in highway construction was responsible for the decline from September a year ago, as losses in services and logging were offset by gains in mining, manufacturing, trade and transportation. The changes in other groups were quite small. Placements by industrial divisions included: manufacturing, 48; farming, 81; mining, 56; construction and maintenance, 2,522; trade, 26; and services, 610, of which 438 were of household workers. Placements in regular employment numbered 1,521 of men and 268 of women.

#### Movement of Labour

During the month of September, 1934, the offices of the Employment Service of Canada made 19,117 placements in regular employment, 9,056 of which were of persons from whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter, 854 were granted the Employment Service reduced transportation rate, 687 proceeding to centres within the same province as the despatching office and 167 to other provinces. The reduced transportation rate which is 2.7 cents per mile with a minimum fare of \$4 is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

In Quebec during September 135 reduced rate certificates were issued to bushmen for transportation from Hull to employment within the Pembroke zone. Ontario offices assisted in the transfer of 553 persons during September, 545 of whom went to provincial situations and 8 outside the province. The latter were carpenters who were carried at the reduced rate from Sudbury to Rouyn. Within the province the Sudbury office granted certificates to 334 bush workers and 2 mine labourers going to employment within the territory covered by that office. From Port Arthur 83 bush workers, 69 mine workers, 24 power construction workers, 4 cookees, 3 cooks, 1 plumber and 1 domestic were despatched to centres within the Port Arthur zone, the Fort William office sending 10 bushmen, 8 miners and 3 plumbers to employment within its own zone. The Fort William zone also received 2 mine workers from Timmins. The one remaining transfer was of a tinsmith who journeyed from North Bay to Timmins. The

Winnipeg office was responsible for the despatch of all workers travelling at the reduced rate in Manitoba during September, 36 in number. Of these, 12 went to provincial centres and 24 outside the province. Provincially all workers were sent to points within the Winnipeg zone and included 7 farm hands, 2 miners, 1 carpenter, 1 blacksmith, and 1 hotel cook. The interprovincial movement was entirely to the Port Arthur zone, 13 bushmen, 3 farm hands, 3 mine workers, 1 carpenter, 2 hotel workers and 2 domestics proceeding to employment at various points within that zone. Saskatchewan transfers at the reduced rate during September were 3 in number and effected by the Regina office, which despatched 3 teachers within its own zone. In Alberta, 95 persons took advantage of the Employment Service reduced transportation rate during September, these going to provincial employment. From Edmonton 1 harvester was sent to Drumheller and 47 highway construction workers, 9 building construction workers, 8 mine workers, 1 sawmill clerk, 8 bush workers, 12 farm hands, 1 under-

taker, 3 café workers, and 1 domestic to various centres within the Edmonton zone. The Calgary office was responsible for the despatch of 1 cook each to the Drumheller and Lethbridge zones and of 1 carpenter and 1 cook within the Calgary zone. British Columbia offices granted certificates to 32 persons during September, all of whom went to provincial employment. Travelling on certificates secured at the Vancouver office 15 cannery workers and 2 sawmill workers went to Kamloops, 2 miners and 1 domestic to Penticton and 3 mine workers and 2 hotel employees to points in the Vancouver zone. For employment within their respective zones Nelson transferred 6 miners and New Westminster 1 sawyer.

Of the 854 persons who benefited by the Employment Service reduced transportation rate during September 744 were carried by the Canadian National Railways, 101 by the Canadian Pacific Railway, 5 by the Pacific Great Eastern Railway, 3 by the Temiskaming and Northern Ontario Railway, and 1 by the Northern Alberta Railway.

#### (4) Building Permits issued in Canada during September, 1934

The value of the building authorized in 61 cities during September stood at \$2,247,784; this was a seasonal decrease of \$1,026,705 or 31.4 per cent from the total of \$3,274,489 in August, 1934, but an increase of \$260,881 or 13.1 per cent in the more significant comparison with September of last year, when the permits granted aggregated \$1,986,903. The value of the building authorized in the first nine months of this year, viz., \$19,024,000, was higher than in 1933, though lower than in any other year of the record; in considering these data, it should be noted that the wholesale prices of building materials were lower in 1934 than in other years since 1920, with the exception of 1933, 1932 and 1931.

Some 50 cities furnished detailed statistics for September, showing that they had issued about 135 permits for dwellings estimated to cost approximately \$480,000, and nearly 1,750 permits for other buildings valued at about \$1,375,000. In addition, three cities authorized engineering projects valued at \$17,327. During August, permits were granted for the erection of about 250 dwellings and 1,600 other buildings, estimated to cost approximately \$900,000 and \$1,980,000 respectively.

New Brunswick reported a slight increase in the estimated value of building as com-

pared with August, 1934, while in the remaining provinces there were declines, that of \$562,037 or 32.9 per cent in Ontario being most pronounced.

As compared with September, 1933, there was improvement in Nova Scotia, Quebec, Ontario and Saskatchewan. The greatest gain of \$341,345 or 42.3 per cent was reported in Ontario. Of the declines elsewhere recorded, that of \$107,202 or 38.3 per cent in British Columbia was most marked.

Of the larger cities, Montreal and Toronto registered smaller totals of permits issued than in August, but the value in each case was higher than in September, 1933. Winnipeg and Vancouver showed decreases in both comparisons. Of the other centres, Sydney, Saint John, Guelph, Owen Sound, Stratford, St. Catharines, Sarnia, Sault Ste. Marie, Welland, East Windsor, Woodstock, Regina, Lethbridge and Medicine Hat recorded increases as compared both with August, 1934, and September, 1933.

*Cumulative Record for First Nine Months, 1934.*—The following table gives the value of the building authorized by 61 cities during September, and in the first nine months of each year since 1920, as well as index numbers

Year	Value of permits issued in September	Value of permits issued in first nine months	Indexes of value of permits issued in first nine months (1926=100)	Average indexes of wholesale prices of building materials in first nine months (Average 1926=100)
1934.....	\$ 2,247,784	\$ 19,024,000	15.8	83.4
1933.....	1,986,903	16,394,014	13.6	77.5
1932.....	2,449,735	35,026,199	29.1	77.6
1931.....	10,407,999	88,602,995	73.7	82.7
1930.....	11,093,020	126,361,350	105.2	92.7
1929.....	17,117,017	186,011,017	154.8	99.2
1928.....	20,374,149	165,621,634	137.8	96.7
1927.....	14,462,243	141,152,535	117.5	96.3
1926.....	11,047,503	120,163,936	100.0	100.7
1925.....	10,140,853	98,364,181	81.9	103.1
1924.....	15,055,250	96,817,333	80.6	108.2
1923.....	10,768,898	108,319,972	90.1	111.8
1922.....	11,597,034	116,778,450	97.2	108.5
1921.....	10,907,828	88,573,442	73.7	126.8
1920.....	9,842,677	96,146,278	80.0	144.2

for the latter, based upon the total for the corresponding period of 1926 as 100. The average index numbers of wholesale prices of building materials in the first nine months of the years since 1920 are also given (average 1926=100).

The aggregate for the first nine months of this year was higher by 16.0 per cent than in 1933, but was lower than in earlier years of the record; the average index numbers of wholesale prices of building materials, however, were also lower in 1934 than in other years of this record, except from 1931 to 1933.

## REPORTS OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JULY TO SEPTEMBER, 1934

THE business of the offices of the Employment Service of Canada during the third quarter of 1934 showed considerable gain over that transacted during the corresponding quarter of last year, as there was a gain of 12 per cent, both in opportunities for employment and also in placements effected in regular and casual work. Of the gains recorded in construction and maintenance, logging, services and mining, those in the first three groups are by far the largest and accounted for over 96 per cent of the total. Farming, manufacturing and transportation showed losses, the most pronounced of which was in farming, while placements in trade recorded no change. Provincially, Ontario, Quebec and British Columbia registered increased vacancies and placements, the remaining provinces recording declines in both instances. The accompanying table gives the vacancies and placements of the Employment Service of Canada by industrial groups in the various provinces from July to September, 1934.

From the chart on page 1044, which accompanies the article on the work of the Employment Offices for the month of September, it will be noted that the curves of vacancies and placements in relation to applications were downward throughout the quarter, except during the latter half of August, when an upward trend was shown, but at the close of the period under review both levels were slightly above those shown at the end of September a year ago. During the period, July to September, 1933, there was an average of 53.6 vacancies and 51.0 placements for each 100 applications for employment, as com-

pared with 58.1 vacancies and 55.1 placements for each 100 applications during the period under review.

The average number of positions offered daily during the current quarter was 1,346, of applicants registered, 2,316, and of placements effected, 1,275, in contrast with the daily average of 1,181 vacancies, 2,203 applications and 1,123 placements in regular and casual employment during the corresponding quarter of 1933.

During the three months, July to September, 1934, the Offices reported that they had made 101,974 references of persons to positions and effected a total of 96,865 placements, of which 58,332 were in regular employment and 38,533 in casual work. Of the placements in regular employment 45,274 were of men and 13,058 of women, while casual work was found for 30,660 men and 7,873 women. Comparison with the corresponding period of 1933 showed that 86,467 placements were then made, of which 49,369 were in regular employment and 37,098 in casual work. Applications for employment during the period under review were received from 135,154 men and 40,861 women, a total of 176,015, in contrast with a registration of 169,564 persons during the same period of 1933. Employers notified the Service during the quarter, July to September, 1934, of 102,275 vacancies, of which 76,642 were for men and 25,633 for women, as compared with 90,888 opportunities for work during the corresponding period a year ago.

In another section of this issue will be found a report in detail of the transactions of the Employment Offices for the month of September, 1934.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, October, 1934, summarized the employment situation in September as follows:—

Employment at September 24, 1934, showed a substantial improvement as compared with a month before. The improvement was most marked in coal mining, and in the boot and shoe, pottery and woollen and worsted industries. There was also some improvement in most of the other textile industries, in dress-making and millinery, the hat and cap, iron and steel, tinplate, leather and furniture industries, and cocoa, chocolate and sugar confectionery manufacture.

On the other hand employment declined in building and public works contracting, stone mining and quarrying, the distributive trades, the hotel, boarding house and shipping services, the linen industry, glass bottle making, and certain food manufacturing industries.

The improvement in employment was most pronounced in the Midlands and Northeast England, but there was some improvement also in Northwest England and in Wales. In the south of England, in Scotland, and in Northern Ireland, on the other hand, employment showed a slight decline. In London and the Southeastern counties, however, it continued fairly good, and in the Southwest and Midlands it was fair. In the north of England and in Scotland it continued bad, while in Wales it was still very bad. In Northern Ireland it remained bad.

Among those workpeople of ages 16-64 who were insured against unemployment in Great Britain and Northern Ireland the percentage unemployed at September 24, 1934 (including those temporarily stopped as well as those wholly unemployed), was 16.1,\* as compared with 16.6\* at August 20, 1934, and with 18.4 at September 25, 1933. The percentage wholly unemployed at September 24, 1934, was 13.4,\* as compared with 13.0\* at August 20, 1934; while the percentage temporarily stopped was 2.7,\* as compared with 3.6. For males alone, the percentage at September 24, 1934, was 15.5\* and for females, 9.9\*; at August 20 the corresponding percentages were 18.9\* and 10.4\*.

At September 24, 1934, the number of persons on the registers of Employment Exchanges in Great Britain was 1,647,673 wholly unemployed, 352,696 temporarily stopped, and 81,618 normally in casual employment, making

a total of 2,081,987. This was 54,591 less than a month before, and 254,740 less than a year before. The total included 1,658,481 men, 65,339 boys, 306,721 women and 51,446 girls.

In Great Britain and Northern Ireland, the total number of persons on the registers of Employment Exchanges at September 24, 1934, was 2,143,682.

### United States

*Manufacturing Industries.*—Factory employment decreased 4.7 per cent from August to September and factory pay rolls declined 6.8 per cent over the month interval.

While 44 of the 90 manufacturing industries surveyed each month reported gains in employment from August to September and one industry reported no change, the increases in employment in these industries were not sufficient to offset the declines in the remaining 45 industries. Normally there is a seasonal expansion in employment and pay rolls between August and September. Labour disturbances in September, however, in certain textile industries, combined with recessions in employment in industries of such importance as automobiles, hardware, boots and shoes, blast furnaces, steel works, rolling mills, and foundries and machine shops contributed largely to these contra-seasonal fluctuations.

The Bureau of Labour Statistics' index of factory employment for September, 1934, was 75.8 (preliminary) and the September index of factory pay rolls was 57.9 (preliminary). The index of factory employment in September, 1934, is 5.2 per cent below the level of the same month in 1933, when the index was 80.0. The September, 1934, pay-roll index is 2.0 per cent below that of September of a year ago, when the index was 59.1. The base used in computing these indexes is the average for the 3-year period, 1923-1925, which is taken as 100.

The indexes of factory employment and pay rolls are computed from returns supplied by representative establishments in 90 important manufacturing industries of the country. Reports were received in September from 24,206 establishments employing 3,439,808 workers, whose weekly earnings were \$63,872,263 during the pay period ending nearest September 15. The employment reports received from these co-operating establishments cover more than 50 per cent of the total wage earners in all manufacturing industries of the country.

Comparing the level of employment and pay rolls in the 90 separate industries in Sep-

\*Provisional figures.

tember, 1934, with September, 1933, 41 industries show increased employment over the year interval and 53 industries show increased pay rolls.

*Non-Manufacturing Industries.*—Seven of the 18 non-manufacturing industries surveyed monthly by the Bureau of Labour Statistics reported gains in employment from August to September and 6 industries reported gains in payrolls.

The most pronounced gains were seasonal increases of 15 per cent in employment and 18.4 per cent in payrolls in the anthracite mining industry. These gains reflect seasonal activity combined with a resumption of operation in a number of mines which had previously been affected by labour trouble. Employment in retail trade, based on reports received from 57,762 establishments employing 861,635 workers in September showed a gain of 7 per cent over the month interval. The general merchandise group, composed of department stores, variety stores, general merchandise stores and mail order houses showed a seasonal increase of 12.7 per cent in employment while in the remaining 52,978 retail

establishments employment increased 3.0 per cent. Employment in the private building construction industry showed a gain of 1.8 per cent from August to September and payrolls increased 2.0 per cent. The percentages are based on reports received from 10,190 contractors employing 77,598 workers in September, and do not include employees on construction projects financed by Public Works funds. The dyeing and cleaning industry also reported an increase of 1.8 per cent in employment from August to September coupled with an increase of 4.1 per cent in payrolls. Employment in bituminous coal mining increased 1.4 per cent, reflecting seasonal demand, and wholesale trade establishments reported a gain of 1.2 per cent in number of workers from August to September. The gain of 0.2 per cent in employment in the electric light and power industry was coupled with a decrease of 0.7 per cent in payrolls. The quarrying and non-metallic mining industry reported a decrease of 2.6 per cent, and the hotel industry reported a decline of 2.1 per cent, reflecting the closing of seasonal resort hotels.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding the contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government with respect to contracts "for construction, remodelling, repair or demolition of any work" is set forth in an Act of Parliament adopted on May 30, 1930, entitled "The Fair Wages and Eight-Hour Day Act" (chapter 20-21, Geo. V). The full text of this measure appeared in the LABOUR GAZETTE, April, 1930, page 383. The Fair Wages and Eight-Hour Day Act provides as follows:—

3. (1) Every contract made hereafter with the Government of Canada for construction, remodelling, repairs or demolition of any work shall be subject to the following conditions respecting wages and hours:—

(a) All persons in the employ of the contractor, sub-contractor, or of any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall be paid such wages as are generally accepted as current from time to time for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged; provided that wages shall in all cases be such as are fair and reasonable;

(b) The working hours of persons while so employed shall not exceed eight hours per day except in such special cases as the Governor in Council may otherwise provide, or, except in cases of emergency, as may be approved by the Minister.

The Fair Wages Policy was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Order in Council of April 9, 1924. The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions for the protection of the workmen employed, which are sanctioned by the foregoing Orders in Council.

It is further provided in the foregoing Orders in Council that "all contracts for the manufacture and supply to the Government

of Canada of fittings for public buildings; harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees; mail bags, letter boxes, and other postal stores; and any other articles and things hereinafter designated by the Governor in Council" must contain provisions for the observance of the current wages rates and working hours in the district, or, in the absence of any such current standards, fair and reasonable rates and working hours. These conditions, which are referred to in the Orders in Council as "B" conditions (the Conditions of the Fair Wages Orders in Council with reference to building and construction works being designated as "A" conditions), including the following Fair Wages Clause:—

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rate of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Both in the case of contracts for building and construction work, and in the "B" conditions sanctioned by Orders in Council applicable to contracts for the manufacture of certain classes of supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed.

The contractor is also required to keep proper books and records showing the names, trades and address of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages, rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed, claim therefore may be filed with the Minister of the Department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of certain classes of supplies listed in the Fair Wages Orders in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing fair wages conditions, have been recently executed by the Government of Canada:—

## DEPARTMENT OF MARINE

*Contracts in Group "A" (Construction, etc.)*

Construction of water-works, roads, graveling, etc. for the Harbour Commissioners of Chicoutimi, Chicoutimi, P.Q. Contractor, Mr. Jean Angers, Chicoutimi, P.Q. Date of contract, October 1, 1934. Amount of contract, \$130,082.06. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Blacksmiths.....	\$0 45	8
Bricklayers.....	0 70	8
Carpenters and joiners.....	0 50	8
Cement finishers.....	0 50	8
Compressor operators.....	0 40	8
Drill runners (machine).....	0 40	8
Electricians.....	0 55	8
Firemen—stationary.....	0 35	8
Hoist operators (gasoline).....	0 45	8
Hoist operators (steam).....	0 55	8
Labourers.....	0 30	8
Lathers, metal or wood.....	0 50	8
Machinists.....	0 55	8
Motor truck drivers.....	0 35	8
Painters and glaziers.....	0 50	8
Plasterers.....	0 70	8
Pile driver runners.....	0 55	8
Plumbers and steamfitters.....	0 55	8
Roofers, felt and gravel.....	0 45	8
Sheet metal workers.....	0 55	8
Structural steel workers.....	0 65	8
Driver, horse and cart.....	0 45	8
Driver, team and wagon.....	0 55	8
Concrete mixer operator.....	0 40	8

N.B.—In any cases where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Construction of a lighthouse and tower at Sheet Rock, Halifax Co., N.S. Name of contractors, the McDonald Construction Co., Halifax, N.S. Date of contract, September 6, 1934. Amount of contract, \$7,915. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Bricklayers.....	\$0.70	8
Carpenters.....	0 50	8
Cement finishers.....	0 50	8
Compressor operator.....	0 40	8
Concrete mixer operator.....	0 40	8
Electricians.....	0 55	8
Hoist operator—gas.....	0 45	8
Labourers.....	0 30	8
Lathers—metal or wood.....	0 50	8
Motor truck drivers.....	0 35	8
Painters and glaziers.....	0 50	8
Plumbers and steamfitters.....	0 55	8
Man in charge of roofing—felt and gravel.....	0 45	8
Sheet metal workers.....	0 55	8
Stonecutters.....	0 60	8
Stonemasons.....	0 70	8
Teamsters, team and wagon.....	0 55	8

Painting the Jacques Cartier Bridge structure, Montreal, P.Q. Name of contractors, F. J. Leduc & Associates, Montreal, P.Q. Date of contract, August 30, 1934. Amount of contract, \$49,500. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Brushmen.....	\$0 50	8
Riggers.....	0 50	8
Carpenters.....	0 60	8
*Labourers.....	0 35	8
	0 40	

\*N.B.—Labourers are to receive an hourly rate of 35c. if work is performed on the basis of an eight-hour day. If however, work is done on a shorter day basis, the hourly rate is to be 40c.

Placing necessary stone to restore elevation of the dams across the secondary arms of the St. Lawrence River below Sorel, P.Q. Name of contractors, the Dufresne Construction Co., Ltd., Montreal, P.Q. Date of contract, October 3, 1934. Amount of contract, \$3.25 per cubic yard of material. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Derrick operators.....	\$0 55	8
Derrick hands.....	0 30	8
Labourers.....	0 30	8

Construction of cribwork pier at Pointe du Lac, Lake St. Peter, P.Q. Name of contractors, the Laval Construction Company, Montreal, P.Q. Date of contract, October 4, 1934. Amount of contract, \$12,800. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Labourers.....	\$0 30	8
Pile driver runner.....	0 55	8
Timbermen or criemen (using such tools as: X-cut Saw, hammer, broad-axe, auger, adze).....	0 37½	8
Carpenters.....	0 50	8
Teamster, team and wagon.....	0 55	8
Teamster.....	0 30	8

## DEPARTMENT OF NATIONAL DEFENCE

*Contracts in Group "A" (Construction, etc.)*

Supply and erection of structural steel at the Mess and Recreational Building, Royal Military College, Kingston, Ont. Name of contractors, Hamilton Bridge Co., Ltd., Hamilton, Ont. Date of contract, September 6, 1934. Amount of contract, \$23,750.

Pouring of foundation walls at the above-mentioned building, Kingston, Ont. Name of contractor, Mr. W. P. R. Holderoft, Kingston, Ont. Date of contract, October 2, 1934. Amount of contract, \$3,281.

A fair wages schedule was inserted in the two contracts above-mentioned as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Cement finishers.....	\$0 95	8
Stonemasons.....	0 95	8
Stone cutters.....	0 95	8
Brick and hollow tile layers.....	0 95	8
Structural steel workers.....	0 80	8
Carpenters and joiners.....	0 75	8
Sheet metal workers.....	0 80	8
Man in charge of felt and gravel roofers.....	0 75	8
Terrazzo layers.....	0 75	8
Marble setters.....	0 95	8
Tile setters.....	0 95	8
Metal lathers.....	0 75	8
Plasterers.....	0 95	8
Plasterers' helpers.....	0 45	8
Painters and glaziers.....	0 70	8
Plumbers and steamfitters.....	0 80	8
Electricians.....	0 70	8
Labourers.....	0 40	8
Motor truck driver.....	0 45	8
Driver, horse and cart.....	0 60	8
Driver, team and wagon.....	0 75	8
Driver.....	0 40	8
Hoist operator—gasoline.....	0 60	8
—steam.....	0 75	8

N.B.—In any cases where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

*Contracts in Group "B"**(Manufacture of Supplies, etc.)*

The following is a statement of contracts awarded by the Department of National Defence during the month of October, 1934, for various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

Goods Contracted for	Contractor
Braces.....	National Suspender Co., Toronto, Ont.
Galvanized steel.....	Pedlar People Ltd., Ottawa, Ont.
Ankle boots.....	J. A. and M. Cote, Ltd., St. Hyacinthe, P.Q.
Ankle boots.....	A. E. Wry-Standard Ltd., Amherst, N.S.

Goods Contracted for	Contractor
Flannelette.....	Canadian Cottons Ltd., Montreal, P.Q.
Kit bags.....	Woods Mfg. Co., Ltd., Ottawa, Ont.
Caps.....	The Ottawa Imperial Cap Co., Ottawa, Ont.
Ready roofing.....	Brantford Roofing Co., Brantford, Ont.
Mattresses.....	Simmons Ltd., Vancouver, B.C.
Table oilcloth.....	Dom. Oilcloth and Linoleum Co. Ltd., Montreal, P.Q.
Rubber boots.....	Northern Rubber Co., Guelph, Ont.
Rubber boots.....	Woodstock Rubber Co., Ltd., Woodstock, Ont.
Rubber boots.....	Canadian Goodrich Co., Kitchener, Ont.
Sheets, pillow slips, dish towels.....	Dominion Textile Co., Ltd., Montreal, P.Q.
Trouser drill.....	Dominion Textile Co., Ltd., Montreal, P.Q.
Leather mitts.....	Charles E. Duclos, Montreal, P.Q.
Shirt drill.....	Dominion Textile Co., Ltd., Montreal, P.Q.
Canvas shoes.....	The Great West Felt Co., Elmira, Ont.
Mackinaw coats.....	Grant-Holden-Graham Ltd., Ottawa, Ont.
Sweater jackets.....	Jos. Simpson Sons Ltd., Toronto, Ont.
Forks and spoons.....	McClashan Clarke Co., Ltd., Niagara Falls, Ont.
Cloth.....	Watchorn and Co., Ltd., Merrickville, Ont.
Drawers.....	Galt Knitting Co., Galt, Ont.
Drawers.....	Penmans Ltd., Montreal, P.Q.
Drawers.....	Jos. Simpson Sons, Toronto, Ont.
Drawers.....	Zimmerknit Ltd., Hamilton, Ont.
Shirts.....	Galt Knitting Co., Galt, Ont.
Shirts.....	Penmans Ltd., Montreal, P.Q.
Shirts.....	Jos. Simpson Sons, Toronto, Ont.
Shirts.....	Zimmerknit Ltd., Hamilton, Ont.
Socks.....	Brampton Knitting Mills, Brampton, Ont.
Leather gloves.....	Western Glove Works, Ltd., Winnipeg, Man.
Leather gloves.....	W. H. Gurney, Wingham, Ont.
Soap.....	Colgate Palmolive Peet Co. Ltd., Toronto, Ont.
Peak caps.....	Ottawa Imperial Cap Co., Ottawa, Ont.
Shoes.....	Great West Felt Co., Elmira, Ont.
Tap soles and top lifts.....	Anglo-Canadian Leather Co., Toronto, Ont.
Crockery.....	Sovereign Potters Ltd., Hamilton, Ont.
Soap.....	Royal Crown Soaps Ltd., Calgary Alta.
Gum rubber boots.....	Canadian Goodrich Co., Kitchener, Ont.
Gum rubber boots.....	Woodstock Rubber Co., Woodstock, Ont.
Gum rubber boots.....	Northern Rubber Co., Guelph, Ont.
Sweater jackets.....	Joseph Simpson Sons Ltd., Toronto, Ont.
Enamel ware.....	General Steel Wares Ltd., Montreal, P.Q.
Mattresses and pillows.....	Arrow Bedding Ltd., Toronto, Ont.

## DEPARTMENT OF PUBLIC WORKS

*Contracts in Group "A" (Construction, etc.)*

Construction of a Customs and Immigration Building and Customs Warehouse at Lacolle, P.Q. Name of contractor, Mr. Francois E.

Girard, Lacolle, P.Q. Date of contract, October 18, 1934. Amount of contract, \$20,000 and unit prices for additional work. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator.....	\$ 40	8
Cement finishers.....	0 50	8
Stonemasons.....	0 70	8
Stone cutters.....	0 60	8
Brick and hollow tile layers.....	0 70	8
Structural steel workers.....	0 65	8
Ornamental iron workers.....	0 45	8
Carpenters and joiners.....	0 50	8
Sheet metal workers.....	0 55	8
Roofers, felt and gravel (Man in charge).....	0 45	8
Terrazzo layers.....	0 55	8
Marble and tile setters.....	0 70	8
Lathers, metal.....	0 50	8
Plasterers.....	0 70	8
Plasterers' helpers.....	0 35	8
Painters and glaziers.....	0 50	8
Plumbers and steamfitters.....	0 55	8
Electricians.....	0 55	8
Labourers.....	0 30	8
Driver, one horse and cart.....	0 45	8
Driver, team and wagon.....	0 55	8
Driver.....	0 30	8
Motor truck driver.....	0 35	8

Reconstruction of a section of the west pier at Rondeau, Kent Co., Ontario. Name of contractors, Messrs. T. C. Warwick & Sons, Ltd., of Blenheim, Ont., and Edward Cunningham & Sons, Highgate, Ontario. Date of contract, October 15, 1934. Amount of contract, approximately \$16,566.12. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Blacksmith.....	\$ 55	8
Carpenter.....	0 60	8
Cement finisher.....	0 55	8
Concrete mixer operator.....	0 45	8
Hoist engineer—gasoline.....	0 50	8
Hoist engineer—steam.....	0 65	8
Machinist.....	0 65	8
Pile driver runner.....	0 65	8
Labourer.....	0 35	8
Driver, horse and cart.....	0 50	8
Driver, team and wagon.....	0 65	8
Driver.....	0 35	8

Construction of a public building at Wallaceburg, Ontario. Name of contractors, Schultz Construction Ltd., Brantford, Ont. Date of contract, October 18, 1934. Amount of contract, \$39,095 and unit prices for additional work. A fair wages schedule was inserted in the contract as follows.

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator.....	\$ 45	8
Cement finishers.....	0 55	8
Stonemasons.....	0 80	8
Stone cutters, (Granite, Sandstone and limestone).....	0 70	8
Brick and hollow tile layers.....	0 80	8
Structural steel workers.....	0 80	8
Ornamental iron workers.....	0 60	8
Carpenters and joiners.....	0 60	8
Sheet metal workers.....	0 65	8
Roofers, felt and gravel (man in charge).....	0 50	8
Terrazzo layer.....	0 75	8
Terrazzo layers, helpers.....	0 40	8
Marble setters.....	0 80	8
Lathers, metal.....	0 60	8
Plasterers.....	0 80	8
Plasterers, helpers.....	0 40	8
Painters and glaziers.....	0 55	8
Plumbers and steamfitters.....	0 65	8
Electricians.....	0 35	8
Labourers.....	0 50	8
Driver, one horse and cart.....	0 65	8
Driver, two horses and wagon.....	0 40	8
Motor truck driver.....	0 40	8

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Construction of a breakwater at Malloch's Beach, Campobello Island, N.B. Name of contractors, Messrs. J. W. Wilson and W. G. DeWolfe, St. Stephen, N.B. Date of contract, October 22, 1934. Amount of contract, approximately \$19,958. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Hoist engineer—gas.....	\$ 45	8
Hoist engineer—steam.....	0 55	8
Blacksmith.....	0 45	8
Labourers.....	0 30	8
Teamster, team and wagon.....	0 55	8
Teamster.....	0 30	8
Motor truck driver.....	0 35	8
Timbermen or cribmen (using such tools as broad-axe, hammer, X-cut saw, adze, auger).....	0 37½	8

Painting and stone-pointing the exterior of the Hunter Building, Ottawa, Ont. Name of contractors, The C. J. Pott Co., Ltd., Montreal, P.Q. Date of contract, October 10, 1934. Amount of contract, \$3,230.75.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement, the rates of wages for the principal classes of labour are given, with other information of general interest.

## Manufacturing: Textiles and Clothing

TORONTO AND HAMILTON, ONTARIO.—CERTAIN CAP MANUFACTURERS AND THE CLOTH HAT, CAP AND MILLINERY WORKERS INTERNATIONAL UNION, LOCAL No. 41.

Agreement reached October 26, 1934, with certain firms, following strike reported on page 999 of this issue.

The agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, October, 1933, page 1936, the 40 hour week being continued in effect, with the following new provisions:

The system now in effect in each factory to continue but the week work system may be changed by mutual consent of the manufacturers and the union manager.

At the beginning of each season, either party may petition the arbitration board to take up for consideration and decision questions affecting individual or general adjustment of wages and prices.

87513—6

## Manufacturing: Printing and Publishing

TORONTO, ONTARIO.—DAILY NEWSPAPER PUBLISHERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 91.

The agreement which was summarized in the LABOUR GAZETTE, January, 1926, page 58, July, 1928, page 784, December, 1931, page 1355 and September, 1932, page 1019, was changed April 1, 1933, to provide for a reduction in wages to \$44 per week. A new agreement in effect from April 1, 1934, to March 31, 1937, provides for increases in wages as follows: from April 1, 1934, to March 31, 1935, \$45.50 per week of 46½ hours; from April 1, 1935, to March 31, 1936, \$46.50 per week; from April 1, 1936, to March 31, 1937, \$47.50 per week. Night work to be 42 hours per week with the same weekly wage rate as for day work. During the last year of this agreement, wages for apprentices after second year to be \$16 to \$32 per week.

TORONTO, ONTARIO.—CERTAIN JOB PRINTING OFFICES AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 91.

Agreement to be in effect from May 1, 1934, to December 31, 1934, and thereafter from year to year until notice.

Only union members to be employed.

Hours: 44 per week for both day and night work. For work on holidays, double time.

Wages for journeymen: \$33 per week for day work and \$37.95 for night work.

Two apprentices may be employed for the first five journeymen and one to each subsequent four journeymen. Apprentices to serve five years and the union regulations for apprentices to be complied with.

Wages for apprentices: from \$13.50 per week during first half of third year to \$28 during second half of fifth year.

## Manufacturing: Food, Drink and Tobacco

CALGARY, ALBERTA.—ONE POULTRY MARKET AND THE FOOD WORKERS INDUSTRIAL UNION, LOCAL No. 1.

Agreement reached following strike reported on page 997 of this issue. Agreement to be in effect from October 26, 1934, to October 31, 1935. Notice of any change to be given.

The shop committee of employees to be recognized and no discrimination to be shown employees on account of union activity.

Wages are piece rates: 3 cents for each fowl pinned, 3½ cents for each chicken pinned, 9 cents for each turkey pinned, 10 cents for each duck pinned, 12 cents for each goose pinned. For all additional work, 25 cents per hour to be paid.

## Construction: Buildings and Structures

MONTREAL AND DISTRICT, QUEBEC.—CERTAIN ORNAMENTAL IRON AND BRONZE MANUFACTURERS AND CONTRACTORS AND THE CANADIAN ORNAMENTAL IRON AND BRONZE WORKERS' UNION.

This agreement which applies only to shop employees is to be in effect from October 11, 1934, to March 31, 1935.

Employers to recognize the union.

In case of any dispute, the union is not to withdraw its men from shops observing the conditions of the agreement.

Other terms of the agreement were made obligatory on all employers and employees under the Collective Agreements Extension Act and are given on page 1005 of this issue.

## Transportation and Public Utilities: Local Transportation

VANCOUVER AND DISTRICT, B.C.—A CERTAIN FREIGHT AND TRANSFER TRUCKING COMPANY AND THE TRUCK OPERATORS EMPLOYED BY THEM.

Agreement to be in effect from October 1, 1934, for a period of one year and thereafter subject to 30 days' notice.

The Company to recognize an employees' committee which may discuss employment conditions with the management.

Hours not to exceed 5½ days per week and 54 hours per week. In case of emergency, any overtime worked to be allowed off later.

Wages: regular operators \$4.25 per day, motorcycle operators \$2.75, operators promoted from cycle to truck \$3.50 per day during first six months. Spare operators 45 cents per hour.

## Transportation and Public Utilities: Water Transportation

MONTREAL, QUEBEC.—CERTAIN STEAMSHIP COMPANIES AND THE STEAMSHIP CHECKERS AND COOPERS EMPLOYED BY THEM.

Agreement to be in effect from September 6, 1934, to March 31, 1935, and thereafter from year to year until notice.

Hours: 10 per day for day work and 9 for night work.

Overtime: double time for work on Sundays and two holidays except for express and baggage. Double time for working during meal hours until relieved.

Wages: checkers 45 cents per hour for day work and 53 cents for night work; coopers 44 cents for day work and 52 cents for night work. Checkers employed temporarily as head checkers to be paid 5 cents per hour additional.

An employee disciplined who considers himself unfairly treated may submit his case in writing to his employer.

Employers may use their regular weekly or monthly paid employees on any checking and cooping work on the wharves, such employees not to be governed by this agreement.

VANCOUVER, B.C.—THE SHIPPING FEDERATION OF BRITISH COLUMBIA AND THE VANCOUVER AND DISTRICT WATERFRONT WORKERS ASSOCIATION.

The report of the Board under the Industrial Disputes Investigation Act dealing with the dispute between these two parties was published in the LABOUR GAZETTE, July, page 596. The majority award of this Board was rejected by the workers as noted in the August issue, page 729. As stated in the October issue, page 904, a joint negotiating committee composed of members of each party subsequently reached a revised agreement which was accepted by both parties.

The agreement applies only to the loading and discharging of deep sea vessels in Vancouver Harbour.

Agreement to be in effect from November 1, 1934, to October 31, 1937, and thereafter from year to year until notice. Rules, Working Conditions and Despatching Regulations may be amended at any time by mutual agreement or by reference to the joint advisory and negotiations committee. Wage rates may also be changed by a joint conference and mutual agreement.

Union members to be employed, if available.

The employment and regulation of waterfront labour including the despatching and distribution of work and earnings shall be controlled by the Shipping Federation and supervised through its Labour Manager, but the Association may appoint a representative to co-operate with and assist the labour manager in the supervision and administration of the despatching regulations which regulations form part of the agreement.

All disputes which cannot be settled by the labour manager and the business agent of the Association are to be referred to the joint advisory and negotiations committee. If they cannot agree, the matter to be referred to an arbitration committee.

Hours: 8 per day between 8 a.m. and 5 p.m. excluding the noon hour. All other time to be considered overtime.

Wages per hour: straight time for ship work 85 cents, dock work 81 cents; overtime \$1.28 per hour for ship work and \$1.22 for dock work. Double winch driver 10 cents per hour extra. Meal hour: \$1.28 straight time for ship work, \$1.22 for dock work; \$1.92 overtime on ship, \$1.83 overtime on dock. Special rates are paid for handling special commodities, including coal, cement, fertilizers, creosoted products, etc., for the most part at 10 cents per hour

extra, with some exceptions such as handling high explosives and damaged cargo which is paid at same rates as for meal hour noted above. Waiting time for men despatched to work and waiting for work to commence to be paid at half regular or overtime rates according to the time of the day, except between 1 a.m. and 6 a.m. when full overtime rate to be paid.

Provision is made for transportation and travelling time for work at places outside the harbour.

### Service: Recreational

**HALIFAX, N.S.—CERTAIN THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, LOCAL No. 680.**

Agreements to be in effect from September 1, 1934, to August 31, 1935.

Only union members to be employed as moving picture machine operators and stage employees.

Hours and wages per week: Moving picture machine operators—in one theatre with a continuous showing, two shifts with two projectionists on each shift working 5½ hours per day, 6 days per week, \$42 per week for first class projectionist and \$35 for second class; for a non-continuous showing, two projectionists to be employed 7½ hours per day, 6 days per week, \$46 for first class projectionists and \$41 for second class. In another theatre, hours 7 per day, 6 days per week, wages \$30 for first projectionists and \$23 for other projectionists. In another theatre \$37 for first projectionists and \$29 for others. Wages for stage employees: \$30 per week for carpenter, propertymen and electrician and \$25 for assistant propertymen, assistant electricians, flymen grips and lamp operators, with a 48 hour week.

Overtime for both projectionists and stage employees: \$1.50 per hour. Sunday work at double overtime rate.

Provision is made for payment for extra performances, etc.

**OTTAWA, ONTARIO.—CERTAIN THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, LOCAL No. 257.**

Agreements to be in effect from September 1, 1934, to August 31, 1936.

Only union members to be employed.

Wages for projectionists: \$45 per week, two men to be employed on a shift.

Overtime: \$1.50 per hour, extra performances \$7.50 per man.

Provision is made for the arbitration of disputes.

**KINGSTON, ONTARIO.—CERTAIN THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, LOCAL No. 528.**

Agreements to be in effect from September 1, 1934, to August 31, 1935.

Only union members to be employed.

Hours: 7 per day.

Overtime: \$1.50 per hour. Sunday work at double overtime rate.

Wages for projectionists: \$45 per week, one projectionist at each machine.

Provision is made for payment for special performances, etc.

**TORONTO, ONTARIO.—CERTAIN THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, LOCAL No. 173.**

Agreement to be in effect from September 1, 1934, to August 31, 1935.

Only union members to be employed.

Wages and hours vary according to size of theatre. Two men to be employed on each shift. In large theatres operating 33 hours per week, wages \$55 per week. Small theatres operating 27 hours per week; from \$35 for first projectionists and \$20 for second to \$38.50 for both projectionists.

Overtime to be paid pro rata.

Provision is made for payment for extra performances and special showings.

Any dispute between a projectionist and his employer to be referred to the union business agent for adjustment.

**VANCOUVER AND OTHER CENTRES IN BRITISH COLUMBIA.—CERTAIN THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, LOCAL No. 348.**

Agreement to be in effect from September 4, 1933, to September 1, 1935.

Only union members to be employed.

The total amount of wages paid per week in each theatre is given rather than the wages per man. The agreement does not provide for the division of the total wages between the projectionists employed in each case. In a previous agreement it was specified that 2 projectionists be employed in each theatre except for five large theatres where 4 projectionists were to be employed. Total wages per week in each of the theatres in all "Mountain" houses, including Chilliwack, Nanaimo and Prince Rupert: \$56.80 per house per week of 27 hours; in suburban Vancouver \$70.20 per week of 27 hours per house; downtown Vancouver houses \$187 per house per week of 72 hours. Other theatres: \$93.50 per house per week of 36 hours and \$160 per house per week of 60 hours. A readjustment of wages to be made when business shows improvement.

Overtime at straight time rates; Sunday work, double time. Special rates for midnight shows.

**VICTORIA, B.C.—CERTAIN THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, LOCAL No. 168.**

Agreement to be in effect from September 1, 1933, to September 1, 1935.

Only union members to be employed.

Wages for projectionists vary according to size of theatre: \$53.35 and \$47 per week of 44 hours, \$39 and \$24 for 40 hour week and \$30 for 30 hour week.

Overtime at straight time. Sunday work, double time. Midnight shows at time and one-half.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, OCTOBER, 1934

### Cost of Living, Prices of Staple Articles and Index Numbers

THE cost per week of the family budget in terms of retail prices was slightly higher due mainly to the increased cost of foods, while the Dominion Bureau of Statistics index number of wholesale prices was lower due in a large part to lower prices for grains.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.54 at the beginning of October as compared with \$7.46 for September; \$7.24 for October, 1933; \$11.68 for October, 1929; \$10.93 for October, 1926; \$11.48 for October, 1921; \$16.92 for June, 1920 (the post war peak); and \$7.99 for October, 1914. The increase in October as compared with the previous month was due mainly to the higher price of eggs, although the prices of bacon, lard, milk and butter were also higher. The prices of beef, mutton, fresh pork and potatoes were lower. Including the cost of fuel and rent with that of foods the total budget averaged \$15.96 at the beginning of October as compared with \$15.87 for September; \$15.78 for October, 1933; \$21.96 for October, 1929; \$21.14 for October, 1926; \$22.01 for October, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.48 for October, 1914. Fuel was slightly higher due to a seasonal advance in the price of coal. Rent was unchanged.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics based on prices in 1926 as 100 declined from 72.0 in September to 71.4 in October. Comparative figures for previous dates are 67.9 for October, 1933; 96.8 for October, 1929; 98.1 for October, 1926; 99.6 for October, 1921; 164.3 for May, 1920 (the post war peak); and 66.8 for October, 1914. One hundred and ten prices quotations were lower, seventy-two were higher and three hundred and eighty-five were unchanged.

In the grouping according to chief component materials five of the eight main groups declined and three advanced. The groups which declined were: the Vegetables and Vegetable Products group, because of lower prices for grains, bran and shorts; the Fibres, Textiles and Textile Products group, due to reduced quotations for raw cotton, raw wool, woollen cloth and worsted cloth yarns; the Wood, Wood Products and Paper group owing mainly to lower prices for spruce lumber and ground wood pulp; the Non-Metallic Minerals and their Products group, due to lower prices for gasoline; and the Chemicals and Allied Products group, because of declines in the prices of copper

sulphate and soap. The Animals and their Products group was slightly higher, increased quotations for calves, lambs, hides, milk, butter and eggs offsetting lower prices for steers, hogs, fresh and cured meats and leather. The Iron and its Products group and the Non-Ferrous Metals group were also slightly higher.

In the grouping according to purpose both consumers' goods and producers' goods were slightly lower, the former due to lower prices for certain lines of clothing, household equipment and for foods, chiefly milled products, meats, sugar and vegetables. In producers' goods the decline was due mainly to lower prices for materials for the meat packing and for the milling industries.

In the grouping according to origin both raw and partly manufactured goods, and fully and chiefly manufactured goods were lower. Canadian farm products and articles of forest origin were lower while articles of marine origin and articles of mineral origin were higher.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of October of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

(Continued on page 1072)

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL, AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost for an average family

\*Prior to 1926 number of commodities was 236, and commencing in January, 1934, the number is 567.

(Continued from page 1064)

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences.

While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

## Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average

being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing 18½%; Sundries, 20%.

### Retail Prices

Beef prices were again lower in most localities. The Dominion average for sirloin steak was down from 22 cents per pound in September to 21.2 cents in October, round steak from 17.8 cents per pound to 17 cents and shoulder roast from 11.5 cents per pound to 11.1 cents. Decreases were more pronounced in Ontario and the prairie provinces. The price of mutton was down in the average from 19 cents per pound in September to 18.5 cents in October and fresh pork from

an average of 21.6 cents per pound in September to 20.5 cents in October, decreases occurring in most localities. Breakfast bacon was 1 cent per pound higher in the average at 36.2 cents per pound. Lard prices advanced in nearly all localities, the average price being 14.5 cents per pound in October as compared with 13.2 cents in September and 12.7 cents in August.

Egg prices showed a substantial seasonal advance, fresh being up from 27 cents per dozen in September to 32.6 cents in October and cooking from 23.5 cents per dozen to 27.3 cents. Milk was fractionally higher at 10 cents per quart, increases being reported from Sydney, Sherbrooke, St. John's, Toronto, Kitchener, Stratford, London, Windsor, Cobalt and Winnipeg. Butter prices also were seasonally higher in most localities, dairy being up from an average of 21 cents per pound to 21.7 cents and creamery from 24 cents per pound to 24.6 cents.

Canned vegetables were fractionally lower, tomatoes averaging 11.4 cents per tin and peas 12.5 cents per tin. Onions were down from an average of 4.3 cents per pound in September to 3.5 cents in October. The price in July was 6.3 cents per pound. Potato prices were again lower in most localities, decreases, however, were more pronounced in the eastern provinces. The Dominion average for October was 88 cents per ninety pounds as compared with 98 cents the previous month and \$1.23 at the beginning of October last year. Granulated sugar was unchanged at an average price of 6.6 cents per pound. Anthracite coal advanced in the average from \$14.96 per ton in September to \$15.09 in October. Increases were reported from Halifax, Hull, Ottawa, Belleville, Orillia, Niagara Falls, Guelph, Woodstock, Sarnia and Cobalt. No changes were reported in rent.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$16; Windsor, Nova Scotia, \$16.50; Quebec, \$14.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$15.50; Montreal, \$15.50; Hull, \$16.75; Ottawa, \$16.75; Kingston, \$16; Belleville, \$16.50; Peterborough, \$17; Oshawa, \$15; Toronto, \$15; St. Catharines, \$15.50; Hamilton, \$15; Galt, \$16; Windsor, Ontario, \$14; Sudbury, \$17.50; Cobalt, \$19; Timmins, \$19; Port Arthur, \$16; Fort William, \$16; Winnipeg, \$19.50.

### Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices for the most part were lower. No. 1 Manitoba northern cash wheat, Port

Arthur and Fort William basis, averaged 78.2 cents per bushel in October as compared with 82.3 cents in the previous month; western oats 41.5 cents per bushel as compared with 45.7 cents; flax \$1.336 per bushel as compared with \$1.516 and barley 51.6 cents per bushel as compared with 58.5 cents. Rolled oats at Toronto declined 30 cents per ninety-pound bag to \$3. Granulated sugar at Montreal declined from \$5.09 per hundred pounds to \$4.90. Raw rubber at New York was down from 15.9 cents per pound to 14.6 cents. The price in October, 1933, was 8.6 cents per pound. In live stock choice steers at Toronto declined from \$5.30 per hundred pounds to \$5.04 and at Winnipeg from \$3.49 per hundred pounds to \$3.30. Bacon hogs at Montreal were down from \$8.85 per hundred pounds to \$8.19 and at Winnipeg from \$7.65 per hundred pounds to \$7.17. The price of lambs at Mont-

real advanced from \$5.65 per hundred pounds to \$6.05 and at Winnipeg from \$4.66 per hundred pounds to \$5.05. Butter prices were unchanged, creamery at Montreal averaging 21.4 cents per pound and at Toronto 22 cents per pound. Eggs were substantially higher, fresh at Montreal being up from 32.1 cents per dozen to 39.1 cents and at Toronto from 30.8 cents per dozen to 39.4 cents. The price of raw cotton at New York declined from 12.7 cents per pound to 12.2 cents. Raw wool was 1 cent per pound lower at 14 cents. A grade of spruce lumber was down from \$18.50 per thousand board feet to \$16.50. In non-ferrous metals the price of electrolytic copper at Montreal declined from \$7.30 per hundred pounds to \$7.13 and tin at Toronto was down from 56.3 cents per pound to 55.5 cents.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to significant changes in prices in Great Britain and certain other countries. The authorities for the wholesale prices index numbers are named in all cases. The latest table showing cost of living and wholesale prices index numbers for various countries appeared in the LABOUR GAZETTE for October.

### Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1924=100, was 63.4 for September, a decline of 0.3 per cent for the month. An advance of 3 per cent in coal and small increases in cereals, meat and fish and iron and steel were more than offset by decreases in the other groups.

The *Statist* index number on the base 1867-1877=100, was 82.1 at the end of September, a decrease of 1.6 per cent for the month and an increase of 1.7 per cent over the same date last year. All the food groups showed decreases from the previous month, as well as textiles which fell 2.7 per cent.

COST OF LIVING.—The index number of the Ministry of Labour of the cost of living on the base July, 1914=100 was 143 at October 1, showing no change from the September 1 level. All groups were unchanged, except for a slight decrease in food prices.

### France

WHOLESALE PRICES.—The General Statistical Office index number on the base 1914=100 (gold index) was 73 for September, a decline of one point for the month. Vegetable foods

and miscellaneous industrial materials were slightly higher, but the other groups declined, the sugar, coffee and cocoa group showing the only considerable decline.

### Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office, on the base 1913=100, was 100.4 for September, an increase of 0.3 per cent for the month. Agricultural products advanced 0.2 per cent, colonial products declined 0.5 per cent; industrial raw materials and semi-manufactured goods as a whole were unchanged; while manufactured goods advanced 0.9 per cent.

COST OF LIVING.—The official index number, on the base 1913-1914=100, was 122.9 for September, a decline of 0.7 per cent for the month, due entirely to lower food prices, as the other groups were slightly advanced except rent which was unchanged.

### India

WHOLESALE PRICES.—The index number of the Labour Office, Bombay, of wholesale market prices in Bombay, on the base July, 1914=100, was 95 for July, a decrease of one point for the month. Foods as a whole were unchanged, while industrial materials showed a decline of one point.

COST OF LIVING.—The index number of the Labour Office, Bombay, of the cost of living in Bombay, on the base July 1914=100, was 97 for July, an advance of two points for the month, due chiefly to higher food prices.

### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926 = 100, was 77.6 for September, an advance of 1.6 per cent for the month. This continues the steady rise for five months and is nearly 10 per cent higher than the September, 1933, level. As compared with the previous month, farm products advanced over 5 per cent in September. This makes farm products 29 per cent higher than a year ago and 49½ per cent higher than two years ago, but still 31 per cent lower than the September, 1929, level. Food products were 3 per cent higher than in August. Except for slight decreases in metals and metal products and building materials, all other groups were higher or unchanged from the August level.

*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated) which is the sum total of the prices per pound of 96 commodities of common consumption, was \$9.4566 at October 1, a decline of 0.2 per

cent for the month, due to lower prices for breadstuffs, live stock, provisions, fruits, metals, building materials and miscellaneous commodities, which were partly offset by advances in hides and leather, textiles, coal and coke, oils and naval stores.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost *per capita* of a year's supply of commodities, was \$170.032 at October 1, an advance of 0.5 per cent, which continues the advance for the fifth consecutive month. Increases in breadstuffs, dairy and garden produce, "other food" and metals were partly offset by declines in meat, clothing and miscellaneous commodities.

**COST OF LIVING.**—The index number of the Department of Labour and Industries, Massachusetts, of the cost of living in Massachusetts, on the base 1913 = 100, was 135 for September, an advance of 1 per cent for the month. Food, clothing, shelter and fuel and light were all higher than in August, while sundries were unchanged.

## FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1934

**T**HE number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the third quarter of 1934, was 260, there being 103 in July, 97 in August and 60 in September.

The report for the second quarter of 1934, showing 224 fatalities, was given in the *LABOUR GAZETTE*, August, 1934, page 799. In the third quarter of 1933, 189 fatal accidents were recorded (*LABOUR GAZETTE*, November, 1933, page 1139). The supplementary lists of fatal industrial accidents, not reported in time for inclusion in the reports covering the periods in which they occurred, contain 6 fatalities for the first half of 1934, and one fatality for 1933.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, from the Board of Railway Commissioners of Canada, from certain other official sources and from the correspondents of the *LABOUR GAZETTE*. Information as to accidents is also secured from newspapers.

Classified by groups of industries, the fatalities occurring during the third quarter of 1934, were as follows: agriculture, 49; logging, 20; fishing and trapping, 11; mining, non-ferrous smelting and quarrying, 32; manufacturing, 26; construction, 40; electric light and power, 12; transportation and public utilities, 36; trade, 14; service, 20.

Of the mining accidents, 20 were in "metaliferous mining," 8 in "coal mining," and 4 in "non-metallic mineral mining and quarrying, n.e.s."

Of the accidents in manufacturing, 5 were in "vegetable foods, drink and tobacco," 1 in "animal foods," 3 in "textiles and clothing," 3 in "saw and planing mill products," 1 in "wood products," 7 in "pulp, paper and paper products," 1 in "iron, steel and products," 1 in "non-ferrous metal products," 2 in "non-metallic mineral products," and 2 in "chemical and allied products."

In construction there were 17 fatalities in "buildings and structures," 18 in "highway and bridge," and 5 in "miscellaneous construction."

In transportation and public utilities, there were 11 fatalities in "steam railways," 14 in "water transportation," 2 in "air transportation," 8 in "local transportation," and 1 in "telegraphs and telephones."

In trade there were 3 fatalities in "wholesale," and 11 in "retail."

**FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1934  
BY GROUPS OF INDUSTRIES AND CAUSES**

CAUSE	Agriculture	Logging	Fishing and Trapping	Mining, Non-ferrous Smelting and Quarrying	Manufacturing	Construction	Electric Light and Power	Transportation and Public Utilities	Trade	Finance	Service	Unclassified	Total

Of the fatalities in service, 11 were in "public administration," 4 in "recreational," 1 in "laundering, dyeing and cleaning," 3 in "custom and repair," and 1 in "personal, domestic and business."

Accidents involving the loss of two or more lives were as follows:—

On July 31, two quartz miners lost their lives following a cave-in at a placer mine at Vital Creek, British Columbia.

Two labourers were crushed under a concrete roof when it collapsed at Toronto, Ontario, on July 10.

Two labourers on sewer construction were buried when an excavation caved in at Montreal, Quebec, on July 5.

When their plane crashed into Lake Winnipeg, Manitoba, on August 17, the pilot and the engineer were drowned.

A truck driver and his helper were killed when a train struck their truck at Britannia Mills, Quebec, on July 7, and another truck driver and helper were killed in a similar accident at Port Hope, Ontario, on July 26.

While fighting a fire following an explosion on an oil barge at Toronto, Ontario, on July 23, the fire chief and two firemen were burned to death and the owner of the barge died from burns on September 15.

### Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first half of 1934 has been compiled which contains 6 fatalities, of which 1 was in logging, 1 in construction, 1 in transportation and public utilities, 2 in trade and 1 in service. One of these accidents occurred in February, 2 in April, 1 in May and 2 in June.

A further supplementary list of accidents occurring in 1933 has been made. This contains one fatality which was in transportation and public utilities and which occurred in October.

There were 5,226 accidents reported to the Ontario Workmen's Compensation Board during the month of October, as compared with 4,695 during September, and 3,558 during October a year ago. This brings the total number of accidents reported to date this year to 45,553, as compared with 30,887 for the same period last year. The fatal cases reported during October numbered 33, as against 18 in September. The total benefits awarded in October amounted to \$422,820.58, of which \$345,396.05 was for compensation and \$77,424.53 for medical aid, which brings the benefits awarded during 1934 to date to \$3,668,826.62, as compared with \$2,993,645.05 for the corresponding period of 1933.

# THE LABOUR GAZETTE

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 34]

DECEMBER, 1934

[NUMBER 12

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

CONTRARY to the usual seasonal movement in industrial employment as experienced in the last thirteen years, there was further though slight improvement in the general situation at the beginning of November, when the 8,978 firms furnishing employment returns to the Dominion Bureau of Statistics reported 937,482 employees, as compared with 934,902 on October 1. Each of these firms ordinarily employs a minimum of 15 workers. Reflecting the advance, the index (based on the average for the calendar year 1926 as 100), increased from 100.0 in the preceding month to 100.2 on the date under review, as compared with 91.3 on November 1, 1933. On that date in the preceding twelve years, the index was as follows: 1932, 84.7; 1931, 103.0; 1930, 112.9; 1929, 124.6; 1928, 118.9; 1927, 108.8; 1926, 104.0; 1925, 98.3; 1924, 94.1; 1923, 100.0; 1922, 97.0, and 1921, 91.3.

At the beginning of November, 1934, the percentage of unemployment reported by local trade unions stood at 16.2 in contrast with percentages of 16.4 at the beginning of October, 1934, and 19.8 at the beginning of November, 1933. The percentage for November was based on the returns received by the Department of Labour from an aggregate of 1,765 labour organizations, including 162,066 members.

Reports received from the offices of the Employment Service of Canada during October, 1934, indicated a gain in vacancies and placements, but a decline in applications when the figures were compared with those of the corresponding month a year ago, all groups, except construction and maintenance, participating in the general improvement noted. Vacancies in October, 1934, numbered 35,954, applications 64,745, and placements in regular and casual employment 34,052.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent at the beginning of November was \$16.03 as compared with \$15.96 for October; \$15.72 for November, 1933; \$22.03 for November, 1929; \$21.24 for November, 1926; \$21.60 for November, 1921; \$26.92 for July, 1920 (the

post-war peak); and \$14.36 for November, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics based upon prices in 1926 as 100 was 71.2 for November as compared with 71.4 for October; 68.9 for November, 1933; 95.7 for November, 1929; 97.7 for November, 1926; 98.3 for November, 1921; 164.3 for May, 1920 (the post-war peak); and 67.2 for November, 1914.

The most recent statistics available reflecting industrial conditions in Canada are given in the table on page 1078. The index of the physical volume of business was slightly lower in October than in the preceding month but nearly 9 per cent higher than in October last year. Of the principal factors included in the index those used as indicators of mineral production, electric power output, carloadings, imports and exports were higher than in the preceding month, while manufacturing, construction and trade employment were lower. As compared with October, 1933, all of these factors except construction were substantially higher. Information available for November shows employment continuing to improve. Sugar manufactured during the four weeks ended November 3 was much higher both as compared with the preceding four weeks and with the corresponding period in 1933. Wholesale prices declined slightly from the level in October but were higher than in November last year.

The figures for strikes and lockouts during November were the lowest since the middle of 1933, there being only thirteen disputes recorded, involving 1,542 workers and resulting in a time loss of 17,182 man working days. In October, 1934, there were recorded sixteen disputes, involving 4,970 workers and resulting in a time loss of 52,011 days; while in November, 1933, there were twenty disputes, involving 4,718 workers with a time loss of 51,040 days. Most of the time loss for November, 1934, resulted from two strikes, one of loggers in northern Ontario carried over from October, and one of coal miners in Vancouver Island. In October over one-half of the time loss resulted from two strikes of coal miners in Nova Scotia. In November,

## MONTHLY STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

(Official statistics except where noted)

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(3) Figures for end of previous month.

(4) Figures for four weeks ending December 1, 1934, and corresponding previous periods.

(5) Sugar production given in periods of four weeks ending November 3, October 6, and September 8, 1934; November 4, October 7, and September 9, 1933.

(7) MacLean's Building Review.

1933, considerable time loss resulted from six strikes of loggers in northern Ontario and Quebec. Four disputes were carried over from October and nine disputes commenced during November. Ten of the thirteen disputes were terminated during the month, four resulting in favour of the employers involved, three resulting in favour of the workers concerned, while three resulted in compromises or were partially successful. The disputes unternminated at the end of the month numbered three and involved 155 workers. These figures do not include those strikes and lockouts in which employment conditions were no longer affected, but which had not been called off or definitely declared terminated by the unions involved.

### Canadian Support for League of Nations

Dr. Walter A. Riddell, Canadian Advisory Officer for the League of Nations at Geneva, who recently completed a tour of Canada, expressed satisfaction with the support given to the League throughout the Dominion. He stated that more public confidence in the League existed throughout the world to-day than ever before. "A criterion of this," he said, "is the fact that, of the nations represented, twenty-five sent either their Prime Ministers or Foreign Secretaries to the last assembly. Moreover, there is a striking spirit of international co-operation based on contact, and the members of the League realize to the full the benefits of collective action." As evidence of the increasing authority of the League, Dr. Riddell also mentioned the fact that the United States had joined the International Labour Organization, and noted the recent accession to League membership of the Soviet Union, Afghanistan and Ecuador.

### Royal Commission on Price Spreads.

Reference was made on page 92 of the February issue to the appointment by the House of Commons on February 2, of a select special committee to inquire into the causes of price spreads, etc., the scope of the proposed inquiry being defined in a resolution moved by the Prime Minister. By an Order in Council dated July 7, 1934, the members of committee were constituted a Commission under the Inquiries Act to continue the inquiry; and on November 19 a further Order in Council was passed for the purpose of clarifying the scope of the inquiry and of authorizing the commission to continue, complete, and report on all or any matters referred to in the resolution of the House of Commons on February 2. The Commissioners are as follows: Messrs. W. W. Kennedy (chairman),

Hon. H. H. Stevens, Samuel Factor, J. L. Baribeau, D. M. Kennedy, E. J. Young, James Ilsley, Thomas Bell, O. L. Boulanger, Mark Senn, and A. M. Edwards.

### Farm credit legislation effective in Alberta.

By a proclamation of the Alberta Government, published in the *Alberta Gazette*, November 30, the Canadian Farm Loan Act, 1927, and the Canadian Farm Loan Act Amendment Act, 1934, were proclaimed as effective in the Province as from December 1, 1934, "to the extent that each of the said Acts is not within the legislative competence of the Parliament of Canada, and is within that of the Legislative Assembly of the Province."

At the last session of the Legislature the Provincial Agricultural Debts and Credits Act was passed, enabling the Lieutenant-Governor in Council "to proclaim any legislation enacted by the Parliament of Canada to be in force in the Province, which has for any of its objects the extension of credit to persons engaged in agriculture, or the effecting of compromises between such persons and their creditors, or either of those objects, to the extent that the legislation so proclaimed is not within the legislative competence of the Parliament of Canada and is within that of the Legislative Assembly of the Province."

Reference was made in the *LABOUR GAZETTE*, June, 1934, page 492, to the two bills introduced by the Prime Minister in the House of Commons last June for the purpose of facilitating farm credit in Canada.

### Milk Marketing scheme effective in British Columbia.

Under the provisions of the Natural Products Marketing (British Columbia) Act, passed by the provincial legislature at the last session (*LABOUR GAZETTE*, June, 1934, page 515), a scheme "to regulate the marketing of milk and products processed or manufactured wholly or chiefly from milk and produced in a described area in British Columbia," was approved on November 21, to come into force on December 1, 1934. The scheme is known as the "Milk Marketing Scheme of the Lower Mainland of British Columbia." Its constitution is fully set forth in the *British Columbia Gazette* for November 29. The Provincial Act provided for the appointment of boards to co-operate with the Dominion Marketing Board, and to exercise powers within the Province with respect to the marketing of natural products. The provisions of the Natural Products Marketing Act, 1934, passed by Parliament at its last session, were outlined in the *LABOUR GAZETTE*, April, 1934, page 304.

### Legislative program in Saskatchewan

The first session of the Eighth Legislature of Saskatchewan opened on November 15. The Speech from the Throne announced that legislation would be introduced dealing with the financial position of public bodies and the restoration of credit within the province. A permanent plan will be established whereby seed may be available to farmers without becoming a charge upon the province. As the result of information secured through a soil survey, steps will be taken to re-establish on better lands, preferably in the same section of the province, a limited number of farmers now on poorer lands, to conserve water for stock, and to construct small irrigation works at suitable places as soon as financial conditions permit. The government will also seek to improve provincial credit outside Saskatchewan by keeping expenditures, provincial, municipal and individual, within the limits of revenue, by maintaining the people in active productive employment, by "sane legislation" regarding contracts, and by meeting all obligations.

### Inquiry into coal mining industry in Saskatchewan

The Government of Saskatchewan has appointed Mr. W. F. A. Turgeon as a commissioner under the Public Inquiries Act, "for the purpose of making an inquiry into all factors entering into wage level and coal prices having to do with the coal mining industry in the Province of Saskatchewan, including market conditions, alleged unfair business practices, wage and working conditions and, generally, to inquire into the whole of the operation of the said industry with the object of recommending to the government of the Province what action, if any, by legislation or otherwise, should be taken by the government in connection with the operation of the said industry in the interests of the public, the workers and the industry itself."

### Inquiry into milk industry at Halifax

By an order in Council dated November 13, the Nova Scotia Government appointed a commission under the Public Inquiries Act, to inquire into and concerning all matters relating to the production, transportation, processing, delivery, purchase and sale of milk and cream intended for distribution or consumption in or for distribution from the city of Halifax; and into and concerning the financial structure of any company or companies engaged in the processing, distribution or sale of milk or cream in the city of Halifax,

and to report thereon to the Governor in Council."

The commission consists of the following members: Professor A. Burpee Balcom, Ph. D., of Wolfville; William J. Bird, of Truro; and Alexander D. MacKay, of Pietou.

### Check-off privilege in coal mines of Nova Scotia

In 1932 a second coal miners' organization was formed in Nova Scotia, namely the Amalgamated Mine Workers of Nova Scotia, the majority of its members being seceders from the United Mine Workers of America. Efforts were subsequently made by the new union to secure the privilege of the check-off (a deduction made by the company from the miner's wages for union dues). Owing to the insistence of the demand of the new organization, and in view of the fact that the coal mining companies were unwilling to maintain a second check-off, the Provincial Legislature, at the last session (LABOUR GAZETTE, August, 1934, page 748) passed the following amendment to the Coal Mines' Regulation Act:

"Be it enacted by the Governor and Assembly as follows:

1. Section 97 of Chapter 1 of the Acts of 1927 is hereby amended by adding the following Subsections to said Section:

3. Notwithstanding anything in Sub-section (1) of this Section, no employer shall be obligated to retain or pay any sum or sums to any person designated to represent a union other than the union to which belong the larger or largest number of employees in or about all mines operated by said employer.
4. For the purpose of determining to which union the larger or largest number of employees belong, regard shall be had solely to the number of written requests referred to in Sub-section (1) hereof filed with the employer before November 15th in each year, and every employer shall on said day permit a representative of every union to which any of his employees belong, to attend at the place where said cards are filed and count the same.
2. This Act shall come into force on from and after, but not before the 15th day of November, 1934.

In compliance with this legislation a vote of the miners was taken in November, and according to press reports it resulted in the United Mine Workers of America securing the check-off privilege with six companies and the Amalgamated Mine Workers of Nova Scotia with two companies. The total vote as published was as follows:—United Mine Workers of America, 6,604; Amalgamated Mine Workers, 6,066.

On November 26 Mr. Justice Doull, in Supreme Court Chambers at Halifax, granted an interim injunction directing the Dominion Coal Company to continue the check-off of

union dues for the Amalgamated Mine Workers until November 30, pending further inquiry into the result of the ballot.

### **Retail merchants favour codes for Manitoba undertakings**

The Manitoba Retail Merchants' Association has prepared the draft of a bill for submission to the provincial legislature under the title: "The Department of Trade and Industry Act."

The text of the proposed measure is published in *Winnipeg Commercial*, a monthly magazine which serves the general retail trade of Western Canada. It is proposed to provide means for prohibiting "the unfair business methods and practices that have or may become prevalent in certain trades and industries and to fix minimum wages and working conditions for employees engaged in these trades and industries and to fix a minimum price for the sale of certain goods and services and so prevent the destruction of these trades and industries." These purposes would be effected by means of the licensing of persons engaged in the particular trades, by their formation into associations, and by the framing of codes which would be compulsory on the respective industries when they have been approved either by 66 per cent of the licensed persons in a trade or by 50 per cent of the licensed persons carrying on the trade if they own 66 per cent of the invested capital.

### **Farmers' organization in Quebec**

A strong appeal for united action by farmers was made by President Albert Rioux at the tenth annual meeting of the Farmers' Catholic Union held at Quebec City on November 7-9. Over 200 delegates, representing all sections of the Province, attended the convention. "If the farmers would unite," the president said, "the farming problem would be solved. If they would unite once and for all, no government would enact legislation without having first consulted their organization."

At last year's convention, colonization was the leading subject under discussion, the main topic this year being farm credit. The president intimated that farm credit would be studied in all its bearings during the coming year. He pointed out that even in normal times the establishment of farmers' sons on the land depended upon a supply of credit being made available. Four billion dollars had been advanced to the farmers in the United States since the crisis, and aid was also being granted in every country to some extent. Half the farmers in Quebec, he stated, stood in need of credit. He recommended

that the money now being applied to transferring prospective settlers from the cities to farms should rather be used to provide credit for the sons of the farmers. The study to be undertaken would show whether the federal farm credit system should be allowed to remain, or whether it might be preferable to establish parochial systems of credit.

The secretary's report showed that in 1934 the number of members had increased by 944. After 10 years' existence there were over 10,000 members, indicating a progress more rapid than that of the Boerenbund, the similar organization in Belgium. The number of local "circles" has risen from 592 in 1933 to 630 this year.

### **Consumers' service in New York City**

The Department of Markets of New York City has created a "Consumers' Service Division" to furnish information to house-keepers in regard to marketing and the planning of meals so as to obtain the best food values. A five-minute radio talk is given every morning on market conditions and "good buys," with advice on selecting and preparing foods. Newspapers also are supplied with similar information. The Consumers' Service Division also conducts studies of the costs of marketing and distributing foods, and of municipal markets as a means of bringing the farmers and consumers into closer relation. It is claimed that the movement, while still in its infancy, is already bringing about a consolidation of consumers' interests. The "Consumers' Guide," issued by the Consumers' Counsel of the Agricultural Adjustment Administration in co-operation with the Bureau of Home Economics (Bureau of Labour Statistics) "emphasizes the consumers' right to full and correct information on prices, quality of commodities, and on costs and efficiency of distribution. It aims to aid consumers in making wise and economical purchases by reporting changes in prices and costs of food and farm commodities. It relates these changes to developments in the agricultural and general programs of national recovery. It reports on co-operative efforts which are being made by individuals and groups of consumers to obtain the greatest possible value for their expenditures."

### **Inquiry into operation of labour laws in South Africa**

The South African Government recently appointed a commission of seven members, including representatives of employers and of workers, to examine the operation of the Wage Act and the Industrial Conciliation Act. The terms of reference are

to enquire into, report upon and make recommendations in regard to the following subjects: the extent to which wage determination and agreements under these Acts are evaded, and the effects of such evasions on employers acting in accordance with the spirit of such legislation and on the workers; the effect of fixing lower wages for women than for men and of laying down ratios between different classes of employees, both male and female; the comparative wages fixed by determination under the Wage Act for similar classes of work in different occupations; the adequacy of present wage rates for unskilled labourers and semi-skilled workers, and the desirability of fixing minimum wage rates for such workers; the disparity between wage levels of skilled workers and those of labourers and of persons in semi-skilled occupations.

The provisions of the Wage Act were outlined in the LABOUR GAZETTE, July, 1929, page 706. The Act provides for the establishment of a Board which has power, after hearing the representations of the parties, to make determinations of wages which may be made binding on all employers and workers in the trades and areas concerned. The employees allege that employers evade the wage determinations by discharging workers who receive the full wage and replace them by workers at the bottom of the scale, and by similar practices.

The Industrial Conciliation Act was outlined in the LABOUR GAZETTE, June, 1924, page 495. The workers allege that in the ten years of its operation the workers have found the Act of little benefit, particularly in regard to the provision for industrial councils.

As regards both the Wage Act and the Industrial Conciliation Act it is contended that there are serious defects in enforcement and in particular that penalties for evasion of wage awards and agreements are quite ineffective. It is therefore urged that both Acts should be redrafted in simpler terms and various provisions introduced to ensure their effective enforcement.

#### **Conditions of success in unemployment insurance**

The conditions with which a successful system of contributory unemployment insurance must comply were outlined by Dr. Hector H. W. Hetherington, principal of the University of Liverpool, and formerly a member of the British Royal Commission on Unemployment Insurance (LABOUR GAZETTE, December, 1932, page 1308), during a recent visit to Canada. First, there must be a good system of employment exchanges; second, there must be a first-rate administration: "It is a very big administra-

tive job," he said, "and a great tax on the Civil Service." The third condition is that there must be some auxiliary method of relieving the long-term unemployment which cannot be carried on the insurance scheme. Dr. Hetherington pointed out that without any previous model England started unemployment insurance in 1911; and he expressed the opinion that the development of the English system was "the most constructive thing in the history of great industrial countries." The chief lesson that had been learned by past experience was that long-term unemployment must be cared for by means of a secondary scheme; "we were trying," he said, "from 1924 to 1930, to make unemployment insurance carry the whole burden, and that is why it came quite near to breaking down."

"I believe," Dr. Hetherington concluded, "that every industrial country will have to have a system of unemployment insurance, for it is much the cheapest and simplest means of carrying the unemployment that occurs in all industrial centres."

The amended legislation now in effect in Great Britain (LABOUR GAZETTE, December, 1933, page 1170) incorporates the major recommendations of the "Gregory Commission."

#### **Social security program for United States**

A program of "economic security" for the United States is being studied by an advisory council appointed by President Roosevelt with a view to the enactment of suitable legislation by Congress. This program includes ten proposals; namely, unemployment insurance; provisions for old age security; provisions for meeting the economic risks of illness; public works as a means of economic security; employment opportunities; special measures for economic security of children; survivors' insurance; dependency and relief; economic security for farmers and agricultural workers; handling and investment of reserve funds.

The advisory council was appointed by the President on November 10, composed of 19 experts in the various departments of activity included in the program, with Frank P. Graham, President of the University of North Carolina, as chairman. The council will provide information and assistance to the Committee on Economic Security, a body composed of four members of the Federal Cabinet and Federal Relief Administrator Harry Hopkins.

### British labour and industry confer on shorter hours.

The British Minister of Labour of Great Britain announced in the House of Commons in November that he had invited the National Confederation of Employers' Organizations and the General Council of the Trade Union Congress to discuss with him the question of shorter hours of labour, with special reference to the following points: (1) To inquire, industry by industry, whether hours of employment could be reduced without reducing earnings; (2) If that is impossible, whether employers and workpeople would make concessions to permit of a reduction of working hours and an increase in the number of workpeople; (3) Whether the result would be an appreciable increase in the numbers employed.

### Uniformity of Labour Legislation in U.S.A.

The International Association of Governmental Labour Officials in the United States, at their annual convention in Boston in September, considered the problem of minimum wage legislation. The basis for legislation, whether that of a fair return for services rendered or that of cost of living, was discussed, also the various types of laws now in effect. While uniformity of legislation is desirable, the type of legislation adopted must be suited to local conditions. Certain general principles regarding minimum wage legislation were set up. Legislation, it was suggested, should be as simple as consistent with effective administration. It should also be sufficiently elastic to meet changing economic conditions. In this connection it might be well to allow greater discretionary powers to administrative officers. The need of educational work was stressed in order to enlist interest and support by the public. Mutual exchange among the States was recommended as to policies, problems encountered and methods of meeting them. It was suggested that such exchange might best be effected through the Minimum Wage Committee appointed by the Secretary of Labour, the Women's Bureau, and the Interstate conference on Labour Compacts.

### Coal Statistics for Canada in October

Coal production in Canada during October amounted to 1,551,379 tons or 1.8 per cent below the output of 1,579,351 tons in October, 1933, but 5.8 per cent above the five-year average for October of 1,466,277 tons. During the month under review bituminous coal

production totalled 1,002,724 tons, sub-bituminous coal, 67,770 tons and lignite coal, 480,885 tons. The Nova Scotia production of 658,754 tons was the highest monthly output on record since October, 1928. Alberta produced 586,196 tons or 5.8 per cent below the October, 1933, total of 622,504 tons. In October, 1934, Alberta's production included 160,494 tons of bituminous coal, 67,770 tons of sub-bituminous coal and 357,932 tons of lignite coal while a year ago 142,590 tons of bituminous coal, 66,841 tons of sub-bituminous coal and 413,073 tons of lignite coal were produced. An increase of 11.6 per cent was recorded in British Columbia's output in October when 155,832 tons were produced as compared with 139,658 tons a year ago. The tonnage mined in Saskatchewan declined in October to 122,953 tons from the total for the corresponding month of 1933. New Brunswick's output of 27,644 tons was 13.0 per cent above the October, 1933, production of 24,458 tons.

Production of coke in Canada at 204,143 tons in October reached the highest level for any month since December, 1930. In September output amounted to 188,375 tons and in October of a year ago to 172,508 tons.

### Industrial Policy in the Soviet Union

A conference of heavy industry in the Soviet Union was recently held in Moscow for the purpose of studying methods of increasing efficiency and output in industrial undertakings. A resolution was adopted, which is published in full in *Industrial and Labour Information* (Geneva), November 19, 1934. Definite instructions were addressed all managers, foremen, engineers and technical workers in industrial undertakings, requiring them to act on the following lines: to combat the spirit of bureaucracy; to make a more discerning selection of labour and technical staff, giving preference to quality rather than numbers; to arrange wage scales in such a way as to increase the output of labour by paying workers according to their merit and the quantity and quality of work actually performed; to maintain strict discipline in undertakings, both in the field of labour and that of management and finance; to mechanize heavy work, especially the most exhausting kinds; and to rationalize production in every field.

The Conference also drew attention to the necessity of carrying on a campaign for industrial hygiene and for cleanliness in workers' dwellings, refreshment rooms and workplaces, and declared that an improvement in the quality of work depends on an improvement in the living and working conditions of the workers.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

**M**EDIATION by an officer of the Department of Labour resulted in a settlement being reached during November in the case of a dispute between the Winnipeg Electric Company and certain of its employees being motormen, conductors and busmen, members of the Street Railwaymen's Unit of the One Big Union. An application for the establishment of a Board of Conciliation and Investigation had been received on October 26

from the employees in question, approximately 600 in number (LABOUR GAZETTE, November, 1934, page 991). The dispute related to the alleged unjust dismissal of two employees, the question of the speed of the cars on certain routes being also involved. In the article which follows on the recent conciliation work of the Department of Labour will be found a statement regarding this settlement (page 1088).

## SUMMARY OF PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

**T**HE tables presented below summarize the proceedings under the Industrial Disputes Investigation Act for the fiscal year ending March 31, 1934, and from March 22, 1907, to March 31, 1934.

The proceedings under the Act during the fiscal year 1933-34 include three cases in which certain proceedings had taken place during the preceding year. On March 31, 1934, results were still pending in connection with four applications.

**I.—TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM APRIL 1, 1933, TO MARCH 31, 1934**

Total.....	802	38

The Hon. Arthur Roebuck, Minister of Labour for Ontario, announced on December 1, that the government proposed, at the forthcoming session of the provincial legislature, to introduce legislation enabling the government to aid employers and workers in reaching agreements regarding wages and hours of labour. A representative of the Department of Labour, the Minister said, should preside over conferences between the parties to such agreements.

\*Including three cases carried over from preceding year.

†Two boards dealt with two applications each.

## AGREEMENTS AS TO WAGES OF CLERKS, FREIGHT HANDLERS, ETC., ON CANADIAN NATIONAL RAILWAYS

THE LABOUR GAZETTE for November, on pages 991-992, contained information as to agreements made on November 3, 1934, between the principal steam railways in Canada and various classes of employees, providing for the partial restoration of the rates of pay under the agreements in force in 1929. Beginning in December, 1931, deductions of ten per cent had been made from the earnings of employees of various classes, following proceedings under the Industrial Disputes Investigation Act in some cases. Since the later months of 1933 these deductions have been in general fifteen per cent, and the new agreements provided for the restoration of three per cent on January 1, 1935, and two per cent on May 1, 1935, either party to give thirty days' notice after July 1, 1935, of any further change desired. For any employees not subject to the full fifteen per cent deduc-

tion provisions for *pro rata* restorations were made.

Later in November negotiations were entered into between the officials of the Canadian National Railways and the representatives of the clerks, freight handlers, station employees, shop labourers, roundhouse employees, sleeping and dining car employees, wharf employees at Halifax, and Prince Edward Island ferry employees, members of the Canadian Brotherhood of Railway Employees. Early in December agreements were reached providing for the partial restoration of 1929 agreement rates, as arranged in November for other classes, namely three per cent on January 1, 1935, and two per cent on May 1, 1935.

Negotiations as to the rates for employees of the express department were in progress early in December.

## Changes in Occupations in Scotland

A new volume of the Census of Scotland, recently published, deals with the occupations of the people and the industries in which they are engaged.

The population of Scotland of working age (14 years and upwards) at the date of the Census (26th April, 1931) was 3,617,783, and showed an increase of 78,731, or 2.2 per cent as compared with the previous Census (relating to 1921), although the total population at all ages had declined by 39,517, or 0.8 per cent. Of the total population of 14 years and upwards, 2,201,310 were returned as normally following a gainful occupation (including those out of work at the date of the Census).

Among males gainfully occupied (including persons out of work) there were remarkable changes between 1921 and 1931 in occupational distribution. There were increases of 29.8 per cent in commercial occupations (excluding clerks); of 7.2 per cent in transport and communication; of 37.5 per cent in personal service occupations; and of 26.0 per cent in "other and undefined" occupations: these last are largely unskilled labourers, and the increase was partly due to a change in classification. There were decreases of 22.7 per cent among metal workers; of 18.3 per cent in

mining and quarrying occupations; and of 13.5 per cent among workers in wood and furniture. There were also considerable reductions in wood and furniture. There were also considerable reductions among clerks, etc., in public administration and defence occupations, and among makers of articles of clothing, fishermen, and workers in agricultural occupations. Taken generally, the figures indicate a marked decline in numbers in productive occupations, and increases in commercial, transport, and personal service occupations.

Among females normally engaged in gainful occupations, there were increases, between 1921 and 1931, of 16.0 per cent in personal service occupations; of 14.7 per cent in commercial occupations; and other considerable increases among textile workers, in professional occupations, and among clerks, typists, etc. There were decreases of 27.1 per cent among makers of articles of dress, etc.; of 35.2 per cent in agricultural occupations; and of 27.3 per cent in "other and undefined" occupations. This latter group may, however, have been affected by changes in classification. Among clerks, typists, etc., an increase of 3,421 females was concurrent with a decrease of 6,514 males.

## CONCILIATION WORK OF THE DEPARTMENT OF LABOUR FROM AUGUST 1, 1934, TO NOVEMBER 30, 1934

CONCILIATION proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act, which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Board of Conciliation and Investigation.

The Department of Labour has on its staff conciliators and mediators who are stationed at Vancouver, Toronto, Ottawa, and Montreal. The territory of the officer resident in Vancouver comprises the four western provinces. The conciliation officer resident in Toronto confines his activities to Ontario, while the officer in Montreal covers the province of Quebec and the Maritime Provinces. The headquarters of the Chief Conciliation officer are at Ottawa.

These officers are also charged with certain duties arising out of the administration of the Fair Wages Policy applying to contracts let by the Dominion Government and to works aided by federal funds.

The following statement covers the more important conciliation matters dealt with during the period from August 1, 1934, to November 30, 1934 (An article covering the period April 1, 1934, to July 31, 1934, appeared in the LABOUR GAZETTE, August, 1934, page 729).

*Coal Miners, Beverly, Alta.*—In June, 1934, representations were made to the Department on behalf of a number of unemployed coal miners at Beverly, Alta., formerly employed on a property now operated by the Beverly Coal Company, Limited, that they were being discriminated against, and it was intimated that an application for the establishment of a Board of Conciliation and Investigation would be made. An officer of the Department of Labour visited Beverly in the latter part of June and held conferences with the interested parties. It was ascertained that an agreement is in force between the mine management and the United Mine Workers of America and that no dispute existed between the company and its employees. Under the circumstances no ground existed for the

establishment of a Board. The president of the company, however, agreed that should he require additional miners at a later period preference would be given to the unemployed in Beverly.

*Longshoremen, Montreal, P.Q.*—Early in July, 1934, the attention of the Department was called to a dispute regarding working conditions which had arisen between the longshoremen employed at the Port of Montreal and the Cunard White Star Line, Limited. At the request of the longshoremen for the mediation services of the Department, an officer was assigned to the case. Conferences were arranged between the parties concerned and certain suggestions of the departmental officer were carried out which resulted in the dispute being terminated.

*Paper Makers, Dolbeau, P.Q.*—In May, 1934, 42 papermakers employed by the Lake St. John Power and Paper Company, Dolbeau, P.Q., went on strike, their demands for the immediate restoration of the 1932 wage scale being refused by the employing company. Officials of the Provincial Government dealt with this dispute but were unsuccessful in their attempt to bring about a settlement. In August a conciliator of the federal Department of Labour visited Dolbeau and discussed the situation with officials of the company and also with a number of the strikers whose positions had been filled. Subsequently he interviewed the president of the company in Montreal for the purpose, if possible, of having the men reinstated. On this point the only assurance received was that in cases of vacancies further consideration would be given to the re-employment of the papermakers then idle.

*Plumbers, Calgary, Alta.*—In July, 1934, a dispute arose between the master plumbers of Calgary, Alta., and the plumbers in their employ, numbering approximately 14, as a result of the employers' desire to reduce the hourly rate of wages from \$1 to 90 cents, the former agreement having expired on April 30. Conferences between the interested parties having failed to solve the difficulty the plumbers ceased work. This situation was not brought to the attention of the Department of Labour until on or about September 1, and shortly thereafter a mediator was sent to Calgary. This officer was successful in bringing the disputants into agreement.

*Linemen, Troublemén, etc., Toronto, Ont.*—On September 1, 1934, an application for the

establishment of a Board of Conciliation and Investigation was received in the Department of Labour from linemen, troublemen and truckdrivers, members of Local No. 636 of the International Brotherhood of Electrical Workers and employed by the Toronto Transportation Commission, Toronto, Ont., these employees desiring to secure a new agreement embodying increased wages, etc., and being unable to arrange conferences with the employing company. A conciliation officer of the Department, while in Toronto on other business, looked into the matter and made arrangements for conferences between the interested parties. Negotiations are still proceeding.

*Checkers and Coopers, Montreal, P.Q.*—In the August issue of the LABOUR GAZETTE reference was made to negotiations then taking place between representatives of the checkers and coopers and officials of the Shipping Federation of Canada, Inc., Montreal, P.Q., with the assistance of a mediator of the Department of Labour, respecting wages and working conditions. These negotiations proved successful and a signed agreement became effective September 6, 1934, thereby making Board procedure unnecessary.

*Operating Engineers, Hamilton, Ont.*—The dismissal of one of their members early in September, 1934, was the cause of a threatened strike of operating engineers, members of Local Union No. 700 of the International Union of Operating Engineers, Hamilton, Ont., in the employ of the Hamilton By-Product Coke Ovens, Limited. A request for the mediatorial services of the Department of Labour was received from officials of the union concerned, and an officer proceeded to Hamilton immediately. This officer was successful in having the employee in question reinstated, and the dispute was accordingly settled. Approximately 37 men were estimated to be involved.

*Street Railway Employees, Brantford, Ont.*—Early in September, 1934, an application for the establishment of a Board of Conciliation and Investigation was received in the Department of Labour from certain employees of the Brantford Municipal Railway Commission, Brantford, Ont., being members of Local Division No. 685 of the Amalgamated Association of Street and Electric Railway Employees of America, to deal with a dispute which had arisen regarding the request of these employees for a new agreement embodying increased wages and certain changes in the working conditions. Approximately 50 employees were involved. Officials of the Commission requested that action in this connection be postponed owing to the illness of the

chairman, to which the employees agreed. About the middle of the following month a Conciliation Officer of the Department of Labour visited Brantford, held several conferences with the interested parties, and was successful in bringing them into accord, the commission granting certain concessions with respect to working conditions, and the employees agreeing not to press their demand for wage increases.

*Truck Drivers, Edmonton, Alta.*—For several months a dispute had existed between the Truckmen's and Coal Haulers' Local Union No. 19 and the Edmonton Coal Operators respecting haulage rates, etc., and early in October a request for the services of a mediator was received by the Minister of Labour from the employees. An officer of the Department then in that territory was assigned to this case promptly, and through joint conferences which he arranged considerable progress was made toward a settlement at that time. Conferences were renewed upon the return to Edmonton of the departmental mediator the latter part of November which resulted in an agreement being reached between the parties directly interested.

*Coal Miners, Edmonton, Alta.*—On October 12, 1934, a conference was brought about by a mediator of the Department of Labour between the management of the Red Hot Coal Company, Edmonton, Alta., and officials of the United Mine Workers of America. At this conference an agreement was concluded which conformed to the conditions obtaining in other coal mines in that area.

*Coal Miners, Edmonton, Alta.*—In October, 1934, a mediator of the Department of Labour brought about conferences between the operators of several small coal mines in the Edmonton field and union officials for the purpose of eliminating disputes which had arisen. At these conferences certain preliminary steps were agreed upon which, it is anticipated, will finally lead to a definite agreement as to wages and working conditions.

*Operating Engineers, Hamilton, Ont.*—Early in October, 1934, word was received in the Department of Labour that the negotiations between officials of the Hamilton By-Product Coke Ovens, Limited, Hamilton, Ont., and representatives of their operating engineers, members of Local Union No. 700 of the International Union of Operating Engineers, regarding a new agreement to institute a 6-day week without loss of wages in place of the seven-day week then being worked, had failed to settle the issue, and a joint request for the mediation services of the Department in this connection was made. This request was im-

mediately granted, and a departmental officer held several conferences with the two parties. The resulting agreement provided for a 6-day week with the hourly rate of the employees being increased sufficiently to absorb 50 per cent of the earnings of the extra day formerly worked. While only 37 employees were directly involved in this dispute it is understood that the terms of settlement were applied to all plant employees, approximating 139 in number.

*Coal Miners, Wayne, Alta.*—A dispute arose during the latter part of October, 1934, at the Jewel Collieries, Wayne, Alta., regarding the payment for bone in the coal seam and also on account of alleged discrimination against certain employees. A mediator of the Department of Labour discussed the situation with the management of the company and with union officials, but was unable to bring about a direct settlement. It was finally agreed that under the terms of the agreement the Minister of Labour should appoint an independent chairman.

*Steamship Clerks, Checkers, Stowers, Loaders, etc., Fort William and Port Arthur, Ont.*—An application for the establishment of a Board of Conciliation and Investigation was received in the Department of Labour on September 24, 1934, from the truckers, stowers, loaders, sealers, checkers, assistant foremen and clerks, members of the International Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, employed by the Western Stevedore Company, Fort William, Ont. The dispute related to wages and working conditions, and direct negotiations had failed to settle the issue. Approximately 400 men were directly affected.

On October 15 an application for the establishment of a Board of Conciliation was also received from a similar group of employees, members of the same labour organization, employed by the Canadian National Railways at Port Arthur, Ont., the dispute being of the same general nature. It was stated that 320 employees were directly involved.

A conciliator of the Department of Labour proceeded to Fort William and discussed with representatives of both groups of employees, on October 21 and 22, the various points involved. Subsequently the conciliator had a conference with the manager of the Western Stevedore Company, at which time certain concessions were granted. These, however, were not acceptable to the employees' representatives. In the case of the Canadian National Railways, proper negotiations had not taken place and later on arrangements to this end were made by the Department. The

joint conference which followed failed to settle the dispute and Board procedure therefore became necessary. The employees' representatives, however, agreed with the conciliator that one Board could properly deal with both disputes and accordingly a Board was established early in November.

*Street Railway Employees, Winnipeg, Man.*

—An application for the establishment of a Board of Conciliation and Investigation was received in the Department of Labour on October 26, 1934, from the motormen, conductors and busmen employed by the Winnipeg Electric Company, Winnipeg, Man., being members of the Street Railwaymen's Unit of the One Big Union. The dispute related to certain dismissals and the speed of cars over certain routes, which the parties directly interested were unable to solve. Some 600 men were directly affected. A mediator of the Department of Labour proceeded to Winnipeg on November 10 and upon arrival there held separate conferences with the company and union officials over a period of several days. Finally an understanding was reached which took care of the speed issue and provided for the reinstatement of a dismissed motorman in the capacity of conductor. A ballot of the employees approved of this settlement, thereby avoiding the necessity of Board procedure.

*Coal Miners, Cumberland, B.C.*—The expiration of the existing agreement on October 31, 1934, and the failure to secure a new agreement embodying, among other things, a wage increase of ten per cent, was the cause of a threatened strike of approximately 500 coal miners employed at the Canadian Collieries (Dunsmuir) Limited, Cumberland, B.C. At the request of the Deputy Minister of Labour for British Columbia, a representative of the federal Department of Labour proceeded to Cumberland early in November to co-operate with an officer of the provincial Department of Labour who was already in the territory, but upon arrival there he was informed by the miners' committee that they were not agreeable to mediation. The departmental officer then informed them of the provisions of the Industrial Disputes Investigation Act and that his services were available upon request. A strike subsequently followed, particulars of which appear elsewhere in this issue. It is understood that the attitude on the miners' committee in this instance was largely influenced by the presence in the district of organizers of the Mine Workers' Union of Canada.

*Coal Miners, Princeton, B.C.*—On November 8, 1934, word reached the Department of Labour that a dispute existed between the management of the Tulameen Coal Company,

Princeton, B.C., and its coal miners respecting the bringing into effect of a new agreement. A mediator of the Department of Labour visited Princeton on November 24 and found that mediation was acceptable to the company but unacceptable to the miners' committee, members of the Mine Workers' Union of Canada.

*Paper Makers, Masson, P.Q.*—As a result of a strike or walk-out of paper makers in the employ of the James MacLaren Company, Limited, Masson, P.Q., which took place on

November 22, 1934, some six employees were refused re-employment when the plant resumed operations. A conciliator of the Department of Labour visited Buckingham on November 24 and had a conference with the managing director of the company with the object of bringing about, if possible, the reinstatement of these men. In this, however, he was unsuccessful, the managing director being adamant on this point. Full particulars will be found in the article dealing with strikes and lockouts in Canada appearing elsewhere in this issue.

## STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1934

THE following table shows the number of disputes, workers involved and time loss for November, 1934, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*Nov. 1934.....	13	1,542	17,182
*Oct. 1934.....	16	4,970	52,011
Nov. 1933.....	20	4,718	51,040

\* Preliminary figures.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time is frequently not received until some time after its commencement.

The number of disputes, as well as the number of workers involved and the time loss, was much lower in November than in the previous month or in the same month a year ago. In fact the figures were lower than for any month since the middle of 1933. Only two strikes in November caused much time loss, one involving loggers in the Sault Ste. Marie district of Ontario carried over from October and one of coal miners at Cumberland in Vancouver Island involving about five hundred workers for about two weeks. In October two strikes of loggers in northern Ontario caused a time loss of about 23,000 days and two strikes of coal miners in Nova

Scotia resulted in a time loss of nearly 9,000 working days. In November last year six strikes of loggers in northern Ontario and Quebec involving some 3,000 workers resulted in a time loss of about 40,000 days.

Four disputes, involving 804 workers, were carried over from October, the dispute involving cap factory workers at Toronto, Ont., reported as unterminated in the November issue of the LABOUR GAZETTE, having been settled on October 29, 1934. Nine disputes commenced during November. Of these thirteen disputes ten terminated during the month, four being in favour of the employers involved, three in favour of the workers concerned, while the results of three were recorded as compromises or partially successful. At the end of November, therefore, there were three disputes in progress recorded as strikes or lockouts, namely: compositors, London, Ont., loggers, Sioux Lookout, Ont., and shingle mill workers, Eburne, B.C.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected, but which the unions concerned have not declared terminated. Information is available as to six such disputes, namely: photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; paper mill workers, Dolbeau, P.Q., May 30, 1934, one employer; shoe factory workers, New Toronto, Ont., July 25, 1934, one employer; shoe factory workers, Preston, Ont., September 13, 1934, one employer, and loggers, Port Alberni, B.C., October 10, 1934, one employer, this last being added this month. The dispute involving moulders employed by one firm in Peterborough, Ont., commencing February 27, 1934,

## STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1934\*

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
<b>(a) Strikes and Lockouts in Progress prior to November, 1934</b>			
LOGGING— Loggers, Sault Ste. Marie, Ont..	519	5,000	Commenced Oct. 3, 1934; for increased wages, reduced hours, improved conditions and recognition of camp committees; terminated Nov. 13, 1934; in favour of employer.
Loggers, Port Alberni, B.C.....	100	1,000	Commenced Oct. 10, 1934; against dismissal of workers for union activity; working conditions no longer affected by end of November; in favour of employer.
MINING, ETC.— Coal miners, Sydney Mines, N.S.	110	1,100	Commenced Oct. 23, 1934; for increased wages; terminated Nov. 12, 1934; compromise.
MANUFACTURING— <i>Textiles, Clothing, etc.</i> — Cap factory workers, Toronto and Hamilton, Ont.	.....	.....	Commenced Oct. 22, 1934; for renewal of union agreement; terminated Oct. 29, 1934; compromise.
<i>Printing and Publishing</i> — Compositors, London, Ont.....	75	1,950	Commenced Mar. 1, 1934; for renewal of union agreement; untermiated.
<b>(b) Strikes and Lockouts Commencing during November, 1934</b>			
LOGGING— Loggers, Sioux Lookout, Ont....	45	1,000	Commenced Nov. 1, 1934; for increased wages, reduced hours and improved conditions; untermiated.
MINING, ETC.— Coal miners, Cumberland, B.C..	426	6,000	Commenced Nov. 5, 1934; for increased wages; terminated Nov. 21, 1934; partially successful.
MANUFACTURING— <i>Boots and Shoes</i> — Shoe factory workers, Toronto, Ont.	60	60	Commenced Nov. 17, 1934; against reduced wages; terminated Nov. 17, 1934; compromise.
<i>Fur, Leather, etc.</i> — Leather coat makers, Fenelon Falls, Ont.	51	51	Commenced Nov. 19, 1934; against discharge of worker; terminated Nov. 20, 1934; in favour of workers.
<i>Textiles, Clothing, etc.</i> — Weavers (woollen cloth), Au- burn Mills, Ont.	11	11	Commenced Nov. 29, 1934; for increased wages; terminated Dec. 30, 1934; in favour of workers.
<i>Pulp and Paper</i> — Paper makers, Buckingham, P.Q.	40	240	Commenced Nov. 19, 1934; against discharge of worker; terminated Nov. 24, 1934; in favour of employer.
<i>Other Wood Products</i> — Shingle weavers, Eburne, B.C.	35	700	Commenced Nov. 8, 1934; for increased wages; untermiated.
TRANSPORTATION— <i>Water</i> — Longshoremen, North Syd- ney, N.S.	35	35	Commenced Nov. 1, 1934; for increased wages; terminated the same day; in favour of workers.
Longshoremen, North Syd- ney, N.S.	35	35	Commenced Nov. 3, 1934; for increased wages; lapsed after one day; in favour of employer.

\*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which working time was lost to an appreciable extent.

and carried in the above list for some months, is reported by the union to have lapsed by the end of November and has consequently been removed from the list.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is per-

formed or may be required, are not included in the record, no relation of employer and employee being involved.

A dispute involving plumbers at Calgary, Alta., from July 15, to September 24, resulted from the failure of the master plumbers and the union to agree on the terms of the

renewal of the agreement expiring April 30, 1934. The employers proposed to lower the wage rate from \$1 per hour to 90 cents and made this reduction effective on July 15. The plumbers employed, about fourteen, ceased work until September 24, when the western representative of the Department brought about a settlement at 90 cents per hour, the other terms of the agreement to be settled later, and in November negotiations on these points were in progress.

Further information as to disputes involving bakers employed by firms in Montreal, P.Q., noted in the November LABOUR GAZETTE, indicates that pastry makers, etc., employed in several bakeries were involved at different dates during October and November in minor disputes as to increased wages and reduced hours and that settlements were reached in all cases.

A dispute involving eight taxi drivers at North Sydney, N.S., commenced November 1 against an impost of \$1 per month for soliciting business on railway property, the strikers being joined on November 5 by baggage transfer men. A settlement was reached on November 29 when the taxi drivers agreed to pay the \$1 fee during the tourist season from June to October.

A strike of dressmakers employed by one firm in Montreal, P.Q., is reported to have commenced on November 16 to enforce a demand for higher wage rates. Employees of a shirt factory operated by the same company are reported to have ceased work in sympathy with the dressmakers; but no details as to the disputes have as yet reached the Department.

A dispute involving employees in a furniture factory in Stratford, Ont., in September was referred to in the LABOUR GAZETTE for October, page 907. The partial re-employment of former employees apparently was not satisfactory to some of the workers and negotiations have been in progress from time to time, the establishment being picketed. During November one of those picketing was reported to have been arrested on a charge of damaging property. Early in December a settlement was reported to have been reached, part of the staff resuming work on December 7, the others to be taken on later.

As a result of disturbances in connection with a strike of leggers at Rouyn, P.Q., in November, 1933 (LABOUR GAZETTE, December, 1933, pages 1162 and 1164, and January, 1934, pages 17 and 18), and a strike of metal miners at Noranda, P.Q., in June, 1934 (LABOUR GAZETTE, July, 1934, pages 624-625), a number of strikers and sympathizers were arrested. In November and early in December a number

of these were reported to have been convicted on charges of rioting, sedition, etc., and sentenced to terms of imprisonment from three months to two years, several being recommended for deportation.

In November and October as a result of a disturbance in connection with a dispute at Stellarton, N.S., July 27 to August 4 (LABOUR GAZETTE, September, 1934, page 812), a number of miners were reported to have been convicted of unlawful assembly and sentenced to terms of imprisonment from two to four months.

During November it was reported that as a result of disturbances in connection with a strike of metal miners at Flin Flon, Man., July 11 to July 14 (LABOUR GAZETTE, August, 1934, page 739), a number of strikers were tried on charges of "watching and besetting," rioting, assaulting police, etc. One was released on suspended sentence for one year, one was acquitted, and three were convicted and remanded for sentence. The judge stated that these would have been released on suspended sentence if they had not made false statements.

It has been reported that during October as a result of disturbances in connection with a strike of loggers in the Timmins district, Ont., September 5 to November 1, three strikers charged with assaulting police, resisting arrest, etc. (LABOUR GAZETTE, October, 1934, page 908) were sentenced to imprisonment from one to four months.

During November a number of persons were tried on charges in connection with picketing in a strike of shoe factory workers at New Toronto, Ont., July 25-August 31, 1934 (LABOUR GAZETTE, September, page 812). Several were acquitted, the jury disagreed in regard to several, another trial to be held in December, and one was convicted and sentenced to imprisonment for two months on a charge of obstructing police.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

LOGGERS, SAULT STE. MARIE, ONT.—Toward the end of October some of the employees involved in this strike, which commenced on October 3, for increased wages, reduced hours, etc., returned to work and by November 14 all had returned except about thirty. Out of nine hundred employees it was reported that only 519 had ceased work. In connection with picketing a number were arrested on charges of assault, etc., and committed for trial.

LOGGERS, PORT ALBERNI, B.C.—During October some of the employees involved in

this dispute returned to work and others were replaced, operations being carried on to some extent from October 14. From time to time more men were replaced and by the end of November the dispute appears to have lapsed though the union reported approximately seventy-five per cent of the strikers as still involved, and the dispute has, therefore, been added to the list of such strikes and lockouts in a previous paragraph.

**COAL MINERS, SYDNEY MINES, N.S.—**A settlement of the dispute involving employees of one company since October 22 was reached on November 12, work being resumed next day. The miners had demanded increases in wages of ten per cent for those on day rates and twelve and one-half per cent for those on piece rates in accordance with increases that had been made in other mines some time previously, being the partial restoration of reductions effected in 1933. A compromise was reached providing for a five per cent increase for day men and for piece workers an increase per box with a reduction in charges for explosives.

**CAP FACTORY WORKERS, TORONTO AND HAMILTON, ONT.—**In the *LABOUR GAZETTE* for November this strike involving employees of fifteen firms was recorded as untermminated although several of the employers had reached settlements with the union on October 26, the agreements being renewed with some upward adjustments in wages. Information has since been received that the other firms reached agreements with the union by October 29.

**LOGGERS, SIOUX LOOKOUT, ONT.—**Employees of a sub-contractor for railway ties ceased work on November 1 demanding increases in wages from \$30 per month with board to \$35, from four cents each for eight foot logs to five cents, and from eight cents each for sixteen foot logs to ten cents, with nine hours per day instead of ten; also a reduction in charges for board from 90 cents per day to 75 cents. The employer proposed that work should be continued for a few days until he could consult the main contractor but this was refused. At the end of the month a settlement had not been reported.

**COAL MINERS, CUMBERLAND, B.C.—**A cessation of work by employees of one company, except maintenance men, occurred on November 5 as a result of a dispute as to a wage increase demanded. The agreement between the employer and a committee of employees expired on October 31 and negotiations had not resulted in a renewal. On October 31 the miners voted against calling a strike by a small majority. The demand had been for

a wage increase of ten per cent, the management stating this was impossible but offering some concessions on house rent, prices of coal, and explosives, and on certain other points; also a clause in the agreement providing for investigation by the miners' committee of any discharge of employees. The miners then demanded an increase of five per cent for haulage men at \$4.22 per day and for all paid less. This being refused, the haulage men refused to continue work and were joined by the others. The Deputy Minister of Labour for British Columbia had drawn to the attention of both parties the Industrial Disputes Investigation Act providing for a Board to investigate any dispute in mines and public utilities and prohibiting strikes or lockouts pending such inquiry and also requested that the western representative of the Federal Department of Labour attempt to bring about a settlement. On October 30 this officer joined an inspector of the provincial department at Cumberland and interviewed the management but the chairman of the miners' committee stated that the committee refused to meet them. The management offered to increase the haulage men's rate from \$4.22 to \$4.30, the rate in the Nanaimo mines, but this was not accepted. The management announced that the mines would be kept open until the end of the month after which they would be closed indefinitely if the miners had not resumed work. On November 18 negotiations were resumed and a settlement was reached, providing for the eight cent per day increase for the haulage men, with the other concessions previously offered, the agreement to be for three years. The resumption of work was delayed somewhat by a dispute as to alleged discrimination in re-employment of strikers.

This was the only important strike of coal miners in the island mines since that from 1912 to 1914, except a strike of one thousand miners for a week in 1925 against a wage reduction following reductions in coal miners' wages in the Crow's Nest Pass district in British Columbia and throughout Alberta. The Mine Workers' Union of Canada, most of whose members are in Alberta, has recently organized locals in the Princeton area in British Columbia where strikes occurred at the end of 1932, and has recently secured members at Cumberland. No demand for union recognition was made but union officials stated that a large number of the miners had joined it before and during the dispute.

**SHOE FACTORY WORKERS, TORONTO, ONT.—**Employees in one establishment ceased work on November 17 stating that a reduction of twenty-five per cent in piece rates had been

made although the agreement with the Shoe and Leather Workers' Industrial Union did not expire until next year. The management stated that the establishment was being moved to another city. Work was resumed on November 19, a reduction of ten per cent being accepted, except for some of those at the lowest wages.

**LEATHER COAT WORKERS, FENELON FALLS, ONT.**—Employees in one establishment ceased work on November 14, in protest against the dismissal of one employee. This worker being reinstated, work was resumed the following day.

**WEAVERS, AUBURN MILLS, ONT.**—The weavers in one establishment ceased work on November 29 to enforce a request for an adjustment in the wage rate for eight of their number for work on a new kind of cloth. It was stated that at the piece rates in force they could make only nine to fourteen cents per hour instead of 32 cents per hour, the usual earnings. The management stated that arrangements for an adjustment had already

been made. Work was resumed the following day.

**PAPER MAKERS, BUCKINGHAM, P.Q.**—The paper makers in one establishment ceased work on November 19 alleging that the management was discriminating against union membership of the employees and had refused to meet the committee. The union officials ordered the strikers back to work on November 22 as the dispute had not been dealt with properly but the employer refused to take back a number of them. Negotiations as to this delayed the resumption of work for two days. About 250 employees of other classes were reported to be indirectly affected as the mill was closed.

**SHINGLE WEAVERS, EBURNE, B.C.**—Employees in one establishment ceased work on November 8 demanding an increase in wages to the scale of the Shingle Weavers' Union. Complaints were made as to the rates for board, and that the provincial minimum wage scale was not observed. At the end of the month the dispute was reported as still in effect, the employer refusing to negotiate.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue of February, 1934, in the review of Strikes and Lockouts in Canada and Other Countries, 1933. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in October was 47, and 6 were in effect from the previous month, making a total of 53 disputes in progress during the month, involving 13,900 workers with a time loss of 71,000 working days for the month. Of the 47 disputes be-

ginning in October, 11 were over demands for advances in wages, 6 over proposed wage reductions, 9 over other wage questions, 12 over questions respecting the employment of particular classes or persons, 5 over questions of trade union principle and 4 over other questions. During October, settlements were reached in 35 disputes, of which 11 were settled in favour of workers, 14 in favour of employers and 10 ended in compromises. In one other dispute, work was resumed pending negotiations.

A strike involving between 1,300 and 1,400 coal miners at Treharris, Glamorganshire, began October 12 and was still in effect at the end of October. It was caused by a dispute between two unions.

### France

A strike of 7,000 textile workers at Roanne and neighbouring towns, France, is reported to have begun November 22 against wage reductions.

### United States

The number of disputes beginning in September was 99, and 101 were still in progress from the previous month, making a total of 200 disputes in progress during the month,

involving 530,901 workers with a time loss of 8,133,859 working days during the month. Corresponding figures for the previous month show 217 disputes to have been in progress, involving 121,004 workers with a time loss of 1,775,814 working days.

No report of a settlement of the strike of silk dyers at Paterson, New Jersey, which began October 24 and was mentioned in the last issue of the LABOUR GAZETTE, has been noted. Federal government officers continued efforts to bring about a settlement.

## BRITISH COLUMBIA BOARD OF INDUSTRIAL RELATIONS

### Orders under the Hours of Work Act, the Female Minimum Wage Act, and the Male Minimum Wage Act

THE Board of Industrial Relations of British Columbia, which administers the Hours of Work Act, the Female Minimum Wage Act and the Male Minimum Wage Act (LABOUR GAZETTE, June, 1934, page 510), has issued new orders, dated in November, under each of these Acts. The Board is composed of the following members: Mr. Adam Bell, Deputy Minister of Labour (chairman); Mr. W. A. Carrothers, Mr. C. J. McDowell, Mrs. Fraudena Eaton, and Mr. James Thompson.

#### HOURS OF WORK ACT

##### *Regulation No. 17.—Baking Industry*

The baking industry, by which expression is meant all operations in or incidental to the manufacture and delivery of bread, biscuits, or cakes, is hereby added to the Schedule of the said Act, the approval of the Lieutenant-Governor in Council to such addition to the said Schedule having been obtained by Order in Council dated the 6th day of November, 1934.

##### *Regulation No. 17A.—Baking Industry*

Employees employed in the baking industry as deliverymen may work six (6) hours per week in excess of the weekly limit prescribed by section 3 of the Act.

Made and given at Victoria, B.C., this 22nd day of November, 1934.

##### *Regulation No. 18.—Catering Industry*

The catering industry, which includes all operations in or incidental to the preparation, or to the serving, or to both preparation and serving, of meals or refreshments where the meals or refreshments are served or intended to be served in any hotel, restaurant, eating-house, dance-hall, cabaret, banquet-hall, cafeteria, tea-room, lunch-room, lunch-counter, ice-cream parlour, soda fountain, or in any other place where food is served and a charge is made for the same either directly or indirectly, whether such charge is made against the persons who partake of the meals or refreshments or against some other person, is hereby added to the Schedule to the said Act, the approval of the Lieutenant-Governor in Council to such addition to the said Schedule having been obtained by Order in Council dated the 9th day of November, 1934.

This regulation shall come into force on the 1st day of December, 1934.

##### *Regulations No. 19.—Retail Florists*

Persons employed in the establishments of retail florists may work such hours in addition to the working-hours limited by section 3 of the said Act as (but only so many as) shall be necessary to surmount extraordinary conditions which cannot reasonably be otherwise overcome: Provided that the working-hours of such persons shall not exceed ninety-six (96) hours on the average in any two successive weeks.

In determining extraordinary conditions the decision of the Board shall be final, and where the Board is of the opinion that, under the provisions of this regulation, the working-hours limited by section 3 of the Act are being unduly exceeded, the Board shall, by written notification to the management, exclude the employer's establishment from the provisions of this regulation for such period of time as the Board considers advisable.

##### *Regulations relating to the Mercantile Industry (Retail Temporary)*

That from the 19th of November, 1934, until the 31st of December, 1934, persons employed in retail establishments in the mercantile industry in mail order, shipping, and delivery may work such hours in addition to the daily working-hours limited by section 3 of the said Act as (but only so many as) shall be necessary to cope with the seasonal exigencies which cannot reasonably be otherwise overcome, but in no case, except during the week ending December 22, 1934, shall the weekly limit of forty-eight (48) hours be exceeded.

##### *Mercantile Industry (Christmas, 1934, Temporary)*

That, in order to meet the requirements of Christmas shopping, persons employed in the mercantile industry may work three (3) hours in excess of the limit of eight (8) hours prescribed by section 3 of the said Act, upon December 21, 22, and 24, 1934.

##### *Order No. 10.—(Supplementary)\**

That all overtime in excess of forty-eight (48) hours per week as granted by the Board of Industrial Relations under a Regulation pertaining to the Mercantile Industry (Christmas, 1934, Temporary) made under the "Hours of Work Act, 1934," and published in the *British Columbia Gazette* on November 15, 1934, shall be paid *pro rata* on an hourly basis according

\*Order No. 10 was printed in the LABOUR GAZETTE, August, 1934, page 753.

to the rates set forth in Order No. 10 of the Board for such overtime worked.

#### FEMALE MINIMUM WAGE ACT

##### *Order No. 5a—Relating to Janitresses in the Public Housekeeping Occupation*

Pursuant to the provisions of section 13 of the "Female Minimum Wage Act" being chapter 48 of the Statutes of British Columbia, 1934, the Board of Industrial Relations hereby orders:—

That with respect to Order No. 5 of the Board of Industrial Relations governing Public Housekeeping Occupation, published in the *British Columbia Gazette* on the 10th day of May, 1934,\* paragraph 1 thereof is varied by adding thereto the following words: "This paragraph shall not apply to the employment of janitresses in apartment buildings of twelve (12) residential suites or less."

\*LABOUR GAZETTE, June, 1934, page 531.

#### MALE MINIMUM WAGE ACT

##### *Order No. 1A—Relating to Watchmen in the Logging Industry*

Pursuant to the provisions of section 11 of the "Male minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, the Board of Industrial Relations hereby orders:—

That with respect to Order No. 1 of the Board of Industrial Relations establishing a Minimum Wage in the Logging Industry, published in the *British Columbia Gazette*, on April 12, 1934,\* and with respect to Order No. 13 of the said Board establishing a Minimum Wage in the Logging Industry East of the Cascade Mountains, published in the *British Columbia Gazette* on October 4, 1934,† watchmen employed in watching logging camps in which operations are entirely suspended are exempt from the said Orders from the time of the taking effect of this Order, and the said Orders are respectively varied accordingly.

\*LABOUR GAZETTE, May, 1934, p. 419.

†LABOUR GAZETTE, October, 1934, page 914.

##### *Order No. 16—Establishing a Minimum Wage in the Shingle Industry*

Pursuant to the provisions of the "Male Minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, the Board of Industrial Relations hereby orders:—

1. That where used in this Order the expression "shingle industry" includes all operations in or incidental to the manufacture of wooden shingles, except shingle-bolt operations as specified in paragraph I of Order No. I\* and paragraph I of the Order No. 13† of the Board of Industrial Relations establishing a minimum wage in the logging industry.

2. That, subject to the exemptions granted from time to time under section 6 of the said Act, the minimum wage for every employee in the shingle industry (not included in any other Order of the Board) shall be the sum of forty cents (40c.) per hour.

\*LABOUR GAZETTE, May, 1934, page 419.

†LABOUR GAZETTE, October, 1934, page 914.

Dated at Victoria, B.C., this 1st day of November, 1934.

##### *Order No. 17—Establishing a Minimum Wage in the Baking Industry*

Pursuant to the provisions of the "Male Minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, the Board of Industrial Relations hereby orders:—

1. That where used in this Order the expression "baking industry" includes all operations in or incidental to the manufacture and delivery of bread, biscuits, or cakes.

2. That, subject to the exemptions granted from time to time under section 6 of the said Act, the minimum wage for every employee in the baking industry (not included in any other Order of the Board) shall be the sum of forty cents (40c.) per hour.

3. That, subject to the exemptions granted from time to time under section 6 of the said Act, the minimum wage for every male person over the age of 18 and under the age of 21 years in the baking industry (not included in any other Order of the Board) shall be as follows:—

Over the age of 18 and under the age of 19 years, twenty-five cents (25c.) per hour.

Over the age of 19 and under the age of 20 years, thirty cents (30c.) per hour.

Over the age of 20 and under the age of 21 years, thirty-five cents (35c.) per hour.

Dated at Victoria, B.C., this 1st day of November, 1934.

In the Saskatchewan legislature, on November 22, it was stated that physically incapacitated unemployed in the province receive relief through the municipal officials of the municipality in which they reside, and in those municipalities where the Government is contributing a portion of the cost of relief, expenditures on behalf of such persons are included in the accounts sent to the Government for payment. In cases where the incapacity arose out of an industrial accident covered by the provisions of the Workmen's Compensation Act, such persons obtain their relief through the Workmen's Compensation Board.

The first American unemployment-compensation law came into operation in Wisconsin on July 1 of this year (LABOUR GAZETTE, July, 1934, page 588). Some 3,200 Wisconsin employers are now contributing to their several unemployment-reserve funds at the rate of two per cent on payrolls. Their first month's contributions totalled more than \$450,000. By July 1, 1935, when cash benefits become payable, these employer-financed reserves should aggregate close to five million dollars.

## WOMEN'S MINIMUM WAGES IN QUEBEC

### Definition of Woman's Work in Laundries and Dyeworks

THE following supplement to Order No. 1 of the Minimum Wage Board was published in the *Quebec Official Gazette*, November 17. Order No. 1 governs female employees in laundries, dyeworks and dry cleaning establishments in the City and Island of Montreal

(LABOUR GAZETTE, February, 1929, page 175).  
ORDER No. 1—ANNEX A

The following occupations are considered and classified as Woman's Work and if they are performed by boys or men, they should be paid at least the minimum wages fixed for female workers by Order No. 1:

*Preparing*: taking off buttons, staples, ornaments, etc., so that the clothes may be ready for the different laundry operations.

*Checking*: verifying, sorting or classifying the clothes.

*Washing by hand*: the operation of washing—hand work only.

*Shaking*: making the clothes ready for the flat work Ironer.

*Flat ironing*: feeding, receiving and folding the clothes for or from the flat work Ironer.

*Body pressing*: pressing of wearing apparel or other articles except the bosom of shirts.

*Hand Ironing*: ironing of wearing apparel or other articles except shirts—hand work only.

*Sorting*: segregating the individual pieces constituting the original bundle sent to the laundry.

The following operation is considered and classified as either Woman's or Man's Work.

*Bosom pressing*: pressing of the bosom of shirts.

## MINIMUM WAGES IN MANITOBA

### General Order Governing Employment of Persons Under 18 Years of Age

IN pursuance of the provisions of the Minimum Wage Act, the Lieutenant-Governor in Council of Manitoba, by an Order dated November 17, 1934, made the following order, to come into effect one month after its publication in the *Manitoba Gazette*. (The order was gazetted on November 24, 1934.)

#### TEXT OF ORDER

Pursuant to the provisions of "The Minimum Wage Act," it is hereby ordered as follows:—

1. In these regulations "person" includes a body corporate.

2. No person in Manitoba shall employ any employee of eighteen (18) years of age or over, or suffer or permit any employee of eighteen (18) years of age or over to be employed in Manitoba at a rate of wages less than the rates herein provided, unless:—

(a) A lower rate is permitted by a regulation under "The Minimum Wage Act" covering the specific occupation in which the employee is engaged;

(b) such employee is employed on a farm or market garden or is an employee of a person operating a farm or market garden and the work performed is in connection with a farm or market garden;

(c) such employee is employed as a domestic servant or in household service in a private dwelling which is not a boarding, rooming or victualling house, nursing home, or an establishment of any similar nature, and not operated as a business or source of revenue forming the main source of livelihood for the owner or occupant;

(d) such employee has been granted a special licence authorizing employment at a lesser rate under the provisions of section 10 of "The Minimum Wage Act."

(e) such employee is exempted under the provisions of section 2 (h) of "The Minimum Wage Act."

3. No employee in Manitoba shall be paid wages at less than the following minimum rates:—

(a) if employed in any city or in the municipalities of St. James, St. Vital, Fort Garry, Tuxedo, East Kildonan, West Kildonan, Old Kildonan, Brooklands, Transcona, or at any summer resort during the months of June, July, August or September, the minimum rates shall be:

Twelve dollars (\$12) per week of forty-eight (48) hours or twenty-five (25) cents per hour;

(b) if employed in any other part of Manitoba the minimum rates shall be:

Ten dollars (\$10) per week of forty-eight (48) hours or twenty-one (21) cents per hour.

4. Wages shall be paid weekly in cash, and after each week's wages have been earned they shall be paid within three (3) days.

5. Where the employer furnishes board and lodging to an employee, the employer may deduct from the wages of the employee a sum not more than two dollars and fifty cents (\$2.50) per week for room, and not more than four dollars (\$4) per week for board, and not more than six dollars and fifty cents (\$6.50) per week for both board and lodging. Part board or lodging may be deducted at the same ratio.

6. The Board, in exceptional cases or where emergency conditions exist, may issue permits upon application therefor granting modification of, or exemption from these regulations.

7. Any person guilty of a violation of any of these regulations shall be punishable by

fine or imprisonment, or both, as provided in section 17 of "The Minimum Wage Act."

Dated at the office of the Provincial Secretary this twenty-first day of November, A.D. 1934.

## WORKMEN'S COMPENSATION IN SASKATCHEWAN

THE *Saskatchewan Gazette*, November 30, 1934, contained the text of Regulation 56 under the provisions of the Workmen's Compensation Act (Revised Statutes of Saskatchewan, 1930, chapter 253). Regulation 41, amended in the new order, was given in the *LABOUR GAZETTE*, October, 1930, page 1154; it governs the procedure in connection with the attendance of physicians or surgeons on injured workmen under the Act. Schedule A, (with scale of medical, surgical and X-ray fees) and Schedule B, (rulings of the Board with regard to hospital accounts, treatments and accommodation) form part of Regulation 56, but are here omitted:

### REGULATION 56

An employer who otherwise would be included in one or more of the classes of industries enumerated in Schedule one or in the regulations of the Board shall if his employees are all members of the family as the term "member of family" is interpreted by the Act, if the number thereof does not exceed six, be deemed to be excluded from the class or classes to which his industry or industries would otherwise belong unless and until he shall have filed a payroll return with the Board showing all the members of the family employed, with their names and P.O. address, the wages paid from the beginning of the calendar year in which the application is made, the estimated earnings of each member of the family for the remainder of the calendar year, satisfies the Board by such evidence as it may demand of the correctness of the account and estimate of wages given, pays his full assessment for the calendar year on the payroll filed with the Board for that year, undertakes to keep an accurate written record capable of proper audit of the wages paid from time to time, and the Board has after compliance with these conditions approved of the application which shall take effect from the date of approval by the Board. Any applications made must cover all members of family employed.

Each application shall be approved only for the calendar year in which it is made and a fresh application must be made on or before the 20th day of January of the succeeding calendar year or on or before the date the employer commences business subsequent to January 1, the approval thereof to be subject to the conditions set out above, provided, however, that an approval of a second or subsequent application shall make such admission retroactive to the first day of that calendar year or to the day when in that calendar year the employer commenced business or to such other date as may be ordered by the Board.

Regulation 41 of the regulations made by the Workmen's Compensation Board of the Province of Saskatchewan on the 8th day of September, 1930, and approved by Order in Council dated the 12th day of September, 1930, is amended by adding thereto as (f) the following:—

(f) The whole of the contents of Form 30 (attached hereto as schedule A) as amended by Minute of the Board dated March 14, 1934, providing for a discount of ten per cent of the taxed amount of accounts in excess of \$10 except as to X-ray fees; and the whole of the contents of the Minutes and ruling of the Board of the 18th of November, 1930 (attached hereto as Schedule B), is and are hereby made a regulation of the Board, and if the conditions imposed by the Board by Regulation 41 as passed by the Board on the 8th day of September, 1930, and as amended on this 16th day of October, 1934, are not complied with in any individual case, no medical or surgical aid or other payment under sections 48 and 49 of the Act shall be made by the Board in that case or be collectable from the Board, except the bills of hospitals which are not at fault in complying with this Regulation, and except as to the bills of nurses engaged on the case.

All regulations heretofore passed by the Workmen's Compensation Board of the Province of Saskatchewan and approved by the Executive Council of the Province of Saskatchewan by Order in Council shall be deemed to have been passed by the said Board and approved of by the Executive Council under the authority of Chapter 73 of the Statutes of Saskatchewan 1928-29, by which Act it is provided that the Act may be cited as the Workmen's Compensation Act of 1929, or under the authority of amendments to the said Statute, or under the authority of Chapter 253 of the Revised Statutes of Saskatchewan, 1930, whereby it is provided that the Act Chapter 253 may be cited as The Workmen's Compensation (Accident Fund) Act, or under the authority of any amendments thereto.

The City Council of Hamilton, Ontario, on November 28, adopted, for a trial period of three months, a plan of medical relief which had been proposed by the Hamilton Medical Academy, providing that the doctors will attend to indigent cases and charge the Welfare Commission for services rendered. Hitherto three physicians engaged by the Welfare Commission were in charge of the work of medical attendance for persons unable to pay.

## A PLAN FOR HEALTH INSURANCE IN CANADA

### Report by the Committee on Economics of the Canadian Medical Association

A REPORT dealing with a plan for health insurance in Canada was presented at the recent annual meeting of the Canadian Medical Association, and passed to the provincial organizations for their consideration. It was prepared by the Committee on Economics in accordance with the instructions of the Executive Committee. The problem set before the Committee was to devise a way "to make available for everyone the full benefits of curative and preventive medicine, irrespective of the ability of the individual to pay, and at the same time, to secure the willing co-operation of the medical profession."

The special problem of medical care at the present time is stated in the report to have grown out of the following conditions: (1) a change in our social organization under which the State has assumed increasing responsibility for the welfare of the citizens, as evidenced by legislation covering Old Age Pensions, Mothers' Allowances, Workmen's Compensation, and so forth (2) the present individualistic system of medical practice is of long standing; it has not adjusted itself to the present social organization in which the majority are wage-earners with no resources beyond their weekly earnings; (3) medical facilities are not fairly distributed, and so some areas are deprived of essential medical services because the population of these areas is not sufficient to support the required medical services; (4) the wage-earning population are often unable to pay ordinary fees, and are certainly not in a position to meet the costs of a long or serious illness; the wage-earner usually loses his wages when he is ill, at the very time when expenses are increased and the necessity continues for providing maintenance for his family; (5) medical care becomes a luxury rather than a necessity when the income provides only sufficient for food, shelter and clothing; (6) the medical profession is expected to furnish medical care for the indigent—a state responsibility—without remuneration; (7) because of the cost of medical care, there is delay in securing care and a great deal of self-medication; (8) modern medicine demands, in a percentage of cases, that consultant, hospital and other facilities be available if the patient is to receive the care required; this implies an actual correlation of existing services and making these services available to the patient through the family physician.

"All of these contribute to a condition under which many are going without adequate medical care, some are overwhelmed with the cost and losses due to illness, preventable diseases and postponable deaths are still common, comparatively few physicians have the opportunity to practise preventive medicine, while, at the same time, physicians, in general, are not adequately remunerated."

Part I of the Report shows that the public need for adequate medical care may be met by a system of health or sickness insurance, or a public organization for the prevention and cure of disease, based upon contributions from those who are insured. The systems at present in effect or under discussion in various countries are described, including the National Health Insurance schemes in England, Germany and France, the medical service in the Highlands and Islands of Scotland, the recommendations of a commission on Social Insurance in South Africa, the British Medical Association's proposals for a general medical service for the nation, the report of the United States Committee on the costs of medical care, etc.

Part II is devoted to a presentation of the Canadian situation, beginning with a general statement, and then passing to a more detailed consideration of what appear to be the most important or unusual conditions in Canada.

In Part III the report passes from the study of the existing provisions of medical care in Canada and other countries, and proceeds to consider what might be done to bring about an improvement in the medical care received by the Canadian people. The conclusions reached by the Committee are contained in the following outline:

#### GENERAL OUTLINE OF PLAN

*Purpose:* The ultimate purpose of any plan is to make available, for every Canadian, the full benefits of curative and preventive medicine, irrespective of individual ability to pay, and, at the same time, to assure the practitioners of medicine and others associated in the provision of medical care, a reasonable remuneration for their services.

#### I. Administration.

1. Central: Provincial Department of Public Health:

(a) Central Health Insurance Board; advisory.

- (b) Central Medical Services Committee; advisory.
- (c) Regional Officers; supervisors and referees.

## 2. Local: Local Department of Public Health:

- (a) Local Health Insurance Board; advisory.
- (b) Local Medical Services Committee; advisory.

NOTE: Such other similar central or local committees as may be deemed necessary to represent other bodies rendering service under the medical benefit.

## II. Persons Included in the Plan.

### 1. Compulsory and Contributory:

- (a) Persons, with dependents, having an annual income of less than \$2,500;
- (b) Persons, without dependents, having an annual income of \$1,200 or less;
- (c) Indigents—premiums paid by the State;
- (d) Dependents of (a), (b) and (c).

### 2. Voluntary—Hospital Care Insurance:

- (a) Those with incomes above the limit of "1" above.

## III. Benefits.

### 1. For compulsory contributors and indigents:

- (a) Every qualified licensed practitioner entitled to practise under the plan;
- (b) Freedom of choice of general practitioner by insured;
- (c) A general practitioner service for health supervision and the treatment of disease;
- (d) Services to be secured through general practitioner: (1) Specialist and consultant medical service; (2) Visiting nurse service in the home; (3) Hospital care; (4) Auxiliary services—usually in hospital; (5) Pharmaceutical service.
- (e) Dental service.

2. For voluntary contributors to Hospital Care Insurance: (a) Payment to hospital for private-patient accommodation for twenty-one days during the year. Medical care, special nursing, and extras not included.

## IV. Contributions to the Insurance Fund.

- 1. Wage-earners and salaried employees to pay a wage tax.
- 2. Rural land-owners to pay a land tax.
- 3. Rural non-land-owners and urban employers to pay a per caput tax.
- 4. Employers of insured to contribute.
- 5. State to contribute.

## V. Payment to Medical Practitioners.

- 1. The medical practitioners of each local area to determine method of payment for their area.
- 2. The Central Medical Services Committee to determine specialist, surgical and other medical fees.
- 3. Contract-salary practice limited to sparsely-populated areas which require additional help from Insurance Fund to maintain a general practitioner in their area.

## VI. Public Health Services (not provided by Insurance Fund).

- 1. Vital Statistics; 2. Communicable Disease Control; (a) Tuberculosis Clinics; (b) Venereal disease clinics; 3. Cancer Control Clinics; 4. Mental Hygiene Clinics; 5. School Health Service; 6. Industrial Hygiene; 7. Milk and Food Control; 8. Public Health Laboratory Service; 9. Biological Products; 10. Public Health Engineering; 11. Sanitation and Housing; 12. Public Health Education.

## VII. Related Services (not provided by Insurance Fund).

- 1. Mental Hospitals; 2. Tuberculosis Sanatoria; 3. Workmen's Compensation (may be part of Health Insurance); 4. Construction of hospitals.

## ENUMERATION OF PRINCIPLES

1. That, in the provinces where state health insurance is established, it be administered by the departments of public health (whether or not under a Commission) in order to co-ordinate the organized preventive and curative medical services.

2. That a Central Health Insurance Board and Local Insurance Boards be appointed, representative of all interested, to advise the responsible administrative authority.

3. That the professional side of health insurance medical service be the responsibility of the organized medical profession through the appointment, by the medical societies, of a Central Medical Services Committee and Local Medical Services Committees to consider and advise on all questions affecting the administration of the medical benefit.

4. That local areas for health insurance administration correspond to urban municipalities and rural health unit areas.

5. That the whole province be served by adequate departments of public health, organized on the basis of provision of individual health supervision by the health insurance general practitioner.

6. That there be a State Health Insurance Fund, provincially controlled, and that

"Regional Officers", to act as supervisors and referees, be appointed, paid and controlled by the provincial Department of Public Health.

7. That medical care for indigents be provided under the Plan, the State to pay the premiums of the indigent, who then receive medical care under exactly the same conditions as the insured person.

8. That the Plan be compulsory for persons, with dependents, having an income of less than \$2,500 per annum; and for persons, without dependents, having an income of \$1,200 and less per annum.

9. That the dependents of insured persons be eligible for the medical benefit.

10. That there be offered, on a voluntary basis, to those with incomes above the health insurance level, Hospital Care Insurance, and that this be administered as part of the State Health Insurance Plan.

11. That the only benefit under the Plan be the medical benefit.

12. That the medical benefit be organized as follows:

- (a) Every qualified licensed practitioner to be eligible to practise under the Plan;
- (b) The insured person to have freedom of choice of general practitioner;
- (c) The medical service to be based upon making available to all a general prac-

itioner service for health supervision and the treatment of disease;

- (d) Additional services to be secured normally through the general practitioner; (1) specialist and consultant medical service (only those so designated to be eligible to practise as specialist and consultant; (2) Visiting-nurse service in the home; (3) Hospital care; (4) Auxiliary services—usually in hospital; (5) Pharmaceutical service.
- (e) Dental service, arranged direct with dentist or upon reference.

13. That the Insurance Fund should receive contributions from the insured, the employers of the insured, and the State.

14. That the medical practitioners of each local area be remunerated according to the method of payment which they select.

15. That the Central Medical Services Committee decide the relationship between specialist and general practitioner fees, and between medical and surgical fees.

16. That contract-salary service be limited to areas with a population insufficient to maintain a general practitioner in the area without additional support from the Insurance Fund.

17. That no economic barrier be imposed between doctor and patient, but that the insured be required to pay a part of the cost of medicines.

## SAFEGUARDING HEALTH IN CAMPS IN ONTARIO

"HOW Camps are Regulated in Unorganized Territory" is the title of the following article by the Hon. J. A. Faulkner, Minister of Health for Ontario, which appeared in the *Canadian Lumberman* (Toronto), for November 15.

Territory without municipal organization in Ontario covers about 350,000 square miles, with a population of about 250,000 engaged in agriculture, lumbering, pulp operations and mining. These are industries which by their nature involve isolation from established communities, so that questions of sanitation and medical service require special consideration. However, in all but agriculture there is some concentration of workers, so that the camp has been used as a unit for the development of special regulations under the Public Health Act. These regulations impose upon every employer operating a camp in unorganized territory the same obligations and responsibilities with respect to communicable diseases, that rest upon the householder and the attending physician, and with respect to nuisances, the responsibilities placed upon

owners or occupants of premises in organized districts. A suspected outbreak of communicable disease in a camp must be notified to the district provincial sanitary inspector, of whom there are six.

Employers with camps housing more than twenty men exclusive of one foreman and one clerk—called permanent camps—are responsible for all medical, surgical and hospital care and treatment of workmen in their employ, subject to certain limitations respecting residence and diseases of excess, for a period of ninety days after the workman ceases to be employed. Under these conditions, the employer may enter into a contract with a physician to carry out such medical treatment as may be necessary, the cost to be met by deductions from wages which are to be paid to the physician in their entirety. There are about ninety of these contract physicians who are also required to notify the district inspector of the presence of communicable disease. Here then are physicians whose remuneration is independent of the amount of sickness in the

group, so that such measures as they put into effect to control sickness are to the benefit of the employee, employer and themselves alike.

An operator of such a permanent camp is required to enter into a sanitary contract with a legally qualified physician. The physician's duty under this contract is to ensure that these camps are built and operated in accordance with the regulations with respect to sanitation, similar in effect to the duty of a sanitary inspector of a local Board of Health under the Public Health Act for the prevention and abatement of nuisances. The cost is borne by the employer. District provincial sanitary inspectors in unorganized districts order correction of any condition which may jeopardize the health of workmen housed in any camp. There are detailed provisions covering location, construction, sleeping and eating accommodation, ventilation, sanitary facilities and water supply of camps.

In this vast area with perhaps forty thousand men housed in lumber, pulpwood, mining and road camps, the number of communicable diseases from year to year has been small. The recent rapid extension of mining development has introduced some

additional hazard but further to the ordinary requirements some, even of the smaller operations, have employed full-time physicians for the supervision of the health of workmen far removed from centres of population.

With the employer, contract physician and provincial sanitary inspector charged with definite responsibilities, the opportunity for an outbreak of disease which is controllable, is very limited. The need for medical attention in the individual case is largely met through the presence of contract physicians, and regulations requiring the employer operating a permanent camp to provide isolation and general hospital accommodation.

Indication of the importance attached to these requirements by employers and workmen alike is the fairly common practice of maintaining the provisions for medical care in communities which have later become organized, and the objections which are raised should the duties outlined be neglected.

Explanation of the health significance of the various provisions by contract physicians and provincial sanitary inspectors has enlisted the active co-operation of all progressive operators. The Department looks upon the requirements as the minimum essential for safeguarding the public health.

## NEW PLAN OF COLONIZATION IN QUEBEC

AT a colonization conference held at Quebec city in October the Hon. Irenée Vautrin, Minister of Colonization for the Province of Quebec, outlined a new colonization plan which had been approved by the provincial government. It is now necessary, he said, to inaugurate a provincial plan, the cost of which will be entirely borne by the province without any contribution from the municipalities, to establish settlers in groups of about fifty at a time. Settlers will first go to their new homes either at their own expense or at the expense of an organization being financially aided by the government, which will then proceed as follows:

A colony of four houses, which will later be used permanently by settlers occupying these lots, will be built by the settlers under expert direction after which they will be given road work in the vicinity. These settlers will be paid \$1.60 a day for this work for about two months while, at the same time, they will also build their own houses on their own lots. A dollar a day of his wages will be withheld from each settler, but the remainder of his wages will be given him so that he can purchase tools, clothes and other necessities. Each

settler will receive a special grant of \$100 to buy everything he will need to build his house, all the buildings being erected to a general definite plan. At the end of two months, the married settler will transport his family to their new home at his own expense by means of the \$200 saved from his wages.

Throughout the plan the road will always precede the settler who will also benefit by a special clearing grant of \$15 per acre, with a maximum of \$75 being established, the settler being paid \$10 a month by cheque. When he has received the sum of \$75 he will be entitled to receive the usual sowing grant, and if in need, particularly during the winter, will also receive the special grant awarded to needy first-year settlers. The government will purchase a certain number of horses and some material for each colony and all this will be under the direction of the Government inspector, until the settlers can afford to buy some of this, at cost price, from the Government. With the second year, the settler will become eligible for work on the roads, ordinary grants, distribution of seeds, sale of wood, and, if adjudged necessary, special grants for needy settlers.

An alternate experimental plan consisting in having roads opened and houses built at the cost of the province, after which settlers would be installed in them and would proceed to clear their own lots aided by the same various grants, will also be tried by the government in order to more quickly establish any settlers who might prefer settling in remote back woods.

The above arrangements apply to settlers in groups only, and individual cases will be handled along much the same lines only with the following differences. Their maximum reserve sum, to transport their families will be limited to \$75 instead of \$200. The rest of the conditions are very much the same with the varying conditions being determined by the number of dependants.

## NATIONAL CONSTRUCTION COUNCIL OF CANADA

### Inquiry into Slum Clearance and Low Cost Housing

THE National Construction Council of Canada recently appointed a Special Committee on Housing to consider the subject of slum clearance and low cost housing, and an effort is being made to obtain, through twenty regional committees in the leading cities of the Dominion, a survey of housing conditions in the various localities. (The foundation and objectives of the Council were noted in the LABOUR GAZETTE, March, 1933, page 283.) The objects of the Special Committee are as follows: (1) In communities that have already undertaken housing surveys, to lend any assistance required, and to provide a national body through which a joint effort may be made to gain the consideration of provincial and Dominion authorities; (2) to promote and encourage similar action in communities

where no action is being taken, and if necessary to initiate such action through the Regional Committees.

The National Construction Council, through its Housing Committee, is also endeavouring to obtain an expression of opinion from the Regional Committees in the various centres on the following points: (1) supplementary to any scheme of Housing or Slum Clearance, should the rehabilitation of sub-standard housing be advocated? (2) If so, should any scheme of financial assistance to owners of such sub-standard housing for necessary repairs and improvements, or replacement by a new building, be considered?

For the guidance of the Regional Committee the Council has provided the following classification Standards for Housing:—

### NATIONAL CONSTRUCTION COUNCIL HOUSING SURVEY—1934

#### *Classification Standards for Housing*

Housing to be judged according to minimum health standards and additional requisites of minimum standard of amenities. The minimum health standard is one that provides for health and decency only, any dwelling falling below this standard to be considered as dangerous to the health of the occupants or incompatible with decency. The additional requisites of minimum standard of amenities are those that would provide satisfactory environmental conditions which Canadian customs and standards demand.

	Minimum Standard of Health	Minimum Standard of Amenities
Position.....	Must have free access of light and air.....	No rear or alley dwelling.
Foundation.....	Where there is no cellar there must be a space of 2' 0" under house, space drained and enclosed.	Same as for health.
Cellar.....	Good if floored with cement and ventilated. Dry dirt floor with good foundations well ventilated.	Cement floor required.
Rooms.....	No living rooms in basement. Specially planned basement apartment with floor not more than 4' 0" below grade not to be considered as sub-standard.	
Heating.....	Central heating (furnace or heating boiler) is not required. House must be weather proof and capable of being heated by one or more stoves.	Central heating required.
Windows.....	All rooms must have windows opening on to the outer air and windows must be movable.	
Lighting.....	It should not be necessary to use artificial lighting on a normal day..	Good daylight in all rooms.
Illumination.....		Wired for electric light or piped for gas.
Dampness.....	The house or apartment must be free from serious dampness.....	
Smell.....	Smell does not itself place the house in the sub-standard class but when smell is persistent and caused by conditions which are a menace to health the house should be classed as sub-standard.	Free from obnoxious odours inside or out.

	Minimum Standard of Health	Minimum Standard of Amenities
Vermín.....	The house must be in condition to keep it free from vermin. Where a row of houses is infested it would be impossible for one house to be kept free. Environment must be considered.	Free from vermin of all kinds.
Water supply.....	House must be piped for cold water. These must be in good working order: Tap with sink and drain, basin or bath.	Complete inside plumbing with hot and cold water with sink, basin, bath and toilet. Toilet must not open off kitchen, living room or be in basement. All must be in good working order. There must be a window to open air in all rooms containing plumbing fixtures.
Toilet.....	Water closet inside building for use of household only, with entry from the dwelling. There must be a window in compartment opening directly to open air. Toilet must be in working order.	
Cooking.....	A separate place must be provided for cooking apart from the sleeping quarters. Vents and flues must be provided.	Individual cooking arrangement; for each household.
Food storage.....	Accommodation for the storage of food must be provided in a reasonably cool position with protection from dust and flies.	
Environment.....		What is commonly termed a "slum" would not supply the proper neighborhood surroundings for a house intended to provide satisfactory environmental conditions of even a minimum standard of amenities.

NOTE:—The Housing and Slum Clearance Committee are indebted to the Report of the Lieutenant-Governor of Ontario's Committee on Housing Conditions in Toronto whose standards have been adopted for the purpose of this survey.

## REPORT OF DEPARTMENT OF PENSIONS AND NATIONAL HEALTH, 1933-34

THE Department of Pensions and National Health recently issued its report for the year ending March 31, 1934, which details the work of the Pensions Division and of the National Health Division in connection with the inspection and analysis of food and drugs, the prevention of illegal traffic in narcotics, the supervision of proprietary medicines, public health engineering, etc.

The functions of these various sections were described in the review of the Department's report for 1933, which appeared in the *LABOUR GAZETTE*, March, 1934, page 232.

The records of the pension Division indicate that at March 31, 1934, the number of disability pensions in force of all ranks totalled 77,855.

During the fiscal year 1933-34, the admissions to hospital were 9,172 as against 10,693 in the previous year. The total number who received in-patient treatment was 11,718, as against 13,342 in 1932-33, 14,267 in 1931-32, 15,519 in 1930-31, and 12,939 in 1929-30. Treatments under the out-patient department were 193,388, an increase of 9,753 over the previous year and 13,354 over the year 1931-32.

Of the actual number in hospital on March 31, 1934, 1,568 were in departmental hospitals and 832 were in civil institutions, making a

total of 2,400, as against 2,533 in the year previous.

The number of pensioners who have been granted relief was 12,735. Comparison with the three previous fiscal years shows 14,368 in 1932-33, 12,303 in 1931-32, 8,811 in 1930-31. The orders issued amounted to \$1,912,563, as compared with \$1,978,284 in 1932-33, and \$2,082,052 in 1931-32.

In the Vetreft Shops 35 men were admitted and 57 struck off, the number of employed on March 31, 1934, being 121.

The War Veterans Allowance Committee (functioning in the interests of indigent and totally incapacitated war veterans) dealt with 3,081 applications, and reviewed 7,540 cases.

*Pensioners' Workmen's Compensation.*—The provisions under which the Department assumes responsibility in respect of accidents sustained by pensioners of 25 per cent and upwards while engaged in industry has been continued by Order in Council to December 31, 1934. During the fiscal year under review, the number of claims was 180, being one more than during the previous year. The expenditure, however, was \$36,419, as against \$17,641 during the previous year. In 1931-32, the expenditure was \$49,878 and the number of claims was 200.

During the year, the Child Welfare Branch ceased to function as a section of the Department, its activities being taken over by the Canadian Council on Child and Family Welfare.

The report of the National Health Division gives a comprehensive account of the work involved in analysis of food and drug products. Tabular summaries are given of the results of the examination of the more important foods and the ultimate disposal of imports of food shipments examined.

The Narcotic Division report tells of the campaign waged against illicit drug trafficking, detailing the important prosecutions.

Reports are also presented with reference to the Public Health Engineering Service (engaged in the protection of the health of tourists and the travelling public) and also to the Marine Hospital Service for sick and injured mariners. During the year, this service, administered in conformity with the Canada Shipping Act, collected dues from 683 vessels and treatment was given to 3,344 mariners.

## CANADIAN NATIONAL RAILWAYS

### Revised Pension Plan Effective January 1, 1935

A REVISED pension plan of the Canadian National Railways, including its subsidiaries (except those in the United States), will become effective on January 1, 1935. (The former Grand Trunk Pension Plan was outlined in the *LABOUR GAZETTE*, January, 1924, page 33, and the superannuation plan of the Intercolonial Railway in the issue of January, 1925, page 27; while a measure enacted by Parliament in 1929 to correct the inequalities of the existing pension system was noted in the issues for March, 1929, page 264, and April, 1929, page 396.) The Canadian National Railways has published a pamphlet giving information regarding the revised Pension Plan, including the text of the Rules and Regulations governing the administration of the fund, with questions and answers to elucidate the provisions of the plan for the benefit of employees, and a table showing the approximate monthly amounts of the normal monthly subscriptions required from an employee to provide for a supplemental annuity of \$100 per year to commence at the age of 65 years.

The voluntary contributory pension and annuity plan is summarized in the pamphlet as follows:—

To all employees who fulfil the age and service requirements the Company will pay upon retirement a pension of not less than \$300 a year at its own expense, without contribution from the employees. In addition supplemental annuities will be paid to employees who contribute out of wages or salary in accordance with the terms of the plan. Participation through contribution is wholly voluntary. The Company will match the employees' contributions dollar for dollar up to 5 per cent of the employees' compensation and will accrue interest compounded yearly upon the employees' voluntary contributions

and the Company's contribution. The amount accumulated at retirement will be used to purchase a supplemental annuity. The management believes that the contributory feature on which the supplemental annuities are based is desirable from the employees' standpoint, but the status of no employee will be affected adversely if he decides not to participate.

*Non-contributory Basic Pension and Service Pension.*—Every employee in service prior to January 1, 1935, who entered the service before attaining 50 years of age, will have his non-contributory basic pension or service pension established as follows: if he shall have had less than 10 years continuous service at January 1, 1935, his non-contributory basic pension at retirement will be \$300 per year. If he shall have had more than 10 years continuous service as of January 1, 1935, his non-contributory service pension payable at retirement will be determined by 1 per cent of his highest average salary for any ten consecutive years up to January 1, 1935, multiplied by his years of continuous service up to January 1, 1935, with a minimum of \$300 per year.

Every employee who joins the service of the Company after January 1, 1935, before attaining the age of 45 years will upon retirement receive a non-contributory basic pension of \$300 per year.

*Rules for Participation.*—Any employee after the lapse of 10 years from the date of his last entry into the service is eligible to become a contributor to a supplemental annuity. He may authorize a deduction from his pay of any stated percentage from 1 per cent to 10 per cent. No fractional percentages are allowed and the choice once made continues to the end of the calendar year, at

which time he may change the percentage if he desires to do so. The Company will hold employees' funds in trust including interest thereon compounded yearly. Subject to certain restrictions the Company will match the accumulation of the employees' funds dollar for dollar. The employee will receive such supplemental annuity as may be purchasable with the amount of his contributions added to the contributions credited by the Company, together with compound interest accrued thereon.

The restrictions upon contributions by the Company are as follows:—

The Company will not match contributions beyond 5 per cent of the wages or salary of the individual contributor.

The basic pension or service pension plus the proportion of the supplemental retirement annuity provided from the Company's funds computed in the form of a simple annuity at age 65 shall not in any case exceed 40 per cent of the employee's highest average salary during any ten consecutive years of his whole period of service to date of retirement. This limitation of 40 per cent does not apply where the basic pension or service pension plus the total supplemental annuity is \$600 per year or less nor to reduce any service pension established at January 1, 1935.

Contributions by the Company to a supplemental annuity cease at age 65 as will also the accrual of interest upon the Company's contributions.

*Safeguarding of Employees' Funds.*—All contributions by employees shall be made to the Company and the Company shall be a trustee therefor. The funds will be kept in a separate annuity trust account and will not form any part of the revenues or assets of the Company. Funds contributed by the employees and the accumulated interest thereon will be invested in Dominion Government securities or securities guaranteed by the Dominion Government.

*Interest Allowance.*—Contributions will be increased by interest compounded yearly. The rate set for the first three years is 4 per cent, but since it is well known that interest rates change in the course of time, sometimes going higher and sometimes going lower, provision is made for a revision of the interest rates by the Trustees at three-year intervals, but the interest rate cannot be set lower than  $\frac{1}{4}$  per cent below the average bond yield of Dominion of Canada bonds payable in Canadian funds maturing in not less than 20 years. When the time comes to purchase an annuity an interest rate must be determined on which to base the calculations of the size of the annuity. The plan provides

that this interest rate shall be fixed from time to time by the Board of Trustees but shall not be less than  $3\frac{1}{2}$  per cent compounded.

*Annuities.*—Employees' contributions, together with the Company's contribution, are intended solely for the payment of supplemental annuities to employees who reach retirement age and have the necessary service qualification. The normal age retirement is 65, but employees also have the right to retire with pension and annuity benefits at age 60 or over if retirement is due to physical or mental incapacity.

The mortality tables used to calculate the size of the annuities are subject to the approval of Superintendent of Insurance and Annuities of the Dominion Government. The tables known as Rutherford's Annuity Tables (which have this approval) have been chosen.

*Types of Annuity Available.*—Many pensioners have responsibilities for their wives or other dependents and these responsibilities cannot be adequately taken care of by a simple pension which terminates with the death of the pensioner. To meet such cases a pensioner at his option, may take his pension in the form of a joint and survivor annuity, or in the form of an annuity guaranteed in any event for a stated number of years instead of a pension which terminates at his death. The size of the pension will be decreased somewhat depending upon the age of the co-beneficiary in the case of a joint and survivor pension, or upon the period of guarantee in the place of an annuity, guaranteed in any event for a stated number of years. A joint and survivor pension will enable the pensioner to protect the old age of his wife (or sister) as well as of himself. The pension guaranteed for a stated number of years would enable a pensioner to protect a child or other dependent since the annuity, even if the pensioner should die, would continue to be paid until the stipulated guaranteed period had expired.

*Withdrawals.*—An employee who leaves the service for any reason whatever will be paid back all the money he has contributed with compound interest on request. In such a case the Company's contribution will be cancelled and should the ex-employee again join the Company's service he cannot re-deposit the funds with the Company. An employee temporarily laid off or on leave of absence or furlough, is not compelled to withdraw his accumulated contributions and is not required to contribute during such periods. If an employee dies before retirement his contributions with compound interest will be

paid his beneficiary or his estate. Under special conditions of necessity approved in each case by the Pension Board, a contributor may withdraw all of his contributions together with accrued interest thereon. In such event the equivalent contribution credited by the Company equal to the employees' contributions and accrued interest, will be cancelled. The employee withdrawing his contributions cannot at any further date re-deposit the amount and re-establish the Company's contributions which have been cancelled.

*Gratuitous Pensions.*—An employee having ten years or more of service, who becomes incapable of continuing his service by reason of injuries received while actually at work in the employment of the Company may, at the discretion of the Board of Trustees, receive a gratuitous pension, the cost of which will be borne entirely by the Company. An employee at the age of 50 years of age and upwards with 15 years or more of service who is discharged from the Company's service

otherwise than for misconduct may receive a gratuitous pension at the discretion of the Board of Trustees. The cost of such gratuities will be borne by the Company.

*Present Pension.*—The new pension plan does not in any way affect pensions presently in force.

*Administration.*—The pension plan will be administered by a Board of seven members, four of whom will be officers of the Company nominated annually by the Trustees and three will be officers of recognized labour organizations on the Canadian National Railways elected by vote of such officers who shall be General Chairman, Legislative Representative, or holders of higher official position approved by the Trustees. This Board will determine the eligibility of employees to receive pensions, the amount of their pensions, and will authorize all withdrawals of contributions. Its actions are subject to the approval of the Board of Trustees of the Canadian National Railways.

#### DIVISION NO. 4, RAILWAY EMPLOYEES' DEPARTMENT, AMERICAN FEDERATION OF LABOR

THE ninth convention of Division No. 4, Railway Employees' Department of the American Federation of Labor, was held at Toronto, Ontario, on September 24. Owing to the fact that Hon. W. A. Gordon, Minister of Labour, was prevented from being present, Mr. Joe Harris, M.P., welcomed the delegates on behalf of the federal government. Mr. J. F. Marsh, Deputy Minister of Labour, in the absence of the provincial Minister of Labour, Hon. A. Roebuck, extended a welcome on behalf of the government of Ontario, while the civic welcome was conveyed by Mayor Stewart of Toronto. The greeting of the Trades and Labour Congress was extended to the delegates by Controller Jas. Simpson, Vice-president, in the unavoidable absence of President Tom Moore.

The credential committee's report showed that there were 149 delegates present, the representation being as follows: Carmen, 61; boilermakers, 14; blacksmiths, 5; electricians, 5; machinists, 34; moulders, 2; pipefitters, 6; sheet metal workers, 6; firemen and oilers, 1; grand lodge officers, 12; local federations, 1; system federations, 1; correspondent of *Labour* (Washington), 1.

Mr. R. J. Tallon, president, thanked the speakers for their welcome. Before proceeding with the business of the convention he referred to the loss sustained by the organiza-

tion in the death of the former Secretary-Treasurer Charles Dickie and as a mark of respect to his memory and to the memory of other active members who had died since the last convention the delegates were asked to stand in silence for one minute.

Referring to the work of the past year the President said that "while we were interested in motor car competition, amalgamation and the future success of railroads, we were more interested in securing enough to live upon. . . . so our first object was the re-establishment of our basic rate and full working conditions."

In presenting his report, the president spoke of the difficulties with which the organization had to contend since the last convention, and the stand taken by the officers, loyally supported by the active workers, to maintain the best conditions possible for the membership. A review of the wage negotiations was also presented, together with an account of the successful efforts put forth to prevent a more drastic cut in wages during July, 1933. The delegates were reminded of the importance of keeping in close touch with legislative matters in the federal parliament and provincial legislatures. The president stated that "this important branch of our activities must be carried on and we should organize in each railway centre through our local councils a movement which would enable us

to secure direct results when it becomes necessary to interest the respective members of Parliament in matters that are important to us."

Under the caption "Union-management Co-operation," reference was made to the matter of co-operation with railway management, as in effect on the Canadian National Railways, the railway management being desirous of continuing this relationship after ten years' trial. Speaking for the employees, President Tallon said that "as regards our membership on that property it is recognized that this policy has been extremely profitable inasmuch as it has resulted in more generous working conditions and better working time than has existed on any other class 1 railroad in North America." Mention was also made of the close co-operation which existed between District No. 4 and the Trades and Labour Congress of Canada, and of the constant touch maintained with the legislation representatives of the transportation brotherhoods at Ottawa.

In connection with pension matters President Tallon reported that "real progress has been made in the adoption of a contributory pension scheme. All information is now available on the new regulations which come into effect in January 1, 1935, and while we have not the favourable government support which prevails in the United States, it is generally acknowledged that our plan is equally meritorious, and if adopted generally by Canadian railways, our membership will be protected in a much more satisfactory way than has prevailed heretofore."

As a result of merging of operations, as authorized under the Canadian National-Canadian Pacific Railway Act passed at the 1934 session of the federal parliament, a number of employees, it was stated, had lost their positions, but after joint meetings with the management the number was reduced to the minimum, and certain basic principles were agreed to, future action in this connection to be guided by the decisions made by the present convention.

Owing to the death of secretary-treasurer Dickie, the president presented the report for that office which showed a balance of \$4,811.94 in the treasury after the purchase of bonds to the amount of \$20,000.

The schedule committee in their report explained that they had divided the various resolutions submitted to them into four main divisions, of which the restoration of wages and shorter hours were of most concern. In connection with the restoration of wages, the committee's recommendation that the 1929 basic rates prevail from December 16, 1934,

was adopted. A further recommendation that joint negotiations with the standard railway organizations be carried out was also approved. In dealing with four resolutions having for their object shorter hours the committee recommended that the subject of minimum working hours be left to each system federation. After considerable discussion the recommendation carried.

The committee on officers' reports, reported on the advisability of continuing the *Federated Railwayman*, official organ of the organization. The committee recommended that this matter be discussed by all the local lodges, and if they wished the publication continued they were to so notify the president who could take the matter up with the executive board, and they would have the power to continue it if the expressions were favourable and conditions warranted, otherwise the publication would be discontinued at the end of 1934. After considerable discussion the committee's recommendation was carried.

The following resolutions were adopted by the convention on recommendation of the schedule committee:

All Sunday work to be paid at time and one-half.

That all employees called to work at any time be paid for the 8 hour shift.

Two weeks holidays with pay.

That upon application being made on behalf of an employee who has been invited to accept political nomination in federal or provincial elections, such employee shall be granted leave of absence without pay for whatever time might be necessary for reasonable electioneering purposes, which shall include the period time involved in final returns being given.

Laid-off members to hold seniority rights on the waiting list only for a period equal to their actual service in their classification.

That the incoming executive be instructed to make a thorough investigation, in conjunction with the Trades and Labour Congress of Canada, its provincial executives and Dominion Council of Health, of the injurious effects on the health of the employees as a result of the use of paint spraying machines, oil spraying machines, sand blast machines, blower systems of coach cleaning, with a view to securing adequate protection for these employees.

Apprentices not to work nights or overtime during entire apprenticeship.

The convention adopted the recommendations of the committee on constitution and laws which were to designate Montreal, Que., as headquarters of Division No. 4, and to

combine the offices of president and secretary-treasurer.

Other resolutions made the following recommendations:

The regulation by Parliament of hours of employment of operators of motor trucks and buses.

Pensions at the age of sixty--five.

Enactment of legislation enabling all unemployed citizens of the Dominion to sustain themselves and their dependants in accordance with standards recognized as necessary in Canada.

Establishment of a Transportation Commission to replace the present Railway Commission.

Joint action of all railway unions in combating wage cuts and to oppose amalgamation of railway systems.

Closer relationship with all rail organizations of an international character.

Opposing any further unification, consolidation or amalgamation of railway services and the consequent displacement of railway employees.

Enactment of legislation whereby all United States railroads running through or into Canada shall have a *pro rata* amount of work done in Canada on locomotives and rolling stock on the percentage basis of the mileage in each country.

Joint action with all other branches of the service for the purpose of obtaining a return to the basic rates of pay.

Appointment of a representative committee to consider the problem of members who are furloughed after long service, through changes in work methods, and not because of work being transferred elsewhere.

That the ratio of apprentices be 1 to 25, and not more than one apprentice to 5 mechanics to be employed in subdivision of department.

Compensation for members displaced as a result of pooling and joint use of facilities and other co-operative actions.

That all electric and radial lines operating under control of the C.N.R. and C.P.R., with their greatest proportion of mileage in Canada, be included in Wage Agreement No. 6.

That in the restoration of forces, only men represented by the federated trades be considered for re-employment.

That the hiring of apprentices be discontinued for a period of five years.

That the caption of wage agreement No. 6 be changed to cover all departments of a railway, in lieu of the present caption which includes only the motive power and car departments.

Officers elected were: President-secretary-treasurer, R. J. Tallon, 213 Coronation Bldg., Montreal, Que.; vice-president, Frank McKenna, 311 Coronation Bldg., Montreal, Que.

Vancouver was selected as the next convention city.

## QUEBEC JOINT LEGISLATIVE COMMITTEE OF THE RAILWAY TRANSPORTATION BROTHERHOODS PRESENT LEGISLA- TIVE PROGRAM TO THE QUEBEC GOVERNMENT

ON November 7 the Quebec Joint Legislative Committee of the railway transportation brotherhoods, composed of Charles Masse, Chairman, Montreal (Brotherhood Locomotive Firemen and Enginemen); M. J. Clark, secretary, Farnham (Brotherhood of Railroad Trainmen); J. L. Labrèche, Ottawa, Dominion Legislative Representative (Brotherhood of Railroad Trainmen), and William L. Best, Ottawa, vice-president and National Legislative Representative (Brotherhood of Locomotive Firemen and Enginemen), presented to Premier L. A. Taschereau and members of his Cabinet a program of proposed legislation. Cabinet ministers present beside the Prime Minister were: Hon. C. J. Arcand, Minister of Labour; Hon. Athanase David, Provincial Secretary and Registrar; Hon. R. F. Stockwell, Provincial Treasurer; Hon. J. E. Perrault, Minister of Lands and Mines; Hon.

J. M. Francoeur, Minister of Public Works; Hon. Adélard Godbout, Minister of Agriculture, and Hon. Irénée Vautrin, Minister of Colonization.

The committee, in presenting their proposals, gave it as their considered judgment that measures which will ensure a larger share of economic freedom, and the enactment of necessary social legislation, will constitute forward steps toward relieving many thousands of unfortunate citizens of some of the burdens they are obliged to bear. "Although reluctant to express what may be regarded as an alarmist's view of the situation," the committee stated, "we are convinced that vigorous and aggressive action by your government is urgently necessary, in co-operation with federal authorities, to prevent a possible social and industrial upheaval in our country. Many well-meaning and industrious citizens in this

and other provinces have reached a stage in their economic existence where they may not much longer tolerate the apparent indifference of governmental, industrial and financial leadership to deal effectively with prevailing conditions in the interests of human welfare."

Under the heading "Social Insurance" the enactment of the following legislation was requested: Mother's Allowances; Old Age Pensions; Unemployment Insurance under federal authority, and in this connection the committee favoured the co-operation of the various provincial legislatures in revision of British North America Act.

Other measures proposed were as follows:—  
Advance polls in municipal elections.

Compulsory school attendance for children up to sixteen years of age.

Amendments to the Workmen's Compensation Act.

That immediate and definite action be taken for more effective control of all highway transport, particularly as to the restriction of excessive speed, over-loading, and a more reasonable limitation of the width of commercial vehicle construction and loading.

That the existing legislation which provides for limiting the mileage or hours of labour, for medical certificates of physical fitness, etc., covering passenger vehicles, be extended to cover commercial vehicles.

The committee were given an attentive hearing, and were assured that their proposals would receive careful consideration.

## UNITED MINE WORKERS OF AMERICA DISTRICT 26

THE annual convention of District 26, United Mine Workers of America, was held at Truro, N.S., November 19-24, 1934. In addition to the district officers, there were present seventy-four delegates representing twenty-two local unions.

After appointing the various convention committees, President Morrison presented his report, in the opening part of which he referred to the trying period through which the organization had passed, since the last convention, due he stated "principally to the activities of a dual organization that had been organized in this district, commonly known as the Amalgamated Mine Workers of Nova Scotia," and which "almost since its inception received its direction from the headquarters of the Communist Party in Toronto."

In regard to wage negotiations, he stated that two-year contracts had been signed with a number of smaller coal companies at the present rate of wages, based on the rate paid by the larger companies in the District, and in some classifications upward adjustments were obtained. The president further advised that the present agreement with the Dominion Coal Company and the Cumberland Railway and Coal Company would terminate on January 31, 1935. Reference was made to the stoppage of work at the Acadia Collieries for a period of about three months, which necessitated a financial outlay of \$34,092.80 for relief, of which amount the international organization contributed approximately \$20,000 and the district the balance.

Referring to unemployment within the district the president stated that "the situation

from the viewpoint of unemployment has improved during the past year, due in a large measure to the fact that competition in the St. Lawrence market is less keen from the coal operators of the United States, who since the National Recovery Act went into effect have not the advantage they formerly had in that market. Government aid in the form of subventions have also very materially assisted in the moving of Nova Scotia coal to new markets in Ontario and Quebec."

To overcome the serious situation arising out of the increasing number of unemployed young men, the president made the suggestion that a conference of representatives of the government, coal operators and the district organization be held as soon as possible with a view of finding a solution.

Under the heading "social legislation" mention was made to the payment of old age pensions which had been inaugurated in March, 1934. Other legislation, the enactment of which was considered of the utmost importance and should receive attention of the convention, were: Unemployment insurance; amendments to the Compensation Act, and the shorter work day.

In closing, President Morrison stressed the educational value to the various local unions in having representatives present at annual conventions of the international organization.

Vice-president P. G. Muise and each of the six board members presented reports covering their work during the year.

The policy committee, to which was referred resolutions from practically every local in the district, presented their recommendations, and

these as amended by the convention were as follows:

Restoration of the 1931 rates for contract men, and a flat increase of 50 cents per day for the datal men.

Where new scales of rates have been negotiated since the last wage agreement, they should show the same proportional increase as the contract miners throughout the District.

All employees working on the 11 o'clock shift should be paid 50 cents extra per shift.

Hours of labour in around the mines should be 8 hours.

Time and one-half for overtime and double time for Sundays and holidays. This to apply to all employees.

That an umpire be appointed to render a decision on all cases in which the coal companies and the executive of the U.M.W. of A., District No. 26, fail to agree, his decision to be final; the umpire to be agreed to by the coal company and executive of the U.M.W. Should they fail to agree, the County Court Judge of Cape Breton shall appoint said Umpire. Should the general superintendent (or his representative) of the coal company and the executive of the U.M.W. fail to settle a dispute, the dispute should be referred to the umpire within seven days; the umpire to render his decision within thirty days; the umpire to be paid jointly by the coal companies and District No. 26, U.M.W. of A. In no case shall the coal companies or the executive of District No. 26, U.M.W. of A. ask to have set aside the written terms of the agreements.

That the district executive convene a conference of international unions in Nova Scotia for the purpose of seeking legislation for a six-hour working day and a five-day week, also increased compensation and any other legislative matters than may come before the conference.

Amendment of the Coal Mines Regulation Act with reference to check-off for unions dues to read: "That coal companies shall deduct dues for the U.M.W. of A. only, which is the recognized organization doing business for the coal miners of the North American continent.

That the executive put on a campaign to fully reorganize District 26, and that local officers and organizers of the A.M.W. when seeking membership in the U.M.W., shall make application direct to the district office, and shall be subject to such terms and penalties as may be prescribed by the executive board of District No. 26, U.M.W. of A.

Resolutions were adopted containing the following recommendations:—

Repeal of recent legislation, the policy committee to bring in a resolution on check-off legislation.

Cancellation of arrears for coal and rent in the district.

Uniform shifts for all classes of labour.

An extra man at the lamp house on each shift.

That a person with actual coal mining experience and conversant with conditions of employment in coal mines be included on the Workmen's Compensation Board.

Text books to be supplied to school children free of charge.

A shorter work day at termination of present contract.

Purchasing of motor ambulances.

That the next contract contain provision for weekly pay for those not receiving the same under the present contract.

The wage scale committees to accompany executive officers at wage negotiations.

Opposing importations of foreign coal.

Thanking international organization for financial assistance received last year.

That as many delegates as possible attend next international convention.

Negotiation of an agreement embodying a 6-hour day and 5-day week.

Time and a half for overtime and double time for Sundays and holidays.

Legislation requiring the employer to supply employment for injured workmen.

Asking the company to re-employ men who have served a jail term.

That a clause be inserted in the next agreement prohibiting mine managers from hiring anyone not a local resident of his colliery until such time as all unemployed have secured employment.

Taxing of labour-saving machinery in proportion to the labour displaced, the revenue received to be applied to unemployment insurance.

Improvement in the housing conditions and failing this an injunction against collection of rents.

Organization of all miners in the district.

Higher rates of pay for various classes of work.

That the executive open negotiations with the receivers of the Acadia Coal Company and endeavour to arrange a new agreement satisfactory to the employees prior to the expiration of the present contract.

An extra fireman for each shift.

Thomas Kennedy, secretary-treasurer of the United Mine Workers of America and R. J.

Tallon, vice-president, Trades and Labour Congress of Canada, addressed the convention.

The next convention of District 26, United Mine Workers of America will be held at Truro, N.S., in October, 1936, the present officers holding office until that time in conformity with the amended constitution.

### New Labour Organizations in Canada

The Trades and Labour Congress of Canada has issued a charter to London Federal Labour Union No. 53; President, Joseph Durkin, 313 Hill St., London, Ont., Secretary, K. G. Semchism, R.R. No. 3, London, Ont.

The following organizations have been chartered by the All-Canadian Congress of Labour:

Toronto branch, National Hotel and Restaurant Employees' Union and Bartenders' Alliance.—Secretary, Maurice Brown, Room 24, Hargraff Bldg., 43 Scott St., Toronto, Ont.

Toronto local, National Union of Radio and Electrical Appliance Employees.—Secretary, P. Sparks, 39 Bamsley Ave., Toronto, Ont.

Edmonton Street Railway Unit, Transport and General Workers of Canada.—Secretary, R. LeMaitre, 11319-87th St., Edmonton, Alta.

Saskatoon Stagehands' Local No. 6, National Union of Theatrical Employees.—Secretary, S. E. Nesbitt, 727-9th St. E., Saskatoon, Sask.

## CIVIL SERVICE FEDERATION OF CANADA CONVENTION

THE fifteenth National Convention of the Civil Service Federation of Canada was held at Ottawa on November 15 and 16, 1934. The report of the Executive referred to the steady growth of organizations affiliated with the Federation since the preceding convention in 1931, and the attendance of the delegates this year was larger than for several preceding conventions.

The more important resolutions adopted at the convention instructed the incoming Executive to continue its efforts, more particularly in the light of improving Federal revenues, to secure for Civil Servants the lifting of the ban on promotions and statutory increases, as well as the abandonment of the present horizontal salary deductions. Resolutions requesting changes in the detail of the superannuation and retirement systems were adopted, the subject of optional retirement after long service and before age 65, as presently provided for, receiving considerable attention, more particularly as the convention took the view that employment trends in industry are toward a lower retirement age. On the subject of hours of work the convention favoured more nearly universal application throughout the Civil Service of the regulations providing for a maximum working day of eight hours and a week of forty-four hours: it was decided to request seven hours as the night equivalent for an eight-hour day in those branches of the Service where such a rule would be applicable. For the time being at least the Federation decided not to endeavour to form a group insurance scheme to be participated in by all sections of the Service. Corporate membership in the League of Nations Society was

voted. Present political rights of Civil Servants were re-affirmed, but the convention voted unanimously against Civil Servants being given the right to actively participate in partisan election campaigns.

At a luncheon the delegates were addressed by the Honourable C. H. Cahan, M.P., Secretary of State, while the Convention dinner, tendered by the Civil Service Association of Ottawa, was addressed, among others, by the Honourable D. M. Sutherland, M.P., Minister of Pensions and National Health, the Honourable M. Burrell, Parliamentary Librarian, and Luther C. Steward of Washington, D.C., President of the National Federation of Federal Employees of the United States, who was a fraternal delegate to the convention.

V. C. Phelan, of the Department of Labour, who presided throughout the sessions, was re-elected President for a third term. V. L. Lawson of the Department of Railways and Canals was elected Secretary, and G. R. L. Potter of the Department of the Interior was elected Treasurer. In addition to these three officers the Headquarters Executive Committee at Ottawa consists of five Vice-Presidents and ten members of the Executive Council, while fourteen provincial Vice-Presidents were also elected.

The next convention has been tentatively fixed for 1937.

### Farmers' Business Organizations in Canada

The Division of Marketing (Agricultural Economics Branch) of the Department of Agriculture has recently published a report entitled "Farmers' Business Organizations in Canada." This report covers the business

year 1931, and deals with the activities of 795 farmers' co-operative organizations having 2,706 branches. The shareholders and members financially interested number 379,687, and their total investment (exclusive of reserves of \$7,732,027) amounts to \$38,643,598. Combined assets total \$70,226,288 with plant and equipment valued at \$45,607,366.

A summary of the business activity of the organizations during the year under review is given in the following paragraphs from the report:

"Sales of farm products for the period under review amounted to \$134,611,154. The sales value of supplies purchased totalled \$10,665,503, and other receipts \$27,297, which

combined means a total business of \$145,303,954. It should be kept in mind that this was a period of low prices with the index of farm prices standing at nearly 50 per cent below the 1926 level.

"The farm produce marketed co-operatively in Canada as taken from returns received is given as an estimate. Whole milk handled amounted to 1,994,056 hundredweight, butter 34,357,329 pounds, cheese 19,324,907 pounds, apples 2,356,308 boxes and 675,019 barrels, potatoes 809,951 hundredweight. Live stock handlings totalled 3,496,647 hundredweight, poultry 12,341,822 pounds and eggs 16,424,822 dozen, and grain marketed is estimated at 175,580,591 bushels."

## LABOUR POLICY OF GENERAL MOTORS OF CANADA, LIMITED

A POLICY designed to promote closer relations between the workers and the management is practised by General Motors of Canada, Limited, whose headquarters are at Oshawa, Ontario. The policy is described in a statement issued on November 22 by Mr. H. A. Brown, vice-president and general manager of the company, which reads in part as follows:—

"The management of General Motors feels that there is no real conflict of interest in its relations with its 4,500 employees. Such apparent conflicts as arises usually result from a lack of mutual understanding between the employee and employer. We know we can not get along without labour any more than labour can get along without management—nor can management get along without capital and all three are dependent upon the customer and buying demand. . . . This co-operative relationship is based upon a few simple fundamentals: (1) An opportunity for inter-communication between employees and management; (2) fair wages; (3) fair employment practices; (4) good working conditions; (5) fair and just treatment.

To-day, in the large organization of General Motors of Canada we must depend almost entirely upon our supervisory contacts in dealing with our employees. At times, however, there might be a failure on the part of management—or because of some insulation in the organization—in conveying to the employee group as a whole an understanding of management's aims and purposes. More importantly, because of the layers of organization between the working group and the management, there might be a lack of understanding by the management of the employees' viewpoint. Under such conditions these weak-

nesses interfere with the mutual understanding necessary to harmonious relationships.

### Labour—Management Co-operation

The management philosophy of the General Motors Corporation is such that it should be possible to achieve this harmonious relationship so necessary to the success of a continuing institution. This objective can be fully served only by having sympathetic inter-communication of ideas from management to the men and from men to the management. Just as we go to the car owners of Canada to get their viewpoint as to what they desire in their automobiles, much in the same way we have gone to the men in our shops to get their viewpoint and their problems in their work. On several occasions, we have come directly to the men or their representatives on problems that vitally concerned their welfare. For example, at Walkerville we met with representatives of the men and discussed the wage payment plan and, after thoroughly discussing the problem, arrived at a decision mutually satisfactory to both the men and the management.

"In the spring of 1932, we were confronted with the problem of reducing our price and costs. We felt that the reduction in the price of our products would result in an increase in volume that would enable us to provide more hours of work for our employees. We went to the men with our story because we felt that they would be willing to co-operate with us. After discussion with them, they voluntarily took a reduction in wages in the belief that by so doing they would receive more hours of work. Subsequently, it proved out as was thought it would and the men have taken as much satisfaction out of it as we

have. This cut in wage has long since been restored, in fact, the men are now receiving more per hour than before the cut was made.

### **Suggestion System**

"For the handling of current employee problems we have in General Motors of Canada a suggestion system which parallels, in a measure, employee representation. Under this plan, the men elect representatives by secret ballot to sit as a committee with the management. Every employee is encouraged to submit any ideas or suggestions he may have concerning working conditions, safety, efficiency, wage rates, plant procedure, etc. The elected committee sitting with management representatives then passes on the proposals. During the past year, we have received many valuable ideas through this plan. It has provided information on employee problems that we wouldn't have obtained otherwise. We also have been better able to present management's problems to the employees, thereby establishing another two-way channel where ideas can flow in both directions.

### **Responsibilities of Management**

"There are certain management considerations that have to be considered in our personal policies, just as there are certain engineering considerations that have to be considered in the design of our product. On the other hand, by finding out how the employees feel, we are in a position to go to them with explanations as to why this or that policy cannot be changed. Our experience in dealing with the employees has led to the conclusion that our employees are as fair-minded as our customers. We have found employees entirely reasonable and willing to accept any explanation that is truthful and just.

"I am frank to admit, however, that there is a reluctance on the part of the workmen to discuss their problems freely. They are sceptical. One of the problems before me is to impress these men with the sincerity of management in its endeavour to open up this medium and thereby cement a closer relationship between them and management. Beyond this formal contact, the management door is always open to any employee. In keeping with good organization practice, we would like to have him first take his problem up with his immediate superior and then if he doesn't feel that he has received fair treatment, he is free to carry the matter even to the general manager. The fact that management subscribes to this principle of giving the workman a voice in those things which concern him does not in any way absolve management of certain inherent responsibilities and duties which must also be recognized. By giving the employees

a voice in conditions affecting them it does not imply the assumption by the employees of a voice in those affairs of management which management by its very nature must decide upon its own responsibility.

"Management is charged with the responsibility for promoting and maintaining the best long-term interests of the business as a continuing institution. Therefore, it is our principle that, while management should exhaust every means in endeavouring to settle all problem of employer-employee relations which may arise, it cannot submit to arbitration (which is a surrender by both sides to the authority of an outside agency) any point at issue where compromise might injure the long-term interests of the business and, therefore, in turn, damage the mass of employees themselves.

"General Motors is part of an industry where there has long been a natural regard for and an understanding of the benefits which flow from a high general standard of living. Of course, all industry is ultimately, and the automobile industry is directly, dependent upon the ability as well as the desire of the customer to buy. It is necessary to increase the spread between the cost of the bare necessities of life and the amount of the pay envelope so that there will be something left with which the employees can buy things such as motor cars, radios, etc.

### **Seasonal Production**

"Consistent with the foregoing, General Motors of Canada has for years, as a matter of policy, paid their workmen as well as, or better than any other Canadian industry. It is only natural, therefore, that our employees are not so much concerned with how much they make per hour, as how many hours' work they get per week and how much is in the pay envelope. The hours of work we can give are determined by the demand for our product. Our business, unfortunately, is seasonal. In Canada, people buy but few automobiles in the winter. Most of our business is done in the late spring and early summer. Because of this, we must build most of our cars in the spring of the year. To meet this special condition we have two alternatives:

"1. Work our regular force of employees long hours in the spring of the year, or

"2. Put on a large number of temporary men and hold down the hours.

"Our employees indicated that they preferred the former, and we have, therefore, adopted a policy of giving our regular employees the extra hours in the spring to offset the shorter hours in the fall. If we did not

have this elasticity in the number of hours it would create a serious social problem in Oshawa. It would be necessary for us to import into Oshawa men for short-term employment during the rush months. After having completed their short term of work they would be thrown upon civic welfare for the remainder of the year.

"While I feel that it is in the interest of the employee to have a sufficient bank of hours in the spring to offset the lower employment in the fall, I appreciate management's responsibility to do whatever is practical to level off the seasonal peaks. In this connection, Mr. Sloan's recent announcement of 'staggering' the introduction of new models will have a highly beneficial effect in Canada.

"Regardless of all these things, however, we realize that Canada's climate and the nature of the product which we are selling will continue to cause extreme seasonal peaks. Consequently, through a system of forecasting much too involved to deal with in detail here, we attempt to forecast, as accurately as possible, the season's production requirements in advance. We then attempt to break down this production into total productive hours of employment for the entire operation. This total is then distributed to the various departments and, as far as possible, the man power for each department determined on a basis of providing a satisfactory annual earning for each employee. It is essential that we have definitely in mind the health and general welfare of the employee during the high production period.

### Stabilizing Employment

"We have always maintained the practice of employing only local people as far as possible. It is only after all satisfactory, available local applicants have been hired that consideration is given applicants from other communities. Last spring we ran into a shortage of certain specialized labour. It was only after an investigation disclosed that there was no supply available in Oshawa and, after we had advertised in the local newspapers, for diemakers and none appeared, that we went out of town to secure them. This year, we have had classes in metal-finishing in which we trained local labour—some sons of old employees—in order to make it unnecessary to bring in labour from outside.

"When reducing or increasing our force, each of the following factors is considered: Efficiency of the man; human relations—such as married or single—number of dependants; and length of service. Where more than one member of the family is employed in General Motors, this factor is also considered.

### Rating of Employees

"For several years we have had a plan whereby we rate our employees periodically in order to have a systematic method of following the progress of the individual on his job. This rating plan is used in determining the relative efficiency of the man not only in connection with his lay-off and rehire, but it also influences his rate and his opportunity for promotion.

"To maintain discipline, management has the right to discharge an employee for insubordination, inefficiency or infraction of shop rules. The decision to discharge an employee, however, must rest upon clear and explicit cause and must be reasonable. The reason for discharge is clearly stated to the employee. When a man is separated from General Motors of Canada he is given a reason slip, clearly indicating the reasons. If he is discharged, he knows why; if laid off on account of reduction in force, it is understood that he is eligible for re-employment. When a man quits, his release slip indicates this.

"As a result of the foregoing, we are very fortunate in having a stabilized organization, comparatively free from the so-called 'floater' type of employee. This is indicated by the fact that in spite of a substantial increase in production this year, we have taken on only a few employees who have not worked for us previously.

### Accident Prevention and Sickness Insurance

"Mr. Knudson, executive vice-president of General Motors, United States, says that 'Safeguarding our employees from accidents is, in my opinion, the greatest and most important task before us at all times.' I heartily and fully subscribe to this statement. Our safety experience during the year 1933 and for the first nine months of 1934, I am happy to state, is far better than other industrial concerns in our line of business.

"A complete plant hospital is maintained under the supervision of competent Oshawa physicians to serve the employees of General Motors of Canada, not only in industrial injuries, but also from the standpoint of preventive medicine and in special cases of non-industrial illness.

"It is difficult for me to discuss within the confines of this story the many other things we have such as the General Motors of Canada Recreational Association which has gymnasium and auditorium facilities at Oshawa. We also have a group insurance for financial protection in the case of sickness or death.

### Training in Industrial Relation

"The final and most important element in the problem of promoting good industrial re-

lations is that of fair and just treatment. Irrespective of how acceptable the foregoing policies may be, unless they are justly and equitably administered, we cannot expect harmonious employer-employee relations. It must be recognized that in the problem we are dealing with human nature and irrespective of the safeguards which may be set up to insure fair treatment, individual weaknesses will assert themselves.

"This problem is not so much a matter of policy as it is a matter of administration, and in this connection special training courses emphasizing this point of view are periodically given to the supervisory force. An effort is made to impress upon the employees the sincerity of management's point of view that they carry to higher levels of the organization

any grievances which they cannot satisfactorily settle with their immediate superiors. The suggestion system has proved very beneficial in bringing other grievances, either individual or departmental, to the attention of the management. In addition to the foregoing, various other means are being continually employed to detect cases of unfairness and to discipline supervision where necessary to insure an adherence to this policy.

"In conclusion, this theory of management clearly points out the necessity of shortening the gap between the man in the shop and the man behind the manager's desk because they are both in the same business and working for the same employer. In short, it is desired that that high degree of understanding which exists in a small company may be developed in General Motors of Canada."

## OCCUPATIONAL CHANGES IN GREAT BRITAIN

The number of persons insured against unemployment under the Unemployment Insurance Acts of Great Britain is estimated once a year, on the basis mainly of information derived from the annual exchange of unemployment books in July. The results of the last inquiry are published in the *Ministry of Labour Gazette*, November, 1934. The total number insured at the beginning of July, 1934, is estimated at 12,960,000, an increase of 75,000 as compared with the estimated number at the beginning of July, 1933. An increase of 126,000 was shown in the number of insured men during the year, and the number of insured women also increased by 8,000; but on the other hand there was a decrease among boys of 37,000 and among girls of 22,500. The decreases in the number of boys and girls are attributed largely to the fall in the birthrate in the war-years 1915-1918.

The net change between any two dates in the numbers insured represents, it is stated, the balance between the number of entrants and re-entrants on the one side and the number of exitants on the other. Usually about 75 per cent of the new entrants are juveniles under 18 years of age. The remaining 25 per cent of new entrants consist almost entirely of adults from uninsured industries such as agriculture and private domestic service; persons who give up business on their own account; men discharged from the Forces; persons returning from abroad; and non-manual workers whose salaries have fallen below the £250 income limit. The re-entrants may be drawn from the same classes, or may be persons, insured at an earlier date, who at the time of re-entry are attracted by a relaxation

of the conditions for the receipt of benefit. The exitants consist of persons who pass out of insurance through death or through reaching the age of 65, through entering one of the classes from which adult entrants and re-entrants are drawn, or through retirement from employment.

The figures for new entrants show, as in previous years, important variations between the different industries. The depressed industries attract comparatively few new entrants, while the expanding industries as a rule show proportions well above the average. Among the latter, the more important, in the case of males, are the electrical trades, the manufacture of miscellaneous metal goods, of bricks, tiles and pipes, and of hosiery, the bread biscuit, etc., and wood-working industries, the distributive trades, commerce and finance, and the hotel, public-house, restaurant, boarding-house and laundry services. Among females the electrical, musical instrument, glass and artificial silk industries, with hotel, boarding-house and restaurant service, the distributive trades, and commerce and finance show high proportion of new entrants. The exitant figures show that the movement of men out of the depressed trades has continued. This is particularly the case with the cotton and shipbuilding and ship repairing industries; but a similar, if less marked, movement is shown in coal mining, tinplate manufacture, tailoring, boot and shoe manufacture, and watch, jewellery, etc., manufacture.

The industries into which men have transferred from other industries include coke oven and by-product works, the manufacture of

bricks, tiles and pipes, constructional engineering, motor vehicles, cycles and aircraft, electric cable, apparatus and lamps, the silk and artificial silk industries, and the building industry. There has been an appreciable decline in the number of women in the mining industries, iron and steel and tinplate manufacture, the cotton industry, artificial silk, yarn manufacture, textile bleaching, etc., trades,

food, drink and tobacco industries, printing, etc., and rubber trades. The number of women has increased, however, in the paper and some of the dress industries, general engineering, stove and general iron-founding, electric cable, apparatus and lamp manufacture, silk manufacture and artificial silk weaving, the manufacture of leather goods and of musical instruments, in the building industry and in commerce and finance.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Publications of the Office

*"The International Standardization of Labour Statistics"*—The International Labour Office has just published under this title a review of the statistical work of the Office and of various international statistical conferences. This volume contains the resolutions adopted by various international conferences of statisticians held under the auspices of the International Labour Office, or with its direct collaboration. The resolutions deal with the scope and methods of compilation of statistics of labour, including the classification of industries and occupations, wages and hours of labour, cost-of-living index numbers, unemployment and employment, industrial accidents, family budget enquiries, housing and rent, industrial disputes, collective agreements, emigration and immigration, and international real wage comparisons.

Five international conferences on labour statistics have been convened by the Office, and others have been held on the initiative of various institutions. The text of the resolutions is preceded by an introduction describing the nature of these conferences, and explaining the scope of the subjects treated and the efforts made by the Office to compile regular statistics, classified so far as possible on the lines laid down by the conferences.

The volume is intended not only for the use of officials of the statistical departments called upon to deal with these various subjects, but also for students and research workers concerned with labour problems.

*"International Comparisons of Cost of Living"*—The Office has also issued a study of certain problems connected with the making of index numbers of food costs and rents. The International Labour Office has always given considerable attention to the problem of international cost-of-living comparisons, both in its theoretical and practical aspects, and various articles have been published in the *International Labour Review* from 1924 onwards, in which tentative comparisons based

on the prices of foodstuffs are made, and the difficulties met with in dealing with the problem are discussed. In 1930 the Office was requested to make an enquiry into the relative cost of living in certain European countries compared with Detroit, and the Statistical Section was entrusted with the task. The results were published in a special study in 1932 (*LABOUR GAZETTE*, February, 1932, page 220). Although this enquiry was limited to a particular case of this problem, namely the amount which should be paid to a worker in certain European cities in order that he may have a standard of living approximately equivalent to that of a certain category of American worker of given income, yet the enquiry raised many problems of method which are discussed in the study. In 1931 a conference of official labour statisticians was held at the International Labour Office, which discussed, among other things, the general question of international comparisons of cost of living. This conference made certain recommendations concerning the future work of the Office on these matters, and the present volume gives the first results of the studies undertaken in this field by the Statistical Section of the Office. It consists of two parts, dealing respectively with food and rent.

Regulations, dated November 5, 1934, under Manitoba Factories Act and Fires Prevention Act, were published in the *Manitoba Gazette*, November 17. They govern the sale or delivery of fuel oil and the installing of oil burning equipment and its servicing. It is provided that "no person shall within the Province of Manitoba by himself, his clerk, servant, employee or agent, sell or deliver fuel oil for use within the Province of Manitoba in a fuel oil burner used for heating premises unless he is the holder of an existing licence which is in force and which has been issued by the Minister. Such licences may be cancelled and penalties imposed in cases where the regulations have been violated.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF NOVEMBER, 1934

### Reports of Superintendents of the Employment Service

**T**HE employment situation at the end of November was reported by the superintendents of the Employment Service to be as follows:—

Local farmers in the Maritimes were engaged in ordinary farm chores. Fishing was somewhat slack, except at Halifax and Saint John, where good catches were reported. Logging was quiet, although the cutting and shipping of Christmas trees afforded a slight increase in activity for the time being. Coal mines in the New Glasgow area operated from two to six days per week, while those in Cape Breton and vicinity worked from two to five days. Manufacturing showed improvement, many factories being busy preparing stock for the holiday season, and no idleness was reported in the iron and steel industry. At Moncton, splendid progress was reported in several building projects already underway, but elsewhere little construction outside of work on highways was being carried on. Relief camps also continued operations. Railway transportation, both freight and passenger, was good, but water transportation, except at Saint John where the winter port had been opened, was seasonally slack. Trade showed little change and placements in the Women's Division remained steady.

Little activity was reported in farming in the Province of Quebec, nor were many placements effected in logging, although in the district around Rouyn about 1,500 men were employed cutting logs. Manufacturing was reported as follows: Chicoutimi, conditions unchanged; Montreal, tobacco and cigars, textiles and clothing busy, but rubber, boots and shoes, and metal trades quiet; Quebec City, factories operating on a smaller scale with curtailment of production; Three Rivers, normal except for a slightly lessened activity in the paper mills. Orders for building tradesmen were numerous in Montreal with a few requests for building labourers, but a decrease was noted in the amount of unskilled help employed by the municipality. Building construction was slack in Sherbrooke and Quebec City, although maintenance in the latter municipality was fairly busy. The only construction of importance in Three Rivers was the carrying on of some repair work. Transportation was quiet at Chicoutimi and Quebec, but at Three Rivers, an increase was noted due to the approaching closing down of navigation which will take place shortly.

Trade showed a marked improvement. Except at Three Rivers, placements of domestic help in the Women's Division were numerous.

There was little demand for farm help in the Province of Ontario, and while logging continued very active with camps filled to capacity, the companies were greatly handicapped by mild weather and rain. Lessened activity was reported from the mining districts owing to the approach of winter, although in many cases surface labour was being absorbed underground. Manufacturing on the whole, appeared to be rather quiet, but local conditions in several districts showed improvement and staffs were being fairly well maintained. Little change was noted in the iron and steel industries, but textiles, tobacco, clothing, electric apparatus, paper box factories and metal trades were fairly busy. Ordinary building construction was at a low level, repairs and alterations being about the only source of employment in that line, and highway maintenance and construction continued as a relief measure. In the Women's Section the demand for domestic workers was firm, with a scarcity of first class cooks-general. Stores reported business good, and saleswomen were again finding employment, even if only temporarily.

Requests for farm workers in the Prairie Provinces remained steady, but the majority of placements made were under the Farm Relief Plan. There was also a better demand for bush workers, particularly tie makers and cordwood cutters, with vacancies in some localities somewhat difficult to fill, as the men were required to furnish their own blankets and their fares to destination, and many workers were without money. Mining remained slack, although the colder weather had improved conditions to a certain extent. Manufacturing likewise was quiet. Alterations and repairs constituted almost the only work in building construction and openings for skilled mechanics or labourers were few. Requirements for various relief camps were lower than usual, with all orders easily filled. Trade was somewhat better, due to the approaching holiday season, and a fair demand for women domestics existed, with nearly all city orders promptly filled.

Farming in British Columbia was very quiet, although some orchard work was still going on, and packing houses were retaining quite a

number of employees as shipments of fruit were fairly steady. There was no great movement of labour in logging, but the cutting and shipping of Christmas trees continued. Stocks of logs were still very high and the market rather dull. Saw and shingle mills were operating fairly well. Mining was active, but no shortage of labour existed. At Nanaimo, another herring fishing and salting plant had opened, but others had closed down so that no marked change resulted. Factories at Nelson were working full time and with full crews. Building construction was exceptionally quiet, with only small jobs on hand, and shipments of men to relief camps conti-

nued heavy. Longshore work at New Westminster and Victoria was the best that had been reported for some time, due at the latter point to large consignments of Japanese oranges for reshipment. Waterfront work was also fairly plentiful at Vancouver, but at Prince Rupert the docks were quiet, as well as the shipyards, where only a few repair jobs were being done on small crafts. An upward trend was noted in trade, caused, no doubt, by early Christmas shopping. Little change was recorded in the Women's Division. A few orders for domestic help were coming in, but a large number of women were also registering for work.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN OCTOBER, 1934

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on November 1 was 8,978, the employees on their payrolls numbering 937,482 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for October was 1,765, having an aggregate membership of 162,066 persons, 16.2 per

cent of whom were without employment on November 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 65 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 61 cities throughout Canada, showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the Beginning of November as Reported by Employers

According to reports furnished to the Dominion Bureau of Statistics by leading industrial firms throughout the Dominion, employment at the beginning of November showed a continuation of the upward tendency in evidence in the preceding month; the advance, though small, is interesting because it is contrary to the general seasonal movement manifested in the years since 1920, which has involved an average decline of from half a point to a point in the index. The 8,978 firms making returns for November 1, 1934, reported payrolls aggregating 937,482, compared with 934,902 in the preceding month. Reflecting this increase of 2,580 persons, the index rose from 100.0 on October 1, to 100.2 at the beginning of November, as compared

with 91.3 on November 1, 1933. On the same date in the twelve preceding years, the index was as follows: 1932, 84.7; 1931, 103.0; 1930, 112.9; 1929, 124.6; 1928, 118.9; 1927, 108.8; 1926, 104.0; 1925, 98.3; 1924, 94.1; 1923, 100.0; 1922, 97.0 and 1921, 91.3. As already mentioned, a gain at this time of year is unusual, so that the index, after correction for seasonal factors, showed an increase of nearly one point as compared with October 1, 1934.

Particularly important improvement occurred at the beginning of November in logging; the reported increase of 16,247 persons exceeded that noted in any other month of the years since 1920. Coal and metallic ore mining, building construction and trade also afforded greater employment, that in coal mines and

trade being seasonal in character. On the other hand, manufacturing, highway and railway construction, transportation, communications and services showed contractions, as is customary in the autumn. The losses in manufacturing occurred chiefly in food and lumber factories, following the active season for these industries.

A fuller analysis of the situation in the various industries is given at pages .. and ..

### Employment by Economic Areas

The tendency was upward in the Maritime and Prairie Provinces and Quebec, while losses were recorded in Ontario and British Columbia. Employment in all five economic areas was at a higher level than at the beginning of November in 1933.

at the beginning of October. A decline had been indicated on November 1, 1933, and the index then was nearly fifteen points lower than at the latest date, when it was 104.9.

*Quebec.*—Firms in Quebec showed their seventh consecutive monthly increase; this occurred chiefly in logging, which was exceptionally active, while there were also gains in mining, shipping and trade. On the other hand, manufacturing, steam railway transportation, building, highway and railway construction and hotels and restaurants registered curtailment. Within the manufacturing group, the leather, lumber, vegetable food, pulp and paper and textile divisions showed contractions, in some cases of a seasonal character; iron and steel factories, however, recorded

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

**NOTE.**—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

*Maritime Provinces.*—There was a further improvement in the situation in the Maritime Provinces on November 1, 1934; most of the gain took place in logging, but manufacturing (mainly in vegetable food, iron and steel and electric current works), mining, railway transportation and building construction were also brisker. On the other hand, lumber mills, shipping, highway and railway construction released employees, the losses on highway work being most pronounced. Returns were received from 629 employers, with 74,415 workers on their payrolls, or 1,229 more than

heightened activity. The 2,143 co-operating employers enlarged their staffs by 5,338 persons, bringing them to 268,364 on November 1. Employment was in greater volume than on the same date in 1933, when general improvement had also been indicated. The experience of the last thirteen years shows that employment is usually, though not invariably, less on November 1 than on October 1, the average change between the two dates being a decline of rather more than half a point; the increase of two per cent

occurring at the beginning of November, 1934, is therefore of particular interest.

*Ontario.*—Employment in Ontario showed a seasonal decline, which exceeded the average loss indicated in the years since 1920. An advance over the preceding month had been noted on November 1 of last year, but the index then was lower by over twelve points than on the date under review, when it was 103.6. There was improvement on November 1, 1934, in logging metallic ore mines, building construction, hotels and retail and wholesale trade, but manufacturing as a whole, shipping and railway and highway construction released employees; within the manufacturing divisions, the iron and steel, pulp and paper, textile, chemical and electrical apparatus divisions were brisker, while vegetable food, lumber, tobacco and beverage and electric current plants showed losses. A combined working force of 394,909 persons was reported by the 3,952 employers whose data were tabulated, and who had 399,166 on their payrolls in the preceding month.

*Prairie Provinces.*—There was an increase in employment in the Prairie Provinces on November 1, 1934, which was especially interesting in that it was contrary to the usual seasonal movement indicated in the years since 1920. Returns were compiled from 1,329 firms having 121,460 employees, as against 120,228 on October 1, 1934. Coal-mining, logging, manufacturing, railway transportation and building afforded considerably more employment; on the other hand, communications, railway construction, and local transportation and storage showed contractions. The gain in the manufacturing group occurred mainly in animal food and iron and steel plants. The general though moderate expansion in the Prairies contrasts favourably with the decline noted on November 1, 1933, when the index was slightly lower.

*British Columbia.*—A further decrease in employment was recorded in British Columbia; the staffs of the 925 employers furnishing returns aggregated 78,334, compared with 79,296 in the preceding month. The reduc-

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Nov. 1, 1921.....	91.3	102.6	83.4	92.7	101.9	83.7
Nov. 1, 1922.....	97.0	102.9	88.4	101.1	104.3	88.9
Nov. 1, 1923.....	100.0	106.8	98.4	102.2	98.5	91.1
Nov. 1, 1924.....	94.1	93.9	92.6	96.3	93.4	90.6
Nov. 1, 1925.....	98.3	96.0	96.4	99.8	98.4	98.9
Nov. 1, 1926.....	104.0	97.2	105.4	103.7	106.9	102.9
Nov. 1, 1927.....	108.8	100.1	110.2	109.8	110.7	104.2
Nov. 1, 1928.....	118.9	109.5	114.8	121.1	128.6	112.1
Nov. 1, 1929.....	124.6	124.6	122.8	126.5	129.5	113.9
Nov. 1, 1930.....	112.9	110.1	111.9	111.6	125.8	105.4
Nov. 1, 1931.....	103.0	116.6	96.2	98.1	128.2	98.9
Nov. 1, 1932.....	84.7	86.8	83.6	84.2	91.6	77.8

June 1.....	96.6	98.4	90.9	104.4	89.5	89.1
July 1.....	101.0	100.4	94.1	109.9	94.1	94.1
Aug. 1.....	99.9	101.3	94.9	106.0	93.0	97.6
Sept. 1.....	98.8	101.8	95.4	103.3	92.9	96.2
Oct. 1.....	100.0	103.1	96.0	104.8	95.7	95.4
Nov. 1.....	100.2	104.9	98.0	103.6	96.5	94.1
Relative Weight of Employment by Economic Areas as at Nov. 1, 1934.....	100.0	7.9	28.6	42.1	13.0	8.4

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated areas to the total number of all employees reported in Canada by the firms making returns for the date under review.

tion occurred almost wholly in manufacturing, there being important seasonal losses in food factories, together with a large contraction in iron and steel. Transportation and railway construction also showed a decline. On the other hand, highway construction was decidedly more active. Employment was brisker than on November 1 of last year, when greater shrinkage had been noted; the index then stood at 84.0, as compared with 94.1 at the latest date.

Table I gives index numbers by economic areas.

### Employment by Cities

Additions to staffs were registered in Montreal, Toronto and Hamilton, while in Quebec City, Ottawa, Windsor and the adjacent Border Cities, Winnipeg and Vancouver there were reductions. With only one exception, the general situation in all these centres was better than that indicated by the firms reporting for November 1, 1933; in the Border Cities, the index was fractionally lower than on the same date of last year.

*Montreal.*—Further improvement occurred in Montreal on November 1, when 329 persons were added to the staffs of the 1,248 co-operating firms, who employed 129,857. Manufactures showed reduced activity, while there were gains in transportation, construction and trade. Within the manufacturing group, there was curtailment in textile, leather and non-ferrous metal factories, but iron and steel plants reported an advance. A large decline had been noted on November 1, 1933, and the index was then slightly lower.

*Quebec City.*—Employment showed a small falling-off in Quebec, according to 161 employers of 12,653 persons, compared with 12,747 on October 1. Manufacturing indicated most of the contraction, while transportation recorded improvement; within the manufacturing group, the largest decrease occurred in leather and electric current plants. Employment as reported by employers was in greater volume than on the same date of last year, when the indicated losses had been on a much larger scale.

TABLE II.—INDEX NUMBERS OF EMPLOYMENT BY PRINCIPAL CITIES

(AVERAGE CALENDAR YEAR 1926=100)

—	Montreal	Quebec	Toronto	Ottawa	Hamilton	Windsor	Winnipeg	Vancouver

Relative Weight of Employment by Cities as at Nov. 1, 1934.....	13.9	1.4	12.5	1.3	2.9	1.1	3.9	3.0

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

*Toronto.*—There was a further increase in the number of workers on the payrolls of 1,320 firms in Toronto, who had 117,541 persons in their employ, or 868 more than in the preceding month. Most of the expansion took place in manufacturing (notably in printing and publishing, chemical and electrical apparatus plants), and in building construction, services and trade. A rather smaller gain had been registered at the beginning of November of a year ago, and the index was then lower by nearly six points.

*Ottawa.*—In Ottawa, curtailment was shown in transportation, and manufacturing was also rather slacker; the changes in the other groups were slight. The 163 employers furnishing data reported 12,630 workers, as against 12,903 on October 1. Employment was in slightly better volume than on the same date in 1933, when improvement had been indicated.

*Hamilton.*—Employment in Hamilton increased substantially on November 1, when

the 265 co-operating firms employed 27,551 persons, or 531 more than at the beginning of October. Manufacturing was decidedly brisker, chiefly in the iron and steel, textile and electrical apparatus group, while clay, glass and stone products employed fewer persons. A larger gain had been reported on November 1 of last year; the index then was nearly seven points lower.

*Windsor and the adjacent Border Cities.*—Activity in the Border Cities showed a further pronounced reduction; 156 employers reported 10,253 persons on their payrolls, compared with 11,681 at the beginning of October. The contraction took place largely in the automobile and related industries. A decrease had been indicated on the same date of a year ago, when employment was at practically the same level.

*Winnipeg.*—Employment in Winnipeg showed little general change, according to 442 firms employing 36,702 workers at the beginning of November, as compared with

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES

(AVERAGE CALENDAR YEAR 1926=100)

	All industries	Manu- facturing	Logging	Mining	Commu- nications	Trans- portation	Con- struction	Services	Trade

Relative Weight of Employ- ment by Industries as at Nov. 1, 1934.....	100.0	49.6	5.1	5.9	2.2	10.6	13.9	2.6	10.1

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

36,767 in their last report. Manufacturing, services and trade reported slight advances, but transportation and construction released help. A greater falling-off had been recorded on November 1, 1933, when employment was in lesser volume.

*Vancouver.*—There was a downward movement in Vancouver, where 390 employers had 28,109 persons on their staffs, or 408 fewer than in the preceding month. Manufacturing and transportation showed declines, while trade was rather brisker. Employment was more active than at the beginning of November of last year, when curtailment had also been reported.

Index numbers by cities are given in Table II.

### Employment by Manufacturing Industries

For the first time since the beginning of January, there was a reduction in employ-

ment in manufactures, this being of a seasonal nature. Very large declines occurred in vegetable food factories, a reaction from an exceptionally active season; lumber mills also showed important seasonal curtailment, and animal food, leather, tobacco and beverage, non-ferrous metal, non-metallic mineral and electric current plants were slacker. On the other hand, musical instrument, pulp and paper, textile, chemical, electrical apparatus and iron and steel factories registered advances. The gains in iron and steel, though not large, are particularly interesting, because from 1924 to 1932, the trend on November 1 was uniformly unfavourable, while the contra-seasonal gain indicated on November 1, 1933, was rather smaller. The 5,331 co-operating manufacturers reported 465,123 operatives, as against 473,063 at the beginning of October. This decline involved more workers than that shown on November 1 of 1933, but approximated the

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	Nov. 1 1934	Oct. 1 1934	Nov. 1 1933	Nov. 1 1932	Nov. 1 1931	Nov. 1 1930	Nov. 1 1929

Miscellaneous.....	.6	120.9	121.7	103.7	101.0	105.8	113.2	113.7

'The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

average indicated in the years since 1920, so that the index, after correction for seasonal influences, remained the same as in the preceding month.

A brief review of the course of employment in manufacturing during the elapsed months of 1934 shows uninterrupted improvement from January 1 to October 1. During this period, the index advanced from 80.0 at the former to 94.4 at the latter date, or by 18 per cent; the contraction recorded at November 1 reduced the percentage gain to 16.0, but this represented a decided betterment in the intervening months. The index on the date under review (92.8) was 6.3 points, or over seven per cent higher than on November 1, 1933, when the reported decreases had involved the release of a smaller number of workers.

*Animal Products—Edible.*—Meat preserving plants reported slightly increased activity, but curtailment in dairies and fish canneries caused a reduction in the group as a whole. Statistics were received from 257 manufacturers, employing 20,806 persons, as compared with 21,131 in the preceding month. This contraction, which took place chiefly in British Columbia, was much smaller than that registered on the corresponding date last year, when activity was generally at a lower level.

*Leather and Products.*—There was a falling-off in employment in this group on November 1, mainly in boot and shoe factories in Quebec. The 262 firms furnishing data reported 19,481 workers, as against 20,276 on October 1. The index was practically the same as on the same date in 1933, when a similar decline had been noted.

*Lumber and Products.*—Further seasonal contractions, involving a larger number of employees than in the autumn of last year, were indicated in the lumber group, in which employment was in greater volume than in November, 1933. The losses on the date under review took place principally in rough and dressed lumber mills, while furniture and other wood-using works showed moderate improvement. A combined working force of 35,516 persons was reported by the 789 co-operating manufacturers, as compared with 37,607 at the beginning of October. The most pronounced decreases were in Quebec and Ontario, while a slightly upward tendency was in evidence in British Columbia.

*Musical Instruments.*—An increase in staffs was indicated in musical instrument factories, 35 of which employed 1,575 workers, or 138 more than on October 1. Employment was in better volume than at the beginning of

November, 1933, although a larger advance had then been made.

*Plant Products—Edible.*—Fruit and vegetable canneries reported very marked seasonal reductions in their payrolls, while sugar and syrup and chocolate and confectionery factories showed an advance. The forces of the 444 co-operating firms aggregated 32,959 persons, or 5,784 fewer than in their last return. Employment declined in Quebec, Ontario and British Columbia, while improvement occurred in the Maritime and Prairie Provinces. The curtailment, on the whole, involved many more workers than that registered on the corresponding date last year, when the index number was slightly higher than on the date under review.

*Pulp and Paper Products.*—There was a moderate increase in the staffs reported by employers in this group, 576 of whom had 57,668 workers on their payrolls, as compared with 57,500 at the beginning of October. Improvement was recorded in printing and publishing houses, while pulp and paper mills were rather slacker. The tendency was favourable in Ontario, but there were declines in Quebec. Larger gains had been indicated at the beginning of November a year ago; the index was then over six points lower.

*Rubber Products.*—Employment in rubber goods showed little general change on November 1; data were compiled from 50 firms with 11,685 employees, as against 11,711 in their last report. Employment was at a higher level than on November 1, 1933, when an advance had been noted.

*Textile Products.*—Hosiery and knitting, silk and woollen and miscellaneous textile factories reported heightened activity, but the production of garments and personal furnishings and headwear showed a falling-off; 927 textile manufacturers enlarged their payrolls from 93,012 on October 1 to 93,401 on the date under review. The increases took place chiefly in Ontario, while the tendency in Quebec was unfavourable. A larger gain had been shown at the beginning of November last year, when the index was several points lower.

*Tobacco, Distilled and Malt Liquors.*—There was a decline in employment in tobacco and beverage factories, according to the 163 establishments furnishing statistics in this group, which employed 14,457 persons, as compared with 15,000 on October 1. Most of the shrinkage occurred in Ontario. A minor reduction had been indicated on the corresponding date last year, when employment was in better volume.

*Chemicals and Allied Products.*—A considerable gain was recorded in this group, in which statements were furnished by 174 plants employing 9,627 persons, or 365 more than in their last report. Activity was decidedly greater than in the autumn of 1933, when the tendency had also been upward.

*Clay, Glass and Stone Products.*—A slight seasonal falling-off was noted in building material plants, chiefly in Quebec and Ontario, while improvement occurred in the Prairie Provinces; employment generally was at a higher level than on November 1, 1933, when more extensive losses had taken place. The forces of the 191 employers from whom information was received, declined by 60 persons to 8,100 at the beginning of November, 1934.

*Electric Current.*—Employment in the production of electric current showed a contraction, 178 workers being released from the forces of the 97 co-operating manufacturers, who employed 14,620 persons. Larger declines had been indicated in this industry on November 1 of last year, when the index was some seven points lower.

*Electrical Appliances.*—Considerable improvement was reported in electrical apparatus works, 109 of which had 12,211 employees, or 309 more than in their last return. Little general change had occurred on the same date in 1933, and employment was then in decidedly smaller volume.

*Iron and Steel Products.*—The crude, rolled and forged, machinery and agricultural implement divisions showed increased activity over the preceding month, while the land vehicle, shipbuilding, foundry and machine shop and some other groups of the iron and steel industry registered curtailment. The result was an increase in employment, which is especially interesting in that it is contrary to the usual seasonal trend indicated on November 1 in the last thirteen years. Statements were received from 822 manufacturers whose payrolls aggregated 94,068 persons, as compared with 93,261 in the preceding month. Employment advanced in all provinces except British Columbia. Improvement on a smaller scale had been indicated at the beginning of November last year, and employment then was quieter than on the date under review.

*Non-ferrous Metal Products.*—Data tabulated from 148 firms in the non-ferrous metal group showed that they employed 17,627 workers, or 133 fewer than on October 1. There was an increase in the aluminum and precious metal divisions, but the smelting and refining and base metal works reported a falling-off. Employment was decidedly brisker

than on the same date of 1933, although large additions to the personnel had then been indicated.

*Non-metallic Mineral Products.*—There was a decline in employment in non-metallic mineral product factories, 121 of which released 194 persons, bringing their staffs to 13,567 at the beginning of November. The index was higher than on November 1 of last year, when only a slight reduction had been noted.

### Logging

Statistics were tabulated from 290 firms employing 47,549 men, or 16,247 more than in the preceding month. This advance was the largest ever indicated since the record was commenced in 1920. Employment on November 1, 1934, was more active than in any other month since March, 1930 (with the single exception of February 1, 1934), while the index was only once exceeded in the autumns for which statistics are available, that for November 1, 1929, having been very slightly higher. The greatest increases on the date under review occurred in Quebec, although all five economic areas shared in the improvement over October 1, 1934.

### Mining

Coal-mining and the extraction of metallic ores afforded much more employment, while quarries and other non-metallic mineral mines were rather slacker. Statements were compiled from 308 mine operators, with 55,365 employees, or 1,510 more than in their last report. Of the total employees recorded on the date under review, 25,376 belong in the coal-mining, 24,182 in the metallic ore and 5,807 in the non-metallic mineral group. A larger gain, on the whole, had been indicated on the same date in 1933, but the index then was below its level at the time of writing.

### Communications

Telephones and telegraphs showed a moderate seasonal contraction in employment; the companies and branches making returns had 21,362 workers on their payrolls, a loss of 173 since October 1. The index of employment was fractionally lower than on November 1, 1933, when a larger falling-off had been noted.

### Transportation

*Street Railways and Cartage.*—There was a reduction in activity in local transportation, according to 197 firms whose staffs aggregated 24,773 at the beginning of November, as compared with 25,157 in the preceding month. The decline occurred chiefly in the Prairie Provinces. Employment was at much the

same level as at the corresponding date in 1933, when similar losses were reported.

*Steam Railways.*—Statistics were tabulated from 99 divisional superintendents and other employers in the railway operation group, whose payrolls were slightly increased by 29 persons, to 59,701 on November 1. Reductions in Quebec and British Columbia were rather more than offset by gains in the remaining provinces. Employment was brisker than at the beginning of November, 1933, when a considerable contraction had been indicated.

*Shipping and Stevedoring.*—A decrease was noted in water transportation, 97 companies employing 14,696 workers, as compared with 15,351 in the preceding month. There was a falling off in the Maritime Provinces, Ontario and British Columbia, with improvement in Quebec. Similar curtailment, on the whole, had been shown on November 1 last year, when the index stood at 90.5, compared with 88.3 on the date under review.

### Construction

*Building.*—There was a considerable increase in building, 983 persons being added to the forces of the 669 co-operating contractors, who had 24,547 employees, a number substantially in excess of that reported by the firms making returns at the beginning of November, 1933; a small loss had then been experienced. The greatest gains on the date under review took place in Ontario and the Prairie Provinces, while the tendency was also favourable in the Maritime Provinces and British Columbia.

*Highway.*—Work on highways and streets generally decreased to some extent, in spite of an advance in British Columbia. Contractions in this group are usually indicated during the autumn. The index, at 214.0 at the beginning of November, was higher than on the same date of 1933, when much smaller losses were reported. Statements were tabulated from 343 employers, whose staffs, standing at 79,034, were smaller by 2,945 persons than on October 1, 1934.

## (2) Unemployment in Trade Unions at the Close of October, 1934

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions which are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation

*Railways.*—Seasonal curtailment of railway construction work was recorded in all economic areas, the most marked reductions occurring in Quebec and Ontario. The forces of the 36 companies and divisional superintendents furnishing returns declined from 31,491 persons on October 1, to 26,588 at the beginning of November. This shrinkage was on a much larger scale than that registered on the corresponding date in 1933, but the level of employment then was slightly lower.

### Services

Hotels and restaurants were seasonally quiet, while the fluctuations in other branches of services were slight, according to 437 firms employing 24,312 persons, or 364 fewer than at the beginning of October. The index, at 114.9, was seven points higher than that of November 1, 1933, when only small changes had been indicated on the whole.

### Trade

The trend of employment in trade was again upward, 1,175 workers being added to the forces of the 1,086 retail and wholesale establishments furnishing returns, whose staffs aggregated 94,432. The advance took place mainly in the retail division, but wholesale houses also showed considerable improvement. The index stood at 121.3, compared with 115.6 on November 1, 1933, when the reported gains had been on a smaller scale. Further pronounced expansion in employment may be expected during the next few weeks, in preparation for the Christmas and holiday trade.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on the date under review.

in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The present article on unemployment among local trade unions deals with the situation as at the end of October and is based on the returns received from 1,765 labour organizations with a total membership of 162,066 persons. For all occupations

reporting 26,291 members, or a percentage of 16.2, were without work on the last day of the month as compared with 16.4 per cent of inactivity in September. Improvement on a larger scale was reflected from October, 1933, when the percentage of unemployment stood at 19.8. Alberta unions with a gain in the employment volume afforded of moderate proportions, showed the greatest change from September. The determining factor in this better trend was the more favourable conditions obtaining for coal miners. In Nova Scotia increased activity, of somewhat lesser degree, was registered, employment tending upward in the majority of trades and industries. The situation in Ontario and Manitoba

Island. Montreal and Vancouver unions reported the greatest percentages of unemployment during October of any of the cities used for comparison, which were but slightly in excess of those recorded at the close of September. In Regina also, the tendency was adverse though the change from September was quite small. Edmonton unions, however, registered a substantial rise in employment from the previous month, and at Halifax and Toronto noteworthy gains occurred. From Saint John and Winnipeg the improvement recorded was slight. In making a comparison with the returns for October last year in these cities Halifax members were decidedly better engaged during the month reviewed,

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

was but nominally improved from September. On the contrary, British Columbia, Quebec, Saskatchewan and New Brunswick unions all reported a slight falling off in available work, which in the last two provinces named was less than one per cent. Employment expansion was indicated in each province when compared with October, 1933, which was most pronounced in Nova Scotia, Manitoba and Alberta, and of rather general distribution throughout the various occupations. In New Brunswick, Quebec, Ontario, and Saskatchewan fair-sized gains occurred, British Columbia showing but a slightly higher employment level than in October last year.

A separate tabulation is made each month of unemployment in the largest city in each province with the exception of Prince Edward

and marked employment recovery was shown by Saint John unions. Noteworthy advances in work available were manifest also, by Montreal and Winnipeg unions from October a year ago, Toronto, Regina and Edmonton recording increased activity of lesser degree. Vancouver unions alone, reported a lessening of the employment volume during the month reviewed, which was but fractional.

From the chart which accompanies this article and traces the curve of unemployment by months from January, 1928, to date, it will be noticed that there has been little change in the level of the curve since the close of August, though the trend has been consistently downward and indicative of a slightly increased volume of work. At the close of October, the level attained by the

curve was below that of the corresponding month of last year, reflecting employment recovery during the month reviewed.

The manufacturing industries during October, continued in the less favourable movement shown in September, though the change was slight, unemployment standing at 16.7 in comparison with a percentage of 16.0 at the close of September. The percentage for the

Oct., 1934.....	4.7	6.7	22.2	16.5	13.9	9.7	11.0	19.9	16.2

month under review was based on the reports furnished by 481 local unions, embracing a membership of 51,844 persons. Conditions, however, were more favourable than in October of last year when 20.9 per cent of the membership reported was out of work. Garment and brewery workers, general labourers, bakers and confectioners, and meat cutters and butchers all registered heightened activity, on a small scale, from September. Among textile workers considerable curtailment of activity was evident, while declines, of much lesser degree, were shown by cigar makers, papermakers, glass, iron and steel, hat, cap and leather workers, and metal polishers. Printing tradesmen, wood and fur workers, however, indicated an unchanged employment volume from September. The majority of trades contributed to the total increase in employment shown in the manufacturing industries from October, 1933, leather workers and metal polishers recording the largest percentage gains, though the improvement noted in the iron and steel trades influenced the situation in the group as a whole, to the greatest extent, as their membership was quite substantial. Employment advances of lesser importance were registered by brewery, wood, and hat and cap workers, papermakers and printing tradesmen, general labourers, cigar makers, bakers and confectioners, and meat cutters and butchers. Conditions for garment workers, however, were much quieter than in October last year, and among glass and textile workers declines in activity were reported. Fur workers registered the same percentage of idleness in both months under comparison.

In the coal mining industry there was a considerable increase in activity during October from the previous month as manifest by the returns received from 53 organizations with a combined membership of 16,293 persons. Of these, 876 or 5.4 per cent were without work at the end of the month in contrast with 11.5 per cent in September. Employment was also at a higher level than in October last year when 8.1 per cent of the members reported were idle. The bulk of the expansion from September was reflected in the Alberta mines which absorbed a considerably greater number of workers, though in Nova Scotia also there was some slight gain. In British Columbia mines there was little change in conditions, the tendency, however, being toward retarded activity. Nova Scotia, Alberta and British Columbia miners all shared in the better employment movement from October, 1933, British Columbia unions indicating advances of around 5 per cent and the other provinces improvement of lesser degree.

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

Month	Fishing	Lumbering and Logging	Mining	Manufacturing Industries	Vegetable products	Pulp and paper products	Pulp and paper products	Printing, publishing and mill workers	Electric current	Wood products	Fibres, textiles and textile workers	Garment workers	Hat, cap and glove makers	Animal products	Iron and its products	Non-ferrous metals	Clay, glass and stone products	Mineral products	Miscellaneous industries	Building and construction	Transportation	Shipping and stevedoring	Steam railway operation	Local transportation	Communication	Telegraph operation	Telephone operation	Trade (retail shop clerks)	Services	Governmental	Miscellaneous	All occupations

The building and construction trades registered slight employment losses during October from the preceding month though conditions were considerably better than in October, 1933. This was evident from the reports tabulated from 208 associations of these tradesmen, covering 16,482 members, 9,087 or a percentage of 55.1 of whom were without work on the last day of the month compared with percentages of 53.9 in September and 65.4 in October last year. Activity for bridge and structural iron workers showed a substantial rise from September, bricklayers, masons and plasterers indicating moderate employment advancement, and steam shovelmen gains of less than one per cent. Among electrical workers there was a sharp drop in the employment volume afforded from September and considerable curtailment was evident among tile layers, lathers and roofers. The declines shown by granite and stonecutters were also noteworthy. Among carpenters and joiners, painters, decorators and paperhangers, and plumbers and steamfitters, however, only slight recessions were indicated. The percentage of unemployment for hod carriers and building labourers remained the same as in the previous month. Compared with the situation in the building and construction trades during October, 1933, bricklayers, masons and plasterers, painters, decorators and paperhangers, and bridge and structural iron workers were all afforded a much greater volume of work during the month under survey, and employment for carpenters and joiners, steam shovelmen, granite and stonecutters, and hod carriers and building labourers was also considerably improved. Moderate curtailment of activity, however, was reported by electrical workers, plumbers and steamfitters, and tile layers, lathers and roofers.

In the transportation industries there was a tendency toward a lessening of the employment volume during October from the previous month, though the change was quite slight, as manifest by the returns tabulated from 778 unions covering 54,079 members. Of these, 4,909 or a percentage of 9.1 were idle at the end of the month compared with 8.1 per cent in September. This slight drop in activity from September was confined to the steam railway division which constituted nearly 79 per cent of the entire group membership reported. Among navigation workers there was some improvement from September, though conditions still remained slack, while street and electric railway employees and teamsters and chauffeurs showed no variation in the employment volume available. The transportation industries, as a whole, reflected a higher level of activity than in

October, 1933, when 12.6 per cent of unemployment was recorded, steam railway employees showing the most noteworthy gains, though navigation workers, and street and electric railway employees also participated in this upward employment movement. Among teamsters and chauffeurs, however, there was no change in the situation from October a year ago.

The 5 unions of retail clerks making returns in October with an aggregate of 1,813 members showed that 199 were out of work at the end of the month, a percentage of 11.0 in contrast with 11.9 per cent in September. Activity was considerably retarded from October last year when only 0.5 per cent of the members reported were idle.

Civic employees were slightly busier during October than in the preceding month as manifest by the returns compiled from 76 associations, including a membership of 7,845 persons. Of these, 185 or a percentage of 2.4, were without work on the last day of the month compared with 3.2 per cent of inactivity in September. Conditions, however, were not quite so active as in October, 1933, when 1.6 per cent of unemployment was recorded.

From the miscellaneous group of trades 114 reports were received during October, embracing 3,701 members, 561 of whom were idle at the end of the month, a percentage of 15.2 compared with 14.6 per cent in September. Employment advances on a small scale, however, were noted from October, 1933, when 17.2 per cent of idleness was recorded. Hotel and restaurant employees registered a large increase in slackness from September, and nominal declines occurred among barbers. Conditions for stationary engineers and firemen, however, were moderately better than in September, theatre and stage employees, and unclassified workers showing slight gains. Compared with the returns for October, 1933, stationary engineers and firemen, theatre and stage employees, and unclassified workers all reported a higher employment volume during the month reviewed, which was in part offset by the curtailment evident among hotel and restaurant employees and barbers.

Fishermen with 3 unions comprising a membership of 297 persons showed that 72.4 per cent were unemployed on the last day of the month contrasted with percentages of 44.4 in September and 24.8 in October, 1933.

Activity for lumber workers and loggers eased off very slightly during October, unemployment standing at 45.6 per cent as compared with a percentage of 44.7 at the close of September. The percentage for October was based on the reports tabulated

from 5 unions with a combined membership of 1,250 persons. Extensive employment losses were registered from October of last year when 24.3 per cent of the membership reported were unemployed.

Table I shows by provinces the percentage of members who were on an average unemployed

each year from 1919 to 1933 inclusive, and also the percentage of unemployment by provinces for October of each year from 1919 to 1931 inclusive, and for each month from January, 1932, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for October, 1934

During the month of October, 1934, reports from the offices of the Employment Service of Canada showed gains in the average daily placements effected of 3 per cent and 2 per cent, respectively, over those of the preceding month and also the corresponding period last year. In comparison with September, 1934, all industrial divisions, except mining and trade, showed gains, the highest being in construction and maintenance and services, and

Employment Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curve of vacancies and of placements in relation to applications showed a sharp upward trend during the first half of the month, followed by an abrupt decline during the latter half of the period under review, but at the end of October each level was slightly above that attained at the close of the corresponding

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements ○-○-○-○-○-○

the losses recorded, nominal only. When compared with October, 1933, all sections, with one exception, again recorded more placements, but the substantial decline registered in the highway division of construction and maintenance materially offset the increases reported in all remaining groups, the largest of which were in logging, services and farming.

The accompanying chart shows the trend of employment since January, 1932, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the

month a year ago. The ratio of vacancies to each 100 applications was 58.3 during the first half and 53.1 during the second half of October, 1934, in contrast with ratios of 45.7 and 52.2 during the corresponding periods of 1933. The ratios of placements to each 100 applications during the periods under review were 54.7 and 50.7 as compared with 43.9 and 49.3 in the corresponding month of 1933.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during October, 1934, was 1,383, as compared with 1,348 during the

preceding month and with 1,347 in October a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,491, in comparison with 2,414 in September, 1934, and with 2,733 during October last year.

The average number of placements made daily by the offices of the Service during October, 1934, was 1,310, of which 802 were in regular employment and 508 in work of one week's duration or less, as compared with a total daily average of 1,269 during the preceding month. Placements in October a year ago averaged 1,281 daily, consisting of 628 in regular and 653 in casual employment.

During the month of October, 1934, the offices of the Employment Service referred 36,307 persons to vacancies and effected a total of 34,052 placements. Of these the placements in regular employment were 20,858, of which 16,218 were of men and 4,640 of women, while placements in casual work totalled 13,194. The number of vacancies reported by employers was 26,610 for men and 9,344 for women, a total of 35,954, while applications for work numbered 64,745, of which 48,884 were from men and 15,861 from women. Reports for September, 1934, showed 32,350 positions available, 57,916 applications made, and 30,441 placements effected, while in October, 1933, there were recorded 33,659 vacancies, 68,310 applications for work, and 32,015 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service, each year, from January, 1924, to date:—

Year	Placements		
	Regular	Casual	Totals
1924.....	247,425	118,707	366,132
1925.....	306,804	106,021	412,825
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328
1929.....	260,747	137,620	398,367
1930.....	187,872	180,807	368,679
1931.....	175,632	295,876	471,508
1932.....	153,771	198,443	352,214
1933.....	170,576	181,521	352,097
1934 (10 months).....	189,588	151,801	341,389

#### NOVA SCOTIA

There was a gain of over 30 per cent in the number of positions offered through Employment Offices in Nova Scotia during October when compared with the preceding month and of over 12 per cent in comparison with the corresponding month of last year. Placements also were over 35 per cent higher than in September and nearly 8 per cent

above October, 1933. Increased placements in the highway division of construction and maintenance were mainly responsible for the gain over October of last year, although logging also showed improvement. The only decline of importance was in services. Placements by industrial divisions included: logging, 65; construction and maintenance, 893; and services, 298, of which 238 were of household workers. There were 462 men and 92 women placed in regular employment during the month.

#### NEW BRUNSWICK

During the month of October positions offered through the Employment Offices in New Brunswick were nearly 8 per cent higher than in the preceding month and nearly 2 per cent above the corresponding month of last year. There was an increase of over 5 per cent in placements when compared with September and a nominal decline only in comparison with October, 1933. There was a large reduction in placements on highway construction when compared with October of last year, but this loss was offset by gains in building and other construction, services and manufacturing. Placements by industrial divisions included: manufacturing, 29; construction and maintenance, 285; and services, 616, of which 408 were of household workers. Placements in regular employment numbered 289 of men and 77 of women.

#### QUEBEC

Orders received at Employment Offices in the Province of Quebec called for over 11 per cent more workers than in the preceding month and 88 per cent more than during the corresponding month of last year. There was a gain also in placements of nearly 17 per cent when compared with September and of over 107 per cent in comparison with October, 1933. All industrial divisions, except manufacturing, in which there was a small decline only, participated in the increase in placements over October of last year, the largest gains being in logging, construction and maintenance and services. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 109; logging, 1,845; construction and maintenance, 1,150; trade, 120; and services, 2,514, of which 2,095 were of household workers. There were 3,483 men and 1,664 women placed in regular employment during the month.

#### ONTARIO

Opportunities for employment, as indicated by orders received at Employment Offices in Ontario during October, were over 6 per cent

\*35 placements effected by offices since closed.

better than in the preceding month, but 8 per cent less favourable than during the corresponding month of last year. There was a gain of nearly 6 per cent in placements when compared with September, but a decline of nearly 9 per cent in comparison with October, 1933. The employment of fewer workers in the highway division of construction and maintenance accounted for the decrease in placements from October of last year. The loss in this group, however, was offset in part by gains in services, farming, transportation and mining. Small changes only were reported in all other groups. Placements by industrial divisions included: manufacturing, 517; logging, 1,028; farming, 1,082; mining, 119; transportation, 277; construction and maintenance, 5,632; trade, 301; and services, 3,816, of which 2,051 were of household workers. During the month 3,996 men and 1,509 women were placed in regular employment.

#### MANITOBA

Positions offered through Employment Offices in Manitoba during October were 11 per cent higher than in the preceding month, but showed a fractional decline when compared with the corresponding month of last year. There was a gain of over 14 per cent in placements when compared with September, but a loss of nearly 4 per cent in comparison with October, 1933. The decline in placements from October of last year was due to less workers being sent to employment on highway construction, as all other groups showed improvement or nominal losses only. The largest gains were in logging and farming. Placements by industrial divisions included: logging, 251; farming, 662; construction and maintenance, 1,457; trade, 49; and services, 730, of which 604 were of household workers. There were 2,033 men and 345 women placed in regular employment during the month.

#### SASKATCHEWAN

Employment opportunities, as indicated by orders received at Employment Offices in Saskatchewan during October, were nearly 4 per cent better than in the preceding month and nearly 12 per cent above the corresponding month of last year. Placements also were nearly 1 per cent higher than in September and over 11 per cent above October, 1933. The only gain of importance over October of last year was in highway construction, and the largest loss in farming. Most of the remaining groups showed improvement. Placements by industrial divisions included: manufacturing, 37; farming, 624; mining, 97; construction and maintenance, 900; trade, 54;

and services, 798, of which 562 were of household workers. Regular employment was secured for 1,333 men and 383 women.

#### ALBERTA

Orders received at Alberta Employment Offices during the month of October called for over 27 per cent more workers than in the preceding month and nearly 13 per cent more than during the corresponding month of last year. Similar percentages of gain were reported in placements under both comparisons. Farming placements were considerably higher than during October, 1933, but this increase was partly offset by a large reduction in the number of workers sent to employment on highway construction. Small changes were reported in all other groups. Industrial divisions in which most of the placements were effected during the month were: farming, 1,429; mining, 92; construction and maintenance, 1,433; and services, 512, of which 412 were of household workers. During the month 2,567 men and 311 women were placed in regular employment.

#### BRITISH COLUMBIA

There was a gain of nearly 18 per cent in the number of positions offered through Employment Offices in British Columbia during October when compared with the preceding month, but a decline of nearly 8 per cent in comparison with the corresponding month of last year. Placements were nearly 17 per cent higher than in September, but nearly 8 per cent less than during October, 1933. All groups, except transportation and services, participated in the reduction in placements from October of last year. The only decline of importance, however, was in construction and maintenance. Placements by industrial divisions included: logging, 33; farming, 63; construction and maintenance, 3,147; and services, 617, of which 440 were of household workers. There were 2,055 men and 259 women placed in regular employment during the month.

#### Movement of Labour

During the month of October, 1934, the offices of the Employment Service of Canada made 20,858 placements in regular employment, 9,362 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter, 734 were granted the Employment Service reduced transportation rate, 461 going to centres within the same province as the despatching office and 273 to other provinces. The reduced transportation rate, which is 2.7 cents per

mile with a minimum fare of \$4, is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Transfers at the reduced rate in Quebec during October were 213 in number and effected by the Hull Office, which was instrumental in the despatch of 166 bushmen to Sudbury and 47 bushmen to Pembroke. Business transacted by Ontario Offices during October involved the issue of 401 reduced rate certificates, 399 of which were to provincial points and 2 outside the province. Provincially from Port Arthur 140 bushmen, 78 mine workers, 8 highway construction workers, 6 restaurant employees and 6 electric power employees were sent to points within the same zone, Sudbury transferring 102 bush workers and one mine worker, and Fort William 48 bush workers and 5 mine workers to points within their respective zones. The Port Arthur zone was also the destination of one paper mill worker journeying from St. Catharines, and the Fort William zone of one mine worker transferred from Timmins. Travelling from Hamilton one pattern maker went to Windsor, while from North Bay one carpenter and one filer were carried at the reduced rate to Timmins. The two interprovincial transfers were of carpenters despatched by the Sudbury Office to Rouyn. In Manitoba, 64 certificates for reduced transportation were granted during October, 6 of which were provincial and 58 for points in other provinces. The former were issued at Winnipeg to 4 farm hands, one mine carpenter and one bushman going to employment within the territory covered by that zone office. The movement outside the province was also from

Winnipeg, 51 bushmen, 2 farm hands, 2 hotel workers and one club janitor travelling to points in the Port Arthur zone, one farm hand to Yorkton and one restaurant cook to Prince Albert. Profiting by the reduced rate in Saskatchewan during October 4 persons were conveyed to situations within the province, the Prince Albert office despatching one teamster and one cook, the Regina office one teacher, and the Saskatoon office one bushman within their respective zones. The Alberta labour movement during October was entirely provincial and included the transfer of 38 workers. All of these secured their certificates for reduced transportation at Edmonton, from which centre one farm hand was conveyed to Medicine Hat and 12 bushmen, 8 mine workers, 7 highway construction workers, 3 farm hands, one carpenter, one housekeeper, 3 cooks, one edger man and one cookee to employment within the Edmonton zone. Workers transported at the Employment Service reduced transportation rate in British Columbia during October were 14 in number, these going to provincial employment. From Prince Rupert 4 bushmen and one carpenter were sent to employment within the same zone, while from Vancouver 2 sawmill workers and 2 cooks went to Kamloops, one hotel employee to Nelson and 3 miners and one hotel cook to centres within the Vancouver zone.

Of the 734 workers who were carried at the Employment Service reduced transportation rate during October 367 journeyed over the Canadian National Railways, 361 over the Canadian Pacific Railway, 4 over the Pacific Great Eastern Railway and 2 over the Temiskaming and Northern Ontario Railway.

#### (4) Building Permits issued in Canada during October

The estimated value of the building authorized by 61 cities during October was \$2,721,919; this was an increase of \$474,135 or 21.1 per cent, as compared with the September total of \$2,247,784, and of \$946,867 or 53.3 per cent, as compared with the aggregate of \$1,775,052 for October, 1933. The value of the building permits issued in the first ten months of 1934 amounted to \$21,745,919, an increase of \$3,576,853 over the total for the same period in 1933; however, the aggregate was lower than in earlier years of the record.

Some 50 cities furnished detailed statistics, showing that they had issued nearly 350 permits for dwellings estimated to cost approximately \$630,000, and about 2,300 permits for other buildings valued at almost

\$1,565,000. During September, authority was granted for the erection of about 135 dwellings and 1,750 other buildings, the estimated cost being approximately \$480,000 and \$1,375,000, respectively.

Nova Scotia, Ontario, Manitoba, Saskatchewan and Alberta recorded increases in the value of authorized building as compared with September, 1934, that of \$362,436 or 31.6 per cent in Ontario being greatest. The decreases in the remaining provinces in this comparison were slight, New Brunswick showing the largest decline of \$4,097 or 15.2 per cent.

In comparison with October, 1933, there was improvement in all provinces except Prince Edward Island, from which no statement was received for the month under

review. Ontario reported the most pronounced increases, amounting to \$789,970 or 109.6 per cent.

Montreal showed a decrease as compared with September, 1934, and also with October, 1933; in Vancouver, there was a decline as compared with September, 1934, but an improvement over October, 1933, while Toronto and Winnipeg recorded increases in both comparisons. Of the other centres, Halifax, Fredericton, Quebec City, Three Rivers, Westmount, Belleville, Chatham, Kitchener, Niagara Falls, Oshawa, Ottawa, Peterborough, Port Arthur, Stratford, St. Catharines, York and East York Townships, Windsor, East Windsor, Sandwich, Walkerville, Brandon, Regina, Edmonton, Prince Rupert and North Vancouver reported increases over both September, 1934, and October, 1933.

*Cumulative Record for First Ten Months, 1934.*—The following table gives the value of the building authorized by 61 cities during October and in the first ten months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first ten months of the years since 1920 are also given (average 1926 = 100).

Year	Value of permits issued in October	Value of permits issued in first ten months	Indexes of value of permits issued in first ten months (1926=100)	Average indexes of wholesale prices of building materials in first ten months (Average 1926=100)
	\$	\$		
1934.....	2,721,919	21,745,919	16.1	83.3
1933.....	1,775,052	18,169,066	13.5	77.8
1932.....	3,170,570	38,196,769	28.3	77.5
1931.....	8,442,627	97,045,622	71.9	82.4
1930.....	12,756,402	139,117,752	103.1	92.0
1929.....	18,073,378	204,084,467	151.3	99.2
1928.....	21,558,085	187,179,719	133.8	96.8
1927.....	18,848,019	160,000,554	118.6	96.2
1926.....	14,738,402	134,902,338	100.0	100.4
1925.....	11,312,644	109,676,825	81.3	103.0
1924.....	13,089,588	109,906,921	81.5	107.6
1923.....	9,999,187	118,319,159	87.7	111.8
1922.....	10,737,525	127,515,975	94.5	108.5
1921.....	10,491,228	99,064,670	73.4	125.2
1920.....	10,401,041	106,547,319	79.0	144.4

The aggregate for the first ten months of 1934 was higher by 19.7 per cent than in 1933, but was lower than in any other year since 1920; the average index number of wholesale prices of building materials, however, was lower in 1934 than in any year from 1920 to 1930.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, November, 1934, summarized the employment situation in October as follows:—

Employment at October 22, 1934, showed a slight decline as compared with a month earlier. There was a seasonal decline in employment in the building and allied industries, the transport and distributive trades, and hotel and boarding house service. There was also an increase in the numbers temporarily stopped in the coal-mining industry, principally in South Wales and South Yorkshire, and some decline in employment in shipbuilding and ship-repairing, and in the hat and cap industry. On the other hand, employment showed an improvement in all the textile industries except carpet manufacture, in most of the clothing trades, in the boot and shoe, vehicle building, iron and steel, pottery, and glass industries, in general engineering, and in certain food-manufacturing industries.

The decline in employment was most marked in the South of England and in Wales, but there was also some decline in Northeast England. In Northwest England, in Scotland, and in Northern Ireland employment showed little change; while in the Midlands it showed an improvement. In London and the Southeastern Counties employment was still fairly good, and in the Southwest and Midlands it was fair. In the North of England, in Scotland, and in Northern Ireland it continued bad; while in Wales it was very bad.

Among those workpeople of ages 16-64 who were insured against unemployment in Great Britain and Northern Ireland the percentage unemployed at October 22, 1934 (including those temporarily stopped as well as those wholly unemployed), was 16.4, as compared with 16.1 at September 24, 1934, and with 18.1 at October 23, 1933. The percentage wholly unemployed at October 22, 1934, was 13.7, as compared with 13.3 at September 24,

1934; while the percentage temporarily stopped was 2·7, as compared with 2·8. For males alone the percentage at October 22, 1934, was 18·8 and for females, 9·9; at September 24, the corresponding percentages were 18·3 and 10·0.

At October 22, 1934, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,695,897 wholly unemployed, 338,199 temporarily stopped, and 85,539 normally in casual employment, making a total of 2,119,635. This was 37,648 more than a month before, but 179,118 less than a year before. The total included 1,700,784 men, 63,495 boys, 304,897 women and 50,459 girls.

In Great Britain and Northern Ireland, the total number of persons on the Registers of Employment Exchanges at October 22, 1934, was 2,181,599.

### United States

*Manufacturing Industries.*—Factory employment increased 3·7 per cent from September to October and factory payrolls increased 4·8 per cent over the month interval. These increases reflect, to a large extent, the settlement of labour difficulties in cotton goods, woollen and worsted goods, silk and rayon goods, and dyeing and finishing textile plants. However, 46 additional manufacturing industries reported gains in employment from September to October. Sixty-one of the 90 industries surveyed reported gains in payrolls.

The Bureau of Labour Statistics' index of factory employment for October, 1934, is 78·6 (preliminary) and the October index of factory payrolls is 60·7 (preliminary). The index of factory employment in October, 1934, is 1·3 per cent below the level of the October, 1933, index (79·6) and the payroll index in October, 1934, is 2·2 per cent above the level of that for October, 1933 (59·4). The base used in computing these indexes is the average for the 3-year period, 1923-1925, which is taken as 100.

The indexes of factory employment and payrolls are computed from returns supplied by representative establishments in 90 important manufacturing industries of the country. Reports were received in October from 25,283 establishments employing 3,600,140 workers whose weekly earnings were \$68,008,419 during the pay period ending nearest October 15th. The employment reports received from these co-operating establishments cover more than 50 per cent of the total wage earners in all manufacturing industries of the country.

Comparing the level of employment and payrolls in the 90 separate industries in October, 1934, with October, 1933, 40 industries show increased employment over the

year interval and 53 industries show increased payrolls.

*Non-manufacturing Industries.*—Increases in employment from September to October were reported in 9 of the 18 non-manufacturing industries surveyed monthly by the United States Bureau of Labour Statistics and gains in payrolls were reported in 14 of these 18 industries.

The gains in employment ranged from 3·9 per cent in the private building construction industry to 0·4 per cent in the dyeing and cleaning industry. The increase in employment in the building construction industry is larger than the gains shown in October, 1933, and 1932, and may be attributed primarily to the effects of the Federal Housing program. These figures do not include employees on construction projects financed from Public Works funds.

The increases of 7·4 per cent in employment in bituminous coal mining and 2·7 per cent in anthracite mining reflect seasonal demands. The gain of 2·4 per cent in employment in metalliferous mining is due to the resumption of operations in one locality, following the settlement of labour difficulties. Combined reports received from 62,022 retail trade establishments employing 928,940 workers in October showed an increase of 1·5 per cent in employment. The gains in retail trade were confined largely to the group of establishments composed of department, variety, and general merchandising stores and mail order houses. This group showed an increase of 3·0 per cent in employment from September to October. Employment in the remaining 57,153 retail trade establishments increased 0·4 per cent from September to October.

In the 9 industries in which decreased employment was reported, the largest decline (5 per cent) was in brokerage establishments, which have reported decreases in employment for a number of months. The remaining decreases ranged from a seasonal drop of 2·9 per cent in the quarrying and non-metallic mining industry to less than one-tenth of 1 per cent in the power and light industry. Employment in the crude petroleum industry declined 2·8 per cent over the month interval and the laundry industry, reflecting seasonal recessions, reported 1·4 per cent fewer employees in October than September. The decreases in the remaining industries were: telephone and telegraph, 0·9 per cent; banks, 0·5 per cent; electric-railroad operation and maintenance, 0·4 per cent; and hotels, 0·2 per cent. The decrease in the last named industry was due to the closing of summer-resort hotels. Employment in hotels other than resort hotels showed a gain of 1·2 per cent from September to October.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding the contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government with respect to contracts "for construction, remodelling, repair or demolition of any work" is set forth in an Act of Parliament adopted on May 30, 1930, entitled "The Fair Wages and Eight-Hour Day Act" (chapter 20-21, Geo. V). The full text of this measure appeared in the *LABOUR GAZETTE*, April, 1930, page 383. The Fair Wages and Eight-Hour Day Act provides as follows:—

3. (1) Every contract made hereafter with the Government of Canada for construction, remodelling, repairs or demolition of any work shall be subject to the following conditions respecting wages and hours:—

(a) All persons in the employ of the contractor, sub-contractor, or of any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall be paid such wages as are generally accepted as current from time to time for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged; provided that wages shall in all cases be such as are fair and reasonable;

(b) The working hours of persons while so employed shall not exceed eight hours per day except in such special cases as the Governor in Council may otherwise provide, or, except in cases of emergency, as may be approved by the Minister.

The Fair Wages Policy was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Order in Council of April 9, 1924. The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions for the protection of the workmen employed, which are sanctioned by the foregoing Orders in Council.

It is further provided in the foregoing Orders in Council that "all contracts for the manufacture and supply to the Government

of Canada of fittings for public buildings; harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees; mail bags, letter boxes, and other postal stores; and any other articles and things hereinafter designated by the Governor in Council" must contain provisions for the observance of the current wages rates and working hours in the district, or, in the absence of any such current standards, fair and reasonable rates and working hours. These conditions, which are referred to in the Orders in Council as "B" conditions (the Conditions of the Fair Wages Orders in Council with reference to building and construction works being designated as "A" conditions), including the following Fair Wages Clause:—

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respect hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rate of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Both in the case of contracts for building and construction work, and in the "B" conditions sanctioned by Orders in Council applicable to contracts for the manufacture of certain classes of supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied

or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of certain classes of supplies listed in the Fair Wages Orders in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing

fair wages conditions, have been recently executed by the Government of Canada:—

#### DEPARTMENT OF INDIAN AFFAIRS

##### *Contracts in Group "A" (Construction, etc.)*

Construction of an Indian residential school at Sault Ste. Marie, Ontario. Name of contractor, Mr. J. J. Fitzpatrick, Sault Ste. Marie, Ontario. Date of contract, September 8, 1934. Amount of contract, \$151,784.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Bricklayers and masons.....	\$0 80	8
Carpenters.....	0 70	8
Electricians (inside wiremen).....	0 65	8
Painters.....	0 65	8
Plasterers.....	0 80	8
Plumbers and steamfitters.....	0 75	8
Sheet metal workers.....	0 65	8
Roofers—shingle.....	0 70	8
Concrete finishers.....	0 60	8
Hoist operators—gasoline.....	0 55	8
Hoist operators—steam.....	0 65	8
Labourers.....	0 40	8
Truck driver.....	0 40	8
Teamster, team and wagon.....	0 75	8
Teamster.....	0 40	8

Construction of an Indian Residential School at LeBret, Sask. Name of contractors, Messrs. Smith Bros. and Wilson, Regina, Sask. Date of contract, October 18, 1934. Amount of contract, \$164,926.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Bricklayers.....	\$0 80	8
Carpenters.....	0 60	8
Cement finishers.....	0 55	8
Compressor operators.....	0 45	8
Concrete mixer operator.....	0 45	8
Electricians.....	0 65	8
Hoist operator—gas.....	0 50	8
Hoist operator—steam.....	0 65	8
Labourers.....	0 35	8
Lathers—metal or wood.....	0 60	8
Marble setters.....	0 80	8
Motor truck drivers.....	0 40	8
Painters and glaziers.....	0 55	8
Plasterers.....	0 80	8
Plumbers and steamfitters.....	0 65	8
Man in charge of roofers—felt and gravel.....	0 50	8
Sheet metal workers.....	0 65	8
Stonecutters.....	0 70	8
Stone masons.....	0 80	8
Structural steel workers.....	0 75	8
Teamster, team and wagon.....	0 65	8
Teamster.....	0 35	8

#### DEPARTMENT OF MARINE

##### *Contracts in Group "A" (Construction, etc.)*

Construction of a railway embankment be-

tween the Imperial Oil and Marien Street Wharves, Montreal East, P.Q. Name of contractors, H. J. O'Connell Ltd., Montreal, P.Q. Date of contract, November 9, 1934. Amount of contract, approximately \$58,400.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Cement finishers.....	\$0 50	8
Carpenters.....	0 60	8
Compressor air operator.....	0 50	8

### Contracts in Group "B" (Manufacture of Supplies, etc.)

The following is a statement of contracts awarded by the Department of National Defence during the month of November, 1934, for various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

Goods Contracted for	Contractor
Enamelware.....	General Steel Wares Ltd., Montreal, P.Q.
Cartridges.....	Canadian Industries Ltd., Montreal, P.Q.
Drill shirts and trousers.....	Houde, Larocche & Cie, St. Croix, P.Q.
Drill shirts.....	Sterling Shirt & Overalls Mfg. Co., Cap de la Madeleine, P.Q.
Shirt drill.....	Dominion Textile Co., Montreal, P.Q.
Cloth, trade pattern.....	Watchorn & Co., Merriekville, Ont.
Rolling doors.....	Richards Wilcox Canadian Co., London, Ont.
Khaki drill.....	Canadian Cottons Ltd., Montreal, P.Q.
Earthenware bowls, cups, plates and saucers.....	Sovereign Potters, Ltd., Hamilton, Ont.
Drill trousers.....	Gault Bros., Ltd., Vancouver, B.C.
Fire hose.....	Goodyear Rubber Tire Co., Montreal, P.Q.
Steel pipe.....	Page Hersey Tubes Ltd., Toronto, Ont.
Blankets.....	Renfrew Textiles Ltd., Renfrew, Ont.
Ankle boots.....	A. E. Wry-Standard Ltd., Amherst, N.S.
Ankle boots.....	J. A. & M. Cote, St. Hyacinthe, P.Q.
Ankle boots.....	Eudore Fournier, Plessisville, P.Q.
Ankle boots.....	Tobutt Shoe & Leather Ltd., Three Rivers, P.Q.
Mackinaw coats.....	Grant-Holden-Graham Ltd., Ottawa, Ont.
Ankle boots.....	Eagle Shoe Co., Ltd., Montreal, P.Q.
Forage caps.....	William Scully, Ltd., Montreal, P.Q.
Winter caps.....	Jay Wolfe Inc., Montreal, P.Q.
Breeches.....	Workman Uniform Co., Ltd., Montreal, P.Q.
Lumbermen's rubber boots...	Northern Rubber Co., Guelph, Ont.
Lumbermen's rubber boots...	Woodstock Rubber Co. Woodstock, Ont.
Lumbermen's rubber boots...	Canadian Goodrich Co., Kitchener, Ont.
Hand towels.....	Stauffer Dobbie Co., Ltd., Galt, Ont.
Sweater jackets.....	Joseph Simpson Sons, Ltd., Toronto, Ont.
Tap soles and top lifts.....	Anglo Canadian Leather Co., Toronto, Ont.
Canvas shoes.....	Great West Felt Co., Elmira, Ont.
Bedstead springs.....	Simmons Ltd., Winnipeg, Man.
Doors.....	Richards Wilcox Canadian Co., London, Ont.

### DEPARTMENT OF PUBLIC WORKS

#### Contracts in Group "A" (Construction, etc.)

Construction of general repairs, etc., to the public building at Lethbridge, Alta. Name of contractor, Mr. S. L. Chappell, Lethbridge,

Alta. Date of contract, October 24, 1934. Amount of contract, \$3,137.70. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Cement finishers.....	\$0 75	8
Concrete floaters.....	0 40	8
Concrete mixers.....	0 40	8
Carpenters and joiners.....	0 75	8
Sheet metal workers.....	0 90	8
Plumbers and steamfitters.....	1 00	8
Hollow tile and brick layers and masons.....	0 90	8
Labourers.....	0 40	8
Driver, team and wagon.....	0 75	8
Motor truck driver.....	0 45	8
Stone cutters.....	0 75	8

Construction of wharf repairs at Sointula, B.C. Name of contractors, Pacific Engineers, Ltd., Vancouver, B.C. Date of contract, October, 1934. Amount of contract, approximately \$3,027. A fair wages schedule was inserted in the contract, as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Pile driver foreman.....	\$1 12½	8
Pile driver engineer.....	1 00	8
Pile driver man.....	0 90	8
Boorman.....	0 90	8
Bridgeman.....	0 90	8
Fireman.....	0 65	8
Labourer.....	0 40	8

Construction of wharf repairs at Grantham's Landing, B.C. Name of contractors, Horie-Latimer Construction Co., Vancouver, B.C. Date of contract, October, 1934. Amount of contract, approximately \$3,694. The preceding fair wages schedule was also inserted in this contract.

Construction of a school dormitory building at Fredericton, N.B. Name of contractors, Messrs. A. & R. Forbes, Fredericton, N.B. Date of contract, November 16, 1934. Amount of contract, \$51,474 and unit prices for additional work. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator.....	\$0 40	8
Cement finishers.....	0 50	8
Stonemasons.....	0 75	8
Stone cutters (granite, sand and limestone).....	0 60	8
Brick and hollow tile layers.....	0 75	8
Structural steel workers.....	0 65	8
Ornamental iron workers.....	0 50	8
Hollow metal workers.....	0 50	8
Kalamein iron workers.....	0 50	8
Carpenters and joiners.....	0 50	8
Sheet metal workers.....	0 55	8
Terrazzo layers.....	0 60	8
Marble setters.....	0 75	8
Tile setters.....	0 75	8
Lathers, metal.....	0 50	8
Linoleum layers.....	0 50	8
Plasterers.....	0 75	8
Plasterers' helpers.....	0 35	8
Painters and glaziers.....	0 50	8
Plumbers and steamfitters.....	0 60	8

Hon. C. J. Arcand, Minister of Labour of Quebec, declared early in December that over 200,000 workers in various trades were then working under the collective agreement extension system which was established by the legislature at its last session. This number, he continued, would probably increase to 300,000 within the next two months, when agreements between employers and workers in the printing and clothing industries are extended so as to govern all the workers who are engaged in these industries in the districts covered by the agreements.

During November there were 4,849 accidents reported to the Ontario Workmen's Compensation Board, as compared with 5,226 during October, and 3,734 during November a year ago. The fatal accidents numbered 30, as compared with 33 during October. The benefits awarded amounted to \$412,309.59, of which \$333,978.14 was for compensation and \$78,331.45 for medical aid. The records to date this year show 50,402 accidents reported, as compared with 34,621 during the same period of 1933, and the benefits awarded this year to date amount to \$4,081,136.21, as against \$3,362,891.10 for the corresponding period of 1933.

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

**R**ECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include the extension to all employees and employers in the industry and district, by Orders in Council, of an agreement affecting the plumbing trade in Three Rivers, the addition of one clause to the Order in Council affecting the ornamental iron and bronze trade at Montreal and applications for the extension of agreements affecting granite cutters and granite quarrymen throughout the Province of Quebec, fur workers at Montreal, bakers and bread distributors at Three Rivers, bakers at Quebec and clothing workers throughout the Province.

Under the Collective Labour Agreements Extension Act, Quebec, the text of which was printed in the *LABOUR GAZETTE*, May, 1934, page 417, applications may be made to the provincial Minister of Labour, by any association of employees or employers who are parties to a collective agreement, to have those terms of such agreement which concern rates of wages and hours of labour made obligatory on all employees and employers in the same trade or industry within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade or industry in the territory included in the agreement, from the date of the publication of the Order in Council in the *Quebec Official Gazette* and for the duration of the agreement. The provisions of an agreement thus made obligatory are to govern all individual labour contracts in the specified trades and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement. Applications for the extension of certain agreements and Orders in Council subsequently passed under this Act have been noted in the *LABOUR GAZETTE* each month beginning in June, 1934.

*Plumbers, Three Rivers and District.*—An Order in Council approved November 9, 1934, makes obligatory the conditions in the agreement between fourteen contractors in plumbing, in the installation of heating systems, refrigeration plants and automatic sprinklers,

in the tinsmith trade, and for roofing, and the National Catholic Union of Plumbers, Incorporated of Three Rivers. (The application for this extension was noted in the *LABOUR GAZETTE*, October, page 913.) The Order in Council makes the terms of the agreement obligatory in the district mentioned therein according to the following conditions:

1. Definition of the term "journeyman": The word "journeyman" used in this agreement comprises and designates a plumber, or installer of heating system, or installer of refrigerating plants, or installer of automatic sprinklers, having obtained his licence as journeyman from the Board of Examiners of pipe mechanics, pursuant to the provisions of chapter 176A, R.S., 1925, as enacted by 23 Geo. V, ch. 69 and amended by 24 Geo. V, ch. 52.

The word "journeyman," for the trades hereinabove designated also comprises workmen who are not obliged to be licensed pursuant to the provisions of the Act respecting pipe mechanics, but who have passed an examination in a satisfactory manner before the Board of Examiners formed by the joint committee named in accordance with the present agreement, pursuant to paragraph 2 of article 7 of the Act 24 Geo. V, ch. 56.

The word "journeyman," added to the words "tinsmith and roofer," comprises and designates the tinsmiths and roofers who have passed, in a satisfactory manner, their examination before the Board of Examiners formed by the joint committee named in accordance with the present agreement, pursuant to paragraph 2 of article 7 of the Act 24 Geo. V, ch. 56.

#### 2. Rate of Wages:

	cents per hour
<i>Journeyman-plumber:</i>	
From the 1st of November, 1934 to the 30th of April, 1935. . . . .	40
From the 1st of May, 1935 to the 31st of October, 1935. . . . .	45
<i>Journeyman-installer of heating systems:</i>	
From the 1st of November, 1934 to the 30th of April, 1935. . . . .	40
From the 1st of May, 1935 to the 1st of October, 1935. . . . .	45
<i>Journeyman-installer of refrigerating plants and automatic sprinklers:</i>	
From the 1st of November, 1934, to the 30th of April, 1935. . . . .	40
From the 1st of May, 1935, to the 1st of October, 1935. . . . .	45
<i>Journeyman-tinsmith-roofer:</i>	
From the 1st of November, 1934, to the 30th of April, 1935. . . . .	40
From the 1st of May, 1935, to the 1st of October, 1935. . . . .	45

3. The time of labour shall conform with the provisions of the Order in Council No. 1496 of July 12, 1933, for the putting into force of the Act respecting the Limiting of Working Hours (23 Geo. V, ch. 40): there shall be no work on Sundays, holidays of obligation, the feast of Saint Jean Baptiste, Good Friday and Labour Day.

4. In the case of non-application or derogation granted by the competent authority respecting the limiting of working hours, the rate of wages of time and a half will be paid to journeymen and apprentices for all overtime, if such is carried on between the hours of six o'clock p.m. and seven o'clock a.m.

5. The workmen will be paid each week.

The travelling expenses of workmen sent or employed outside the town in which they reside, will be at the cost of the contractors. No salary will be paid during the time of the trip.

6. The territorial jurisdiction determined by the present agreement comprises the counties of Berthier, Maskinonge, Saint Maurice, Laviolette, Champlain, Yamaska, Nicolet and Trois Rivières.

7. The present agreement shall be valid from the date of the publication in the *Quebec Official Gazette*, of the Order in Council approving the present request and shall remain in force until the 1st of November, 1935. It shall then renew itself automatically each year, unless a notice of thirty days be given before the expiration of each annual term, by one or the other of the contracting parties desiring to put an end thereto.

*Ornamental Iron and Bronze Workers (Shopmen) Montreal and District.*—The Order in Council which was published in the *LABOUR GAZETTE*, November, page 1005, has been corrected by adding after article 5, the following:

"6. The present agreement shall be valid from and after the date of the publication in the *Quebec Official Gazette* of the Order in Council approving the present request, and will remain in force until March 31st, 1935."

*Granite Quarrymen and Granite Cutters, Province of Quebec.*—Notice of application for the extension of the agreement between certain owners of granite quarries and granite cutting plants in the Province of Quebec and their employees was published in the *Quebec Official Gazette*, November 17. The agreement provides for wage rates of 50 cents per hour for granite cutters and for surface machine operators who are fully competent granite cutters and of 35 cents per hour for quarrymen employed in quarries and 25 cents for inexperienced labourers in quarries; apprentice

granite cutters to be paid 10 cents per hour during first year, 20 cents during second year and 30 cents during third year.

*Fur Workers, Montreal and District.*—Notice of application for the extension of the agreement between members of the Montreal Fur Manufacturing Protective Association and the Joint Board of the Furriers Union of Montreal, comprising locals 66 and 67 of the International Fur Workers Union, was published in the *Quebec Official Gazette*, November 17. The minimum weekly wage rates provided in the agreement are: \$28 and \$35 for cutters, \$20 and \$28 for male operators, \$15 and \$20 for female operators, \$14 and \$18 for finishers (female), \$12 and \$20 for apprentices and \$12 and \$24 for examiners.

*Bakers and Bread Distributors, Three Rivers and District.*—Notice of application for the extension of the agreement between bakery proprietors and master bakers and the National Catholic Union of Bakers and Bread Distributors of Three Rivers, Section No. 12, was published in the *Quebec Official Gazette*, November 24. The agreement provides for minimum wage rates of from \$15 to \$22 per week according to class of baker and size of shop. Minimum wage rates for bread distributors to be \$9 per week plus a commission of 5 per cent during the first year of the agreement and \$9 per week plus 7 per cent commission during the next year.

*Bakers, Quebec City and District.*—Notice of application was published in the *Quebec Official Gazette*, December 1, for the extension of the agreement between bakery proprietors and master bakers and the National Catholic Union of Bakers of Quebec. The agreement provides for minimum wages of \$22 per week for foreman, \$19 for second bakers, when a minimum stated quantity of bread is baked per week.

*Clothing Workers, Province of Quebec.*—Notice of application was published in the *Quebec Official Gazette*, December 7, for the extension of the agreement between clothing manufacturers and contractors associations and certain individual clothing manufacturers and the Amalgamated Clothing Workers of America. The agreement is to apply to the whole province of Quebec and provides for a 44 hour week. Wage rates vary according to class of work and rates for different classes are from 28½ cents for lowest paid class to 68 cents for highest paid class, with the rate for beginners to be according to the minimum wage law order.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Food, Drink and Tobacco

FERNIE AND CRANBROOK, B.C.—Two BREWERIES AND THE INTERNATIONAL UNION OF THE UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, LOCAL No. 308.

The agreement which came into effect June 1, 1931, and was summarized in the *LABOUR GAZETTE*, August, 1932, page 922, was renewed June 1, 1933, to remain in effect until May 31, 1935, with a reduction in wages of approximately 5 per cent from the previous rates.

### Manufacturing: Pulp, Paper and Paper Products

IROQUOIS FALLS, STURGEON FALLS, ESPANOLA, SAULT STE. MARIE AND FORT WILLIAM, ONTARIO.—ABITIBI POWER AND PAPER COMPANY, LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS AND OTHER UNIONS.

In accordance with a provision in the agreement outlined in the *LABOUR GAZETTE*, July, 1934, page 701, a further increase in wages was made June 17, 1934, of approximately  $7\frac{1}{2}$  per cent, the minimum rate for the lowest paid class of work being increased from 40 to 43 cents per hour.

PORT ARTHUR, ONTARIO.—PORT ARTHUR DIVISION, PROVINCIAL PAPER LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS AND THE INTERNATIONAL BROTHERHOOD OF OPERATING ENGINEERS.

Agreement to be in effect from June 1, 1934, to May 1, 1935, and thereafter from year to year until notice.

Preference of employment of new men to be given to union members and all new men employed must belong to one of the unions making the agreement, except those engaged in temporary outside labour, construction crews, slasher mills and woods operation.

Hours: 8 per day, 6 days per week.

Overtime and work on Sundays and four holidays, time and one-half, except ordinary over-

time on tour work which shall be at straight time.

An apprentice system to be in effect in the mechanical trades and apprentices in these trades to be paid 35 per cent of journeymen's rate during first year, 45 per cent during second year, 65 per cent during third year, 85 per cent during fourth year and the full rate after four years.

Provision is made for arbitration of disputes.

Wages: the agreement contains a wage scale which restores part of the previous wage decrease and provides that further increases be made when increases are given in other union mills in Canada. Under this provision, a further increase of  $7\frac{1}{2}$  per cent in wages came into effect June 17, 1934, making certain wage rates from that date as follows:

Wages in sulphite mills, mechanical and yard: wood room—foreman 59 cents, others 43 and 44 cents; acid makers 59 cents, in digester house—cooks 73 cents, helpers 52 cents, blow pit men 44 cents, bleacher men 63 cents, liquor men 59 cents, helpers 43 and 44 cents, screen room men 43 cents; in sulphite machine room—foreman 59 cents, back tenders 47 cents, machine men, press operators and truckers 43 and 44 cents; groundwood mill—foreman 59 cents, other employees 43 to 45 cents; yard labour 43 to 46 cents; mechanics 69 to 77 cents, mechanics helpers 54 to 57 cents, apprentice mechanics 43 to 54 cents, painters 59 cents; boiler house—engineers 73 cents, alternate engineer 65 cents, firemen 59 cents, turbine operators 65 cents, labourers 43 cents.

Wages in paper mill from June 17, 1934: clay and size operator 48 cents, beater engineer 74 cents, helpers 43 and 48 cents, broke beater 43 cents; machine tenders 92 cents and \$1.07, back tenders 75 and 95 cents, third hand 67 and 71 cents, fourth hands 53 and 57 cents, fifth hand 46 and 49 cents, broke beaters 43 cents, clothing man 66 cents, helpers and sweepers 43 cents. In finishing room—stack runners 66 to 69 cents, head loader 52 cents, assistant foreman 59 cents, other employees of finishing room 43 to 49 cents.

KENORA AND FORT FRANCES, ONTARIO.—KENORA PAPER MILLS LIMITED, FORT FRANCES PULP AND PAPER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS.

Agreement to be in effect from May 12, 1934, to April 30, 1935, renews the conditions of an agreement which came into effect May 1, 1933, with the provision that wage rates for paper makers be restored to the 1932 printed paper makers wage schedule and with the further provision that when wage increases are made in comparable newsprint mills in the United States similar increases will be made in the mills at Fort Frances and Kenora.

The agreement provides for preference to union members in employing new men and all permanent employees must be union members.

Hours: 8 per day, 6 days per week.

Overtime and work on Sundays and holidays, time and one-half.

Any dispute which cannot be settled between the parties to be referred to arbitration. No strikes or lockouts to occur.

Wages: as stated above, wages were increased from May 12, 1934, to the 1932 standard union

wage scale. Under this agreement also, a further wage increase of between 7 and 9 per cent was put into effect from July 1, 1934, making the wage rates per hour from July 1, at Kenora: machine tenders \$1.43 to \$1.51, back tenders, \$1.26 to \$1.35, third hand 94 cents to \$1.01, fourth hand 60 cents, fifth hand 52 cents, sixth hand 43 cents, beater engineer 82 cents, rewinder man 64 cents, head oiler 70 cents, oiler 54½ cents, swipers 43 cents, clothing man 81 cents, beater man 43½ cents; clay and size man 43½ cents.

Similar increases were put into effect in the Fort Frances mill.

**KENORA AND FORT FRANCES, ONTARIO.**—KENORA PAPER MILLS LIMITED, FORT FRANCES PULP AND PAPER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS AND THE INTERNATIONAL BROTHERHOOD OF OPERATING ENGINEERS, LOCAL No. 940.

(A previous agreement was summarized in the LABOUR GAZETTE, July, 1930, page 841, and was renewed each year since with certain changes.)

Agreement to be in effect from May 12, 1934, to April 30, 1935, renews the conditions of the previous agreement with the provision that wage rates for pulp, sulphite and paper mill workers be increased 11 1/9 per cent with certain adjustments and with a 40 cent per hour minimum, and with the further provision that when wage increases are made in comparable newsprint mills in the United States that similar increases will be made in the mills at Kenora and Fort Frances. Under this clause, a further wage increase of approximately 7 to 9 per cent was made, with a minimum of 43 cents per hour for the lowest paid classes of workers, making wages per hour of certain classes at Kenora from July 1, 1934; in wood room—43 to 48 cents per hour except for foremen who are paid 53 and 59½ cents and saw filer 70 cents; in chipper room—43 to 45 cents, with 63 cents for foreman; in grinder room—43 to 48 cents with 70 cents for foreman; in screen room—45 and 45½ cents; in sulphite mill—cook 77 cents, cooks helper 49½ cents, acid maker 64 cents, blow pit men 45 cents, lead burner 70 cents and labourers 43 cents; in yard—43 cents for teamsters and labourers and 48 cents for foreman; in finishing room—43 to 49½ cents; in laboratory—43 cents for samplers; maintenance and repair crew—mechanics 70 cents, mechanics helpers 49½ and 57½ cents, painters 53 cents, apprentices 33 cents; electricians—for switchboard operators, maintenance men and tour men 70 cents, journeymen 82½ cents.

Similar increases were made effective at the Fort Frances mill.

**KENORA AND FORT FRANCES, ONTARIO.**—KENORA PAPER MILLS LIMITED, THE FORT FRANCES PULP AND PAPER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL No. 731.

Agreement to be in effect from May 1, 1934, to April 30, 1935, and thereafter from year to year until notice.

The provisions as to hours, overtime, employment of union members, settlement of disputes are the same as in the agreement summarized above between the companies and the paper makers union.

Other clauses in this agreement provide that not more than one helper to one journeyman be employed, and also for not less than two journeymen to work together on high voltage wires.

The wage scale in the agreement at May 1, 1934, was increased by 7½ per cent from July 1, 1934, making the rates from that date at Kenora: for journeymen 82½ cents, for tour men and grinder operator 70 cents and for helpers, 43½ cents.

### Manufacturing: Printing and Publishing

**REGINA, SASKATCHEWAN.**—CERTAIN JOB PRINTING OFFICES AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL No. 75.

Agreement to be in effect from May 1, 1934, to April 30, 1935.

The agreement is the same as the one previously in effect and summarized in the LABOUR GAZETTE, October, 1933, page 1034.

Wages are \$34.65 for cylinder pressmen, \$25.29 for cylinder assistant, \$20.43 for cylinder assistants working part time on cylinder and platens, \$32.29 for platen pressmen.

### Construction: Buildings and Structures

**Quebec Collective Labour Agreements Extension Act.**—The following agreements in the Province of Quebec, not elsewhere mentioned in this article in this or previous months, have been made obligatory by Orders in Council and the terms so made obligatory printed in the LABOUR GAZETTE, as follows:

**BUILDING TRADES, SHERBROOKE, September, 1934, page 824;**

**BUILDING TRADES, JOLIETTE, November, 1934, page 1004;**

**MARBLE, TERRAZZO AND TILE SETTERS, QUEBEC, November, 1934, page 1003.**

**THREE RIVERS AND DISTRICT.**—BRICKLAYING, MASONRY AND PLASTERING CONTRACTORS AND THE NATIONAL CATHOLIC UNION OF BRICKLAYERS, PLASTERERS AND MASONS.

Agreement to be in effect from September 15, 1934, to September 15, 1935, and thereafter from year to year until notice.

Only union members to be employed and business agents of union may visit jobs and also inspect payrolls.

One apprentice may be employed on each job, but not more than one apprentice for each ten journeymen employed on each job.

Contractors must see that any sub-contractors also observe the terms of this agreement.

Provision is made for the payment of fines by either party not observing the terms of the agreement.

Any dispute arising is to be referred to a joint arbitration committee for settlement.

Other terms of this agreement affecting hours, wage rates, etc., are included in the Order in Council making them obligatory which was printed in the LABOUR GAZETTE, October, page 912.

**THREE RIVERS, QUEBEC.**—PLUMBING, HEATING AND REFRIGERATING CONTRACTORS AND THE NATIONAL CATHOLIC UNION OF PLUMBERS OF THREE RIVERS.

Agreement to be in effect from November 1, 1934, to November 1, 1935, and thereafter from year to year until notice.

Only union members to be employed. Union business agents may visit the jobs and examine the payrolls.

Not more than one apprentice to be employed for each journeyman.

Contractors to see that sub-contractors observe the terms of the agreement.

Provision is made for the payment of fines by either breaking the agreement.

Any dispute to be referred to a joint arbitration committee.

Other terms of this agreement were made obligatory by Order in Council and are printed on page 1146 of this issue.

### **Transportation and Public Utilities: Electricity and Gas**

**KENORA, ONTARIO.**—A CERTAIN POWER COMPANY AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL No. 559.

Agreement to be in effect from June 1, 1934, and from year to year until notice.

Union members or those who will join the union to be employed.

Hours: 48 per week.

Overtime: shift operators required to work overtime at other than their regular work to be paid time and half. Employees called out for repair work outside of regular shift to be paid at least for 4 hours.

Wages: power house operators and relief operator \$128, \$135 and \$142.50 per month. Maintenance men \$153 per month.

### **Transportation and Public Utilities: Local Transportation**

**HAMILTON, ONTARIO.**—ONE DAIRY COMPANY AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS, LOCAL No. 357 (MILK DRIVERS AND DAIRY EMPLOYEES).

Agreement to be in effect from January 1, 1934, to January, 1935.

Only union members or those who will join the union to be employed. No discrimination to be shown employees on account of union activity.

Six days to constitute a week's work and any employees working on their day off to be paid \$3.50 extra for the day.

One week's notice of resigning or of dismissal to be given.

Wages for milk drivers to be \$21 per week and a commission of 3 per cent on collections.

Any dispute which cannot be settled between the parties is to be referred to arbitration.

**EDMONTON, ALBERTA.**—ONE DAIRY COMPANY AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS, LOCAL No. 514.

The agreement which came into effect March 1, 1931, was amended March 1, 1932, and remains in effect from year to year until notice.

Union members or those who will join the union to be employed.

Six and one-half days per week to be worked, on the basis of one day off in two weeks and one week's holiday with pay per year.

One week's notice of resigning or dismissal to be given.

Wages per week for drivers, from March 1, 1932: a guaranteed wage of \$16 for beginners, increasing \$1 per week each year to \$19, plus commission on sales; truck drivers \$85 per month.

**VANCOUVER, B.C.**—CERTAIN TAXI CAB COMPANIES AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS, LOCAL No. 151.

Agreements to be in effect from March 16, 1934, subject to 30 days' notice.

All employees must be union members and authorize the company to deduct union dues from their pay; and in turn, if any union member defraud the company of any moneys, the same will be replaced from the union funds. No discrimination to be shown employees on account of union activity.

Hours: 8 per day; no split shift of less than three consecutive hours.

Overtime: 50 cents per hour.

A week's holiday with pay to be granted after a year's service with a clear record.

Wages: In one company, drivers to be paid \$3 or 35 per cent of their daily receipts, whichever is greater; in another company \$2.75 or 35 per cent of daily receipts, whichever is greater, except for first thirty working days when new men will be paid 30 per cent of receipts. Wages for spare drivers, 50 cents per hour.

Disputes to be settled by arbitration.

### **Transportation and Public Utilities; Street and Electric Railways**

**HAMILTON, ONTARIO.**—HAMILTON STREET RAILWAY AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, DIVISION No. 107.

The agreement which came into effect May 1, 1928, and was summarized in the LABOUR GAZETTE, November, 1928, page 1263, was amended March 16, 1932, to remain in effect until notice, and is still in effect in 1934.

The 1932 amendment reduced wage rates for most classes by 3 cents per hour, making the basic wage rate for motormen and conductors after two years' service 49 cents per hour and 54 cents per hour for bus and one-man car operators. Hours for car house and shopmen were reduced from 55 to 48 per week.

### **Transportation and Public Utilities: Water Transportation**

**SAINT JOHN, N.B.**—VARIOUS STEAMSHIP COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCALS Nos. 273, 1039 AND 810 (3 AGREEMENTS).

The agreement for Local 273 (longshoremen) is to be in effect from November 1, 1934, to October 31, 1935, and thereafter from year to year until notice.

This agreement is the same as the one previously in effect and summarized in the LABOUR GAZETTE, January, 1934, page 74, March, 1933, page 332, December, 1931, page 1358, and December, 1930, page 1456, with the following wage change, and with minor changes in working conditions.

Wages: the basic rate is increased from 63 to 68 cents per hour and the rate for handling bulk cargo from 72 to 78 cents per hour.

The agreements for Locals 1039 (ship liners, etc.) and 810 (coal handlers and trimmers), which were summarized in the LABOUR GAZETTE, March, 1933, pages 333 and 332, continue from year to year until notice and no change was made this year, the wage rates for shipping remaining at 59 cents for day work and 88 cents for night work, and for coal handlers and trimmers 72 cents for day work and 90 cents for night work.

## STEAM RAILWAY STATISTICS IN CANADA, 1933

**T**HE Dominion Bureau of Statistics has issued its annual report on Statistics of Steam Railways of Canada for the year ending December 31, 1933, giving data as to mileage and equipment, capital, investment, subsidies, land grants, guarantees, capital, income, earnings, operating expenses, traffic, fuel consumption, employees, salaries and wages, and accidents.

Gross revenues during 1933 amounted to \$270,278,276, which was less than half the revenues of 1928, and was the lowest since 1916. In 1932 gross revenues were \$293,390,415. Freight traffic was also the lightest since 1915, amounting to 21,092,594,200 revenue ton-miles as against 23 billion in 1932 and 41·6 billion in 1928. Passenger traffic, which has been declining rapidly since 1928, was recorded as 1,393,041,245 passenger miles, the lowest since 1907, when these records were first made. Operating expenses were reduced from \$256,668,375 to \$233,133,108, being the lowest since 1918. Net operating revenue amounted to \$37,145,168, and was greater than in 1932 by \$423,128. Railway taxes were \$8,848,542 as compared with \$8,541,870 in 1932, but were lower than in any other year since 1924. Tonnage showed decreases in wheat, mine products, manufactures and miscellaneous freight, including gasoline and petroleum products, but increases in animal and forest products. The monthly reports secured from the larger railways, it was stated, indicated improvements during the second half of the year in revenues, traffic and net operating revenues, with reductions in operating expenses.

The monthly average number of employees dropped from 132,078 in 1932 to 121,923 in 1933. This was the smallest working staff on Canadian railways since 1908, when the mileage was only 54 per cent of the 1933 mileage. The payroll chargeable to operating expenses amounted to \$145,581,043, which was \$20,107,696 less than in 1932, and \$119,088,109 less than in 1928. The average wages per hour for those on an hourly basis was 54·4 cents as against 56·8 cents in 1932 and 59·5 cents in 1930. The average daily wage for those on a daily, weekly or monthly basis was \$5·39 as against \$5·606 in 1932 and \$5·864 in 1930.

A table entitled "employees, salaries and wages" shows for 1932 and 1933 the various classes or occupations and for each of these the average number of employees during the year, the total hours on duty, total salaries or wages paid, the average number of days or hours worked per employee during the year,

the average earnings per employee per day or per hour, and the average earnings per employee per year.

Data from this table will appear in the supplement to the LABOUR GAZETTE for January, 1935, on Wages and Hours of Labour in Canada in 1929, 1933 and 1934.

On accidents the report contains tables showing fatal and non-fatal accidents to employees, to passengers and to other persons, including trespassers and non-trespassers, and accidents at highway crossings; also the time lost by employees through injuries. The accidents are classified by causes and by classes of employees.

The number of employees killed during 1933 was 41 as compared with 57 in 1932, 42 in 1931, 81 in 1930, 104 in 1929, and 114 in 1928. The number of non-fatal accidents to employees was 985 in 1933 as compared with 957 in 1932, 1,131 in 1931, 1,477 in 1930, 2,028 in 1929, and 2,214 in 1928. Most of these occurred to trainmen and trackmen. By causes, "getting on or off trains" accounted for the largest number, followed by "falling from trains or cars" and "coupling or uncoupling."

The time loss by employees as a result of injuries from train accidents was 34,539 days, and as a result of other accidents was 86,803, and of this 28,735 days were lost by trainmen, 30,779 days were lost by shopmen, and 41,931 days by truckmen.

### Hamilton Co-operative Creameries Admitted to the Co-operative Union

Hamilton Co-operative Creameries, Ltd., which in two years has developed into the third largest dairy in the city, has applied for admission to the Co-operative Union of Canada, and has been provisionally admitted by the general secretary. This action will be submitted for ratification at the next meeting of the executive. The first year the organization was not able to meet its interest on capital investment, but at the close of the second year it was found it was able to pay 7 per cent interest per annum for the two years it had been in operation out of one year's profits, and to pay 2 per cent to the producers on their milk shipments and 2 per cent to the consumers on their purchases. The workers employed by the society are one hundred per cent members of their trade union.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, NOVEMBER, 1934

### Cost of Living, Prices of Staple Articles and Index Numbers

THE cost per week of the family budget in terms of retail prices was again slightly higher, due mainly to the higher cost of foods, while the Dominion Bureau of Statistics index number of wholesale prices was lower.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.58 at the beginning of November as compared with \$7.54 for October; \$7.27 for November, 1933; \$11.75 for November, 1929; \$11.01 for November, 1926; \$11.08 for November, 1921; \$16.92 for June, 1920 (the post war peak); and \$7.96 for November, 1914. The slight increase in November as compared with October was due mainly to seasonal advances in the price of eggs, although the prices of milk, rolled oats and beans were also higher. The prices of beef, fresh pork, bacon, butter, rice, sugar, and potatoes were lower. Including the cost of fuel and rent with that of foods the total budget averaged \$16.03 at the beginning of November as compared with \$15.96 for October; \$15.72 for November, 1933; \$22.03 for November, 1929; \$21.24 for November, 1926; \$21.60 for November, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.36 for November, 1914. Fuel and rent were slightly higher, the former mainly because of higher prices for anthracite coal and wood.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics based upon prices in 1926 as 100 declined from 71.4 in October to 71.2 in November. Comparative figures for certain previous dates are 68.9 for November, 1933; 95.7 for November, 1929; 97.7 for November, 1926; 98.3 for November, 1921; 164.3 for May, 1920 (the post-war peak); 67.2 for November, 1914. Ninety-one prices quotations were lower, sixty-nine were higher, and four hundred and seven were unchanged.

In the grouping according to chief component materials five of the eight main groups were lower, one was higher and two were unchanged. The groups which declined were: the Animals and their Products group, because of lower prices for leather, steers, hogs, meats, lard and canned fish, which more than offset advanced quotations for hides, calves, lambs, butter and eggs; the Fibres, Textiles and Textile Products group, because of declines in the prices of cotton, cotton fabrics and hessian; the Wood, Wood Products and Paper group, mainly because of lower prices for lumber; the Non-Metallic Minerals and their Products

group, owing to reduced quotations for sewer pipe; and the Chemicals and Allied Products group, due to declines in the prices of explosives and shellac. The Non-Ferrous Metals and their Products group was somewhat higher, due mainly to increased prices for antimony, copper, silver and zinc. The Vegetables and Vegetable Products group and the Iron and its Products group were unchanged. In the former higher prices for grains were offset by lower prices for gluten meal, raw rubber, sugar and potatoes.

In the grouping according to purpose consumers' goods were lower and producers' goods were somewhat higher. In the former group foods declined, mainly because of lower prices for fish, fruits, meats and vegetables. In producers' goods building and construction materials were lower as were also materials for the textile and clothing industries and for the meat packing industries. Materials for the furs and leather goods industries, metal working industries and the milling and other industries were slightly higher.

In the grouping according to origin raw and partly manufactured goods and fully and chiefly manufactured goods declined. Canadian farm products advanced slightly, while articles of marine origin and of forest origin were lower.

#### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of November of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located

(Continued on page 1160)

**COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL, AND LIGHTING, AND RENT IN  
TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA**

\*Prior to 1926 number of commodities was 236, and commencing in January, 1934, the number is 567.

(Continued from page 1152)

but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle,

anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

## Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and

electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing 18½%; Sundries, 20%.

### Retail Prices

Beef prices were again lower in most localities, sirloin steak being down from an average of 21.2 cents per pound in October to 20.3

cents in November, round steak from 17 cents per pound to 16.3 cents and shoulder roast from 11.1 cents per pound to 10.7 cents. Fresh pork was also slightly lower in the average at 20 cents per pound in November as compared with 20.5 cents in October. The price of breakfast bacon was down in most localities, the Dominion average being 34.5 cents per pound as compared with 36.2 cents the previous month.

Egg prices were substantially higher in practically all localities, fresh being up from an average of 32.6 cents per dozen in October to 40.4 cents in November and cooking from 27.3 cents per dozen to 31.7 cents. Prices in the prairie provinces were considerably lower than in other parts of the Dominion. Milk was fractionally higher at an average of 10.2 cents per quart, increases being reported from Truro, Fredericton, Three Rivers, St. Johns, Montreal, Oshawa, Hamilton, Sault Ste. Marie, Port Arthur, Fort William and Prince Rupert. Butter prices were fractionally lower, dairy averaging 21.6 cents per pound and creamery 24.4 cents.

Bread was unchanged at an average price of 5.9 cents per pound. Beans were up from an average price of 4.7 cents per pound in October to 4.9 cents in November, while onions declined from an average of 3.5 cents per pound to 3.2 cents. Potatoes were again lower in most localities, decreases being more pronounced in the eastern provinces. The average price in November was 76 cents per ninety pounds as compared with 88 cents in October. Evaporated apples were down in the average from 15.4 cents per pound in October to 15.3 cents in November. Prunes also were fractionally lower at an average of 12.8 cents per pound. Both granulated and yellow sugar were slightly lower, the former at an average of 6.5 cents per pound and the latter at 6.3 cents per pound. Anthracite coal was seasonally higher at \$15.13 per ton as compared with \$15.09 in October. Slight increases in rent were reported from several localities.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$16; Windsor, Nova Scotia, \$16.50; Moncton, \$16; Saint John, \$13-\$14; Quebec, \$14.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$15.50; Montreal, \$15.50; Ottawa, \$16.75; Kingston, \$16; Belleville, \$16.50; Peterborough, \$16.50; Oshawa, \$14.75; Toronto, \$15; St. Catharines, \$15.50; Hamilton, \$15; Brantford, \$16.75; Galt, \$16.50; Windsor, \$14; Sudbury, \$17.50; Cobalt, \$19; Timmins, \$19; Port Arthur, \$16; Fort William, \$16; Winnipeg, \$19.50.

### Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices during the month moved within narrow limits. No. 1 Manitoba northern cash wheat, Fort. William and Port Arthur basis, averaged 79.6 cents per bushel in November as compared with 78.2 cents in October. Western oats averaged 44.2 cents per bushel in November and 41.5 cents in October, and barley 51.9 cents per bushel in November as compared with 51.6 cents in October. Prices of flour and other milled products were unchanged. Granulated sugar at Montreal was also unchanged at \$4.90 per hundred pounds. Ceylon rubber at New York was 1 cent per pound lower at 12.7 cents per pound. In livestock choice steers at Toronto declined from \$5.04 per hundred pounds to \$4.78, while at Winnipeg the price was slightly higher being up from \$3.30 per hundred pounds to \$3.45. Veal calves at Toronto were 10 cents per hundred pounds lower at \$6.62. Bacon hogs at Montreal also declined, the average being \$7.84 per hundred pounds in November as compared with \$8.19 in October. At

Toronto the average price was \$7.89 per hundred pounds in November and \$8 in October. Lambs at Montreal advanced from \$6.06 per hundred pounds to \$6.58 and at Winnipeg the price was up from \$5.05 per hundred pounds to \$5.58. The price of fresh eggs at Toronto advanced from 39.4 cents per dozen to 41.4 cents. Stocks in cold storage at the beginning of the month were approximately 25 per cent less than at the beginning of October but about 16 per cent higher than at the beginning of November, 1933. Creamery butter at Montreal rose from 21.4 cents per pound to 22.2 cents and at Toronto from 22 cents per pound to 22.7 cents. Cold storage holdings were reported to be more than 30 per cent higher at the beginning of November than on the corresponding date in 1933. Raw silk at New York was 7 cents per pound higher at \$1.51. Raw wool was also higher averaging 15 cents per pound in November as compared with 14 cents in October. In lumber, common fir declined from \$18 per thousand board feet to \$17 and spruce scantling from \$15 per thousand board feet to \$14.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to significant changes in prices in Great Britain and certain other countries. The authorities for the wholesale prices index numbers are named in all cases. The latest table showing cost of living and wholesale prices index numbers for various countries appeared in the LABOUR GAZETTE for October.

### Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1924=100, was 62.7 for October, a fall of 1 per cent for the month. The decline was confined chiefly to the food groups, of which cereals declined 4.1 per cent, meat and fish 2.5 per cent. Non-foods were 0.3 per cent lower than in September.

The *Statist* index number, on the base 1867-1877=100, was 81.1 at the end of October, a decrease of 1.2 per cent for the month. Food-stuffs declined 2.2 per cent and industrial materials 0.6 per cent during the month.

COST OF LIVING.—The index number of the Ministry of Labour, on the base July 1914=100, was 144 for November, an advance of one point for the month, due to higher food prices, chiefly eggs. Other groups were unchanged.

### France

WHOLESALE PRICES.—The index number of the General Statistical Office, on the base 1914=100 (gold index) was 72 for October, a decline of one point for the month. The decline was due to lower prices in all food groups. Industrial materials on the average were fractionally higher than the September level.

### Germany

COST OF LIVING.—The index number of the Federal Statistical Office, on the base 1913-1914=100, was 122.0 for October, an advance of 0.3 per cent for the month. Small increases were recorded in all groups except rent which was unchanged.

### Australia

WHOLESALE PRICES.—The index number of the Commonwealth Bureau of Census and Statistics, of wholesale prices in Melbourne, on the base 1911=1000, was 1463 for June, which is the highest number reached since last September.

### United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926=

100, was 76.5 for October, a decline of nearly  $1\frac{1}{2}$  per cent from the September level. Lower index numbers were recorded in eight of the ten main groups, the greatest fall occurring in farm products which amounted to 4 per cent, but farm products are still 27 per cent above the level of a year ago and more than 50 per cent higher than in October, 1932. The only group to advance was the chemicals and drugs group, while fuel and lighting materials were unchanged.

*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated) which is the sum total of the prices per pound of 96

commodities of common consumption, was \$9.2791 at November 1, a fall of 1.9 per cent for the month.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost *per capita* of a year's supply of commodities was \$168.005 at November 1, a loss of 1.19 per cent for the month.

**COST OF LIVING.**—The index number of the National Industrial Conference Board, on the base 1913=100, was 80.9 for October, a decrease of 0.1 per cent for the month, due to slightly lower prices for food and clothing.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Validity of Early Closing By-law in Toronto

**I**N 1933 the Association of Shoe Repair Men petitioned the Toronto City Council to pass a by-law restricting the hours within which boot and shoe repair shops could remain open. The application was made in May, but the by-law was not passed until December. The Factory, Shop and Office Building Act (Statutes of Ontario, 1932, chapter 35, section 85 (5) provides as follows:—

“If an application is presented to the council of a city, town or village praying for the passing of a by-law requiring the closing of any class of shops situate within the municipality and the council is satisfied that such application is signed by not less than three-quarters in number of the occupiers of shops within the municipality belonging to the class to which such application relates, the council shall, within one month after the presentation of such application, pass a by-law giving effect thereto and requiring all shops within the municipality belonging to the class specified in the application to be closed and remain closed on one particular day of the week during such time or hours between twelve-thirty o'clock noon and five of the clock of the forenoon of the next following day and during such periods of the year as are named in the application.”

The applicant in the case, who carried on a shoe repair business in Toronto, made a motion for an order quashing the by-law, basing his attack on the by-law on three grounds: (1) that a boot and shoe repair shop is a “factory” and not a “shop” as defined by the Act; (2) that the application presented to the municipal council was not signed by three-quarters in number of the occupiers of shoe repair shops within the municipality; and (3) that it was not passed by the municipal council within one month from the presentation of the application.

Mr. Justice Kelly, in the Ontario Supreme Court, granted the application and quashed the by-law.

In regard to the plaintiffs last contention, that the Council had not passed the by-law within one month of the presentation of the application, his Lordship held the provision in subsection (5) to be directory only, and that failure to pass a by-law within one month did not affect the validity of a by-law subsequently passed.

“But there are other objections of a more serious character,” Mr. Justice Kelly continued, “such as the question whether a boot and shoe repair shop is a ‘factory’ and not a ‘shop’ as defined by 1932 (Ont.), c. 35, and whether the procedure adopted in making the application and the sufficiency of the signatures to the application were as required by the Act. I deal with one only, however, which, it seems to me is fatal to the by-law. Section 85 (8) of the Act declares that ‘the council (municipal) may by by-law make regulations as to the form of the application and as to the evidence to be produced respecting the proportion of persons signing the same and as to the classification of shops for the purposes of this section, and it shall not be compulsory upon the council to pass such by-law unless and until all such regulations have been duly observed.’

“On June 5, 1919, the municipal council of the Corporation of the City of Toronto did pass such a by-law (No. 8140), which is now submitted and relied upon by the respondent as part of its material, making regulations as to the form of the application for the passing of such by-laws as that now in question, and the evidence to be produced respecting the proportion of persons signing the application, etc. These regulations also provide that as soon as possible after the expiration of the period of one week allowed for publication of notice of the application for the by-law, the clerk of the municipal

council shall present to the council the application together with a declaration verifying the same and also the list giving the names and addresses of the occupiers of shops in the municipality belonging to the class or classes of shops to which the application relates, and any objections which may have been filed as referred to in the by-law. It also provides that the clerk shall count and report to the council (1) the number of names appearing on the list; (2) the number of names appearing on the application which also appear on the list; (3) the number of names on the application which do not appear on the list; (4) the number of names on the list which have been objected to, and (5) the number of names on the application which have been objected to."

The evidence showed that, having made these regulations as to the form of application and as to the evidence to be produced regarding the number of persons signing the application, the municipal council itself failed to comply with the terms of these regulations, or left the matter of compliance open to doubt. The by-law was therefore quashed.

*Re Greig and Toronto* (Ontario) 1934 *Dominion Law Reports*, volume 4, page 248.

### **Employer Liable for Neglect to Provide Protective Appliances**

The Supreme Court of Canada recently affirmed the judgment of the Saskatchewan Court of Appeal in the case of *Hill versus Baade*, which was summarized in the *LABOUR GAZETTE*, January, 1934, page 87. The circumstances of the case were there outlined. The plaintiff was an employee who had been hired to get ready to operate farm machinery, and he received bodily injuries from a tractor, the guard which was part of the standard equipment having been removed from the universal joint. The defendant claimed that the plaintiff was fully aware of the risk involved and that he had voluntarily assumed the risk. The trial jury found on the contrary, that the employee had not been guilty of contributory negligence.

As the respondent (i.e. the plaintiff) was operating the machine on the day of the accident, part of the binder canvas which moved the grain along became clogged, and the respondent stopped the tractor but left the shaft in gear, and alighted to straighten out the canvas. He said it was easier to adjust the canvas with the power on. As he was in the act of stepping back to the platform, one leg of his overalls caught in one of the universal joints for which there was no guard. The plaintiff lost his balance and fell

back, and in his efforts to extricate himself, his arm became involved in that universal joint and was taken off.

The appellant (defendant) contended that the respondent (plaintiff) had failed to make out a case of actionable negligence as there was no breach of duty on the part of the appellant towards the respondent; that this was a case of a farmer engaging the respondent, a man of 20 years' experience in the operation of farm and other machinery, to get ready for operation and to operate during harvest the defendant's power machinery and that the appellant naturally and without any duty towards the respondent left it to the experienced respondent to tell him what repairs were required for the successful operation of the machinery, and that he told the respondent to ask for any repairs he wanted. Therefore, the appellant urged, it was not a case of a master turning over to a servant a defective machine with instructions to operate it, but it was a case of a servant having been engaged to assemble machinery and get it ready for operation and to see to it that everything necessary for its successful operation should be put on. The appellant urged that he fulfilled his duty towards the respondent when he provided a guard available to the respondent if he asked for it, and that therefore the respondent was the author of his own injuries. In support of his contentions, the appellant submitted a number of authorities.

Mr. Justice Hughes, in the Supreme Court of Canada, in the course of his judgment, said: "The evidence of the respondent, which the jury was entitled to accept, was that he was hired to operate a harvesting outfit and threshing outfit and repair binders. The wages were to be \$1 per day until the cutting started, then harvest wages and \$5 per day to run the thresher. The appellant admitted that the wages were \$1 per day till harvest started, then harvest wages and \$5 per day for threshing. He admitted also that he paid all the experienced men he had on the binders harvest wages of \$2.50 per day. The respondent said that the appellant did not ask him if he was thoroughly familiar with all kinds of farm machinery. He asked if the respondent understood a tractor and separator and could repair binders, and if he could run a tractor and a binder. The jury, on this evidence, was entitled to consider that the respondent was not hired or treated or looked upon by the appellant in any way materially different from the other experienced men. . . .

"In the case at bar, it must be held that there was evidence of actionable negligence

on the part of the appellant in permitting the operation of the tractor without the main guard. Likewise there was evidence on which the jury could find that the respondent was not guilty of contributory negligence. There was no step on the machinery to assist the operator in mounting and alighting without getting his foot and clothing in the proximity of the dangerous universal joint. He had, when mounting, to rest one foot near the universal joint, catch a lever with his hand and hoist himself up. . . . In order then to disturb the findings of the jury that there was negligence in the appellant and no contributory negligence a very heavy burden is cast on the appellant.

"It is by no means possible for us to say that the verdict of the jury in this case was 'absolutely unreasonable' or that reasonable men might not find as this jury has found.

"There remains for consideration the grounds of objection to the Judge's charge. The learned trial Judge appears to have placed the facts fully and fairly before the jury, and we agree with Mackenzie, J.A., in the Court of Appeal that there was no substantial error in that respect.

"The result is that the appeal will be dismissed with costs."

*Baade versus Hill* (Supreme Court of Canada), 1934, *Dominion Law Reports*, vol. 4, page 385.

### Question of Compensation of Dependant of Deceased Workman

Edward T. Beaudois, a railway conductor in Saskatchewan, was killed by accident in the course of his employment. His brother, Frank J. Beaudois, claimed compensation as a dependant. District Court Judge DeRoche having awarded the claimant \$1,500 as compensation the railway appealed, and in a cross appeal the claimant sought to have the award of compensation increased to \$2,500, the maximum allowed by the Act. The Saskatchewan Court of Appeal dismissed both appeals with costs.

Mr. Justice Turgeon, in his judgment, said the questions to be decided were (1) Was F. J. Beaudois a dependant of the deceased within the meaning of the Act? (2) if so, to what amount of compensation is he entitled? and (3) should his right to compensation be affected by the fact that he received certain insurance moneys through his brother's death?

F. J. Beaudois, the brother of the deceased, was a barber by trade. At the time of his brother's death and for some years previously, Frank and his family were living in

an impoverished condition. He said that, had it not been for the help he received from Edward, he would have been obliged to apply for relief to the city of Winnipeg. Edward knew of Frank's necessitous condition, gave his friends to understand that he intended to assist him, and sent him remittances at irregular intervals during the years 1929, 1930, 1931 and 1932, averaging about \$100 a year.

"From these facts," his Lordship said, "I think it must be inferred that Frank J. Beaudois was in part dependent upon his deceased brother's earnings within the meaning of the Act and that he is entitled to compensation. The learned District Court Judge awarded as compensation the sum of \$1,500. The defendants contend this allowance is unreasonably high and that it should be reduced. The plaintiff's counsel says that it is too low. He cross-appeals, and asks to have the compensation fixed at \$2,500, which is the maximum allowed by the statute for any case of dependency, whether whole or partial.

"Dealing first with the defendants' contention, I do not think we can entertain it. It having been ascertained that Frank J. Beaudois is a dependant, the question of his compensation is a question of fact for the Judge, and if there is evidence to support his finding the Court cannot interfere with it. . . . I doubt whether I should have allowed \$1,500 if I had to fix the compensation in the first instance; I probably would have awarded a smaller amount; but this is not a sufficient reason for interfering with the discretion which the learned trial Judge has exercised.

"The defendants next submit that in awarding compensation the learned District Court Judge should have taken into consideration the fact that Frank J. Beaudois received certain moneys upon certain insurance policies on his brother's life in which he had been made the beneficiary, and that he had therefore benefited by his death. A complete answer to this contention is to be found in sec. 16 of the Act, which says:—

"The amount of compensation recoverable under this Act shall not be subject to any deduction or abatement by reason or on account or in respect of any matter or thing whatsoever save in respect of any sums of money which have been paid by the employer to the workman on account of the injury received by the workman, which sum or sums shall be deducted from the amount of the said compensation."

The respondent's cross-appeal was also dismissed with costs.

*Wolfe versus Canadian National Railways* (Saskatchewan), 1934, *Western Weekly Reports*, vol. 3, page 497.

### Master Liable for Damage Caused by Employee to Third Party

Two companies occupied premises in Winnipeg in the same building, one being directly above the other. On a Saturday afternoon in September, 1933, two employees of the company on the upper floor were engaged in unpacking goods, the other workers in the building being absent, and when they had finished work they left a watertap open, with the result that the premises of the company on the lower floor were flooded with water, causing damages to the extent of \$1,000. In an action for damages brought by the latter company, Mr. Justice Adamson in the Court of King's Bench gave judgment for the plaintiffs, holding that the defendants were liable for the negligence of their servants. On appeal this judgment was affirmed by the Manitoba Court of Appeal.

For the defense it was contended that the master was not responsible when injury is caused by a servant who is acting outside the scope of his employment. Mr. Justice Dennistoun pointed out that the closets, the basin and the hot water tank had been installed for the use of the office staff; when the employees soiled their hands while at work, they were invited and expected to wash them, and were within the scope of their employment in doing so. The appeal, therefore, was dismissed with costs.

*Bishop Printing Co. versus Ontario Beauty Supply Co. (Manitoba), 1934, Dominion Law Reports, vol. 3, page 510.*

### Employer Failing to Report Accident Loses Right to Insurance

A construction company took suit in the Superior Court at Montreal against an insurance company to recover \$2,814 which the Superior Court of the district of Quebec ordered paid as damages for the death of Joseph Therrien, one of its employees. During the construction work in November, 1927, Therrien plunged into the St. Charles River and was apparently unhurt, but subsequently, he contracted pneumonia and died in April of the following year. Because no notice of the accident was given the insurance firm until after his death, the insurance company refused to admit liability under its insurance policy, and this refusal was maintained by the court.

In its action against the insurers to recover, the construction company explained that it was insured against liability for all accidents under the Workmen's Compensation Act under a policy whereby the insurance company

undertook to indemnify it against such loss, and the insurance company further bound itself to defend any suits arising out of such injuries. When Therrien seemed apparently unhurt because of his plunge into the river, no accident was reported to the office of his company. On his death, his widow presented a petition to sue the construction company under the provisions of The Workmen's Compensation Act. Prior to the petition, it was complained, no notice of claim had ever been received by the construction company and it was not aware of the existence of the alleged accident.

The insurance company, in refusing to reimburse the construction company, contended that the delay in notification rendered the policy void and relieved it of responsibility under its terms.

Mr. Justice Demers agreed with this view, and pointed out that the period required for notice constituted a material and substantial part of the insurance contract. It was proved that the construction firm's foreman knew of Therrien's disability, but had kept him on the payroll. Notification of claim some five months after the mishap happened would lose recourse under the insurance policy. The action seeking the reimbursement of the construction company was therefore dismissed with costs.

*Northern Construction Company Limited versus Queensland Insurance Company, Limited (Quebec).*

A mandatory order issued by the New York Department of Labour on August 1, 1934, governing women and minors in laundry occupations (Minimum Fair Wage Standards No. 1) provides that the basic rate for a full work week of 40 hours shall be 31 cents per hour or \$12.40 per week in New York City area, and 27½ cents per hour or \$11 per week outside New York area. In regard to payment for under-time, for a week of less than 40 hours, it is provided that a bonus of 10 per cent shall be added to the basic rate per hour, until the wage paid for the week's work is equal to the wage paid for a basic 40-hour week, i.e. \$12.40 in New York City, and \$11 outside New York City. In regard to over-time, for the first five hours beyond the basic 40 hours the basic rate shall be paid; time and a half rates shall be paid for each hour after the 45th hour.
